The British steamer *Far East*, Captain Henry Jones, which arrived in Hong Kong on the 24th of February, reports having left Saigon on the 15th of February. She encountered a strong monsoon and high sea up to the Paracels, afterwards moderate variable winds and fine weather. Passed the schooner *Mouette*

Digitized by Google

on the 20th; steamers *Clan Alpine* on the 21st, and *Tait Sing* on the 23rd of February, at nine A.M., entering south.

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 6th March.

H. M.'s steamer *Orontes*, Captain Hire, arrived on the evening, of the 23rd February from Hong Kong, and sailed for Mauritius and the Cape of Good Hope on the following day. She brings home a number of officers and men, whose ships, by the new regulations, have been paid off in China.

The B.I.S.N. Co.'s steamer *Arabia*, Captain Maddison, from Madras on the 27th February, arrived at Singapore on the 6th March. She had on board eleven officers and 489 men, headquarters and right wing of the 8th M.N.I. to relieve the 34th Regiment M.N.I. The following is a list of the officers:—Lieutenant-Colonel Cooke, Major Curtis, Captains Swanston and Ellis, Lieutenants Cheny, Thomas, and Brooking, and Assistant-Surgeon Ridings. The *Arabia* will take back to Madras the headquarters and right wing of the 34th M.N.I.

The loss is recorded of the French schooner *Charles et Julie* bound to Singapore from Penang. She struck on a rock close to the Carrimons, and the crew arrived at Singapore on the 28th February in the boats belonging to her.

The fourth Ordinary General Meeting of the Tanjong Pagar Dock Company was held at the Company's office on the 28th February. Messrs. Jellicoe, Harrison, Schmidt, Tan Beng Swee, Greenshields, and Joaquim were re-elected, and Mr. Turnbull was elected, as directors for the ensuing year, and Messrs. Willans and Powell re-appointed auditors. The reports having been received and the accounts passed, the meeting was turned into an Extraordinary one, when it was proposed by Mr. Gilfillan, seconded by Dr. Little, and carried unanimously, "that the directors be empowered to raise the capital of the company to $600,000 by the issue of 3,000 new shares; present shareholders having the preference in the allotment to the extent of the shares they hold." After some consideration on the subject of an amalgamation of the Tanjong Pagar Dock Company (Limited) with other companies interested in the New Harbour, it was arranged that the directors should consider and investigate the proposals, and if they thought well of them, bring the matter before the shareholders at some future period. A considerable number of the new shares were subscribed for immediately after the meeting.

H.M.'s steamer *Banterer* left Singapore on the 27th Feb. for Malacca, to cruise between that port and Penang in search of the pirates who had lately been committing depredations in the vicinity of Larote upon petty Malay traders.

Messrs. Middleton, Harrison, and Co. announce that the British steamer *Bintang* will in future be despatched for Saigon immediately after the arrival of the English mail steamer, due at Singapore about the 30th of each month, and will leave Saigon on her return voyage, calling at Pulo Condore on the 15th of each month.

The *Free Press* complains of a movement being made by the Mahomedans to propagate their doctrines among European sailors. Our contemporary is informed that the "real influence that has caused some to embrace the false religion is the debts which they have contracted in the low liquor shops belonging to Klings, who, on pressing Jack to liquidate, well know at the time it is impossible for him to do so, and they then inform him that if he consents to enter Islamism his debts will be paid, and a certain sum of money added and given to him for his benefit. Only yesterday another sailor was prevented from accepting these tempting offers by being arrested by the police." The *Free Press* suggests that the rules of the Sailors' Home should be altered to meet the evil. At present a sailor is charged there half-a-dollar per diem, *payable in advance*. "We think a better state of affairs might be established, viz., to admit sailors to the Home, and to charge them with the amount of their board when they are shipped. The captain no doubt would advance the sum, and poor Jack would be clear of all his difficulties without the necessity of becoming a renegade, and we, as fellow-countrymen, would have no occasion to feel annoyed, when conversing with Klings, who make a boast of having converted Englishmen to their religion, or by knowing that some of the zealous followers of Mahomet are running away with the idea that the spread of Islamism is on the increase, and that it will at last predominate and prove itself to be the true religion.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

Goodwin—On the 7th Feb., at Shanghai, the wife of Charles Wycliffe Goodwin, Esq., Assistant Judge of H.B.M.'s Supreme Court for China and Japan, of a daughter.

McCarthy—On the 14th Feb., at Shanghai, the wife of John H. McCarthy, Esq., of a daughter.

Short—At Chatsworth, Sree Menanti Estate, Singapore, the wife of Septimus Short, Esq., of a son.

MARRIAGE.

Fearon—Hutton.—On the 17th Feb., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, Robert Inglis Fearon, Esq., to Mary, eldest daughter of Charles Hutton, Esq., of Cavendish-place, Bath. No cards.

Corrie—Wyatt.—On the 24th Feb., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, Captain William Taylor Corrie, 11th Regiment, to Antoinette Fanny, eldest daughter of Colonel L. Wyatt, 11th Regt.

DEATHS.

Kingsley—On the 23rd Feb., at the General Hospital, Hong Kong, of hydrophobia, Corporal M. Kingsley, 2nd Batt., 11th Regiment, aged 26 years.

White—On the 24th Feb., at the Civil Hospital, Hong Kong, E. B. White, seaman of the U.S.S. Wyoming.

McLean—On the 24th Feb., at the Civil Hospital, Hong Kong, John McLean, seaman.

SHIPPING INTELLIGENCE.

ARRIVAL.

At Hong Kong.—From England: Feb. 15, H.M.S. Serpent.

DEPARTURE.

From Macao.—For Havana: Feb. 14, Guadalupe.

COMMERCIAL POSTSCRIPT.

The Mexican dollars by the West India steamer have been sold, for China, at 60¼d. per oz., being an advance of ⅜d. from the last price. The small quantity of bar silver by the same opportunity has fetched 61¼d., also showing a rise of ⅜d. since the last arrival. There is at present a steady demand for silver for shipment to the East, and both here and abroad supplies are very limited.

The biddings for £350,000 in bills on India took place on the 4th inst. at the Bank of England. The proportions allotted were—to Calcutta, £200,000; to Madras, £50,000; and to Bombay, £100,000. The minimum price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 2s. will receive about 4 per cent., and on Bombay at 2s. 0¼d. about 20 per cent; all above in full. These terms show an increase in the demand for means of remittance to the East.

A correction is needed to the list of silk shippers which appeared in our last issue (27th ultimo). In the addition at the foot of the column the total number of bales is made 83,081; it should be 38,025.

Spoken.—George Peabody, Manila to New York, March 11, 20 N., 54 W.

Arrivals not included in the Table.—April 1, at Texel, from Batavia, Nicolaas, Witsen, from Banjoewangie; Gleaner, at Brouwershaven, from Batavia, Elisabeth; at Zierikzee, from Batavia, Ternate.

Departures.—April 2, from Portland, for Singapore, Carlota; March 31, from Newport, for Hong Kong, Ariosto; April 3, from Liverpool, for Manila, Espana; for Hong Kong, Derwent; 4, from London, for Shanghai, Polmaise.

HONG KONG RACES.

The Hong Kong races came off on the 20th, 21st, and 22nd of February, and were unusually interesting and successful. The band of the 9th Regiment was on the ground, and contributed greatly to the general pleasure. The following is a brief analysis of the results:—

First Day.

The Wong-nei-Chong Stakes, for all Ponies. Entrance $5 each, with $50 from the Fund.—Cœur de Lion, 1; Truant, 2. Time 2 min. 7 sec.

The Canton Cup, presented by the Mahomedan community, for Arabs only. Weight 10st. Entrance $10, to go to the fund. One mile and a-half.—Early Purl, 1; Hadji, 2. Lord Lyon made the running during the first part of the race, but was eventually passed by both the others; after the first round Early Purl took and kept the lead, winning a slow race by four lengths.

The Pony Welter, for all Ponies—13 hands, 9st. 7lbs. Entrance $5 each, with $50 from the fund. One mile. Aga, 1; Brinjarra, 2 (rider fell). Time 3 min. 11 sec.

The German Cup, valued 200 guineas, presented by the German community, for all horses. Entrance $10. One mile and a-half. Sir William, 1; Traveller, 2. In this race Ramornie and Young Babylonian pulled up after going once round the course. Time 2 min. 57 sec.

The Northern Plate, value $100, for China Ponies only. Entrance $10,

Digitized by Google

to go to the Fund. Half-a-mile.—Promised Land, 1; Truant, 2. Promised Land took the lead at starting, and maintained it throughout, having at one time a close run with Truant. He won a good race by about two lengths. Time 1 min. 5½ sec.

The Parsee Cup, value $250, presented by the Parsee community, for all Horses, English excepted. One mile and a-quarter.—Exeter, 1; Pons Asinorum, 2. This was a very exciting race. Spider led off, but before going once round had fallen behind. Exeter, who had third place, then began to pull ahead, and after a display of capital jockeyship on the part of his rider won the race by a short head. Time, 2 min. 28 sec.

The Subscription Cup, presented, value £100; for all Manila and China Ponies. Entrance $5.—Rob Roy, 1; Cromwell, 2. On passing the post the first round, Rob Roy was fourth; he remained in this position till nearly entering the straight run, when he drew ahead, and challenged Cromwell, who was leading. After a most exciting race Rob Roy was the winner by about a nose, Meteor and Cœur de Lion being distanced. Time, 4 min. 34 sec.

SECOND DAY.

The Scurry Stakes, for all Ponies. Catch weights. Entrance $5 each, with $50 from the Fund. Half a-mile.—Stein Bille, 1; Brinjarra, 2. After a bad start on the part of Skittles and Imposter, Stein Bille took the lead, which he maintained throughout, winning by a neck. Time, 1 min. 4 sec.

The Challenge Cup, value 500 guineas, for all Horses, entrance $10. To be won two years consecutively by a horse the *bona fide* property of the same owner. Two miles.—Exeter, 1; Sir William, 2; Haddington, 3. Haddington was the favourite for this race until the morning of the trial, when the hopes of his backers began to fall a little, a report being circulated that he was unwell. At the start Sir William and Haddington led for some distance, but at the bottom turn Sir William drew ahead, Exeter following closely. They remained in this position till coming to the straight, when Exeter began to pull ahead; just at the distance post a wonderful speed on the part of Exeter brought him in first by ten lengths, both horses being ridden in the most capital manner. Sir William came in about six lengths ahead of Haddington. Time 2 min. 54½ sec.

The Stewards' Cup, for Ponies. Entrance $5. One mile and a-quarter.—Rob Roy, 1; Cromwell, 2. This was a most exciting race, the winner only coming in by half a length, Cromwell being two lengths before Meteor.

The St. Leger Cup, presented by a Subscriber, for Arabs only. Entrance $10 each. One mile and a-half.—Hadji, 1; The Castle, 2. Time 3 min. 20 sec.

The Roadster's Plate, value $150, for all Horses not entered for any Cup during the Meeting. Catch Weights. Entrance $5 each. Half a-mile.—Nugget, 1; Colonist, 2. Sir Moses led off, Nugget following; at the turn the latter pulled a head, and after a short hunt with Colonist, who was close behind, won easily by about ten lengths. Sir Moses was distanced. Time 57 sec.

The Broker's Cup, value $500, for all Horses. Entrance $10. One mile and three-quarters.—Traveller, 1; Pons Asinorum, 2. Time, 3 min. 27 sec.

The Galloway Stakes, for all Galloways, 14 hands and under. One mile.—Sultan, 1; Yedek, 2.

THIRD DAY.

The Ladies' Purse, for all Ponies that have run at this meeting. To be handicapped by the stewards. Entrance fees, $5. One mile.—Aga, 1; Cromwell, 2. The Ladies' Purse was won by Aga after a pretty close race. The purse was presented by Miss Cubitt, who in a neat speech complimented the gentleman who acted as jockey upon his success. Time, 2 min. 6 sec.

The Fakei Cup, value $500, presented by the American community of Hong Kong and Canton, for all Horses. One mile and a-quarter.—Exeter, 1; Pons Asinorum, 2. Won easily by Exeter, who came in some four lengths ahead of the second horse. Time, 2 min. 24½ sec.

The Foochow Cup, value 100 guineas, presented by the Foochow Community, for all Horses, English Horses excepted. Entrance $10.—Pathfinder, 1; Traveller, 2. Traveller led off till approaching the straight, when Pathfinder overhauled him and won easily.

The Hack Stakes, value $100. Entrance $5. One mile.—Nugget, 1; Mainstay, 2. Nugget took the lead, and was held in during the race, winning easily by about four lengths.

The Shanghai Cup, value 100 Guineas, presented by the Shanghai Community, for all Horses. Entrance $10. Two miles.—Sir William, 1; Pathfinder, 2. Sir William won easily, Pathfinder making a good second, being well ridden. Time 3 min. 53 sec.

TEA.

(TRAVERS' CIRCULAR.)

The division of our time into years may be highly symmetrical and useful, but it seldom coincides with the ordinary divisions of time made by mankind for their own especial convenience. The legal year, for instance, commences with the Michaelmas term in October; the ecclesiastical year with Advent Sunday. So too the Tea season in China has a period of its own, commencing with the 1st of June and terminating with the 31st of May. Strictly speaking, we have from the present moment still two months to include in our reckoning before the Tea season, or year, is over; but as the season is already spoken of in the Chinese Circulars as being virtually closed, it may not be out of place to take this opportunity of briefly alluding to the prospects of the Tea-market, such as they are at the present time, and such as they are likely to be during the ensuing months. Taking the circular of Messrs. Mitchell and Aspinall as our authority for the statement, we find that the total amount of stock in the United Kingdom on the 28th of February was 100,000,000 lbs., against 112,565,000 lbs. at the same time last year. The amount afloat is given at about 35,425,234 lbs. If to this be added the stock in the different Chinese ports, and the quantity at present in that country, but on its way to the ports, say about 10,000,000 lbs., and also the Indian Teas, which may be set down as certainly not less than 3,000,000 lbs., we shall find that these various quantities, amounting in all to 148,000,000 lbs., constitute, with a few unimportant exceptions, our total supplies from the present time up to the beginning of September, when the first cargoes of new season's may be expected to arrive. Thus, then, we have 148,000,000 lbs., of Tea to supply a home consumption of five months, and also to meet the demands of the export trade. With regard to the latter point, it is clear that there will be a wide difference as compared with last year. At that time the American civil war was raging, and a considerable portion of the carrying trade fell into our hands in consequence of the depredations committed on the ships of the United States by the Confederate cruisers. With the return of peace, America resumes its own commerce; and the addition to her exports from China—about 15,519,000 lbs. over the quantity exported last year—is a measure of the quantity to be deducted from our own export trade. Taking the home consumption of the next five months even at 9,000,000 lbs. per month, 45,000,000 lbs. would suffice for the home trade until the arrival of fresh supplies. We cannot therefore understand that with a decreasing export trade, and so large a stock on hand, any great pressure will be felt from a want of supply. With reference to the exports, the total for the twelve months ending December 31st last was 32,633,451 lbs.; from this deduct the 15,000,000 lbs. which has reverted to the American trade, and we get 17,633,451 lbs. for the exports of the year. One-twelfth part of this (to represent a single month's exports) is 1,469,454 lbs.; and for five months this would be 7,247,270 lbs., a quantity which, if required, might be deducted from so large a stock without a serious effect on the market prices. It may be true that a large proportion of the stock lying in bonded warehouses is composed of low and undesirable kinds, and there is a very insufficient supply of those sorts likely to be in most demand; it is, however, impossible to verify this statement as the official returns deal only with figures, without attempting to classify qualities, and at present it only amounts to an assertion, which we think we have heard in former years, but which we do not remember having been verified, at least to the extent of causing any serious inconvenience. Assuming, as we are fairly entitled to do, in the absence of any proof to the contrary, that a large proportion of the stock is fit for use, there would appear to be an ample margin to meet any probable increase in consumption which is likely to take place within the next three years, and in the meantime the production of tea in China will be yearly increasing; at least this seems a logical deduction to draw from the high prices that have been paid during the last six months, and it is certainly one that is strictly in accordance with precedent.

DUTCH AGGRESSIONS IN SUMATRA.

(To the Editor of *The London and China Telegraph.*)

SIR,—In one of your late numbers you published a letter from Singapore, signed "J. C.," in which the writer attempted to prove that the Sultan of Siak is suzerain of all the States on the east coast of Sumatra, and might assign such suzerainty to any Power he chose. That, consequently, the Netherlands Indian authorities, acting on behalf of the Sultan of Siak, were justified in coercing Assahan and other native States on the east coast into compliance with any demands of theirs, of whatsoever nature. Now, the facts of the case really are, that the power of the Sultan of Siak, whatever it might at one time have been, was, in the year 1856, so near being altogether lost, that application was made to Inchi Wan Abubakar (the present Tumongong of Johore) for assistance to keep him on his "Ballie Rawong" of Siak. This application was acceded to, and under the nominal leadership of one Mr. Adam Wilson a force was sent from Singapore to Siak. This force was composed of European sailors and some Johore Malays. On its arrival at Siak, this filibustering force, acting, doubtless, on its instructions from Inchi Wan Abubakar, attempted to impose upon the Sultan of Siak conditions which would, if agreed to, be more disastrous than deposition by his own subjects. The Sultan, then, finding that his Singapore friends were but deadly though covert enemies, thought it better to trust himself in the hands of the Dutch Resident at Rhio, his declared foe. Accordingly, the Rhio authorities, glad of such an opening on the east coast of Sumatra, sent some steam and sailing gunboats to Siak to relieve the poor Sultan of the burden of his Singapore friends. Treaties were appealed to by the Dutch to prove the illegality of Adam Wilson's proceedings, and Wilson was notified by Governor Blundell that he must withdraw. This Wilson was glad to do, fighting the Dutch not being at all to his taste. Governor Blundell, however, intimated to the Dutch authorities that his consent to their restoring peace to Siak was not to be construed into a consent to the abrogation of the Third and Sixth Articles of the Treaty of 1824. The Dutch authorities replied that they had no wish nor intention to violate the said Treaty, which would, in its most liberal sense, be scrupulously respected by them. The reason they gave for having then interfered with Siak, was that the anarchy prevailing in that State was injurious to States then under their control. The Treaty of 1824 in its Third and Sixth Articles is clear and explicit, and it becomes the duty of the Secretary of State for Foreign Affairs to see that these articles be respected; more especially now that it is clearly evident the Dutch authorities ignore their existence in *toto*. In order that "J. C.'s" memory may be refreshed I will now quote the Articles in question:—

"3rd. The high contracting parties engage that no Treaty hereafter made by either, with any Native Power in the Eastern Seas, shall contain any article tending either expressly, or by the imposition of unequal duties, to exclude the trade of the other party from the ports of such Native Power: and that if in any Treaty now existing on either part, any article to that effect has been admitted, such article shall be abrogated upon the conclusion of the present Treaty."

"It is understood that before the conclusion of the present Treaty, communication has been made by each of the contracting parties to the other, of all treaties or engagements subsisting between each of them, respectively, and any Native Power in the Eastern Seas; and that the like communication shall be made of all such treaties concluded by them respectively hereafter."

"6th. It agreed that orders shall be given by the two Governments to their officers and agents in the East, not to form any new settlement on any of the islands of the Eastern seas, without previous authority from their respective Governments in Europe."

Now, at the period when this Treaty was made, Siak was not a depen-

Digitized by Google

dency of Bencoolen, and even supposing it were, the Dutch had not the shadow of a right to conclude a treaty with it without informing the British Straits authorities. As for "J. C.'s" assertion, that the Dutch have never abandoned their rights to Siak since the year 1761, it is answered by the fact that for the time the British held Java the Dutch had no power nor right to any part of Sumatra. Their right to Bencoolen had been conquered from them by the British, and their power in Sumatra became *nil*.

This point is, however, unimportant, and if Her Majesty's Secretary of State for Foreign Affairs will only insist on the faithful execution of the Treaty above quoted, the Straits merchants will be satisfied.

I would now seriously ask "J. C." if he is not aware that the military occupation of the Island of Bangkalis is a violation of the 6th Article of the Treaty of 1824? I would also beg of "J. C." to inform me whether or not he is aware that the Treaty made by the Dutch with Siak in 1856 was not a violation of Article 3rd of the Anglo-Dutch Treaty of 1824? Is it not a fact that the fish-roe business of the Siak river was made a close monopoly or such high duties imposed that trade herein with the Straits Settlements became a commercial impossibility? There can be but one reply to these queries. That reply has been given by the merchants of Penang in their Petition to Earl Russell, dated 20th September, 1865, when that nobleman was Secretary of State for Foreign Affairs. The Petition clearly proves that, owing to the fact that the Treaty of 1824 had been disregarded by the Dutch, the trade of Penang had been seriously interfered with. The Prayer of the Petitioners that steps should be taken for the protection of British Trade with the ports of Sumatra demands the immediate and earnest attention of Her Majesty's Secretary of State for Foreign Affairs, and it is to be hoped that article third of the Anglo-Dutch Treaty of 1824 will no longer be allowed to remain a dead letter. At the time it was signed, the following extracts from a note addressed by the British to the Netherland's Plenipotentiaries prove, if proof were needed, that the treaty was meant to be respected more in its spirit than its letter.

"Their (the British Plenipotentiaries) conviction is, that on both sides an equal disposition exists to carry into effect, with sincerity and good faith, the stipulations of the Treaty in the sense in which they have been negotiated."

To this the Netherland's Plenipotentiaries replied: "This (a disposition to carry into effect, with sincerity and good faith) essential aim and principal tendency of the Treaty is evident to all who read its different articles with attention. What is there expressly stipulated ought to suffice for the removal, by common consent, of all uncertainty which might present itself in the sequel."

With this fair and clear understanding was the treaty of 1824 signed, and yet in the very teeth of their *declarations* all the *acts* of the Netherlands Authorities since then have been such as show clearly that their *declarations* were most jesuitical. Ever since the year 1838 trade has been jeopardised by Dutch attempts to subvert the independence of the States lying between Acheen and Siak. Formerly these attempts were made covertly. Latterly, however, emboldened, doubtless, by the apparent apathy with which they were regarded by the British authorities, these attempts at the entire subjugation of the Native States of Sumatra and the full control of their trade have been made openly. I say *apparent apathy*, because I am well aware that the Governor of the Straits Settlements felt keenly the humiliating position in which he was placed by the Indian circumlocution officials, who treated all his representations on matters relating either to Sumatra or the Malay Peninsula with silent contempt. Now, however, that the Straits Settlements are about to be relieved of the Indian Board incubus, we will hope for better things from the united action of Her Majesty's Secretary of State for Foreign Affairs, and the Secretary of State for the Colonies, aided by the advice and counsel of the Straits merchants, who will doubtless be represented in the Straits Legislative Council so soon as the transfer to the Colonial-office is effected.—Yours sincerely, PULO PENANG.

April 2nd, 1866.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for the month and two months ended the 28th of February again present very favourable results, when contrasted with those issued at the corresponding period last year. The total declared value of exports for February last was £15,116,063, against £11,376,214 in 1865, and £12,698,121 in 1864, being an increase of £3,739,849 over the former period, and of £2,417,942 over the latter. For January and February of the present year the total declared value was £29,470,811, against £21,865,553 in 1865, and £23,111,707 in 1864, which is an increase of £7,605,258 compared with 1865, and of £6,359,104 as contrasted with 1864. Nearly all branches of business appear to have shared in the activity, but the greatest proportionate augmentation has been in cotton goods, our shipments of cotton yarn having been more than double those of the same month of the two preceding years, while in cotton manufactures the increase has been about 40 per cent. Hardwares figure for an excess of 25 per cent., linen manufactures 32 per cent., silk manufactures 30 per cent., and woollen manufactures 35 per cent. Iron, which in the same month of last year showed a falling off of about 45 per cent., now exhibits a recovery of 35 per cent. Of machinery our exportations have been 20 per cent. less than in the same month of last year. As regards importations, the principal feature is that we have taken about three or four times as much wheat and flour as in February, 1865, the chief arrivals having been from Russia and France, those from the United States being insignificant. The figures in these returns specially appropriated to our trade with the Far East are the following:—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.
	Quantity for the Month of February,		
Cotton yarn	383,130	98,050	298,378 lbs.
Cotton manufactures	2,788,445	5,885,356	11,927,651 yds.
Worsted stuffs	901,999	1,427,045	1,672,038 „
Woollen & Worsted cloths.	223,884	142,887	150,185 „
Lead	491	300	611 tons
	Quantity for January and February.		
Cotton yarn	384,130	251,772	686,458 lbs.
Cotton manufactures	4,924,426	10,023,724	24,924,414 yds.
Worsted stuffs	1,645,013	2,004,023	2,607,858 „
Woollen and worsted cloths	302,177	208,491	395,060 „
Lead	997	633	1,078 tons
	Value for the Two Months.		
Cotton yarn	£44,996	£27,976	£75,253
Cotton manufactures	146,791	275,083	617,312
Worsted stuffs	108,118	165,246	197,952
Woollen and worsted cloths	47,879	40,573	59,428
Lead	21,713	14,148	23,975

The Cotton Manufactures exported to other ports and countries in the Far East, quantity for the month and value for the two months, are represented thus:—

	1864.	1865.	1866.
	Quantity for the Month of February,		
Ceylon	1,913,703	490,944	1,873,320 yds.
Singapore	6,600,262	4,289,066	4,778,300 „
Java	4,413,017	1,356,618	4,830,996 „
Philippine Islands	1,380,007	3,741,760	1,524,572 „
	Value for January and February.		
Ceylon	£117,252	£33,791	£89,758
Singapore	191,214	162,912	168,949
Java	125,466	70,895	119,988
Philippine Islands	99,118	178,958	91,289

Of Cotton Yarn the quantity exported to Singapore in February was 89,980 lbs., and the quantity for the two months 136,580 lbs., against 250,000 lbs. in the two months of 1865, and 135,400 lbs. in 1864. The value for the two months was £16,781, while it was £25,848 in 1865, and £17,628 in 1864. To Ceylon the quantity exported in the month was 24,000 lbs.; and for the two months of the present year 38,000 lbs., against 4,000 lbs. in 1865, and 32,300 lbs. in 1864. The value for the two months of 1866 is £6,730, while in 1865 it was only £850, and in 1864 £3,747.

IMPORTS.

As regards Raw Cotton the return from China remains *nil*, as will be seen by the figures given:—

	1864.	1865.	1866.
	Quantity for the Month of February,		
Egypt	144,855	270,162	137,801 cwts.
British India	203,672	158,243	214,442 „
China	21,137	28,256	—
Total from all parts	463,118	660,337	780,178 „
	Quantity for the Two Months.		
Egypt	159,591	322,663	148,268 „
British India	233,645	186,104	305,997 „
China	28,988	45,652	—
Total from all parts	544,757	811,601	1,154,122 „
	Value for the Month of January.		
Egypt	£190,831	£588,011	£111,125
British India	310,619	211,431	683,003
China	76,024	111,624	—
Total from all parts	953,205	1,530,194	3,341,901

Of Unrefined Sugar we have received no importation from Java and the Philippine Islands during either January or February in the present year. The value of the import thence in January, 1865, was £21,990, and £10,483 in January 1864.

Of Hemp also from the Philippine Islands there has been no importation during either February or January of the present year. In January 1865 the value of the import thence was £11,282.

Of Coffee, Ceylon delivered to us 3,218,974 lbs. during February in the present year, nearly the entire delivery of the two months, as the figures following show:—

	1864.	1865.	1866.
Quantity for Jan. and Feb. (lbs).	4,946,391	3,385,469	3,463,960
Value to 31st January	£119,571	£97,921	£8,203

The present Returns furnish the computed real value of the merchandise imported into the United Kingdom from each foreign country and British Possession; from which it appears that the Imports from British Possessions during 1865 were of the value of £72,865,067, and from Foreign Countries, of the value of £198,269,902, making a total of £271,134,969. The value of the Imports from the various ports and countries of the Far East, for the last and two preceding years, is exhibited in the table now given:—

	Imports for the year ended 31st December,		
From	1863.	1864.	1865.
Egypt (including the transit from India and China)	£16,495,582	£19,602,235	£21,773,250
China (exclusive of H. Kong)	12,897,403	12,792,001	10,673,960
Hong Kong	1,288,907	2,881,929	773,068
Singa. and Eastern Straits	1,830,522	2,069,838	2,169,056
Ceylon	3,699,425	3,173,820	3,707,615

LONDON, THURSDAY, APRIL 5, 1866.

SINGAPORE, PENANG AND MANILA—STATEMENT OF TRADE FOR 1865.

WE proceed to an exhibit of the trade of Singapore, Manila, and Penang for 1865. These annual trade returns possess a general as well as special value, reflecting as they do nearly all those influences to be taken into account by the British merchant engaged in Eastern trade. As to Singapore, its very position assures a progressive development; and the increase exhibited in the export of several leading articles in 1865, as compared with the corresponding period in the previous year, is manifestly such as cannot be attributed to purely speculative movements or adventitious circumstances. Her trade also with the Continent of Europe tends to extension. That with China, and indeed with all the Indian islands, is manifestly improving; but there is still abundant room for enterprise in the carrying trade. The United States trade may be looked to for enlargement, now that peace is so fully restored. The chief articles despatched thither in 1855 were gambier, tin, black pepper, and coffee. Of manufactured goods shipped from this country to Singapore we have to note that grey shirtings continued in good demand at last advices, and as the stock was low, enhanced prices were looked for should there be no fresh arrivals. Cloths had improved, and sales in white shirtings, both on hand and for arrival, commanded improved prices. Coal was sold at extreme rates, and was likely to be supported. Exporters throughout the year have shown great discrimination in shipments to Singapore, and the goods arriving have thus seldom occasioned any material fall in the market. The export trade was animated, the wants of exporters causing extreme rates to be demanded. Black pepper was disposed of at prices unprecedentedly high; pearl sago, nutmegs, and rice were in further demand, and increasing in value. Malacca tin had improved, and gambier, for which it was difficult to secure sufficient quantity, was taken at better prices. Opium fluctuated, as usual, according to India and China advices. Black pepper, nutmegs, and mace were wanted and scarce. Taking the very fair prices at which imported goods ruled, and the general upward tendency of exports, the merchants of Singapore have reason to be satisfied.

Victoria Lawns ,,	39,642	45,392	31,120	7,800	1,864	18,500

It will thus be seen that the sales of white and grey shirtings in the past year considerably exceeded those of 1864. At latest advices the demand for the former had somewhat

Digitized by Google

slackened, and it will be observed that the stock on hand at the close of 1865 was nearly one-fifth of the total sales in the year. Grey shirtings were in some request, such as to justify an early advance on somewhat moderate rates in the absence of further arrivals, looking to the lowness of stock.

It will be seen that the exports for the past year exhibit a very encouraging increase as compared with preceding years, the more so that good rates have been maintained. As at Singapore, tin, india-rubber, and spices were in good request, and stock in first hands was by no means abundant. The low quotations for opium in the China market, the result of heavy stocks, and a previous demand, stimulated by a purely speculative movement, had led to depression in that article. The Penang goods market had been overstocked by Chinese traders from Singapore, and re-shipments had taken place. Woollens were in request. The improvement that had latterly taken place in freights was to have been anticipated. The United States export trade that languished in 1864, resumed its activity last year, and we may look for a very considerable augmentation of this trade in 1866.

Comparative view of Principal Exports from Manila in 1865 and 1864.

The most striking feature in this return is the decrease in the shipments of the staple exports, sugar, hemp, cordage, indigo, tobacco leaf, not to speak of rice and paddy. The difference in the clearances as between 1865 and 1864 is somewhat slight on several of these articles, but with every allowance for the character of the past season as affecting produce, even had exports on the whole been simply stationary, the fact is not at all creditable to Manila. The special decrease to which we have referred, and the extent of which is fully indicated in the above tables, is not compensated by the slight margin of excess accorded to other principal articles. Thus the export of coffee which in 1864 was 5,064,220 lbs., rose in 1865 to but 5,303,040. We look in vain to mere external circumstances of a commercial or a climatic character for the explanation of the decline of sugar, but the continent of Europe, Australia and China have taken an increased quantity, and so of hemp, which shows a decrease of 6,000 tons. It is true that in the article of hemp, Manila has to compete with increased supplies from British India, just as her sugar and coffee must face the increased enterprise and skill of the Mauritius and Ceylon, but these conditions, judged in Manila to be so unfavourable, can only be met by the introduction of further European enterprise, skill and capital to a point that would enhance the quality and reduce the first cost of these and other articles of commerce. The imperiousness, too, with which the natives are treated being regarded as only fit for slavery, added to the existence of a bureaucratic oligarchy, is eminently unfavourable to that internal development with which the great commercial houses are concerned. Not to refer to other countries, it is evident that the intercourse between Manila and China and the Indian islands might be immensely extended; but for the further development of a prosperous Asiatic trade, the productive powers of the country round about Manila must be stimulated, and improvements, both in tillage and machinery, introduced. It appears that only an average sugar crop is anticipated for the coming seasons, due in part to the ravages of locusts in the Visayas of Cebu and Iloilo. The decrease in 1865, as compared with 1864 in the Manila sugar shipped to this country was no less than 20,000 tons, and the stock on hand of last year's crop did not exceed the usual average. Current clayed was somewhat short. The amount of sugar sent to Great Britain in 1865 was 1,194 tons, and of hemp, 433 tons; of cigars we took 1,27[illegible] millions. In the past year 39 vessels entered the port, of which 16 were from China, 5 from England, and three from the United States. With the renewal of American Eastern trade, the commercial transactions between Manila and New York and San Francisco must tend to increase.

THE NAVY ESTIMATES.

In a late issue slight references were made to the Navy Estimates for the year 1866-67, giving a rough idea of their general bearing. We now propose to extract those items that are specially connected with Ceylon and the Far East. But before doing so we must correct a statement contained in page 178 of the *London and China Express* of the 10th inst., which was taken from the columns of a contemporary usually trustworthy, but on this occasion guilty of a gross error. The vote required for the marines this year is 497,531*l.* (10,324*l.* less than last year); and the total number of the force is 16,400 (800 less than in 1865-66). The number of seamen to be voted for the fleet is 37,300 (700 less than last year). The pay of a Vice-Admiral Commanding-in-Chief Abroad is 3,102*l.* 10s.; and of a Rear-Admiral discharging such functions, 2,737*l.* 10s.; of a Commodore of the 1st class Commanding-in-Chief Abroad, 2,737*l.* 10s.; of the 2nd class, pay as Captain of the ship he commands, with 2*l. per diem* as Allowance and Table Money. The first entry we find specially charged to the Far East is the following:—

Colonial pay and field allowances to Marines in Japan and San Juan, 2,000*l.*

The Estimate for the Dockyard at Trincomalee is 2,143*l.*—in excess of last year by 7*l.* only. The salary of the Naval and Victualling Storekeeper and Accountant is 550*l.*; two clerks from 90*l.* to 300*l.* per annum 505*l.*; allowance to do. to meet increased cost of living, 100*l.*; allowance to one of the above for performing the duties of Foreman of Shipwrights 80*l.*; temporary employment of clerks 47*l.* Allowances for House-Rent—to additional Surgeon of H.M.S. *Princess Royal*, 30*l.*; to a clerk, 30*l.* Allowance to a Roman Catholic Priest, 10*l.*; in lieu of stationary to the Naval and Victualling Storekeeper and Accountant, 30*l.* Allowance for a horse to the Naval and Victualling Storekeeper and Accountant, 42*l.* 11s.; to additional Surgeon of H.M.S. *Princess Royal*, 42*l.* 11s. Total Salaried Establishment, 1,477*l.* Wages to shipwrights, artificers, and labourers, 666*l.*, viz., to 26 men on the establishment, 470*l.*, and 16 hired artificers and labourers, 196*l.* Total Trincomalee Naval Yard, 2,143*l.* The expenses of the Victualling Yard at Trincomalee is provided for in the above Vote, except as far as regards an item of 120*l.* for wages to two artificers or labourers.

The Salaried Establishment of the Dockyard at Hong Kong costs 6,612*l.*—717*l.* more than last year. The Naval officer in charge has sea-pay as a Captain of the 2nd class 500*l.* 7s. 1d.; command money, 91*l.* 5s.; allowance in lieu of fuel and light, 27*l.* 7s. 6d.; civil allowance, 208*l.* 7s. 11d.—827*l.* 7s. 6d. Then he is allowed three domestics at 82*l.* 2s. 6d., with an allowance in lieu of provisions for them of 81*l.* 10s.—163*l.* 12s. 6d. The Master-Attendant has 500*l.*; the Master of H.M.S. *Princess Charlotte* Depot and Receiving Ship for charge of Naval Stores, and for acting as Harbour Master Allowance in addition to sea-pay), 100*l.*; Naval and Victualling Storekeeper, 600*l.*; Accountant, 600*l.*; Clerks, two senior, from 350*l.* to 400*l.* per annum (720*l.*), three from 90*l.* to 300*l.* (359*l.*), 1,729*l.*; allowance to ditto to meet increased cost of living, 500*l.*; temporary employment of clerks, 700*l.* Allowance for House-Rent—To Master-Attendant, 200*l.*; to Naval and Victualling Storekeeper, 200*l.*; to Accountant, 200*l.*: to established clerks (two at 100*l.*, three at 80*l.*), 440*l.*; to Inspector of Machinery afloat, 200*l.* Allowance in lieu of stationery—To the Naval officer, 12*l.*; to Naval and Victualling Storekeeper, 20*l.*; to Accountant, 20*l.* (52*l.*). Postage, boat-hire, advertisements, and other small expenses, 250*l.* The total Wages of Shipwrights, and other artificers and labourers is 6,610*l.*—eight men on the establishment, 1,387*l.*; 54 hired artificers and labourers, 1,424*l.*; for the wages of artificers and labourers employed in the Steam Factory, 3,799*l.* Wages of Police employed in the yard, 1,542*l.* The total charge of the Hong Kong Naval Yard, 14,764*l.*—823*l.* more than last year. In addition to the above, if we understand the tables right, the Victualling Yard employs two artificers or labourers on the establishment, and twenty-two hired at a cost for wages of 940*l.*

The Medical Establishment at Hong Kong calls for a vote of 3,121*l.*, disbursed as follows:—Deputy Inspector-General of Hospitals, 511*l.*; Surgeon, 273*l.* 15s.; four Assistant-Surgeons, 784*l.* 15s.; clerk from 90*l.* to 300*l.* per annum, 98*l.*; allowance to do. to meet increased cost of living, 100*l.*; allowances in lieu of Hospital provisions including the chaplain of the ship, seven at 4s. a day each, 511*l.* Allowances in lieu of stationery—To the Deputy Inspector-General of Hospitals, 5*l.* 5s.; surgeon, 2*l.* 2s.; chaplain, 8*l.* Funeral expenses, boat hire, and other small expenses, 89*l.* 3s. For the wages of labourers, nurses, &c., 738*l.*

The Repairs and Maintenance of Buildings at Trincomalee is set down at 250*l.*, distributed thus:—Dwellings, 50*l.*; offices, 40*l.*; workshops, 10*l.*; stonehouses, 100*l.*; wharf and boundary walls, 15*l.*; paving, drains, &c., 15*l.*; miscellaneous, 20*l.*

Works, Buildings, &c., at Hong Kong claim 2,645*l.*, with 1,000*l.* for new machinery. Of this sum 2,000*l.* is devoted in the present year to new offices and quarters for artificers, with stores beneath, for which the total estimate is 13,152*l.*, and 4,680*l.* has already been expended. Paving with granite Anchor Rack stands for 45*l.*, and forming surface gutters and laying additional underground drains, 300*l.* The Repairs are set down at 300*l.*, divided into 20*l.* for dwellings, 10*l.* for offices, 110*l.* for workshops, 70*l.* for storehouses, 50*l.* for wharf and boundary walls, 20*l.* for paving, drains, &c., and 20*l.* miscellaneous.

The Head of Special Pay and Allowances furnishes an item of 30*l.* paid to the Surgeon (additional) borne in H.M.S. *Octavia*, at Trincomalee, as an allowance in addition to his pay, for charge of Naval Medical Depot. Shanghai demands 115*l.* for the Paymaster (additional) borne in H.M.S. *Acorn*, as an allowance in addition to his pay, for charge of Naval and Victualling stores, including 15*l.* in lieu of stationery.

There is a charge of 4,000*l.* for net loss by exchange incurred from payments made by Paymasters on the East India and China stations, &c., and for discount on bills drawn.

Surveys are in progress in China and Japan, and among the China Sea-shoals, but the special charge is not enumerated.

Among the items making up a sum of 1,113*l.* 3s. 10d., but the separate charge of each of which is not given, two relate to the Far East—Freight from London to Shanghai of a Monumental Cross to be erected at Peking, and Repayment to Army Funds of the value of Gunners'

Digitized by Google

Stores on board H.M.S. *Saracen*, when she was exchanged in China for a vessel more suitable for Surveying Service.

For Rewards for Services against Pirates(under Act 13 and 14 Vict., c. 26), 1.200*l.* is to be paid to the Commander, officers, and crew of H.M.S. *Grasshopper*, for services on the 15th of August, 1864, against pirates in the China Seas; and a further sum of 150*l.* to the same for services on the 5th of October, 1864.

Among the Pensions granted within the year we find—300*l.* to Admiral Sir Henry Ducie Chads, G.C.B., from the record of whose services we learn that he commanded the *Andromache* in 1834, at the forcing of the passage of the Bogue Forts, and in 1836 destroyed several hordes of pirates in the Straits of Malacca; 150*l.* to Captain Thomas Henry Mason, who in 1840 and 1841, when in command of the *Algerine*, served with distinguished gallantry in the operations against the Chinese, including the capture of Chusan, Canton, and Amoy. Brevet-Major Nevinson Willoughby de Courcy, Royal Marines, has a pension of 100*l.* for wounds during the capture of a stockade at Simonoseki on the 6th of September, 1864.

The Grand Total of the Estimates for the Naval Service for the year is 10,388,153*l.*—presenting the trifling reduction of 4,071*l.* from those of 1865-66.

THE POST-OFFICE ESTIMATES.

The gross amount of the Estimate for the Post-office service of the present year is £2,436,016, which is £314.538 in excess of last year. This considerable increase arises from the fact that £320.000 is required for the purchase of a site in St. Martin's-le-Grand for additional offices, under the powers of the Post-office Extension Act passed in 1865. Of the details constituting the gross sum named above we shall only extract such as those relating to Establishments in the Colonies and Agents abroad as have reference to postal communication with Ceylon and the Far East, These are as follows:—

ALEXANDRIA.—British Postmaster £500 (annual increment £25, up to a maximum of £600); 1st clerk, £250 (annual increment £10, up to £300); 2nd clerk, £100 (annual increment £10, up to £150); doorkeeper £24; sub-postmaster at Cairo £100; sub-agent at Beyrout £15; rent £300; incidental expenses £150; poundage on sale of postage labels at Cairo £5. Total £1,544—£680 more than last year, mainly to be accounted for by the fact that there was then no charge in the Estimate for establishments at Cairo or Beyrout.

CEYLON.—Packet Agent at Point de Galle £100; clerk there £75.

HONG KONG.—Salaries of sub-agent at Canton £60; Swatow £40; Amoy £60; Foo-chow £100; Ningpo £60; Shanghai £150; Nagasaki £60; and Yedo £100.

SUEZ.—Packet Agent £275; clerk £160; do. £128; doorkeeper £24; ground rent and lighting office £20; poundage on sale of postage labels £9.

The Post-office Packet Service is not included in the gross amount of the Estimate above referred to, but forms a separate and additional charge, £821,164, which is a little more than £20,000 less than the charge of last year. One of the heaviest items in this sum is the charge for conveyance of mails between Holyhead and Kingston, which runs up to £89,000. The charges for the various Oceans Packet Services are as follows:—

AMERICA.

Liverpool, Halifax and Boston, and to and from Liverpool, New York, and Nassau, £176,340, of which £1,500 is to be paid by the Government of the Bahamas.

Halifax, Bermuda, and St. Thomas, and Halifax and St. John's Newfoundland, £14,700.

To and from West Indies, £174,000; Turk's Island and St. Thomas, £300; Porto Rico and St. Thomas, second monthly mail £1,000; St. Kitts, Nevis, and Montserrat £490; monthly service between Liverpool and Belize, and between Belize and Jamaica, £2,250 (the colony of Honduras is to make good the deficiency between the sea-postage and the amount of the subsidy).

Brazils and Buenos Ayres £33 500.

West Coast of America, between Panama, Callao, and Valparaiso £18,250.

AFRICA.

West Coast of Africa and England (new contract at the rate of £20,000 per annum, to commence 24th September, 1866) £25,000.

Cape of Good Hope and England £19,700; for a second monthly service *via* Mauritius £2,000.

INDIA, CHINA, AND AUSTRALIA.

Alexandria, Ceylon, Calcutta, Hong Kong, and England, including a Branch from Marseilles to Malta £162,125; (deduct Estimated Proportion to be paid by the Indian Government £41,000; for Discontinuance of Admiralty Survey of Peninsular and Oriental Steam Navigation Company's vessels employed in conveyance of India and China Mails £4,500; proportion to be paid by the Australian Governments for conveyance of the Australian Mails between England and Point de Galle £15,058; for abandonment of reduced fares for Government Passengers on the vessels of the Peninsular and Oriental Steam Packet Company £15,000; total, £75,558); net charge £86.567.

Aden and Bombay £22,000.

ADDITIONAL SERVICES.

Extended services, including two additional Packets per mensem between Marseilles and Alexandria £21,000.

Extra Packets from Southampton to Alexandria, for Bombay Mails £29,500.

Extra Packet, monthly, between Bombay and China £24,000.

Point de Galle and Sydney £120,000; (deduct for Discontinuance of Admiralty Surveys of Peninsular and Oriental Steam Navigation Company's vessels on Australian line £500; and moiety to be paid by the Colonies £59.750); net charge £59,750.

Australia and New Zealand £6.500.

Melbourne and Launceston £800.

King George's Sound and Adelaide £2,475.

For allowance to Government Agents on board the Contract Packets, 18 at £215 per annum; 15 at £125 per annum, £5,745 (these salaries are in addition to the Naval half-pay of the officers employed); (deduct proportion to be paid by the Governments of India and of the Australian Colonies, £1,720); net charge £4,025.

The Packet Establishment at Southampton costs the Post-office £828; the other half of the salaries and allowances being provided for by the Admiralty.

SYNOPSIS OF THE TRADE OF 1865.

Subjoined is a statement showing the proportion in which the various countries of the world ranked as our customers during the past year. The total value of our exportations was £165,862,402 against 160,449.053 in 1864, an increase of nearly 3½ per cent. over the unprecedented total then attained. The amount taken by our own possessions was 29 per cent. of the whole, but this is a falling off from last year, when it was 32½ per cent., the alteration being attributable to the diminution in the demand for Indian cotton, the cessation of the shipments to the Bermudas, and a general slackness in the trade with Canada, the West Indies, the Cape of Good Hope, and Natal, which has been but partially made up by a considerable improvement in the amount of the consignments to Australia. The French total, which last year presented a falling off, now shows a full recovery. Holland and Belgium continue to advance. Italy again exhibits a reduction. Spain, which last year figured for an increase, now shows a heavy reaction. Portugal continues slightly to retrograde. New Granada, owing to the growing importance of the Isthmus traffic, steadily experiences a large augmentation. The Argentine Republic, which was previouly next to Mexico, is now above both Mexico and Chili. Brazil, through the change in the cotton question, exhibits some reaction from the enormous increase of the preceding year. Japan confirms the anticipations of her commercial capacity, the total having risen from £627,383 to £1,520,895. In 1863 she took from us only £108.897. Tunis and Siam likewise show a sudden increase, and even Persia is beginning to appear for an advance on her previous infinitesimal amount:—

FREIGHTS AND CHARTERS.

Both in outward and homeward freights we have but to confirm our last advices.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £45 to £47. For Galle: £40. For Singapore: £39. For Shanghai: £55. For Batavia: £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 3s. For Manila: 35s. For Galle: £1 18s. For Singapore, 35s. For Shanghai: £2 15s. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 149 tons tons naval stores and 50 small spars from the River Thames to Hong Hong.

CASUALTIES.

The Lota, from New York for Shanghai, put back damaged, having struck on a sunken wreck.

The Maria Agnes, Westenenk, from Batavia for Amsterdam with a general cargo, foundered March 20th; her crew and passengers were picked up in the chops of the Channel by the Water Sprite.

The Carlota, Jesperson, from Hamburg for Singapore, put into Portland March 27, with her pumps choked.

The Beautiful Star, Lees, from Sunderland for Hong Kong, lost mizenmast and split sails during the gale on the night of the 23rd March, and drove from Dungeness into the North Sea.

The Jacoba, Schaap, from Shields for Singapore, was assisted into Harwich making a little water and with loss of three anchors, warps, and other stores. She had also thrown some coals overboard.

The Edith, Ogilvie, from Nagasaki, arrived at New York March 13, with sails split, &c.

The Lady Alice, Strannack, from Sourabaya to Amsterdam, was in collision in the North Holland Canal, and sustained much damage.

NOTICE TO MARINERS.

EAST INDIES—STRAITS OF MALACCA.

The Government of Singapore has given notice that four buoys have been placed near the One Fathom Bank in the Straits of Malacca; two of which are moored near the eastern end of the bank in six fathoms at low water, one off the southern end in six fathoms, and another at the western edge of the bank.

Parcela Hill, bearing east, leads to the southward of the bank, and E. S. E. to the northward. Pulo Anza, bearing N. E., leads to the westward, and N. E. by N. to the eastward. Vessels bound up or down the Straits should pass southward and westward of the buoys and light-vessel, so as to clear the two fathom bank, off which the southern buoy is moored.

All bearings are magnetic. Variation, 1° 35′ E., in 1865.

This notice affects the Admiralty chart, Straits of Malacca, sheet No. 1, 355.

HOLLOWAY'S OINTMENT AND PILLS.
Cold and damp are the frequent causes of ailments which prove troublesome though rarely dangerous unless culpably neglected. A cold in the head, throat, or chest, may be safely stopped and expeditiously cured by rubbing Holloway's Ointment twice a day upon the neck and chest, and by aiding its curative powers with appropriate doses of his purifying and regulating pills. The conjoint and reciprocal agency of these medicaments exercises the highest salutary effect over the unicous, vascular and secretory systems, which colds always inconvenience and disarrange. The phlegm, cough, and shortness of breath gradually disappear under this rational treatment, and the strength and vigour of the constitution are increased rather than diminished during the course of cure.

SCINDE RAILWAY (INDUS STEAM FLOTILLA, PUNJAUB AND DELHI RAILWAYS) COMPANY.

At the Eleventh Annual General Meeting of the above Company, held at the London Tavern, Bishopsgate-street, in the City of London, on Wednesday, the 28th March, 1866,

W. P. ANDREW, Esq., Chairman of the Company presiding,

The following Resolutions were carried unanimously:—

1. That this meeting receive and adopt the Report and Accounts of the Directors.

2. That Thomas Williams, Esq., be re-elected a Director of this Company.

3. That Harry Borradaile, Esq., be re-elected a Director of this Company.

4. That William Mackinnon, Esq., be re-elected Auditor of this Company.

5. Proposed by Henry J. A. GOEZ, Esq., seconded by W. F. AUSTEN, Esq.:—

That the construction of the Indus Valley Line and the completion of the Steam Arch from Calcutta to Kurrachee are of the highest importance to this Company, and essential to the general interest of England and India. That it is desirable that the Secretary of State for India, Earl de Grey and Ripon, should be moved by the Directors, in regard to the importance of prompt steps being taken to realise these objects.

6. That the thanks of the Proprietors are due to the Chairman and Directors for their able management of the affairs of the Company, and that the cordial thanks of this meeting are tendered to W. P. Andrew, Esq., for his courteous conduct in the chair this day.

W. P. ANDREW, Chairman.
S. H. R. PARRY, Acting Secretary.

JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box, without which none are genuine.

UPPER MARSH, LAMBETH, LONDON, S.
HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,
WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,
24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

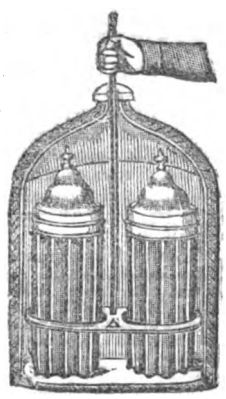
Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street, New York; and 37, Gracechurch-street, London.

BASS AND ALLSOPP'S INDIA PALE ALE

GEORGE JONES, No. 8, Billiter-street, London.

Present prices 7s. 3d. per dozen quarts, and 4s. 9d. per dozen pints. Free on board, protected by his own and the Brewer's Labels and Patent Capsule.

IMPORTANT
TO PERSONS RESIDING IN HOT CLIMATES.



ASH'S PATENT "PISTON" FREEZING MACHINE AND WINE COOLER is the FIRST REALLY EFFECTIVE APPARATUS for TROPICAL CLIMATES.

It will produce PURE BLOCK ICE, FREEZE and MOULD DESSERT ICES, and ICE WINES in any temperature. It is remarkably simple, will not corode or get out of order, and can be worked (with or without Ice) by the most ignorant servant. The Freezing Salts employed are indigenous to most hot climates, easily and cheaply obtained. A *bona fide* Receipt for preparing them given with each Machine. It is not too much to say that the "Piston" Freezing Machine is rapidly becoming indispensable to all European residents in India and China.

PRICES:—For 1 Bottle, 1 Block of Ice, 1 Dessert Ice... ... ... £4 0 0
For 2 Bottles, 2 Blocks of Ice, 2 Dessert Ices 6 10 0
For 4 Bottles, 4 Blocks of Ice, 4 Dessert Ices 11 5 0
If without fittings (merely as Wine Coolers.)

For 1 Bottle £2 0 0
For 2 Bottles 3 0 0
For 4 Bottles 4 5 0

When Dessert Ices are never required, these Wines Coolers can be fitted with BLOCK ICE MOULD at 30s. for each Mould so fitted.

SOLE MANUFACTURER:
GEORGE SIMPSON, 315, OXFORD-STREET, LONDON.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.
CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta.—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words
"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—
J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.
Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

Achilles	1672	Russell ...	Sept. 10.

Each vessel carries a surgeon and stewardess.
Apply to ALFRED HOLT, 1, India-buildings, Liverpool.

FROM LIVERPOOL.

MORS LE BLANCH & CO. intend despatching VESSELS to the undermentioned Ports as follows:—

BATAVIA AND SOURABAYA.

Vessel.	Class.	Probable date of sailing.
A 1 SHIP		—

SINGAPORE.

EASTFIELD	A 1	April 7
CECROPS	3-3rds	May 1

YOKOHAMA.

A 1 British SHIP	—

Loading in Prince's Dock.
Apply at 42 and 43, THE ALBANY, Liverpool.

FOR HONG KONG and WHAMPOA (under engagement to the Lords of the Admiralty, with quick despatch), the well-known British-built clipper ship YARATILDA, A 1 fourteen years, 720 tons register, JAMES DONOUGH, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

FOR HONG KONG and WHAMPOA, with quick despatch (to follow the Yaratilda), the well-known iron clipper-ship PORTLAND, A 1 12 years, 872 tons register, JAMES PETERS, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion court, Cornhill, E.C.

LINE OF PACKETS FROM LIVERPOOL FOR JAVA.

FOR BATAVIA and SOURABAYA, with immediate despatch, having two-thirds of her cargo engaged, the splendid Dutch clipper baaque CATHARINA, Captain VISMAR; 240 tons register; built in 1864, and classed 3-3rds L 1 1 for nine years; the highest class in French Lloyd's; coppered and thoroughly copper-fastened, and a most eligible conveyance for fine goods. Loads in Prince's Dock.

For BATAVIA and SINGAPORE, an A 1 twelve years Ship.

Apply to NUTTALL and Co., 18, Chapel-street, Liverpool.

WEATHERLEY and MEAD'S LINE of CLIPPERS for JAPAN Direct.

FOR YOKOHAMA (Kanagawa), the splendid clipper barque MINNIE, A 1 twelve years, 407 tons register, DAVID BLACK, Commander; well-known in the China trade, having the greater part of her cargo engaged, will be despatched immediately.

For Freight or Passage apply to the owners, Messrs. ADAMSON and RONALDSON, 1, Leadenhall-street; or to WEATHERLEY and MEAD, 21, Water-lane, Great Tower-street, E.C.

LINE OF PACKETS FOR YOKOHAMA, JAPAN.

Has the bulk of her cargo engaged, and will have prompt despatch,

THE splendid Liverpool-built clipper barque CARIOCA, D. HUGHES, Commander; 312 tons, A 1 at Lloyd's for thirteen years, only two years old, has proved herself to be one of the fastest vessels belonging to the port, and in every respect an unrivalled conveyance.

For Freight or Passage apply to Messrs. WAKEFIELD, NASH, and Co., to Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co.

With immediate Despatch.

DIRECT for COLOMBO, the well-known clipper ship NEVILLE, A 1 ten years, 715 tons register, J. ROBINSON, Commander; West India Docks. This magnificent vessel is noted for her rapid passages, and the good order in which she invariably delivers her cargoes.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

COLOMBO DIRECT.—Notice to Shippers.—The WYNAUD, A 1 13 years, 522 tons register, J. W. SMITH, Commander, is now at her loading berth in the West India Docks, and has room for light measurement goods only. This beautiful clipper has a very lofty cabin, with every accommodation for the comfort and convenience of passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard, and for Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

Will have very quick despatch.

DIRECT for COLOMBO, the magnificent clipper-built ship SPANKER, A 1 10 years, 477 tons register, JAMES CANDLISH, Commander, West India Docks. This splendid Vessel is well known for her very rapid Passages, and the good order in which she invariably delivers her Cargoes, thus offering a favourable opportunity to Shippers of fine Goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will have very quick despatch.

DIRECT FOR COLOMBO.—The beautiful new Jersey-built Clipper Ship CAROLINE HUTCHINGS, A 1 Eleven Years, 287 tons register, G. H. COTHER, Commander; lying in the West India Docks. This splendid new ship, from her fine lines, is expected to make a very rapid passage.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with quick despatch.

DIRECT for BOMBAY, the splendid new clipper ship, MARINE MINISTER VON ROON, 3.3rds L 1. 1.—A 1 9 years, 1,018 tons register, J. C. ELLER, Commander, lying in the East India Docks. This magnificent new vessel having the greater portion of her cargo engaged, is confidently recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, No. 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "MARINE MINISTER VON ROON," and will have quick despatch.

DIRECT for BOMBAY, the magnificent clipper ship WHITEHALL, A 1 fourteen years, 936 tons register, WILLIAM CHAPMAN, Commander; lying in the East India Docks. This splendid high-classed ship is now quite ready for cargo, and being one of the fastest vessels afloat (having made the passage to Sydney in 76 days), offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Swanson, R.N., W. Sheen, R.N., W. Brock, R.N., T. Huard, R.N., R. Widdicombe, R.N., and R. W. Tapp, R.N. To Ceylon: Mr. E. Case, Mr. J. H. Purdon. To Shanghai: Mr. E. Wadman.

From Marseilles, April 28.—To Hong Kong: Mr. and Mrs. Leavesley, Mr. J. Livingston. To Yokohama: Mr. A. A. Shand.

Per P. and O. steamer, from Marseilles, May 5.—To Singapore via Bombay: Mr. C. Grey McClelland.

From Marseilles, May 12.—To Yokohama: Mr. and Mrs. Dohmen.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port we have no later dates, and are again without our usual files of papers. The approach of the Japanese New Year holidays had interrupted business, and there was no political news of importance.

The late destructive fire at Yedo appears to have been attributable to a woman's jealousy. Report says that a Niphon fair one, having been forsaken by her lover for a more advantageous match, deliberately set fire to the bridegroom's house on the wedding night. As she then proceeded to fire the house of the *fiancé's* father in another street, her successful rival, on rushing from her flaming bridal couch, found nothing but ashes when she reached her former house. Such is the *on dit* in the capital. The disastrous nature of the fire, which destroyed nearly a whole suburb, was by no means overstated. One hundred and fifty lives were lost, a very large number of persons have been thrown out of employment, and much distress has been its immediate result; the price of provisions and clothing has risen, and agitators of the anti-foreign party, never inactive, have taken the opportunity of so inflaming the popular mind that it is said to be unsafe for Europeans to be seen in the streets of Yedo. A curious proof of the value of the mud fireproof godowns which the Japanese build so well, is found in the fact that the blackened ruins of the burnt town, extending over a space more than twice the size of Yokohama, are studded with the little white fireproof safes, which apparently were inside each house of any importance, hardly even blackened by the flames; probably the outside surfaces being brought to a white heat, threw off the smoke and soot.

With respect to the recent case of Glackmeyer versus McKechnie, the English Consul's decision having been appealed against to Sir Edmund Hornby, the Chief Judge reverses it; technically, he is compelled to take this course—because Glackmeyer had been arrested without a warrant—but, at the same time, agreeing with the English Consul here, that just cause existed for McKechnie's suspicions, he only gives forty shillings damages, and recommends McKechnie to prosecute the plaintiff in the American Consular Court, where, as he says with a grim satire hardly to be appreciated at home, he "is bound to presume" justice will be done. We are anxious (says the *Japan Times*) to see whether Mr. McKechnie will take the hint. Perhaps he is waiting for a change in the *personnel* of the court, which is, we trust, imminent.

It is believed that during the present year the Yokohama racecourse will be completed. The concession of a piece of land for the purpose formed part of the Osaka convention, and the matter has since been under diplomatic consideration. The terms will be finally arranged and the land made over at the same time as the new tariff is agreed to, that is immediately.

The Japanese have taken over the *Fusiyama*, a vessel of war built for them in America, whose arrival we noticed in our last. They bitterly complain of her price and of her construction; in fact aver that they have been much ill-used in the bargain. The vessel is to be put, we have been informed, under the command of an officer of H.I.M.'s ship *Guerriere*, so long as the frigate remains in these waters. This is the first step in the right way towards forming an efficient Japanese

Digitized by Google

navy that has been taken since the Tycoon received the Queen's present to him of the *Emperor*.

We hear of a scheme to create here a company like the Trinity Board, to be called, in fact, the Eastern Trinity Board, which shall take charge of the dangerous coasts of China and Japan, and supply at various points what are so urgently needed —beacons and lighthouses. It will be necessary (says the *Japan Times*) for the whole of the Treaty Powers to give their consent to a tariff of light-dues to be levied on ships of all nations having treaties with China and Japan, payable at the port of entry, of course. We do not think any very great difficulty is likely to be thrown in the way of the promoter of the scheme, or that the Chinese and Japanese Governments will refuse to assist in its successful development. The idea owes its origin to Mr. Patrick Dall, an engineer of considerable talent and experience, now resident in Yokohama. In our opinion the scheme is practicable, and, like every undertaking which promises to supply a general want that is actually felt, would most certainly pay very good interest on whatever capital may be invested in it. We hear that both Admiral King and Sir Harry Parkes have expressed themselves as highly favouring the scheme, and it has been sent in for the consideration of the Chamber of Commerce. We hope soon to see Mr. Dall's idea bearing useful fruit.

The *vexata quæstio* of the Itzeboo exchange is on the point of receiving its solution. The establishment of a new Japanese mint to receive all bullion brought into the country and return its value in a new coin will place the Mexican dollar in its proper position of an article of merchandise, instead of a coin of account. Thus the difference between the "official" dollar, worth 3 Itziboos, and the merchant's dollar, worth from 2¼ to 2½, will disappear. But, as a sudden change would greatly disturb trade at the present moment, a decent interval will be allowed to elapse before the present coin is called in; and we understand that the opening of the new mint will coincide with the opening of the new port of Osaka.

CHINA.

PEKING.

Native reports from Peking announce that much apprehension prevails in the capital in consequence of rumours of the approach of the Nienfei. The latter are now said to be on the high road to Peking, no important river intervening between their present position and that city. Moreover, three thousand Tartars, who were formerly under San-ko-lin-sin's command, were reported to have joined the ranks of the insurgents, who, if this be true, have thus gained an additional element of success.

On the other hand, reliable advices from other quarters inform us that no danger appears to threaten Peking, and that the Cabinet is quietly settling down into a grateful sense of security.

CHEFOO.

A correspondent at Chefoo informs us that on the 7th February that quiet settlement was startled by the alarm of fire. About 3 P.M. large volumes of smoke were seen issuing from the roof of a building in the occupation of the Customs officers, and soon after flames appeared, barely allowing time for the escape of the tide-surveyor and one of the officers who happened to be in his room. Prompt assistance was given by various members of the foreign community, and the fire was by their exertions confined to the range of buildings in which it originated, the whole of which, however, with their contents, were entirely destroyed. The want of a fire engine was much felt, the only one in the settlement sufficiently large to be of service being private property, and a request for the loan of it was, we understand, refused. It is therefore to be hoped that, in consequence of this disaster, some measures will be taken by the residents to obtain an engine, for which many of the Chinese merchants would doubtless be willing to contribute largely.

HANKOW.

The news relative to both Nienfei and Braves is extremely meagre, but fires are occasionally seen in different directions at a distance of ten or twelve miles. The number of rebels in the immediate neighbourhood of Hankow is estimated at from three to four thousand, while the Imperialist garrisons make up a muster of from twenty to twenty-two thousand. No dependence can, however, be placed on the loyalty of the soldiers, and the mandarins are in consequence almost powerless. The settlement at Hankow is crowded by refugees in every stage of destitution and misery, but the charitable have started a soup kitchen, which is well supported, and has already afforded a very considerable amount of relief.

SHANGHAI.

From this port we have no later dates—the French mail delivered on the 5th instant having left on the same day as the present P. and O. mail, viz., 23rd February. Some service is being done by the Chinese gunboats, under the command of Europeans, against the pirates which infest the coast. The *Pluto*, Chinese gunboat, had just returned from a most successful cruise. On the 9th Feb. she fell in with a large piratical junk off Chinsan, which subsequently proved to have nineteen men on board, and to be armed with two 6-pounders, one 9-pounder, four gingalls, and about thirty muskets. After some severe fighting the junk was captured and seven of the pirates were taken prisoners, the remainder escaping to the shore. On the 10th February the *Pluto* captured three junks, all heavily armed, and destroyed one off Ken-Shan. Two men were captured; one of them, being wounded, died, and the other was brought to Shanghai. The remaining men in the junks escaped to the shore, but were pursued, and though they were not caught, the *Pluto's* people succeeded in finding out the house of the pirate chief, which they pulled down.

It is said that the Taoutai is desirous of closing all the native theatres in the Foreign Settlements, and that while H.B.M.'s Consul, to whom application has been made upon the subject, is willing to further that course of action, the Municipal Council have expressed their unwillingness to carry out the order by means of the Foreign Police. Thus it would appear a dispute of a rather serious complexion is likely to arise; as it is not improbable that the Chinese will send their own police with a view to effecting the object, a plan which may bring them into collision with the municipal authorities.

Shanghai has unfortunately the reputation of being the most expensive port in the world to which a ship can be sent. The *North China Herald* remarks that the chief cause of this has been the difficulty and delay experienced in discharging cargo, and the expense attending that operation. It would be easy to adduce numerous instances of vessels of some eight or nine hundred tons which have taken between two and three months to discharge, the men and officers being meanwhile kept on full pay, and all the expenses of the ship running. On the other hand we find that a ship placed alongside a wharf can discharge a cargo of a thousand tons or even more in a day, and be ready if she arrives at this time of year, to accept a rice charter, which exactly fills up her time before the commencement of the tea season. Of this we have lately had an example in the *Serica*, which went alongside the Shanghai wharf on the 5th of February, and in twenty-four working hours was turned inside out. In that time, her cargo, consisting of bales and boxes of Manchester goods and rod iron, was discharged, sorted and made ready for delivery to the consignees. Thus the consignees have obtained their goods without delay, while the owners will make a profit out of the charter to Saigon, upon which the *Serica* left on the 10th February. There is little necessity to point out the manifold advantages of this system. Peculation by cargo boatmen and others is rendered impossible, for the bales and packages consigned to houses here may be counted and examined in the godown before delivery, and the labour of godown keepers is materially lightened.

We learn that a pilot cutter which was left at the East Saddles to await the return of her owner, Mr. Orr, who was placed on board an inward bound vessel, has been walked off by the Chinese crew, there being no European left in charge of her. It is supposed that she has been taken to Ningpo or Chusan for sale. The boat is valued at about twelve hunddred taels. Endeavours are being made through the Chinese authorities to trace the thieves and recover the stolen property. The pilot schooner *Cruiser* was run into by the barque *Sarah Scott* on the 7th February, cutting her down to the copper on her starboard bow; she was towed to Shanghai in a sinking state by the tug *Titan*. The steamer *Nanzing*, having had her engines overhauled lately, went on a trial trip to the Beacon on the 17th February. Everything worked entirely to the satisfaction of all on board, a speed of 12 knots being attained, without the slightest difficulty.

The Chinese New Year holidays, which had nearly filled up the interval since the last mail, had rendered trade dull, and prevented any important movements of a political character amongst the natives. The Nienfei were reported to have shut

Digitized by Google

themselves up for the festive season, and nothing occurred to mar the general felicity. In Shanghai the holidays passed by with remarkably little excitement, and the police sheets, contrary to the expectations of all, were actually lighter than at any previous period during the winter. The merchants and shopkeepers had commenced returning to their places of business, and in a few days the ordinary routine of trade would be restored.

Another matter of importance with reference to the French Settlement has been brought before the notice of the public, namely, the question of establishing a wharf for the Messageries Imperiales Company. At a meeting of Land Renters in the French Settlement convened to take into consideration the question of establishing a wharf for the Messageries Imperiales Company, fifty-five votes were represented, and it was decided by 40 votes to 15 that the rules passed at the general meeting in April, 1864, should be revised, and a committee, consisting of Messrs. Hogg, Dixwell, Viault, Bernard and Wignall, were appointed to report upon the modifications which it would be desirable to introduce, and to lay the proposed draft of revision before a meeting to be called on the 10th of March. The report of the committees is to be distributed to the Land Renters eight days previous to the meeting.

The usual monthly meeting of the Municipal Council took place on the 10th inst. The Finance, Rate, and Appeal Committee report that the taxes have been paid promptly, and that with economy there will be sufficient funds to meet the requirements of the Municipality. Her Majesty's Minister has given instructions that the taxes upon the Consular buildings be paid. As the town due cannot now be passed until the new land regulations have been sanctioned, the Finance Committee recommend that some similar tax be, if possible, passed under the present regulations, and will include some such impost in the budget, which is to be laid before the meeting of land renters in March next. The numbering of foreign hongs has been completed. The lease of the present municipal premises, &c., expiring shortly, the Finance Committee have been in communication with Mr. Thorne respecting the piece of land adjoining the police station. It is suggested that the Mixed Court should make some provision for the expenses entailed by the prisoners sentenced to hard labour in the Municipal Chain Gang. Mr. Fitzroy, the Commissioner of Customs, has been communicated with and requested to pay a similar tax upon the Custom House as that upon other Chinese buildings. He has, however, protested against the imposition. He has also been addressed with reference to the establishment of a river police. The report of the Watch Committee shows that the police force at present consists of 102 men, namely 64 Europeans and 38 Chinese, all in an efficient state. There has been a slight increase of crime during the past month, as is naturally to be expected with the approach of the China New Year. The number of apprehensions in January have been, Foreigners 37, against same month last year 113; Chinese 293, against last year in the same month 233.

H.B.M.'s Consul has requested that a description of all unemployed foreigners might be sent to him weekly for transmission to the Taotai, that in case such were found in the surrounding country they might be appehended. The committee pointed out to H.B.M.'s Consul the danger that might arise from this being done, as the Chinese authorities might mistake descriptions, of using the descriptions as a lever against foreigners, apprehend respectable people, H.B.M.'s Consul still however requesting the information, they disclaimed any responsibility in the matter but instructed the Superintendent of Police to make the required return of British subjects only.

The Works Committee reported that the engagement of Mr. Clark as Municipal Engineer expires on the 4th of June next, and at his request they have allowed it to terminate on the 28th of February. An engagement of three years has been made with Mr. E. H. Oliver to act in the place of Mr. Clark subject to the approval of the Council. The engineer is preparing a report on the public works undertaken during the past Municpal year.

HONG KONG.

The present mail brings intelligence from Hong Kong to the 1st March. No later news had been received from Europe since the departure of the French mail on the 26th February, and during that short period nothing of importance had transpired.

The *China Mail* has commenced the issue of a weekly return of piracies, the first instalment of which is as follows:—

Return of Piracies from 9th to 16th February, 1866.—Feb. 11, Chin Chin, Hamburg schooner, attacked in Ly-ee-moon Passage; three men wounded, one man missing, cargo untouched; Feb. 11, Johanna, Sarah Maria, and Resolution, attacked off S. E. Lema Islands, reported by a pilot as seen engaged with pirates; result unknown.

The *Daily Press* gives the following interesting particulars of the late cruise of the gunboat *Opossum* in search of pirates. The cruise seems to have been very successful.

Lieut. St. John has in one week captured sixteen junks, forty prisoners, fifty-three guns, has burnt a pirate village, and liberated twenty-seven captives,—a week's work to be proud of, indeed. On Saturday, the 10th, Lieut. St. John applied for leave, and received permission from the Admiral to go out for a cruise. He did not at that time know of any projected operations on the part of the pirates, and intended simply to look around and see what was going on. His fires were no sooner up, however, than some of the native merchants sent off to inform him that a number of pirate junks were lying at a place called Pak-shui, on the west coast, a little beyond Macao. In that direction, therefore, he steered, and yesterday week flushed the birds he was in search of. At the head of a small creek stood the village, guarded by a battery of three guns, —one of them a 55-cwt. gun, throwing a 24 lb. shot,—and anchored off it lay the piratical junks, fifteen in number. They were all armed, some of them heavily. In all they carried forty-three guns, most of them 18-pounders. They were manned by 200 men, and it must be acknowledged were not a bad match for one boat with only three guns on board, manned by about seventeen or eighteen Europeans, even though these were British seamen. Lieut. St. John came in so that as he ran down on the junks they were end on to him, and their guns being all in the broadside, consequently useless. As soon as he came within range, he opened a flank fire on the battery, and in a very short time its defenders cleared out. This was the signal for the men in the junks to do the same. The whole two hundred scrambled on shore, and made off into the interior, leaving the vessels a prey to the gunboat. Lieut. St. John landed with a small party of men from the gunboat, and while he was on shore, as we understand, the explosion took place on board one of the junks by which the warrant officer of the *Opossum* was wounded. He was engaged setting fire to the vessel when a jar of powder standing on the deck took fire. There was no explosion in the ordinary sense of the word—that is, no material were thrown about, and the gunner was burnt by the flame of the powder, and by a succession of smaller explosions which followed. A boy who was with him jumped overboard and escaped with but few injuries, but the gunner could not swim and had to run on in the junk. A marine was wounded in another explosion while setting fire to a junk which had been hauled up on shore. After the work had been performed, when the pirates were all out of the way and the *Opossum* was busily engaged destroying their craft, a fleet of forty Mandarin junks came round the point. It seemed that the Imperial men-of-war had been twice beaten off by the pirates of Paksui, and were coming down this time in force. The one English gunboat, however, had accomplished the task out of hand, and there was nothing left for the Chinese but to profit by the victory. They landed 1,600 men, and burnt the village, and Lieutenant St. John handed over to them the greater number of the captured junks and guns after having destroyed the rest. He then went to Macao, and sent back his wounded men to Hong Kong. During the whole of Monday he remained at Macao, but Tuesday morning saw him down the west coast again. On Wednesday, off a place called Imum, he fell in with a large heavily-armed junk, about thirty feet longer than the *Opossum*, carrying eight guns (one 50 cwt., one 30 cwt., and the others 12-pounders), big enough to have hoisted Her Majesty's small ship *Opossum* on board altogether, if she had had the proper machinery. This junk it was at once recognised as the vessel of which the gunboat, on information received, was in search. When she was stopped, her owner was prepared with all the documents necessary to prove him a most respectable trader, only carrying guns for his own protection; but it happened that Lieut. St. John had on board the Chinaman who really owned the vessel. She had, it seems, been entrusted to the man now found in possession of her, who had never afterwards accounted for her to his owner, but had turned pirate instead. When confronted with the Chinese merchants on board the *Opossum*, he saw that his game had been "played out," and resigned himself to his fate with Asiatic fortitude. He made no further attempts to defend himself either by arguments or physical force, and together with forty companions was con-

Digitized by Google

ducted by the *Opussum* to Quang-hei, and given over to the Mandarins. By them he was recognised as a man of great influence on the west coast. He and his crew will be sent on to Canton, and there is no reason to doubt the fate that awaits them. The captives we spoke of above were released at Pak-shui before the village was burnt.

Such exploits as these must have a tendency to diminish the prosperity of the piratical profession, though of course we must not expect that even many such will put an end to attempts on vessels leaving this harbour. While the pirate has so much in his favour, there is no reason to suppose that even if the trade be made more hazardous than it is now it would be abandoned. Piratical junks may come and go in this harbour as they please, and no questions are asked them. While every harmless British or other European vessel is bound under heavy penalties to explain herself at the harbour master's office within a short period after her arrival, native crafts are exempt from the necessity, and are free of the port, as if they owned it. There is nothing to prevent Chinese from establishing a piratical firm with chief offices in the Queen's Road, and the vessels of partners lying off the praya, ready to set sail whenever the departure of a weakly armed merchant ship might make it worth their while to put to sea. Whether there are any such firms in existence we do not know, but we are assured on good authority that it is a common thing for the pirate junks to lie in this harbour, waiting for the departure of some vessel they had previously "spotted." We are wasting the energies of our seamen in sending them up and down the coast after the buccaneers, if our own harbour regulations permit pirate junks to anchor almost within hail of the Admiral's flagship.

(FROM OUR OWN CORRESPONDENT.)

An unexpected but decisive success has within the last few days crowned the Imperial arms in the adjoining province. You have already been informed, in my previous letters, that the remnants of the Taiping hosts, which, after being chased in the early part of last summer out of the city of Chang-chow-Foo, near Amoy, had entrenched themselves in a strong position on the northern frontier of Kwang-tung, and which, being dislodged after months of effort from that position, wandered along the border-line of the adjacent provinces vainly seeking a road for escape, had at length suddenly doubled back and seized upon the city of Kia Ying-chow, not far from Swatow, where they managed to maintain a bold front for upwards of two months, under the leadership of the last survivor of the Taiping chiefs, known as the Kang Wang, or "Prince of Tranquillity." The Imperial forces, numbering some fifty or sixty thousand "braves," had proved absolutely incapable of meeting the rebels in the field, and a decree from Peking accordingly ordered the Viceroy of Tukien, Tso-Tsung-tang, in whose integrity and military skill great confidence is placed, to cross the frontier and take command of the Kwang-tung forces. His first action took place about the 7th inst., when a lucky bullet wounded the rebel leader, whose death ensued on the following day. His adherents, thrown into complete disorder by his loss, at once abandoned the city of Kia-Ying-chow, and endeavoured, to the number of some fifty thousand, to reach the mountains on the Fukien frontier. They were enveloped, however, by Tso Tsung-tang's troops, and absolutely annihilated in a two days' slaughter. The country people joined the troops in massacring the insurgents who had so long oppressed them, and upwards of twenty thousand corpses are said to have been the result of this bloody fight. Very little resistance was made by the hopelessly disorganised rebels, and the villagers are said (like the Spanish peasantry during the Peninsular War) to have actually seized and butchered batches of them, whose lives had already been spared by the braves. Upwards of twenty thousand prisoners still, however, remain in the hands of the Imperial leaders, including seven or eight hundred chiefs of different ranks. This brilliant success, which effects the final extinction of the last vestige of the great rebellion, was at once reported to Peking by couriers bearing the red flag which publishes the news of a signal victory.

The above intelligence has just reached me, and I have no further details. It affords a singular illustration of the often noted facility with which the Chinese administration rights itself, even when apparently on its beam ends and thoroughly hopeless. The condition of affairs in Kuang-tung has appeared serious enough of late to excite even apprehension for the safety of Canton itself; but a lucky blow has dispelled all danger, and the mandarins are on their feet again. It is noteworthy that this final annihilation of the rebellion has been accomplished without European assistance of any kind. Tso Tsung-tang, the successful general, has steadfastly repelled the offers of assistance that have been tendered him by our French friends, having learnt a wholesome lesson from them, while Governor of Che-kiang, in which capacity he had to do with the notorious D'Aiguebelle. A strong effort was made by the latter only a months ago to induce his former employer to engage his services once more, but a steadfast refusal met him, it is said, and also his ally and Counsellor, M. Giquel, a Frenchman in the Customs service. The success which has now rewarded Tso Tsung-tang's efforts will increase his influence at Peking, where already he reigns, in conjunction with Tseng Kwo-fan and Li Hun-chang, almost supreme.

Nothing has been heard respecting the movements of Sir R. Alcock since his arrival in the North, and the consolidation of friendly relations has been so far proceeded with as to leave him no great question to deal with. An absurd rumour appears to have reached England with respect to the dismissal of Mr. Hart from the direction of the Foreign Customs. Nothing could be further from the truth; and the rumour probably arose only from a mendacious paragraph in the *Daily Press* of this place, a journal so noted for its manufactured news (under its late management at least) as to be unworthy of the slightest credit. The Chinese Government have, it is believed, no intention of dispensing with Mr. Hart's services, although it is probable that on the conclusion of the indemnity payments (now close at hand) they will materially reduce the *personnel* of the Customs service. The expenses have become so enormously swollen as to attract attention, and the unnecessarily high salaries paid will, it is said, be sensibly reduced. Mr. Hart himself is reported to be in receipt of emoluments to the extent of some £20,000 sterling per annum. His pay is about one-fifth of that sum. There is no doubt, however, that whatever the cost of the foreign Customs service, the benefit it confers upon the Chinese Government far outweighs the question of expense.

The official returns of the Canton Custom-house have just been published for the year 1865, and I extract a few figures to indicate the course of trade. The following table is instructive :—

COMPARATIVE STATEMENT OF THE VALUE OF TRADE AND AMOUNT OF DUTY AT CANTON FOR THE YEARS 1860 TO 1865.

Total Value	Imports in Mexican Dollars.	Exports in Mexican Dollars.	Exports and Imports.
For the year 1860 ..	$18,415,727 ..	$16,257,623 ..	$34,673,350
„ 1861 ..	12,977,353 ..	15,811,512 ..	28,788,865
„ 1862 ..	10,580,928 ..	17,742,590 ..	28,323,518
„ 1863 ..	9,505,285 ..	16,083,062 ..	25,588,347
„ 1864* ..	8,192,795 ..	13,659,177 ..	21,851,972
„ 1865† ..	10,556,602 ..	18,054,557 ..	28,611,159

The receipts of duty have been as follows :—

TOTAL AMOUNT OF DUTY IN HAEKWAN TAELS.

1860	Tls. 1,496,293	1863	Tls. 926,315
1861	1,230,296	1864	727,889
1862	1,089,308	1865	843,892

From the above tables it will be seen that the depression in the trade of Canton continued progressively from the date of the opening of the Yangtze and northern ports until the close of 1864. In 1865 an improvement is shown, and this corroborates the general opinion that Canton has touched its lowest point, and will now recover, in some measure, its former importance. As the inconveniences attending the riverine trade of the Yangtze become recognised, the facilities offered by Canton are likely to recall a considerable portion of its former business; besides which, the trade in Canton teas and silk is yearly extending itself. A token of returning prosperity is noticed in the commencement of several new buildings on the hitherto almost vacant Shameen site.

The anticipations conveyed in my last respecting the alarm displayed at Hankow have been realised, and the panic which prevailed there a month ago appears now to have been based on slight grounds. The marauding braves have done much injury, it appears, in the surrounding country, but it is doubtful whether Hankow itself was ever in serious danger.

Another catastrophe, precisely similar in its nature and results to that on board the British ship *Pride of the Ganges*, carrying emigrants to Demerara, has occurred on board the French coolie ship *Hong Kong*, from Canton for Cuba. On the second day out, the coolies rose and succeeded in gaining possession of the vessel. The captain was dangerously wounded, and a portion of the crew escaped in one of the boats, in which they reached Macao on the 23rd inst. On the

* Also 2,625,045 dols. treasure imported. † Also 3,421,114 dols. treasure imported.

Digitized by Google

news being brought to Hong Kong by the French Consular Agent of Macao, application was made by the French Consul to the Admiral for the services of a gunboat to proceed in search of the vessel, and the *Firm* was at once despatched, in company with the chartered steamer *Fei-seen*. The vessel was found some miles to the westward, and has been brought in. The particulars of the rising have not yet become public.

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 8th of March. The London mail of the 26th January arrived out on March 4.

The Governor, Colonel Cavenagh, returned from Penang on the 28th of February, and is again resident at Singapore. Sir Richard McCausland, for the last ten years Recorder of Singapore and Malacca, would take his final departure by the next mail steamer, probably on the 22nd of March. He would be entertained at a public dinner on the 17th, to which every resident in the place would sit down. It has been officially announced that Sir Benson Maxwell, who has held the appointment of Recorder of Penang during the len years that Sir Richard McCausland has officiated at Singapore, will succeed the latter as Recorder of Singapore and Malacca.

Captain J. O. Mayne, R.E., Superintending Engineer, gave over, and Mr. J. Bennet, Executive Engineer, 3rd Grade, received charge of the Singapore division on the 1st March ; and Mr. A. Bremner, Sub Engineer, 2nd Grade, succeeded the latter in charge of the Penang division and office of Superintendent of Convicts on the 20th February. One of the principal topics here of late (observes the *Straits Times*) has been the prevalence of piracy in the neighbourhood, and this not only in the China sea, but in the creeks and coast lines of the Malay Peninsula not a day's sail from Penang. Of course these Malay piracies neither equal in extent nor atrocity those perpetrated by the pirate junks of the China sea, but they are notwithstanding a serious check upon a large portion of the native trade, especially of Penang. The Penang merchants call upon Government to station a gunboat there to act as a deterrent, but Government unfortunately are not in a position to do so, and even if they were, it is not quite certain that the desired result would be attained. We are afraid that the recommendation given to the larger craft trading in China waters must be repeated to the native prahus and pukats in the Straits, and that if they wish immunity from attack, they must go better armed on their commercial excursions.

A large fire broke out on Sunday morning, March 4, in Battery Road, in the godowns occupied by Messrs. Macdonald and Co., and Messrs. Barsoe and Ottzen. An alarm was quickly given, and the police fire engine soon made its appearance on the scene of action. Much delay was at first caused by the necessity of breaking open some of the doors before the fire could be reached, and when that was done the supply of water was very small, owing to it being low tide ; however, one engine was soon placed in the bed of the river to pump the water into another, and soon a large stream of water began to pour on the flames. A party of sailors from H.M.S. *Coquette* arrived to render assistance, and were of great use in helping to remove property from the vicinity of the fire. A number of artillerymen and sepoys were also present. By 2.30 A.M. the fire had completely burnt the back godown of Messrs. Barsoe and Ottzen, and was raging with little hope of abatement in that of Messrs. MacDonald and Co., and fears were entertained that the fire would spread. Fortunately, however, there was little wind, and the party walls of the godowns being tolerably thick, a sufficient barrier was opposed to the further progress of the fire, so that about 5 A.M. it was completely subdued. About $70,000 worth of property was destroyed in all.

The following narrative may account to the disappointed for the non-arrival of letters in England :—Shortly after the departure of the mail for Europe yesterday afternoon, Feb. 23, a gentleman in the employ of a mercantile firm found on the floor of a room underneath the office, part of a draft which had been enclosed in a letter for Europe. On searching the room he discovered a number of letters which he supposed to have been posted, all having the portion of the cover to which the stamps had been affixed torn away. An inspector of police was sent for, and on inquiry it was found that the head peon to whom the letters were entrusted for posting had gone to his house on excuse of sickness. The inspector followed, and found the man sitting in a room with several other Klings. He was highly indignant at being suspected, but on removing his hat he endeavoured to take out the contents, and his hands being seized the torn envelopes with the stamps still on them were found in his possession, whilst the cloth lined envelopes which he had been unable to tear were still entire, the contents having been thrown away. In a desk in the room were found some stamps on which the name of another firm was stamped in blue ink, and from the appearance of them they seemed to have been washed for the purpose of obliterating the name. The firm have reason to suspect that it is not the first time their letters have been destroyed. The case is a very bad one, and the man will unquestionably be severely punished. It will be important to discover where the man has disposed of the stamps, if he has stolen them before this instance, as he would, in all probability, sell them in Singapore, and the purchaser must have suspected that they were not honestly obtained, as their appearance must be injured in tearing them from the covers. In Singapore it is the custom to trust native persons to receive and post letters, but in Batavia it is a rule with some, and, we believe, most of the mercantile firms, to entrust this only to European clerks, and this being the second case of the kind that has been detected, some precaution of this kind will probably have to be adopted.

The very handsome and commodious rooms recently secured for the Singapore Club, were formally opened on the 27th of February, by a tiffin, at which the majority of the members were present.

The *Straits Times* has private advice to the effect that Singapore will soon be visited by a Commission of Inquiry from Ceylon, to gather information as to the state of the jail and prisons. The Home Colonial Secretary, it appears, grumbles at the easy labour of the prisoners of Colombo, and is determined to increase its severity. For this purpose he has formed a Committee of the Chief Justice, the Queen's Advocate, the Acting Auditor General, and the principal Civil Medical Officer of Ceylon, who, after having completed the tour of that island, are to visit Singapore, Malacca, and Penang.

The Government are in treaty to purchase the Sarawak steamer *Rainbow*, to supply the place of the *Pluto*, and she is to be taken over after her next trip. On the 23rd February the *Rainbow* got steam up and cruised about the harbour with a party of visitors and officials on board, to test her performance.

The wreck of the French schooner *Charlie et Julie* was sold on the 3rd March for $60. She is lying in about six fathoms of water, but the purchasers no doubt will use a diving apparatus, and if they succeed in stripping her of the copper sheathing they will have made a good bargain, for the vessel is a perfectly new one, being built only about eight months ago.

The clipper barque *Belle of the Southesk*, 548 tons register, Capt. James Mackenzie, which arrived from London on the 2nd March, has proved herself a very fast sailer, says the *Straits Times*, having beaten the Liverpool and Clyde ships which started before her. She left the East India Docks on the 12th November, and had a favourable run as far as Scilly, where she encountered those destructive westerly gales which swept over the British Isles towards the latter end of November, and which retarded her progress until the 30th of that month. She crossed the Equator December 15, passed the meridian of the Cape of Good Hope January 13, and entered the Straits of Sunda February 13th. This fine vessel proceeds at once to China to compete for the first teas of the season ; and as her principal owners are connected with Singapore, we wish her every success.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANDERSON—On the 16th Feb., at the Agra Bank house, Hong Kong, the wife of Adam Hay Anderson, Esq., of a daughter.

ATHOLE—On the 25th March, the Duchess of Athole, of a daughter.

BARCHAM—On the 26th March, at Thurgarton, Norfolk, the wife of Robert Barcham, Esq., of a daughter.

BURKE—On the 2nd April, at Marble-hill, Lady Burke, of a son.

CAMPBELL—On the 30th March, at 45, Lowndes-square, the wife of A. H. Campbell, Esq., M.P., of a daughter.

DANA—On the 4th March, at Gettysburgh, Singapore, the wife of Geo. H. Dana, Esq., of a son.

DAVIES—On the 2nd April, at Chelsea, the wife of Mr. W. H. Davies, P. and O. Steam Navigation Company's Agent, Aden, of a son.

DANBY—On the 28th March, at the residence of her brother-in-law, 37, Upper Bedford-place, Russell-square, the wife of S. Danby, Esq., of Calcutta, of a daughter.

EDEN—On the 24th March, at Cotgrave-place, Notts, the Hon. Mrs. Henley Eden, of a daughter.

FRANKS—On the 31st March, at Bedford Lodge, Balham, the wife of Charles Bayley Franks, Esq., of a son.

GODDARD—On the 7th Feb., at Tientsin, the wife of J. Bedloe Goddard, Esq., of H.B.M.'s Consular Service, of a son.

GOODWIN—On the 7th Feb., at Shanghai, the wife of Charles Wycliffe Goodwin, Esq., Assistant Judge of H.B.M.'s Supreme Court for China and Japan, of a daughter.

HALKET—On the 25th March, at Newcastle-upon-Tyne, the wife of Richard Webb Halket, Esq., Hankow, China, of twins—a son and daughter.

WEBSTER—On the 27th March, at Brighton, Lady Vassall Webster, widow of the late Sir Henry Vassall Webster, Knight, K.T.S., aged 69.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The excessive dulness mentioned in the last report still continues, the Chinese holidays being scarcely over and the teamen with few exceptions have not returned, so that hardly any transactions have taken place. No more Country Congous have come down and no Country Greens are expected, as the extreme prices paid in the North induce the merchants to have them forwarded there. In Canton-made Teas there have been sales of about 900 boxes Scented Orange Pekoe at 21½ taels, and the same quantity of Scented Caper at 11 taels. The stocks are uncertain.

AMOY.—The Amaranth having cleared for New York, the market may be considered closed for this season. Oolong and Ankoi: 1,666 pkgs. have been settled during the last few days at $15 to 29 per picul for fair Ankoi to good cargo Oolong. These rates show no change on previous quotations. Arrivals, sales, and stocks to date are:—

	This Season.	To same time last year.
Congou	.. 36,180 pkgs.	41,515 pkgs.
Ooolong and Ankoi	.. 96,106 „	108 807 „
Pl. Or. Pekoe ..	.. 1,476 „	1,348 „
	Settlements.	Stocks.
Congou	.. 36,180 pkgs.	Nil.
Oolong and Ankoi	.. 95,225 „	891 pkgs.
Pl. Or. Pekoe ..	.. 1,406 „	70 „

FOOCHOW.—The only settlements to report are: Congou, 280 chests and 125 half-chests at 10 to 16 tls.; Pekoe, fair even leaf, 100 chests at 26 tls. Total sales and contracts of Congous since May 8, 1865, and stock on 23rd February, 1866:—Dust and broken leaf, 76,756 chests; common to good common, 78,208 chests; flavory to good flavory, 308,378 chests; second-class Kaisow, 73,062 chests; good to fine, 45,765 chests; finest, 7,758 chests; total, 589.937 chests.

SHANGHAI.—Black Teas: Two chops of Hohow at 19 taels, one chop of Oonam at 22 taels, and three parcels of Oopack Dust at 9¾ to 12½, taels, in all 2,100 chests, comprise the settlements for the fortnight. Reshipments have been only 160 chests, and the stock is reduced to 700 chests. Total shipments from 1st June to date (including Hankow reshipments) 268,000 chests, against 71,500 chests at same date last year. Quotations are:—Hohow, common to good, 19 to 22 taels; Oonam, common to fair, 21 to 24 taels; do., good, 26 to 27 taels; Ningchow, fair to good, 26 to 30 taels. Green Teas: Owing to the intervention of the Chinese holidays business has been almost suspended. The only transaction has been the purchase of two small chops, and holders continue firm for previous rates. Arrivals have been trifling, and the stock remains much as last stated. Settlements have been 414 half-chests Fychow at 40 taels, and one chop local packed at 30 taels. Reshipments have not exceeded 800 half-chests and the stock consists of 22,000 packages Fychow and Moyune and 2,000 half-chests local packed teas. Total shipments from 1st of June to date—244,500 half-chests, against 187,600 half-chests same date last year. Quotations are:—Gunpowder: Fychow and Moyune, cargo, 35 to 40 taels; superior, 42 to 50; fine, 52 to 60; finest, 65 to 75 taels. Imperial: Cargo, 32 to 34 taels; superior, 36 to 42; fine, 44 to 48 finest, 50 to 54 taels. Young Hyson: Cargo, 24 to 28 taels; superior, 30 to 38; fine, 40 to 46; finest, 48 to 55 taels. Hyson: Cargo, 32 to 40 taels; superior, 42 to 50; fine, 52 to 60; finest, 62 to 75 taels. Twankay: Cargo: 17 to 20 taels; superior, 21 to 24; fine, 26 to 28; finest, 28 to 30 taels.

HANKOW.—The latest date is the 13th instant. There had been no arrivals of tea from the country, but a small quantity of Dust (contract) had been shipped to Shanghai. Total shipments to date: 678 chops or 327.700 chests or 33,195,600 lbs., against 752 chops or 373,900 chests or 37,337,300 lbs. to same date last year.

KIUKIANG.—Black Teas: The settlements comprise two small chops, one of 168 chests Hohow at 14 taels, and the other of 448 half-chests, Ningchow at 23 tls. Total shipments to date—119,300 chests o 9,217,500 lbs., against 120,800 chests, or 9,670,600 lbs. to same date las year. Green Teas: In these kinds there were no settlements to report, and musters had not been generally shown, the teamen preferring to ship direct to Shanghai. Quotations accordingly are nominal. 3,200 packages had been shipped, chiefly contracts, and the stock had increased to 13,000 half-chests, against 134,000 at same date last year. Shipments, however, exceed last year's by 58,000 packages. There is said to be but little more to come forward, and the total production will probably be 80,000 to 90,000 packages short of lost season's. Quotations were—Fychows and Moyunes common to fair, 30 to 38 tls.; fine to finest, 39 to 43 tls. Total shipments to date—124,200 half-chests or 7,453,400 lbs., against 66,200 half-chests or 3,908,300 lbs. at same date last year.

YOKOHAMA.—Since the last report the tea market has been quiet, the settlements for the fortnight amount to about 2,000 piculs for the American market. Prices are about the same as last quoted, and during the past few days nothing has been done at all in consequence of the approach of the New Year holidays. The Japanese, however, are very firm in their demands, and refuse to accept lower prices for their produce. The quotations are:—Fine, $36.00 to 38.00 per picul; Good Medium, $31.00 to 35.00; Medium, $27.00 to 30.00: Good Common, $24.00 to 26.00; Common 20.000 to 23.00; Ordinary, $12.00 to 20.00. The stocks are estimated at about 1,500 piculs.

RAW SILK.—The quantity of Raw Silk shipped for Europe by this opportunity is 180 bales, and 2 cases for Southampton, and 87 bales for Marseilles. 240 cases are taken for Bombay.

CANTON.—Very few settlements have taken place during the fortnight, and all kinds are now very difficult to obtain. There still remains in stock a small quantity of the commoner descriptions, which are reported to be wanted for native consumption. The stocks are very light, amounting to about 350 piculs. Quotations are:—Lack-low, $635 per picul; Cumchuck, $635.

SHANGHAI.—Owing to the Chinese holidays having caused a cessation of business, there are no transactions to report since the last report, so that quotations are purely nominal at former rates, the only alteration being the advance in exchange. Total settlements since 1st January. Chinas, 1,600; Japans, 1, 844. The quotations are—Tsatlees, No. 1, Tls. 650 to 655 per picul; No. 2, Tls. 630 to 635; No. 3, Tls. 610 to 615; Taysaams, No. 1, Tls. 530 to 540; No. 2, Tls. 500 to 510; No. 3, Tls. 460 to 470; Yuenfas, No. 1, Tls. 580. Stock, 1,000 bales.

YOKOHAMA.—The advices of the European mail of December 12th and 19th had no effect on prices. On the contrary, the native holders have gradually become weaker with the approach of the native holidays, as by this period they are in want of money to settle their accounts, and in several instances purchases even below former quotations have been made. The decline on former prices has however been less considerable than could have been anticipated, owing to the native holders having been able to secure considerable amounts in advance for silk deposited with foreign houses. In Mybash, extra qualities become scarcer as the season advances, and we can hardly look for any arrivals of magnitude before the new campaign. The majority of purchases for the fortnight consists of Mybash of current and inferior quality. Arrivals for the fortnight are 286 piculs. Settlements (included deposited silk) 538½. Stocks in holders' hands are 100 to 200, but, with what is deposited in foreign godowns against advances, may be called 700 piculs. The quotations are:—Ida, medium, $800 to 850; do., inferior, 850 to 870; Mybash, best parcels offering, 920 to 990, and medium, 820 to 870; Sinchu, inferior, 760 to 890; Oshio, best, 850 to 880; do., medium, 800 to 820; Sodai, best, 820 to 850; Coshu, best, 750 to 770.

DRUGS, &c.—CANTON.—Cassia Lignea: Quotations $18.60 to 18 35, butmerely nominal, as there are no stocks. Cassia Buds: $42, dull of sale, and only 50 piculs. Galangal: $2 to 2.50, at which prices 300 piculs remain on offer. Cassia Galls: Nominally quoted at $18 to 19. Star-anniseed and Essential Oils: None. Vermilion: $38½ per box of 50 catties. Rhubarb: Without fresh supplies and no transactions.

Digitized by Google

Musk: A recent arrival of 20 catties might perhaps be obtained at somewhat reduced terms.

CAMPHOR.—HONG KONG.—The previous reported stock of 2,000 piculs, Formosa, turns out to be only 1,500 piculs, of which 450 piculs have been sold at $26 packed, leaving a stock on the market of about 1,000 piculs for which the same price is asked.

COTTON.—HONG KONG.—The effect of the Chinese new year has not passed off, and the market is hardly open. Sales have consequently been very small, not exceeding about 1,000 bales—Bengal at $22.50 to 24.50, and 2,000 bags China sorts at $26.50 to 29. A recent arrival of 1,500 bales from Bombay was not of a good quality. Holders are firm, the Calcutta supplies having been checked, but renewed activity is expected before long. Quotations—Bengal, $22.50 to 25; Bombay, $23 to 25; Chinas, $26.50 to 29. The stock of Indian cotton is estimated at about 25,000 bales, and that of China sorts at 15,000 bags.

CANTON.—A further rise has taken place in this market, and a good business has been done considering the time of year. The settlement for the fortnight have been 140 bags Shanghai at 20 to 21½ taels, 200 bags Ningpo at 21 to 21½ taels, 650 bags Shantung and Tientsin at 20½ to 21½ taels, and 680 bales Bengal at 16¼ to 20 taels. The stock amounts to about 4,000 bags China Sorts, and 1,600 bales Bengal.

AMOY.—Northern Cotton: Arrivals from Chefoo have tended to lower the market, but we do not expect any material decline. Quotations, fair to good Shanghai, $28¼ to 30¼. Chefoo, $29 to 31. Ningpo and Tientsin, $29¼ to 31¼. Stock in native and foreign hands 5,381 bales. Bengal Cotton: Has been sold at $25½ per picul, and is now worth $24 to 26 per picul. Stock 150 bales.

SHANGHAI.—Two vessels have cleared with 9,648 piculs tor Liverpool, and there are three more on the berth; the market remains steady at 19 to 20 taels per picul.

CHINA IMPORTS.

HONG KONG.

GREY SHIRTINGS.—About 1,500 pieces of the reported clearances were sold at auction on underwriters' account, and 4,000 pieces "to arrive." 7 lbs., $4.20 to 4.25; 8 lbs. 4 oz., $4.75 to 4.90. White Shirtings: 1,000 pieces were sold at auction as damaged goods. T-Cloths: Sales include 500 pieces of 5 lbs. goods. American Drills, &c: None here. Quotations nominal.

WOOLLENS.—Have been neglected during the fortnight. Quotations are:—Spanish Stripes, $0.80 to 1.10; Long Ells, H Scarlet, $10.50 to 10.75; HH Scarlet, $10.25 to 11.0; Assorted, $10 to 10.50; Camlets, S, $23.50 to 23 80; BBB, $24.50 to 25.50. Deliveries small.

METALS.—Nail Rod Iron has been in good demand. Lead has attracted less attention, but holders are nevertheless very firm. 1,300 piculs have found buyers in Canton. Quicksilver: No sales reported.

COALS.—There are no sales of English or Welsh Coal to report. Australian and Formosa Coal have found buyers at high rates.

RICE.—Has been in good demand amongst Chinese, and clearances compare favourably with last fortnihgt's. 83,000 piculs of reported sales were Saigon grain.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.		
At Shanghai (per Tael.)	6 ditto	6s. 4¼d. to 6s. 4½d	6s. 4¾d. to 6s. 5d.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Amsterdam: Feb. 3, Batavia; from Rotterdam, 13, Maria.

At SHANGHAI.—From Liverpool: Feb. 11, Locket; from Cardiff, 9, Whampoa; 12, Wynona; 13, John Bunyan; 17, Nelly, Winna; from Swansea, 11, James Wishart; 9, Moldavian.

REPORTED BY TELEGRAM.—From London: March 2, Min; 12, Taeping.

At HONG KONG.—From England: Feb. 16, H.M.S. Serpent.

REPORTED BY TELEGRAM.—From Rangoon: March, Ariel.

At MANILA.—None.

At SINGAPORE.—From London: March 2, Belle of Southesk; from Liverpool, Feb. 23, Cambrian; from Cardiff, 24, Pieter Adolf.

DEPARTURES.

From YOKOHAMA.—For London: Feb. 10, Medina: For New York: 10, Louisa Bragington.

From SHANGHAI.—For London: Feb. 14, James Shepherd; for Liverpool: 11, Empress; 12, Aerolite; for New York: 13, Catalpa.

From FOOCHOW.—For New York: Anglo Saxon.

From HONG KONG and CANTON.—For Havana: Feb. 19, Hong Kong.

From MACAO.—For London: Feb. 13, Queen of the Age; 23, Emilie; for Havana: 11, Constantin; 14, Guadaloupe.

From MANILA.—For New York: Feb. 13, Endeavour; 14, Santee.

From SINGAPORE.—For London: Feb. 24, Golconda; 26, Jane and Anna (via Penang); For Falmouth: 24, Rio de Janeiro; 27, Spy; for New York: March 1, Apodina; for Boston (via Penang): 8 Orpheus.

VESSELS LOADING.

At YOKOHAMA.—For New York: Spirit of the Deep.

At SHANGHAI.—For London: Jubilee. For Liverpool: Scawfell, Maiden Queen.

At FOOCHOW.—None.

At HONG KONG and CANTON.—For London: Fort Regent. For New York, Eastward Ho.

At MANILA.—For London: Margaret Wilkie. For New York: Enock Train.

At SINGAPORE.—For London: Moneka, Como, Peter Adolph. For Liverpool: Fortuna. For New York: Orpheus.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: £3.

SHANGHAI.—Rates for the Coast remain firm, and available vessels in port are not sufficient for the demand. An improvement is expected in home charters. To London and New York the rate is £2. 10s. per ton, and to Liverpool £2. 2s. 6d. to £2. 5s.

HONG KONG AND CANTON.—The amount of tonnage in harbour is rapidly diminishing, and the increasing inquiry for small vessels induces the masters to look for still higher rates. In home charters a good demand from the Philippine Islands is to be reported, and some settlements have taken place at £3. 10s. to £4 per ton. For London direct the Fort Regent has been put on the berth at £2. 15s. per ton. For the United States the rate remains at £2. 10s. According to the circular of George Holmes, the estimated number of disengaged vessels in harbour is 25, representing 11,653 tons.

SINGAPORE.—The demand for vessels has considerably diminished, and the business done in charters has been small, with a gradual decline in rates. Vessels on the berth for home are getting £1. 10s. per ton for tin, £2 for gambier, and £2. 10s. light cargo.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND AND CONTINENT TO CHINA, &c.— Feb. 12, Albert Victor, Liverpool to Singapore; 13, Black Prince, London to Hong Kong.

From CHINA, &C., TO ENGLAND AND CONTINENT.—Feb. 12, Uranus Macao to Hamburg: Roslin Castle, Singapore to Liverpool; 13, Engel, Hong Kong to Liverpool; 14, Baron Kelner, Macao to Havana; Santa Maria, Manila to Spain; 19, Antoinette, Macao to Havana; 22, Leontine, Singapore to Falmouth; 25, Felix, Singapore to Bordeaux.

From CHINA, &C., TO UNITED STATES.—Feb. 14, Fritz and Anton, Singapore to New York; 16, Quick, Japan to New York; 21, Constantia, Amoy to New York; 25, Endeavour, Manila to New York.

CASUALTIES.

The De Hoop (van Duyn) sailed from Batavia on the 8th of September for Shanghai, and has not since been heard of.

COMMERCIAL POSTSCRIPT.

At the annual meeting of the Delhi and London Bank, the surplus was stated at £27,176, from which two dividends have been declared by the board, making together 9 per cent. for the year, free of income tax, leaving £4,676 to be carried forward. The reserve fund stands at £44,175.

DEPARTURES NOT INCLUDED IN THE TABLES.—April 7, from London for Singapore, St. Andrew's Castle; 9, for Yokohama and Nagasaki, Minnie; 6, from Cardiff for Hong Kong, Glenlee; 7, from Shields for Galle, Cour de Lion; March 10, from New York for Shanghai, Christopher Hall, Lota; 14, Antelope; 15, for Singapore, Powhattan; from Hamburg for Singapore, Luneborg; 7, from Cardiff for Shanghai, Bernhard Carl; for Hong Kong, Birch Grove, Amazone; for Singapore, Dapello; from Liverpool for Galle, Constance; from Shields for Galle, Semiramis; 9, for Singapore, Marie Louise Antoinette; 10, for Chins, Top Smit; 11, from London for Colombo, Neville; 4, from Cardiff for Shanghai, Red Deer.

CLEARED FROM NEW YORK.—March 23, steamship Varuna, Whiting, for Hong Kong.

CASUALTIES.—The cargo of the S. van Heel, Dietz, from Batavia for Rotterdam, which vessel put into Mauritius Feb. 22, having sprung a leak, was more or less damaged and would be sold.

SPOKEN.—Labrador, Manila to Liverpool, Jan. 8, in the Straits of Sunda; Marquita (barq.), Penang to London, 54 days out, Feb. 8, 35 S. 24 E.; Johann Christoph, from Foochow, Feb. 19, 9 S. 14 W.

MISCELLANEOUS.—The Admiralty have invited tenders for the conveyance of 139 tons Naval Stores to Trincomalee, and also of 15 tons Barrack Stores to Hong Kong, both from the River Thames.

APPOINTMENTS.—The Queen has been graciously pleased to appoint Thomas Carew Hunt, Esq., now Her Majesty's Consul at Stockholm, to be Her Majesty's Consul at Bordeaux. The Queen has also been graciously pleased to appoint Peter Barrow, Esq., now Her Majesty's Consul at Nantes, to be Her Majesty's Consul at Kertch. The Queen has also been graciously pleased to appoint Robert Charles Clipperton, Esq., now Her Majesty's Consul at Kertch, to be Her Majesty's Consul at Nantes. The Queen has been graciously pleased to appoint Randal Callander, Esq., now Her Majesty's Consul in the Philippine Islands, to be Her Majesty's Consul at Stockholm. The Queen has also been graciously pleased to appoint George Annesley, Esq., to be Her Majesty's Consul at Hamburg. The Queen has been graciously pleased to appoint Harry Thomas Alfred Rainals, Esq., now Her Majesty's Consul in the Island of St. Croix, to be Her Majesty's Consul in the Philippine Islands. The Queen has been pleased to approve of M. F. von der Heyde as Consul at Singapore for His Majesty the King of Prussia. The Queen has also been pleased to approve of Mr. Magnus Gideon as Consul at St. Helena for His Majesty the King of Denmark.

NAVAL APPOINTMENTS.—Surgeon: Peter M. Rae to the Acorn. Surgeon and medical storekeeper to the Melville Hospital Ship at Hong Kong Geo. B. Newton.

The London & China Telegraph.

LONDON, THURSDAY, APRIL 12, 1866.

CHINA.

A TELEGRAM dated Shanghai, 9th March, tells us that "the "Imperial troops have gained a great victory over the rebels in "the North. 50,000 of the latter are said to have been "slaughtered or captured." We know pretty well by this time what a Chinese victory is, and what is the real value of the imposing array of figures that is always presented to us in conjunction with one. When authentic news reaches us regarding this important action, we shall not be surprised to find that less than 50,000 troops were engaged on either side; and that this number included not only the killed and captured, but all those who ran away besides. Still, the tenor of this telegram, combined with a previous one similar in effect, and with intelligence that the last remnant of the TAIPINGS has been routed and dispersed in Kwantung, is sufficient to justify us in believing the star of the IMPERIALISTS to be still in the ascendant. All danger of an attack on Hankow is, we presume, at an end, and for the present we trust the NIENFEI panic will cease to be the leading feature in our China news. An entire cessation of such alarms is of course too much to hope for. What has become of the dismembered bands of TAIPINGS in Kwantung is not clearly indicated, and they may yet prove troublesome. There appears little danger now of their being able to effect a junction with the NIENFEI, or to co-operate in any way with the Northern rebellion. But should any portion of them make a descent on some small town on the coast and convert it into a centre for piratical operations they will prove a dangerous addition to the swarms of these pests that already prey upon the coasting trade. The aptitude possessed by Chinese of almost all classes for resorting to piracy is astonishing; discontented soldiers, discomfited rebels, and starving fishermen equally looking on it as a perfectly legitimate resource when their ordinary avocations fail.

As we go to press we are presented with another telegram from China, dated Hong Kong, 27th of February. This informs us that "KAN WANG, leader of the NIENFEI, was shot on the walls of Krayinchow." It is a great pity that these messages are not forwarded by persons properly conversant with the subjects they have to deal with. Of course, the personage alluded to had nothing whatever to do with the NIENFEI, but was the soi-disant K'ANG WANG, who headed the remnant of Taipings above alluded to; and the city with the mysteriously spelt name is meant for Kia-ying-chow. We now see that the telegram which reached us a fortnight ago announcing that "the leader of the NIENFEI had been shot" conveyed an entirely wrong meaning, and should have been the first intimation of the death of the TAIPING chief.

JAPANESE SILKWORMS' EGGS IN FRANCE.

IT was only the other day that the arrival of Japanese seed in France was looked forward to with feverish anxiety, and the fear that the premature warmth of the weather might cause the worms to appear before they could be provided for was really intense. When the Tycoon's present to the Emperor of ten thousand cards of eggs arrived, an experienced person was sent to examine the precious packages and see that no mischief had occurred, and M. Leon de Rosny, as we mentioned at the time, was commissioned to go and read off the Japanese marks on the cards. The eggs were then worth twenty francs a card, that is to say, sixteen shillings an ounce, the breeders were clamourous, as was said, for the eggs, and, therefore, ten thousand cards, or ounces, were a matter of very serious moment. The eggs were found not only to be unhatched, but in excellent preservation; the Japanese inscriptions were duly translated and recorded by the learned professor, and so far all being satisfactory, the market was open and eager buyers expected, when suddenly the price went down from twenty francs, not to fifteen, or ten, or five, but to *one* franc per card, and at the present moment buyers are not to be found even at that very low figure, a price at which French eggs are commonly sold even in the most prosperous times. The dismay amongst importers is great, as may be supposed; large importations have been made by many persons, some acting in a pure spirit of philanthropy, others in the ordinary spirit of commerce, to supply a demand that no one dreamed would be so soon satisfied; and now the stock on hand which ought to be at the present moment in the hands of the breeders is suddenly diminished in value to a rate that will scarcely pay for the freight. The market has been most completely glutted, and it is said, and that upon the very best authority, that the case is the same in Italy as in France. It is a commercial accident, which, perhaps, was not to be prevented, and one which is not unlikely to turn out serious for the future should a scarcity again occur and the breeders be again dependent on the importers. This extraordinary and sudden change in the state of affairs has not arisen from the cessation of the disease amongst the worms in France, for we have it direct from one of the men best informed upon the subject, and who was inclined to the belief in an amelioration, that although there was a decided improvement in some districts last season, the contrary was unfortunately the case in others; and as the breeding season has not yet commenced, except in the most southern parts of the country, no change can have taken place this year. There remains the very serious question whether the growers of the mulberry trees and the breeders of the worms in France may not have been so disheartened that many of them have given up the hope of profitable employment, and have turned their attention to other matters. We can scarcely regard this as likely to have taken place to any great extent, but the supposition is quite within the range of possibility. When the Emperor found himself in possession of ten thousand or more cards of seed under such circumstances, a very serious difficulty arose; the sale or the giving away of such a mass of eggs would be equally ruinous to other holders, who would find their stock absolutely worthless. A consultation was therefore held upon the subject, and it was wisely determined that the eggs in the hands of the Government should not be sold, but should be distributed through the prefects to such persons as wanted them for purely experimental and scientific and not for a commercial purpose, or to such small breeders as were positively too poor to purchase eggs at any price. The occurrence furnishes one of the most curious instances of the effect of a deranged industry, and a commercial leap in the dark, that we remember ever to have met with, and the whole to the causes which have led to such a result will probably never be brought to light. The French Government has appointed M. Guerin Meneville, the celebrated entomologist and introducer of the Ailanthus and other worms into France, to visit the silk districts and report on the condition of the worms and upon the industry in general, and it is to be hoped that his scientific knowledge and practical experience may throw some light upon the disastrous but mysterious disease which has given rise to so much distress and so many difficulties.

EUROPEAN TRAFFIC IN EGYPT.

M. LEON CAHUN, of Cairo, has published an account of the movement of Europeans towards and across Egypt, from which we extract the following as likely to interest our readers, leaving to M. Cahun the responsibility as regards the accuracy of the information. During the past year 4,283 vessels entered the ports of Alexandria, or twenty-six more than the total of the preceding year. The English movement is represented at Alexandria by 637 vessels, which carried 3,677 persons to Egypt, and 4,842 for transit across that country. Of these 637 vessels, however, only 462 were under the British flag. M. Cahun expresses his astonishment at the small difference between the number of English going to Egypt as compared with those on their way to India, China and Australia, and he says:—"1,165 passengers more for Egypt, and that country alone would receive as many English as the whole of the extreme

Digitized by Google

East." He forgets that all the English going to India, China and Australia, do not go by the overland route, and thus the comparison becomes practically worthless. France is represented by 248 vessels, which carried, we are told, "9,354 persons to Egypt, and 2,543 military in transit." It would appear by this that no Frenchmen except soldiers crossed Egypt for the Far East, which certainly is not the fact; however, the number was probably but small, and we may assume that the number of immigrants into Egypt from France was more than double the number from England. The immigration from Turkey is given at 8,527 persons, that from Austria at 6,721, and from Italy 3,594. This is, however, a great blot in M. Cahun's account; he says nothing of the numbers quitting Egypt in each case; it is probable that the completion of the account would not much alter the relative numbers, but it might make a considerable change in the totals. As regards the relative increase and decrease of the navigation of various countries, we are told by M. Cahun, with relation to Alexandria, that the vessels under the Egyptian flag fell off to the extent of 72 ships as compared with 1864, that those under the Ottoman flag were less by 104, and those under the French by 14 ships; while, on the other hand, the English showed an increase of 139, and the Greek of 108. The totals for England were 932 in 1865, against 793 in 1864; these totals, unlike those given above, include all vessels, whether employed in the coasting trade or otherwise. As regards commerce, M. Cahun says:—"The tonnage of 1865 was 1,350, 876, and the total number of passengers 73,990, while the tonnage of 1864 was only 1,334,837, and the number of passengers 56,612. Steam navigation increased also from 966 to 1,145 vessels." M. Cahun draws the following inference from the facts and figures given:—"If one compares this vast and active circulation of merchandise, of travellers and of men of business with the small movement of soldiers, if one notes the fact of the entrance of only 25 steam and 2 sailing ships of war into the ports of Alexandria during the year 1865, it will be seen that progress is not a word without meaning, and that the maritime companies form too many knots between Europe, Egypt and the East for any sword to sever." Perhaps the logic of the conclusion is not quite complete, but let us hope at any rate that the inference is a correct one.

THE MORTALITY OF TROOPS IN HONG KONG.

IN the House of Commons on the 10th inst. Colonel NORTH nominated the members of the Select Committee on this subject, moved for by him before the Easter recess. The Committee will consist of seventeen members, namely, Colonel NORTH, the Marquis of HARTINGTON, Lord HOTHAM, Mr. BAXTER, Mr. ADDERLEY, Lord F. CAVENDISH, Mr. ROEBUCK, Colonel P. HERBERT, Mr. DALGLISH, Lord H. PERCY, Mr. CALTHORPE, Major ANSON, Lord J. HAY, Mr. TREVELYAN, Sir H. VERNEY, Gen. DUNNE, and Major O'REILLY. The names seem well chosen, and likely to form a thoroughly efficient committee; so we may hope that in their hands all the details of this disgraceful affair will be properly sifted.

No appointment has yet been made of a Bishop for Hong Kong, although three other Colonial Bishoprics which had lately become vacant, have just been filled up. The post of Attorney-General at Hong Kong, vacant by the appointment of Mr. Smale as Judge, has yet to be filled.

THE *Gazette* of the 3rd April contains an official notification of the appointment of Mr. Randall Callander (lately nominated Consul at Manila) to be Her Majesty's Consul at Stockholm. The same Gazette notifies the appointment of Mr. Harry T. A. Rainals to be Her Majesty's Consul in the Philippine Islands.

According to the Paris *Patrie* of the 10th inst., a despatch from Yokohama, dated March 5, announces that the Japanese Government have conceded the principle of a revision of the treaties made with European Powers. Several clauses of an advantageous nature for foreign commerce will, by common consent, be introduced into the treaties.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, April 8.

The First Chamber of the States General met again on the 4th, but the debates are, and will be, totally unimportant. Several Bills will be voted by our patricians, and then they are to give place to the members of the Second Chamber, who will, no doubt, furnish very interesting discussions on colonial and economical matters.

The Minister of the Colonial Department, Mr. Fransen van de Putte, has recovered from his illness. He is now able to work with his Secretary-General every day. It is feared, however, that he will soon fall again into ill-health, if the true reason for his sickness was—as the Liberal papers told us—the too severe attacks of a few ribald journals. He will have to fight very important battles. Not only has the Indian Budget been laid before the members for the first time, but also the reply of the Government to the report of the sections about the Culture Bill. Neither document is yet obtainable by the public. Much sensation was caused by the protest of the Sourabaya Chamber of Trade and Industry against the Culture Bill. The last mail brought the Address of this Chamber directed to the King, begging his Majesty to take the Bill into further consideration, urging that the sugar industry of Java would be ruined by its enactment.

Religious doctrine commences again, alas! to mix itself with our politics. The Orthodox Protestants and the Roman Catholics are making common cause. They desire—no, they are determined, that our law about lower class instruction shall be altered in a Biblical sense. "Should these laws remain unaltered (they state), our Christian population will soon be a horde of unbelievers." They desire that the communal schools shall be abolished, that no free instruction shall be given, and that every sect shall maintain its school, with the Bible as the standard book. This question threatens to disturb the peace of our country for a long period. The anti-progress party already do all they can to reinforce their ranks in Parliament, and it is certain that Mr. Groen is again to be their leader. He will be a candidate at the next election for Gouda. Mr. Jonckbloet, M.P., published some days ago a very important work about this question. His *Schoolwet Agitatie* (agitation about the laws of instruction) is a warning for the Liberals as well as for the Tories to be on the *qui vive*.

On the evening of the 29th of March Mr. Floris Adriaan van Hall died at the Hague. Before, and since 1848, he has been three times minister. He was a statesman of great capacities, and was most daring in his political and financial administration. He was the man who saved our country from bankruptcy by his voluntary (?) loan of 147,000,000, but he was deficient in firm principles and convictions. He always stood alone, was the man of the moment, and adopted such politics as were fit for the moment. He created no school, and died at the advanced age of 76 years, without having any influence upon our present political condition.

Within a few days a commission will start for England to make arrangements with the British Government about the administration of our possessions on the West Coast of Africa. Messrs. C. J. M. Nagtglas, and H. A. Elias, both ex-governors of Dutch Guinea, will join this commission.

The measure adopted by the English Government, forbidding the importation of cattle for the English markets, has great influence on that branch of trade. The prices now paid here for all sorts of cattle have decreased 25 per cent. The cattle plague spreads more and more and every week, the *cordon sanitaire* is enlarged.

Louis Meyer, our eminent painter, well known to English amateurs, has died at Utrecht, at the age of 56.

The English mania for strikes and holding meetings to compel masters to increase wages has made its appearance here. In several branches of industry the masters have been obliged to grant the wishes of the workmen.

Prince Fredrick, Grand Master of our Freemasons, will celebrate his 50th jubilee within a few weeks. On that occasion he will resign, so that another person must be nominated for that important office. A monster banquet will be offered in the Crystal Palace at Amsterdam to the Prince and to all Freemasons of every nation on that occasion.

COMMERCIAL.

COFFEE.—The market is firm, but the private transactions are not of much importance; they include 3031 b. Maccassar, ex Schwinge, at secret prices; 394 b. Java, ex Henriette Gerardine, Susanna, and Dageraad; 1020 b. Macassar, ex Macassar, and 1270 b. Java, ex Madura, at 42½ c.; and 1106 b. Bali, ex Pudsey Dawson and Majestic, which were sold in auction at 28¾ to 29 c. The Trading Company delivered in the last month 85.590 b. This company will offer, on the 18th inst., in public auction, 28,200 b. Java and 6,800 b. Padang. The stock of the company consists of only 425,072 b. against, 671.700 b. in 1865, while the whole stock amounts to 495,400 b., against 681,800 b. in 1865.

Digitized by Google

SUGAR—(Raw). The market closes rather dull, and there is no inquiry at all. The total stock of raw sugar amounts to 44,518,378 ks.

RICE—(Uncleaned). The 13,000 b. (dam.) Java tafel, which were imported, via Havre, per Malabar, and offered in public auction, were sold at 3f. to 15½f. The prices paid were in general very high, because the quality was very inferior; the greatest part was sold for outward ports.

SPICES.—There was rather more demand for Nutmegs for export, and 83 to 84 c. was willingly paid for No. 1; No. 2, however, was offered at 78 to 79 c. Mace E. 98 c., with much inquiry, but holders decline to operate under 99 to 100 c. Cloves. No. 2, with rather more demand, and 27½ to 28 c. is willingly paid. The stock of the Trading Company is as follows:—

	Nutmegs.	Mace.	Cloves.	Cinnamon.	Pepper.
31 March 1864 ..	1016 cs.	646 cs.	—	1378 fard.	3271 bn.
31 „ 1865 ..	2683 „	696 „	1662 cs.	1155 „	1619 „
31 „ 1866 ..	1331 „	777 „	— „	1783 „	2589 „

TEA.—The market is firm, but there are no transactions to report. On the 25th inst. 2484 ¼-chests and 232 ½-chests Java will be offered in auction privately. The cargo, direct from Foo-chow-Foo, ex Thurso, consisting of 1626 ¼-chests 1519 ½-chests Congou, arrived in the English Channel.

BANCA TIN.—Notwithstanding that the prices are lower than since 1851, there is no confidence for this article; there is no demand either for export or speculation. 1000 slabs only were sold at 50½f. The Trading Company's stocks amount to 219,514 slabs, against 198,968 slabs in 1865, of which respectively 48,054 and 150,918 slabs are unsold.

TOBACCO.—The market is dull; the trade is occupied inspecting the parcels which will be offered on the 24th inst. Stocks, 3894 b. Java; 3567 b. Manilla.

RATTANS.—With a good demand. The sales include 5032 bundles per Majestic; 75 pic. per Madura; 531 bundles per Dageraad; 215 pic. per Brouwershaven.

INDIGO.—There was a good demand, and 120 chests Java were sold at firm prices. The annual spring auction of the Trading Company is increased with 380 piculs.

COTTON.—In consequence of the reports from the principal markets, the public sale, which was held to-day by the Trading Company, went off very dull, say from 14 to 4c. under the valuation. 1000 b. Tinnevelly good fair were paid with 81½ to 83c.; 400 b. sawginned Dharwar fair, 86½ to 89½c.; 493 b. Broach middling fair, 80½ to 82½c.; 235 b. Dhollerah fair, 83¾; 101 b. Oomrawattee good fair, 90 to 90½c. The stock comprises 5007 b. E.I. and 200 b. Japan.

HIDES.—The East Indian Rinder and Buffalo hides which were offered were sold at very firm prices, and the stock in the first hand is decreased to 1654 pkgs. Batavia Buffalo.

ARRACK.—There is a good demand, and the market is very active, in consequence of the decreased stock at Batavia. The transactions include 75 casks ex Ocean Pearl; 23 casks Sourabaya, ex Cossipore; 150 casks Batavia, ex Wallaroo; 72 casks Alcohol, 32 casks Batavia, ex Anna; 12 ¼ and to 50 ½-casks Batavia, ex Lady Ann.

MONEY.—The Bank discount is still unaltered, and in the open market money is very abundant, and large amounts are easily to be had at 5 to 5⅓ per cent. The stock market is dull in consequence of the political condition in Germany. Dutch 2½ per Cents., 60¼; 3 per Cents., 72; 4 per Cents., 93⅛; Trading Company, 145⅞; Dutch Rhenish Railway, 106; Rotterdam Bank, 101. The Rotterdam Bank published its annual report. A dividend of f.14.50—say 11 3-5ths procured upon the amount furnished—will be given. The transactions here amounted in the current of the year to f.214,957,670.37½, and at Batavia f.13,857,940.52; the gross profit was f.489,415.93, net f.356,229.79½

CHANGE.—London, 3 months, f.11.70, 2 months, f.11.74; short, f.11.84½. Paris, 3 months, f.46.57½, 2 months, f.46.72½; short, f.46.95 Hambro, 3 months, f.34 80, 2 months, f.34.90; short, f.35.20. Bremen, 3 months, f.189.40.

SHIPPING.—ARRIVALS.—March 24, at Brouwershaven, from Batavia, Vooruit; from Macassar, Macassar; 25, from Batavia, Vesta; at Zierikzee, from Batavia, L. J. Enthoven; 26, at Texel, from Batavia, Christina, from Banjoewangie, Anthony van Hoboken; from Batavia, India Packet; 29, at Texel, from Padang, Princess of Wales; from Decima, Haalstroom; at Brouwershaven, from Tjilatjap, Jacobus; 30, from Banjoewangie, B. D. Metcalf; from Batavia, Copernicus; at Texel, from Soura, baya, Lady Alice; April 1, at Texel, from Tjilatjap, Generaal Michiels; at Brouwershaven, from Batavia, Elizabeth; at Zierikzee, from Batavia, Ternate; 3, from Singapore, Henriette Gerardine Susanne; from Melbourne, Francina Wilhelmina; 4, at Texel, from Batavia, Lady Ann; from Passaroeang, Gleaner.

PASSENGERS INWARD.

From JAVA.—Per Generaal Michiels: Mr. Rynders. Per Duelwyk: Messrs. A. Lens and family, H. v. d. Wulp and family, H. Naus and family, J. Vriemoet Drabbe, two brothers Jacometti.

PASSENGERS OUTWARD.

For JAVA.—Per Waterloo: Messrs. Goudriaaz and family, Heyning, Veltman and family, Ammedisse and family, Boeke. Per Willem Poolman: Messrs. Ranzow and family, Bouwensch and family, Toepoel and family. Per Meulen: Mr. Warren, Mrs. Meyer.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, April 7.

According to official returns received at St. Petersburg the total value of the goods brought to the annual fair at Jakutzk amounted to 841,999 roubles, of which 593,900 were sold. The principal article was fur, of which there was on show to the value of 221,253 roubles, and the whole was sold at good prices. Then came cotton piece goods of the value of 180,887 roubles, and for 109,290 roubles sold, Chinese produce (value 114,376 roubles brought, and f r 63,569 roubles sold), woollen cloth (46,086 roubles brought, and for 28,077 roubles sold), corn (26,637 roubles brought and all sold), silk manufactures (21,681 roubles brought, and for 15,933 roubles sold), the remainder consisting of various articles of minor importance, together with a considerable quantity of horses and cattle. The singular misproportion in the quantity of some articles brought to the fair produced a curious misproportion in the prices obtained, for whilst sold at 1 rouble 10 copecs to 1 rouble 20 copecs per lb., and sugar at 15 to 16 roubles per pood, the flour nown as kruptschatka fetched no less than 30 to 33 roubles per pood. Of other sorts of flour first quality was altogether wanting, and seconds sold at 20 to 25 roubles per kool of 4 poods. The small stock on show was soon bought up by the local dealers, whilst the poorer classes, who are dependent for their supplies of rye on the Government stores, have to pay for it 1 rouble per pood.

The difficulties to which the Russian missionaries are exposed in their endeavours to Christianise the Buriates are set forth in the report published by the Trans-Baikal missionary, Simeon Stukowas, of his experiences last year. The Buriates, he says, entertain a wonderful antipathy to changing their religion, the women especially, so that it is almost hopeless to attempt to convert them.

Siberian newspapers give the following account of the state of the fur trade in that province:—"About the beginning of November the traders proceed up the Angara, and every one tries to be the first, as they then have a better chance of making good bargains. As the fur traders had received information that at the last year's Leipzig fair squirrel skins were in great demand and fetched good prices, there was this season a keen competition for that description. But they were grievously disappointed, for the chase had been nearly a failure, so that hunters accustomed to bag 1,500 or 2,000 had not killed more than 150 or 200. This bad success was ascribed by some to a disease among the squirrels, whilst others maintained that they had retired to those recesses of the Siberian forests inaccessible to the hunters. The latter appears the most probable, because in some districts through which these little emigrants had to pass, considerable numbers were killed. Owing to their comparative scarcity the skins fetched the high price of 11 copecs each. Fox skins were abundant, and sold at 3 roubles each. Sables were scarce. It is difficult to procure those of the best quality, and but few of inferior. Marder skins realised 1 rouble each, ermine 25 copecs, and hare skins 5 copecs. Last year the stock of squirrel skins at Jenisseisk was more than a million and a half, but this year there is not a quarter of that number, and the wholesale traders bought them up of the hunters at 12 copecs each. The difficulty of obtaining them is so great that many have given up the business.

The first valuable present received this year by the Zoological Society of Hamburg is a young royal tiger, that arrived here last week by the steamer *Allemania* from New York. This beautiful animal comes from China, and is a present from Herr Pasedag, the Hamburg Consul at Amoy, who shipped it by a vessel to New York in the absence of a direct conveyance. A Chinese stag, also a present from the same gentleman, is announced to be on the road, and may be expected to arrive by one of the next steamers.

The Hanoverian brig *Bertha*, Captain Jacobson, after an absence in the Chinese waters of five years, arrived safely on the 27th ult. at Bremerhaven with a mixed cargo from Hong Kong.

By Royal patent, dated Berlin, March 30, 1866, Herr Conrad Gartner has been appointed Prussian Vice-Consul at Hakodadi. Mr. Eugene Butzow, Russian Consul at the same port, is promoted to the rank of Collegial Councillor.

COMMERCIAL.

In consequence of the uncertainty of political events and the supervening of the Easter holidays, the markets for all descriptions of goods have been all more or less affected, and present an unusual calmness at this generally busy time of the year. The sales of Coffee were not more than 20,000 bags, and prices could with difficulty be supported. Raw Sugar is quite neglected, and of Refined only 12,000 loaves changed hands. In Rice but little was done, but prices are well supported. Nothing has been done in any description of Spices. There has been some inquiry for Spelter, and the following transactions are reported:—

		Mks.	Sch.
1000	Centners in loco WH and PH at	16 ..	5

SHIPPING.—ARRIVED.—March 27, Gustav Adolph, from Whampoa; 28, Florentin, from Foo-chow; April 3, Woitzlava, from Macao.

SAILED.—March 25, Costa Rica, to Hong Kong; 29, Luneburg, to Singapore; 29, Flora, to Hong Kong; 29, Victoria, to Nicolayefsk; April 4, Louise, to Hong Kong.

LOADING.—At Hamburg: Alice, for Macassar, Hong Kong and Macao; Dorothea and Agathe Johanna, for Singapore; Peter Godeffray and Pudel, for Hong Kong; George Heinrich, for Hong Kong and Tientsin; Feiga, for Hong Kong and Shanghai; Schulze-Delisch, for Tientsin direct; and Hannover, for Shanghae. At Bremen: Johann Smidt, for Hong Kong and Singapore.

MISSIONARIES IN CHINA.—The *Pall Mall Gazette* has the following on this subject:—"Be courteous," says St. Paul; but those who are fondest of quoting the maxim do not always remember to obey it. The Rev. J. R. Wolfe, Missionary at Foochow, tells us in the last *Record* about his tour in the province of Fohkien. He has to sleep at a village where the inns are intolerable to a Western barbarian. After trying "the best hotel in the place," he and his friend walk out to a Buddhist temple which they had noticed as they came along. It is late at night; and the bonze is startled, as well he may be, at the sudden appearance of two "foreign ghosts." However, after a little parleying, he receives them hospitably;" and they spread their beds in the large room, "taking care" (says Mr. Wolfe) "to turn our backs on the huge image which was placed upon the altar, lest the priest and others present should imagine that we reverenced their idol." By-and-by Mr. Wolfe begins to lecture the onlookers. Let us hope they could not understand him; else he might have been fairly met by the retort, "Either keep clear of our temples, or behave in them as you would expect us to behave in an English church." Now fancy a Chinaman walking into Westminster Abbey to avoid a shower of rain, and insisting on keeping on his hat, or on sitting down with his back to the Communion Table and taking a quiet pull at his opium pipe, or else edifying the vergers with a discourse on the weak points of Christianity. Should we be satisfied with his explanation that he did it all on purpose, lest we should think he reverenced the Christian God? But the Chinaman, if he knew his Confucius, could not be guilty of such conduct. Buddhists, too, Mr. Wolfe ought to know, are not idolators, and no one has ever suspected them of Satan-worship, save certain Jesuit fathers, who explained the many points of agreement between Buddhism and Christianity by calling the former system a devilish counterfeit of the truth. But, idolators or not, the missionary should have respected their feelings when he sought their hospitality, and should have remembered, moreover, that he had the English good name in his keeping, and that it would be sure to suffer by a breach of propriety. Trade too often makes Englishmen coarsely regardless of the ways of Orientals; it is a thousand pities that religion should ever have a similar effect.

THE MALTA AND ALEXANDRIA TELEGRAPH.—The *Malta Times* of the 29th ult. publishes a correspondence which has lately passed between the President of the Malta Chamber of Commerce, Sir Victor Houlton, Chief Secretary to the Malta Government, Mr. G. Gibson, Government and General Superintendent of the Malta and Alexandria Telegraph, and the managing director of the lessees of the line, on the subject of the frequent interruptions in communications which have taken place on the Malta and Alexandria Telegraph Cable. The managing director states that the subject has already received the serious attention of himself and his co-directors, and encloses a preliminary prospectus of a new company, which will take over the present line, and lay a new cable between Malta and Alexandria. Upon this correspondence the *Malta Times* makes the following observations:—"The proposal is to lay an entirely new cable from Benghazi to Alexandria in deep water, as this is the part which has hitherto given all the trouble, and afterwards to carry a line from Malta or Sicily to Benghazi, which will thus duplicate the whole route. We have carefully inquired into the causes of interruptions on this line, and we find that they have all arisen from the small or main cable, which was originally designed and made for depths of from 1,000 to 1,500 fathoms' water—between Falmouth and Gibraltar—having, by the exigencies of the service, been laid in very shallow water along the rough coast of Barbary, and all the faults have been occasioned by the rocky bottom gradually chafing and sawing through the cable, where the water was so shallow as to have the power to move it, generally in about 20 fathoms' depth. In no case has any change been found in the condition of the cable otherwise than that caused by the mechanical action to which we have alluded, and we are assured by those who understand these matters that had the cable been laid in the deep water for which it was designed it would never have given any trouble, so that we look forward now with confidence to the completion of the deep sea section from Benghazi to Alexandria."

METRIC WEIGHTS AND MEASURES.—Sir John Bowring called the attention of the magistrates of Devon, at the quarter sessions just held at Exeter, to the desirableness of conveying to the public, through the local committees of weights and measures, the needful information upon the metric decimal system as legalised by the late Parliament. Earl Fortescue seconded the motion; and a metric standard was decided to be purchased, and the committee instructed to take the needful steps for making the system known. We hope the same steps will be taken by the magistrates of other counties.

IT is stated from Paris that the French Government has ordered the screw corvette *Minerve*, now fitting out at Brest, to proceed to Hong Kong to join the English and French forces now there in an energetic effort to suppress piracy in the Chinese waters.

A BALL-CASTING machine has been constructed at Berlin by M. Leonhard for the Tycoon. It is capable of manufacturing 12,000 rifle balls a day.

Monetary and Commercial.

The report of the Chartered Bank of India, Australia, and China, to be presented on the 18th inst., recommends a dividend at the rate of 5 per cent. per annum, which will leave £2,438 to be carried forward. The sum of £85,000 has been set aside from the reserve to provide for the losses incurred from the Indian failures during the crisis of last autumn. A meeting of the creditors of Messrs. Puget, Bainbridges, and Co., the private bankers, of St. Paul's-churchyard, who recently failed, is convened for the 10th inst.

The meeting of the Credit Foncier of Mauritius took place on the 28th ult. The accounts for the past year exhibit a net profit of £10,777, and a dividend was declared for that period of 7½ per cent., of which 2½ per cent. has already been paid. The balance to be carried forward is £484.

It is understood that the directors of the Oriental Bank, at the meeting to be held on the 19th inst., intend to propose a dividend at the rate of 10 per cent. per annum for the last six months of 1865.

After one year from this date the annual cost of the public debt will be lightened by more than half a million sterling. This is in consequence of the approaching termination of the annuity of £585,740 contracted in 1823 to be paid to the Bank of England for forty-four years, the last half-yearly portion of which will fall due in April, 1867. The expiring of this annuity, commonly know as the "Dead Weight," observes the *Times*, will not in any way affect the accounts of the Bank, the requisite reserve having always been made to reinstate the principal amount.

Sales of five-franc pieces have taken place for shipment *via* Marseilles, in the absence of bars, which are very scarce at the moment, both here and abroad. Mexican dollars are also eagerly taken for China, and the market here being quite bare of them, purchases have been made on the Continent at very advanced rates.

The Mexican dollars by the West India steamer have been sold, for China, at 60¼d. per oz., being an advance of ⅛d. from the last price. The small quantity of bar silver by the same opportunity has fetched 61⅛d., also showing a rise of ⅛d. since the last arrival. There is at present a steady demand for silver for shipment to the East, and both here and abroad supplies are very limited.

The biddings for £350,000 in bills on India took place on the 4th inst. at the Bank of England. The proportions allotted were —to Calcutta, £200,000; to Madras, £50,000; and to Bombay, £100,000. The minimum price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 2s. will receive about 4 per cent., and on Bombay at 2s. 0¼d. about 20 per cent; all above in full. These terms show an increase in the demand for means of remittance to the East.

It is curious to observe how American cotton is regaining its old ground in the British market. In the two months ending Feb. 28, this year, the United States sent us 570,735 cwt. of raw cotton, out of a total import of 1,154,122 cwt., leaving a balance of 583,387 cwt. supplied from other sources. In the corresponding two months of 1865 the United States sent 5,719 cwt. out of a total import of 811,601 cwt., leaving a balance of 805,882 cwt. supplied from other sources. The receipts from the Bahamas and Bermuda declined from 69,094 cwt. in the first two months of 1865 to 2,551 cwt. in the first two months of 1866; those from Mexico from 49,645 cwt. to 1,391 cwt.; those from Turkey from 23,345 cwt. to 13,616 cwt.; those from Egypt from 322,663 cwt. to 148,268 cwt.; those from China from 45,652 cwt. to *nil*; and those from miscellaneous countries from 39,398 cwt. to 17,926 cwt. On the other hand, the receipts from Brazil increased from 69,981 cwt. in the first two months of 1865 to 93,728 cwt. in the first two months of 1866; and those from British India from 186,104 cwt. to 305,907 cwt.

The amount of bullion by the P. and O. Company's steamer *Tanjore*, from Southampton on the 4th inst., was—in gold to Madras, £1,116; to Singapore, £4,050; to Malta, £30,000. In silver, to Calcutta, £59,000; to Singapore, £2,960; to Hong Kong, £49,000; to Yokohama, £500; to Shanghai, £43,180. Total—in gold, £35,166; in silver, £154,640.

ARTICLES OF IMPORT.

TEA.—There has been only a moderate amount of business doing during the past fortnight, the very limited buying which has been the feature for so many weeks past having been further curtailed by the Easter holidays. The last few days, however, there has been more disposition shown to purchase, the telegrams from China, stating the tea season as over, having imparted more confidence, whilst prices, looking at the probable supplies for the season, are now ruling at a moderate rate. Broken-leaf and dusty kinds of Congou have sold to some extent at the decline last quoted. Fair to good common remain quoted at 1s. 0½d. to 1s. 1¼d.,

Digitized by Google

with a moderate business. In fair flavoury kinds the last day or two there has been more doing at from 1s. 1½d. to 1s. 3d. Fine to finest show no alteration. Common to fair black leaf kinds, from 1s. to 1s. 2d., have been saleable, and during the last few days several Chops have changed hands at rather better prices. Medium to good have been sold at about former prices. In fine to finest business continues very limited. In Oolongs there is no new feature to notice. In Souchongs there has been a fair amount of business at about previous prices. Flowery Pekoes remain as before. In Canton Scented Teas there has been a good business done, chiefly in common to fair Capers from 1s. 1d. to 1s. 4d. per lb., and in Orange Pekoes from 1s. 5d. to 1s. 7d., the better kinds being difficult of sale at the quotations. Foo-Chow kinds of Caper remain difficult to move. In Orange Pekoes sales have been made from 1s. 6d. to 1s. 9d. for fair to good kinds. Uncoloured Japans remain as before. There have been no fresh arrivals. Green Teas continue firmly supported, importers selling slowly at the last quotations rather than reduce the prices, as the supplies for the season are likely to be moderate. Canton-made kinds show no material change, transactions being small. Japan uncoloured leaf has been in great demand, and the entire cargo of the Simon Hobley has changed hands at 1s. 5d. to 1s. 8d. per lb., being at an average of 1½d. per lb. above the Eleanor's cargo. There are still large orders in the market, but at impracticable limits. whilst the stock available is reduced to a few hundred packages. The Chanticleer has arrived from Nagasaki with a cargo of coloured sorts, and the kinds suitable for shipping are realising a quick sale at satisfactory prices.

SILK.—Another month has passed without bringing the expected renewal of trade. Good and fine Silk very fairly maintains its ground, and manufacturers have to pay within 1s. of quotations to obtain it, while 3d. or 6d. occasionally separates buyer and seller. There is less firmness shown with regard to inferior Silk, and during the past month some arrivals of low Chinas have been placed on the market, finding buyers only at 2s. 6d. to 3s. under the highest quotations of the year. A large parcel of Japans, mixed Mybash, arrived during March, was also pressed on the market and changed hands speculatively at a decided fall, but without affecting the general course of Silk quotations. Canton Silk, of which the stock is really large, has in some few instances lately gone into consumption at 20s. to 22s. 6d. for Loong Kong, Nos. 1 to 3, a fall of 1s. 6d. on the finer sorts; but here again no disposition is shown by holders to force their Silk. Much of the firmness on the part of importers is to be attributed to the doubts as to even a moderately good crop of European Silk, in spite of the great efforts made by an enormous importation of seed from Japan to restore the failing staple. Experiments lately and generally made in France and Italy of some of this seed do not promise well, and indeed the results in some instances are said to be bad, and as the course of prices for the coming season will after all be ruled by the yield in Europe, whether it be large or small, holders of Silk at the present time evidently prefer the chance of the market to realising at a period of inactivity, at a fall of some shillings from quotations. The deliveries in March were very small; 2,369 bales Chinas, 710 Japans, and 531 Bengals, total, 3,610, against 3,959 in February, and 6,193 in January. The stock on 1st inst. was 13,206 China, 4,484 Canton, 3,056 Japan, and 4,399 Bengal, total 25,145 bales, against a total of 17,817 on the same day last year.

COTTON.—Prices have declined 1d. to 1¼d. per lb. since our last, principally owing to the continued heavy import and increase of stocks at Liverpool. The stock at that port on the 6th was 650,969bales, against 605,455 bales at the same time last year. The stock in London on the 5th was 58,584 bales, against 127 545 bales at the same date in 1865. At the close of business on the week ending the 6th inst. the quotations at Liverpool were—Middling Orleans, 18½d.; fair Dhollerah, 15½d. During that week 1400 bales of Tinnivelly were sold in the London market at 14¼d. to 15d. good fair; and 600 bales to arrive at 13¾d. to 14d., March and December, guaranteed good fair.

SUGAR.—The business week ending the 29th March exhibited a further decline of fully 6d. per cwt., and extreme apathy continuing to prevail, lower prices had again to be accepted during the week ending the 6th inst.

COFFEE.—The market is barely supplied, and there is no quotable change in prices to record.

RICE.—Supplies being scanty, there is no feature of interest to notice in this article.

CARDAMOMS.—Very firm, but quiet: of 16 cases Malabar at auction, a few sold at 6s. 6d. per cwt. for very good; 51 bags Madras retired.

CAMPHOR.—Very quiet; nothing done in Japan, and only retail trade in China.

CASSIA LIGNEA.—Again dearer, with moderate transactions privately up to 105s. per cwt. for first quality buds. Nothing of the least interest doing.

CINNAMON—(CEYLON).—We quote 1st sort 2s. to 2s. 10d. per lb., superior, 3s. to 3s. 4d.; 2nd, 1s. 9d. to 2s. 9d.; 3rd, 1s. 8d. to 2s. 4d.; 4th and Jungle, 1s. 4d. to 1s. 9d.; moderate business done upon previous terms.

COCOA-NUT OIL.—This market has been firm, but with only a moderate extent of business, and no material variation in terms; 16 casks Cochin, 96 casks Ceylon, and 230 casks Sydney at auction.

DRUGS.—Cubebs: Quiet, with limited sales at previous value; no auctions. Dragon's Blood: Steady; of 25 cases at auction, three-fourths sold at £7 to £10 2s. 6d. per cwt. for middling to good lump. Rhubarb: Firm, but quiet; 35 boxes at auction all retired.

GUMS.—Benjamin: Steady; of 25 cases Siam at auction, three-fourths sold at £38 15s. per cwt. for good tear; £31 10s. for 3rd quality; and £16 10s. to £19 10s. dark and drossy. Damar: Quiet; 123 cases at auction all retired. Gamboge: Firm; 10 cases at auction retired at very high prices.

GUTTA PERCHA.—Firm; 53 baskets at auction sold at 1s. 10d. per lb. for fair genuine; and 10 tons common reboiled sold at 4¾d. to 5¼d.

HEMP (MANILA).—Quiet, but firm, with limited transactions at former terms; 250 bales of Sorsogon at auction retired.

INDIA RUBBER.—Quiet, with some inquiry.

JAPAN WAX.—Steady; 109 boxes at auction sold at 85s. per cwt. for fair saucers, and 77s. 6d. fair block.

OILS.—Anniseed: Firm, with moderate business at 9s. 6d. per lb. Cassia: Very flat, with scarcely anything doing; 10 cases at auction retired. Cinnamon: Only 1 case at auction retired. Citronelle: Held very firmly, and 12 cases at auction partly sold at 4¼d. per oz.

PEPPER.—Black: Remains very flat; of 1,497 bags Penang at auction, half sold at 3⅞d. per lb. for good Trang; 463 bags Tellicherry retired. White: Also continues flat, and 70 bags Penang, and 178 bags Singapore at auction were all retired; nothing of moment doing by private treaty.

SPICES.—Cloves: Remain quiet for all descriptions. Mace: Very quiet; 30 cases Batavia at auction retired. Nutmegs: Very flat, and nothing of any importance doing.

SAGO.—Is again rather cheaper: of 757 boxes at auction, only one-fourth sold at 18s. per cwt. for middling bold. Flour: Nothing of any importance doing.

TAPIOCA.—653 bags Penang, at auction, comprised only 260 bags sound, which were partly sold, common to middling 2¾d. to 3½d., a few good bought in at 4d., the remainder, damaged, being taken at from 2¼d. to 3½d.; 40 boxes fair Pearl brought 26s. per cwt.

TERRA JAPONICA.—Cutch, Pegue: Steady, with limited business privately upon former terms. Gambier: Steady: 444 bales at auction retired; moderate business done privately upon former terms. Sales advertised.

TIN.—The course of this market since our last has been very unfavourable, and prices have gone back £2 to £3 per ton, the latest cash prices being £85 to £85 10s. per ton for Banca, and £83 to £83 5s. for Straits.

TOBACCO.—Manila Cheroots and Segars: The Nelson has arrived with about 400 cases, the bulk of which is for foreign account. Manila: In better demand; recent arrivals are for immediate exportation. Japan: The parcel referred to in March proved of fine quality, and realised extreme prices; a further arrival of 150 bales is to be offered at public sale. Java: Good descriptions readily placed; inferior quite neglected, though holders are willing to make considerable concessions. Quotations—Manila Cheroots, 6s. 9d. to 7s. 6d. per lb.; Manila Leaf, 6d. to 3s.; Java, 5½d. to 13d.; Japan, 4½d. to 8½d.

MISCELLANEOUS.—Blacklead: Good qualities meet with much inquiry. Galls: All Galls of the Bussorah character remain very flat, and are cheaper; China and Japan also lower: at auction 150 cases of the former retired; and of 526 cases of the latter, a few only sold at 63s. per cwt. for good. Musk: Quiet, with little present demand; and of 69 caddies at auction, only one-fifth was placed at 31s. to 33s. 6d. per oz. for good picked; 21s. 6d. ordinary; and 15s. 6d. to 16s. pickings: of 6 caddies Cabardine one sold at 11s. 3d.; and 18 tins Grain were all retired. Sapan Wood: steady. Only 3 tons damaged Manila at auction sold at £11 per ton. Mother o'Pearl Shells: Singapore wanted: very high prices demanded. Soy: Quiet: 450 cases Japan sold at auction at low prices, 17s. 6d. to 18s. per box of 36 bottles. Star Anniseeds: Cheaper; and of 187 cases at auction, one-third sold at £6 5s. to £6 10s. per cwt. for middling to good. Sticklac (Siam): Rather lower; and 1067 cases at auction sold at 41s. to 43s. 6d per cwt. for fair small, and 35s. to 37s. 6d. block and blocky.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 15s. to £7; nail rod, £8. 10s. to £8. 15s.; hoops, £9. 12s. 6d. to £10; sheets, single, £10. 10s. to £10. 15s.; Staffordshire bars, £8. 10s. to £8. 15s.; rails, £6. 10s. to £7.

STEEL.—Swedish keg, £15. 15s. to £16. 5s.

COPPER.—Sheet and Sheathing, £95 to £98 per ton; yellow metal, 7¾d. to 8d. per lb.

TIN.—£90 to £91 for block; £91 to £92 for common bars. Tin plates, best charcoal, I.C., 34s. to 35s.

LEAD, &c.—English pig, W.B., £22. 10s. to £22. 15s.; shot, patent, £23. 15s. to £24; sheet, £22; spelter, £24. 10s. to £25; zinc, English sheet, £32; quicksilver, £7. 15s. to £8.

The following is from the Circular of Messrs. French and Smith:—"Notwithstanding there has been more ease in the money market, the metal trade has shown but few symptoms of improvement, as merchants are buying but sparingly, and speculation for the most part is quite at a stand. Iron: Welsh and Staffordshire are in fair demand, but prices are rather easier. The speculators in Scotch pig warrants have maintained the price pretty well during the past month. But on the 2nd inst. the price went back to 73s. 9d. cash, but has recovered to 76s. The stock on warrants on 31st ult. was 464,500 tons, being an increase during the year of 106,700 tons. Copper: Contrary to general expectation the smelters reduced the official quotation £5 per ton on the 21st ult. This was the more unexpected as the demand had improved during the week previous, but it appears to have been owing to the association having bought a large quantity of ores at 16s. 3d. per unit. The present prices of Australian

Digitized by Google

are—Kapunda, 95s. to 96s.; Burra, 93s. to 93s. 6d.; Wallaroo, 92s.; Spanish is dull at about 83s. Tin: The principal occurrence of importance during the past month was the Dutch Company's sale, which took place on the 22nd; and the quantity, 111,746 slabs, realised on the average 49 86-100 florins, equal to £87. 10s. laid down here. The principal buyers having been the Dutch commission houses, the article has since been very quiet, and is now offered rather under sale prices for immediate delivery. Fine square Straits is offering at 85s., round 84s. The quantity of Straits Tin afloat for Europe is about 1,023 tons, against 1,098 in 1865, and 780 tons in 1864. Lead: There has been more business in this metal during the past month, a fair quantity having been bought for export, principally to China, and the price is consequently rather higher. Tin Plates continue firm, especially for charcoal. The exports last month were 140,000 boxes, against 105,000 in March, 1865. Spelter: Rather improving in price. The stock in London on the 1st inst. was 5,516 tons, against 7,365 tons same date 1865."

FREIGHTS AND CHARTERS.

Rates in outward freights are now somewhat easier, and all the loading berths for China are fairly supplied with shipping.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £45 to £47. For Galle: £40. For Singapore: £39. For Shanghai: £55. For Batavia: £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2 3s. For Manila: £1 17s. 6d. For Galle: £1 18s. to £1 19s. For Singapore, £1 17s. 6d. For Shanghai: £2 15s. For Batavia: £1 12s. 6d.

The Admiralty having invited tenders for the conveyance of stores to Hong Kong have ordered the Robin Hood to be surveyed for that purpose.

CASUALTIES.

The Lota, from New York for Shanghai, put back damaged, having struck on a sunken wreck.

The Maria Agnes, Westenenk, from Batavia for Amsterdam with a general cargo, foundered March 20th; her crew and passengers were picked up in the chops of the Channel by the Water Sprite.

The Carlota, Jesperson, from Hamburg for Singapore, put into Portland March 27, with her pumps choked.

The Beautiful Star, Lees, from Sunderland for Hong Kong, lost mizenmast and split sails during the gale on the night of the 23rd March, and drove from Dungeness into the North Sea.

The Jacoba, Schaap, from Shields for Singapore, was assisted into Harwich making a little water and with loss of three anchors, warps, and other stores. She had also thrown some coals overboard.

The Edith, Ogilvie, from Nagasaki, arrived at New York March 13, with sails split, &c.

The Lady Alice, Strannack, from Sourabaya to Amsterdam, was in collision in the North Holland Canal, and sustained much damage.

The S. van Heel, Dietz, from Batavia for Rotterdam, put into Mauritius Feb. 22. Soon after leaving the Straits of Sunda she experienced strong winds, during which she sprung a leak, which went on increasing until she was making 22 inches of water per hour.

MISCELLANEOUS.

At MAURITIUS.—Feb. 22, from Chittagong, Jeune Adelie, Rivert, Sunda (s.s.), Bolck, sailed for Batavia; 27, Jeannie Meyer, Loesewitz, sailed for Singapore.

NOTICE TO MARINERS.

EAST INDIES—STRAITS OF MALACCA.

The Government of Singapore has given notice that four buoys have been placed near the One Fathom Bank in the Straits of Malacca; two of which are moored near the eastern end of the bank in six fathoms at low water, one off the southern end in six fathoms, and another at the western edge of the bank.

Parcela Hill, bearing east, leads to the southward of the bank, and E. S E. to the northward. Pulo Anza, bearing N.E., leads to the westward, and N.E. by N. to the eastward. Vessels bound up or down the Straits should pass southward and westward of the buoys and light-vessel, so as to clear the two fathom bank, off which the southern buoy is moored.

All bearings are magnetic. Variation, 1° 35′ E., in 1865.

This notice affects the Admiralty chart, Straits of Malacca, sheet No. 1, 355.

Orders and remittances should be addressed to the MANAGER.

Office, 12, George-yard, Lombard-street, London, E.C.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer, and a Blacksmith. Dry Godowns for the reception of vessel's stores, &c., when requiring to discharge them.

Amoy, March, 1865.

NEAR LONDON-BRIDGE, LONDON, ENGLAND.
ESTABLISHED IN 1815.

HOLLOWAY'S PILLS.—HYSTERIC AND OTHER FITS.—These Pills exert the most beneficial influence over the brain and nerves, and, therefore, are the safest and surest remedies for all disorders of these vital organs. Few diseases were more unmanageable than hysterics, convulsions, and similar fits until trial was made of Holloway's Pills, which proved able at once to control the morbid irritation, and very rarely failed to carry the patient steadily on to health and strength. Epileptic seizures, springing from scrofulous taints, are especially amenable to this treatment, which eradicates their cause. The Pills should be taken in doses calculated to act energetically on the bowels; the diet should be digestible, nutritious, and plainly cooked; pastry and spirits should be altogether avoided.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor

For Freight or Passage apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destination.	Ships.	Class.	Tons.	Dock.
Bombay ...	Marine Minister Von Roon	3-3rds=1.1	1,018	E.I.D.
Bombay ...	Whitehall ...	A 1 14 yrs.	936	E.I.D.
Colombo ...	Caroline Hutchings ...	A 1 11 yrs.	287	W.I.D.
Colombo ...	Spanker... ...	A 1 10 yrs.	475	W.I.D.
Colombo ...	Celestial Queen.	A 1 13 yrs.	842	S.K.D.

No. 22, Great St. Helen's, E.C.

FROM LIVERPOOL.

Destination.	Ships.	Tons.	Class.	To Sail.
Shanghai ...	Charlotte ...	589	AA 1	Imm.
Hong Kong & Whampoa ...	Patna ...	325	—	,,
Calcutta ...	Ravenscrag ...	1263	—	Imm.
Calcutta ...	William Fairbairn ...	—	—	,,

For terms of Freight or Passage apply to MCDIARMID, GREENSHIELDS, and Co., Liverpool.

LINE of STEAMERS from LIVERPOOL to CHINA.—The following screw Steamers will be despatched with cargo and passengers, at their respective dates, for Mauritius, Penang, Singapore, Hong Kong, and Shanghai:—

Vessel.	Tons register.	Captain.	To sail.
Agamennon ...	1672	Middleton.	April 19.
Ajax	1670	Kidd ...	June 30.
Achilles	1672	Russell ...	Sept. 10.

Each vessel carries a surgeon and stewardess.
Apply to ALFRED HOLT, 1, India-buildings, Liverpool.

FROM LIVERPOOL.

MORS LE BLANCH & CO. intend despatching VESSELS to the undermentioned Ports as follows:—

BATAVIA AND SOURABAYA.

Vessel.	Class.	Probable date of sailing.
A 1 SHIP		—
SINGAPORE.		
CECROPS	3-3rds	May 1
YOKOHAMA.		
A 1 British SHIP		—

Loading in Prince's Dock.
Apply at 42 and 43, THE ALBANY, Liverpool.

FOR HONG KONG and WHAMPOA (under engagement to the Lords of the Admiralty, with quick despatch), the well-known British-built clipper ship YARATILDA, A 1 fourteen years, 720 tons register, JAMES DONOUGH, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

FOR HONG KONG and WHAMPOA, with quick despatch (to follow the Yaratilda), the well-known iron clipper-ship PORTLAND, A 1 12 years, 872 tons register, JAMES PETERS, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

LINE OF PACKETS FROM LIVERPOOL FOR JAVA.

FOR BATAVIA and SOURABAYA, with immediate despatch, having two-thirds of her cargo engaged, the splendid Dutch clipper barque CATHARINA, Captain VISMAR; 240 tons register; built in 1864, and classed 3-3rds L 1 1 for nine years; the highest class in French Lloyd's; coppered and thoroughly copper-fastened, and a most eligible conveyance for fine goods. Loads in Prince's Dock.

For BATAVIA and SINGAPORE, an A 1 twelve years Ship.

Apply to NUTTALL and Co., 18, Chapel-street, Liverpool.

WEATHERLEY and MEAD'S LINE of CLIPPERS for JAPAN Direct.

FOR YOKOHAMA (Kanagawa), the splendid clipper barque MINNIE, A 1 twelve years, 407 tons register, DAVID BLACK, Commander; well-known in the China trade, having the greater part of her cargo engaged, will be despatched immediately.

For Freight or Passage apply to the owners, Messrs. ADAMSON and RONALDSON, 1, Leadenhall-street; or to WEATHERLEY and MEAD, 21, Water-lane, Great Tower-street, E.C.

LINE OF PACKETS FOR YOKOHAMA, JAPAN.
Has the bulk of her cargo engaged, and will have prompt despatch,

THE splendid Liverpool-built clipper barque CARIOCA, D. HUGHES, Commander; 312 tons, A 1 at Lloyd's for thirteen years, only two years old, has proved herself to be one of the fastest vessels belonging to the port, and in every respect an unrivalled conveyance.

For Freight or Passage apply to Messrs. WAKEFIELD, NASH, and Co., to Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co.

COLOMBO DIRECT.—Notice to Shippers.—The WYNAUD, A 1 13 years, 522 tons register, J. W. SMITH, Commander, is now at her loading berth in the West India Docks, and has room for light measurement goods only. This beautiful clipper has a very lofty cabin, with every accommodation for the comfort and convenience of passengers.

For Passage apply to W. H. TINDALL, 5, Tokenhouse-yard, and for Freight or Passage apply to F. TALLACK, 23, Birchin-lane, Cornhill, E.C.

Will have very quick despatch.

DIRECT for COLOMBO, the magnificent clipper-built ship SPANKER, A 1 10 years, 477 tons register, JAMES CANDLISH, Commander, West India Docks. This splendid Vessel is well known for her very rapid Passages, and the good order in which she invariably delivers her Cargoes, thus offering a favourable opportunity to Shippers of fine Goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will have very quick despatch.

DIRECT FOR COLOMBO.—The beautiful new Jersey-built Clipper Ship CAROLINE HUTCHINGS, A 1 Eleven Years, 287 tons register, G. H. COTHER, Commander; lying in the West India Docks. This splendid new ship, from her fine lines, is expected to make a very rapid passage.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will have very Good Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship CELESTIAL QUEEN, A 1 thirteen years, 842 tons register, WILLIAM WATT, Commander; lying in the St. Katharine Docks. This magnificent ship, from her size, high class and fast sailing qualities, having made her last passage from Calcutta in 98 days, offers an unusual opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with quick despatch.

DIRECT for BOMBAY, the splendid new clipper ship, MARINE MINISTER VON ROON, 3.3rds L 1. 1.—A 1 9 years, 1,018 tons register, J. C. ELLER, Commander, lying in the East India Docks. This magnificent new vessel having the greater portion of her cargo engaged, is confidently recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, No. 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "MARINE MINISTER VON ROON," and will have quick despatch.

DIRECT for BOMBAY, the magnificent clipper ship WHITEHALL, A 1 fourteen years, 936 tons register, WILLIAM CHAPMAN, Commander; lying in the East India Docks. This splendid high-classed ship is now quite ready for cargo, and being one of the fastest vessels afloat (having made the passage to Sydney in 76 days), offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

The next French mail, bringing dates from Hong Kong to the 26th March, is expected on the 4th proximo. Telegrams have been received in advance of the mail of 1st April, announcing that an important convention had been concluded at Peking between the Chinese, English, and French Governments, and bringing rumours of a rupture between the Tycoon and Prince Satsuma.

List of Passengers.

PASSENGERS INWARD.

By this mail, per P. and O. Co.'s steamer Tanjore, arrived at Marseilles April 25.—From Singapore: Sir R. B. McCausland, Miss McCausland, Mr. Geo. Brackenbury, and two 2nd class passengers. From Hong Kong: Messrs. Sutherland, Sturrock, Murton, Hitchcock, and Pegram, Mr. T. G. Downs. From Shanghai: Capt. Champion.

To Southampton, per China, expected to arrive May 2.—From Penang: Mrs. Robertson, three children, and servant. From Singapore: Mr. Little, three children, and servant, Miss Crane, and three 2nd class passengers. From Hong Kong: Mr. Mortimer, Mr. Clarke, eight 2nd class passengers, and two children. From Shanghai: Mr. Webster, and one 2nd class passenger.

PASSENGERS OUTWARD.

Per P. and O. steamer, Pera, from Southampton, April 20.—To Hong Kong: Capt. O. J. Jones, R.N., and man servant, Mr. J. W. Lewis, Mr. H. W. Heitmann, Mr. J. B. Coughtrie, Messrs. F. A. Charter, R.N., J. Swanson, R.N., W. Sheen, R.N., W. Brock, R.N., T. Huard, R.N., R. Widdicombe, R.N., and R. W. Tapp, R.N., Mr. Hawkins, Mr. Jas. Ward, Mr. E. G. Hamilton, and four 2nd class passengers. To Ceylon: Mr. E. Case, Mr. J. H. Purdon, Mr. J. F. R. Horsfall, Mr. and Mrs. MacBride, Mr. J. F. Coulson, Mr. R. D. Ormsby, and eleven 2nd class passengers. To Shanghai: Mr. E. Wadman. To Singapore: Five 2nd class passengers. To Calcutta: Capt. Sewell, Mr. P. B. Duell, Rev. T. F. and Mrs. Bigg, Messrs. J. and N. Fox, Mr. Stout, Mr. Cary. Capt. and Miss Stewart, Mr. Davey, Mr. W. Duffell, and thirteen 2nd class passengers. To Madras: Maj. J. Barclay, Mr. J. W. Butler, Mr. and Mrs. Evezard and infant, Mr. E. C. Britton, Mr. L. F. Chapman, Capt. and Mrs. Clark, and seven 2nd class passengers. To Aden: Three 2nd class passengers and two children. To Suez: Three 2nd class passengers. To Alexandria: Mrs. Miller and child, and two 2nd class passengers.

From Marseilles, April 28.—To Hong Kong: Mr. and Mrs. Leavesley, Mr. J. Livingston, and one 1st class passenger. To Yokohama: Mr. A. A. Shand, Mr. P. Heinemann. To Shanghai: Mr. R. B. Baller. To Singapore: Mr. J. Meikleham. To Calcutta: Capt. Eustace Hill, Rev. P. and Mrs. Nicholas, Col. Showers, Capt. Castle. To Madras: Rev. W. Babington. To Aden: Lieut. and Mrs. Schmidt. From Suez.—To Calcutta: Mr. A. Baillie, Maj. J. Hills.

Per P. and O. steamer, from Marseilles, May 5.—To Singapore via Bombay: Mr. C. Grey McClelland.

Per P. and O. steamer, from Southampton, May 4.—To Shanghai: Mr. J. Kidner, Miss E. Meade, Mr. T. G. Meade. To Hong Kong: Messrs. F. Holden, J. Plowright, H. F. Struznell, J. Petts, J. Manley, and G. A. Moses; Mr. A. J. W. Neville, R.N., Mr. F. C. Corbet, R.N. To Ceylon: Mr. and Mrs. F. W. Lemarchant and three children, Mr. E. S. Grigson.

From Marseilles, May 12.—To Shanghai. Mr. R. R. Westall, Mr. R. Conolly. To Yokohama: Mr. and Mrs. Dohmen. To Hong Kong: Dr. F. C. Sibbald. To Penang: Mr. J. Lamb.

Per P. and O. steamer, from Southampton, May 20.—To Ceylon: Mr. and Mrs. H. S. Oldnall Russell, Mr. and Mrs. Hampton, two infants, and child, Mr. P. W. Stavers. To Singapore: Mrs. Swanston and child. To Hong Kong: Mr. E. G. Hamilton, Mr. P. M. Roe, Lieut. C. E. Domville, R.N., Mr. F. K. Taylor, R.N. From Marseilles.—To Hong Kong: Mr. F. Goodridge. To Ceylon: Mr. H. J. Deslandes. To Shanghai: Mr. R. V. Grahame. To Singapore: Mr. Meikleham.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are to the 28th February. The London mail of the 26th December arrived out on the 18th February.

There is no hope of any remission of the indemnity money being made by the treaty Governments, as the third instalment, due on the 29th day of the 12th month (Japanese) last year, has been paid to the Oriental Bank by a three months' bill or promissory note.

From Osaca there is nothing new or decisive. The question of Choshiu is said to be in course of settlement, but no particulars are given except that the Tycoon's party assert that both Choshiu and his son are desirous of yielding, but they are overruled by the fanatical party among their adherents.

There was a rumour the other day that Satsuma had sold all his palaces at Yedo. On inquiry we find that he has sold two or perhaps three,—those purchased by him—not those received from the Tycoon, which he cannot sell.

Kioto seems as undecided as ever—now leaning towards the Tycoon and now towards the hostile Daimios. The manner in which the Mikado to-day makes, to-morrow unmakes, the Gorogio, and deposes high functionaries is beginning to excite much indignation among the loyal servants of the Tycoon.

The gas scheme is in abeyance till some further statistics are obtained. Meanwhile, a great want, long felt in Yokohama, is about to be put in train for removal. We allude to the want of a dock. Two of the foreign residents, whose trade led them to feel the necessity of such a thing, have taken great pains to discover a favourable spot for the construction of a dock that should be of sufficient capacity to take in ships of the largest size that come here—and this they have found a few miles down the coast. Difficulties have to be overcome, inasmuch as the ground will have to be acquired at a distance from the port—but much opposition is not apprehended on the part of the Government. The capital that will be requisite is not very large, and several of our leading men have already expressed themselves as favourable to the enterprise, and willing to assist it.

The *Japan Herald* notes an important step about to be taken for the advancement of education. Our contemporary says:—The existence among us of missionaries belonging to three or four branches of the Protestant Church is quite as well understood by the Japanese as by ourselves. In days gone by it was customary for the authorities to send officers to the houses of these missionaries, outwardly as friends paying friendly visits, but really as spies. Lately these visits have been discontinued, and from suspicion the whole demeanour seems to have changed to the most implicit and entire confidence. Long ago, while yet some of the American missionaries resided at Kanagawa, the Government sent several young men of rank from Yedo to be instructed in English; and more lately schools have been established by authority, and under protection of the respective governors, both in Yokohama and Nagasaki, for the especial instruction of the sons of the upper classes. The

Digitized by Google

school at Yokohama has made wonderful progress. It numbers over fifty pupils—young men, it must be borne in mind, not picked up by the wayside and entreated to come in, but belonging to the official class, and sent thither by the sanction and desire of the Government. In this school are taught, in addition to the English language, several branches of science, and the pupils are made acquainted with books, read by them with avidity, in which Truth is revealed, and hence becomes the subject of general remark in the classes and in conversation. In addition to this Government school, as it may be called, some of the wives of Missionaries have classes of Japanese boys under instruction in English, and with much success. The French school for the instruction of the sons of the official class, in active operation at Benten—is meeting with most satisfactory results, and is strongly supported by the Japanese authorities. But now the Gorogio is going a step further. It is about to erect school buildings in Yedo, in which a hundred young men of family are to be taught. There is to be an English and a French Department, and already the missionaries have been applied to to take charge of them.

On the 26th February the officers of H.M.S. *Princess Royal* gave an amateur theatrical performance at the Olympic Theatre, for the benefit of the two charities to which the proceeds were to have been devoted on the previous occasion, but the funds of which were not then materially augmented—the expenses leaving a very bare surplus for such appropriation. The two pieces were "Aggravating Sam" and "A Regular Fix." Both were capitally played.

By the *Ida D. Rogers*, from California, Mr. Risley has arrived, bringing with him six cows and their calves as a nucleus for the dairy he proposes establishing in Yokohama. The *Ida D. Rogers* made a long passage of 70 days—and at one time there was a fear that the cattle would have died for want of water.

NAGASAKI.

The s.s. *Promise* was lately sold to the Japanese for itz. 175,000. It is said that the buyer is Prince Koko, whose place is opposite to Chosiu. The s.s. *Japan* remains unsold, and is to sail immediately for Shanghai.

The Japanese are to make a race course here for Europeans, at the extreme head of the bay, and a bund road to it from the European settlement, with a bridge connecting the upper end of the European settlement with Decima. The new road will run through Decima, and thence skirt the outside of the native town, right up to the top of the bay.

The Governor of Nagasaki is to leave for Yedo in about twenty-five days from hence. They are putting the *Shun-lee* in order at the factory at Akunora to convey him. The *Shun-lee* is a fine handy sized vessel, just suitable for Japanese use.

Ground has been obtained from the Government for a dock at Nagasaki.

HAKODADI.

An investigation has been held by H.B.M.'s Consul at this port into a charge of stealing the skulls of Ainos, brought by the Japanese Governor against three British subjects, one a Mr. Whitely, a naturalist, on a visit to Hakodadi, and the others two subordinate consular officers. The charge brought against the defendants was as follows :—

On the 21st of the 10th moon (December 8) three Englishmen dug up the skulls of eleven or twelve Ainos at the village of Otosbi, and carried them to Hakodadi. A foreigner came to-day (December 13) to the Custom-house and reported the matter. At the time the authorities knew nothing about it, but a complaint from the people of Otosbi subsequently arrived.

It having been ascertained that the accused parties had been in the neighbourhood of Otosbi on the day in question, they were called into the presence of the Consul and Governor, and gave a detailed account of their proceedings during the time of their absence from Hakodadi, but denied having ever desecrated an Aino cemetery. The Consul having shown the Governor the paragraph in the Order in Council under which the offence charged against the three Englishmen was punishable, the Governor asked whether in the event of the defendants being found guilty the Consul would fine them $500 each and deport them. The Consul replied that he could not answer that question until the charge had been fully investigated by a Consular Court, which, if the Governor thought it necessary, he would summon for the purpose. At the same time he warned the Governor that should the case come before him in his Consular capacity he should be compelled to consider him (the Governor) as a witness, and call on him for the names of his informants. Upon hearing this, the Governor rose suddenly without taking formal leave, snatched his sword in a rude and abrupt manner, and went away.

On the following day a formal despatch was written by the Governor requesting that the three Englishmen should be brought to trial, and enclosing the names of deceased whose graves had been disturbed. They were thirteen in all, nine males and four females. Accordingly, the 15th December was appointed for the trial. The witnesses for the prosecution established the violation of the tombs and theft of the skulls, but failed to prove that the defendants were in any way implicated. The only suspicious circumstance brought to light was that on December 5th the defendants hired horses from a stable at Hakodadi, and set out with three boxes and a roll weighing about 20 lbs. The horses were returned on the 10th December, and it was within the period of their absence that the graves were desecrated. For the defence it was alleged that the party had left Hakodadi on a shooting excursion, and that they had in their possession three baskets and a box, and two guns, one of which was rolled up in matting. They remained a short time at Otosbi, and then left accompanied by a Japanese boy. They shot fourteen birds for Mr. Whitely, and having had some refreshment returned to an inn where they had left their horses. This statement was supported by the other defendants and by the Japanese servant who had accompanied them, and the strongest assurances were given that nothing had been done to the graves. It was also sworn that when the defendants returned to Hakodadi their luggage was unpacked in the presence of witnesses, and no skulls were then seen. After due consideration of the evidence, the Court delivered judgment to the following effect :—

That on the part of the prosecution the evidence is only hearsay, and in no instance was there any one who could state that he had seen the defendants digging up any of the thirteen skulls mentioned in the plaint; that on the part of the defendants the evidence brought by them neither proves nor disproves the charge. The Court is further of opinion that during the two or three hours defendants were in Otosbi it was quite impossible that thirteen skulls could have been dug up and taken away without some one from the village having seen them. The evidence on the part of the plaintiff has never been produced, and the Court would further remark that it was the duty of the plaintiff, which he has omitted to perform, to have produced more conclusive evidence—things seen and not things heard. Finally, the Court is of opinion that the charge is not clearly proved, no evidence having been produced that the defendants did dig up thirteen or any Ainos' skulls as mentioned in the plaint, nor of these supposed thirteen skulls having been seen at Otosbi, or at any of the intervening villages at which the defendants slept, or even at Hakodadi after their return.

The assessors dissented from the judgment on the following grounds; and the proceedings will therefore be submitted for the opinion of H. M. Envoy :—

We dissent from the foregoing verdict for the following reasons. A serious charge is brought against three foreigners by the Japanese Government which they have not endeavoured to substantiate by the production of the most important witness, viz., the boy who informed the Ainos of his having seen foreigners digging in the grave yard, and the inmates of the house where the defendants stayed at Otosbi.

Again the statements of the defendants differ more or less in many important points, and the evidence furnished by their witnesses is irrelevant. Believing that there is a certain amount of truth in the statement of the Ainos, namely, that skulls have been taken away by foreigners, the matter ought to be thoroughly investigated, so as to prevent any ill-feeling or misunderstanding with the Japanese authorities or people here, and that all information on the point be collected, whether from Japanese or foreigners.

At a subsequent sitting of the Court, nothing further was elicited except that two boys had seen foreigners digging in the Aino Cemetery, but of these two, one could not identify the offenders, and the other did not recollect upon what day the offence took place. A few days after the trial some of the missing skulls were given up, but there remain others to be accounted for, which will be a more difficult matter, as it is thought that they are now on their way to some European museum. It is said that the defendants have since confessed that they had a share in the outrage, but other foreigners are supposed to be implicated. It is most unfortunate that the awkward way in which these resurrectionists went about their work has brought the affair to light, as it cannot but leave a very bad impression on the minds of the natives of the north of Japan, hitherto so well disposed towards foreigners.

CHINA.

PEKING.

The news from this quarter is in one sense of considerable importance, if true. It is stated that a mission is to be appointed to proceed to Europe, and that Mr. Wade and Mr. Hart will accompany it. We are also informed that it is intended to take with the mission six of the pupils now study-

Digitized by Google

ing English and French at Peking. Some doubt is entertained as to the truth of this report, as private letters have not mentioned the subject. Nothing more has come to hand about the insurgents in Anhui.

HANKOW.

General Lyang was killed on Sunday, February the 18th, by the Nienfei. He had gone out in the morning with some 60 or 80 men, and fell in with a troop of the Nienfei slightly outnumbering his; and not being able to overcome them, Lyang was making his retreat, when two large bodies suddenly appeared in his rear, and cut him off at a place called Kaipoo. Lyang and his little army are said to have fought bravely, but the odds were overwhelming, and only thirty escaped, leaving their general among the slain. His body was recovered the same night, and, strange to say, was only half stript, and not at all mutilated. Lyang's loss is a matter of great regret to all. He was a brave, energetic general, as Chinese officers go, and the Government express themselves at some difficulty to replace him.

The Treasurer has taken the field against the Nienfei, and the Viceroy will do so on the 25th. His military duties and adventures will be confined to living for a while in the new Customs buildings below the concession, or the joss-house at the foot of the Hanyang hill.

A meeting was held at the Club on the 20th Feb., by the Hankow Volunteer Corps, which was highly satisfactory, both in the selection of its officers and the interest it showed to be still existing towards the movement.

An idea had spread abroad that the Toutai was willing to employ the services of any foreigners who would enlist against the Nienfei, at a daily pay of 5 tls. Whence this rumour arose it is impossible to say, but so great an attraction was it in these hard times that some persons of *uncertain livelihood* have already come up to offer themselves, and a large number are said to be flocking from Shanghai. Of course there is no truth in the report, and no employment for these persons in Hankow, and unless the foreign Consuls and Chinese authorities send them back again at once to whence they came, they will certainly cause much trouble, either by remaining here idle, or by volunteering to the Nienfei. The latter have as yet, however, shown no great desire for individual foreign assistance. One adventurer who went over to them was but rudely received, and had his head half cut off, a proceeding unpleasant perhaps for himself, but decidedly beneficial to the world at large.

A distressing accident occurred while the crew of the gunboat *Algerine* were practising with Congreve rockets. One of the rockets burst in the tube, and so severely injured the *Algerine's* boatswain, Mr. Gardner, who was standing by, that there at first appeared little or no hope of his recovery. He has, however, since rallied, thanks being in a great measure due to the ladies of Hankow, who provided him with those delicacies which it is impossible to obtain on board ship. A subscription in aid of his wife and family has also been got up.

SHANGHAI.

Some time ago an English gentleman, occupying an important position in the employ of the Chinese Government, being desirous to go on a shooting expedition, applied for permission to proceed up the river and creeks in a small steamboat. This request, it was generally imagined, he made more out of courtesy to his employers, whose feelings he might naturally be desirous to consult in such a matter, than from any real conviction that the Chinese authorities were desirous to act in a manner so contrary to the provisions of the treaty as to throw any obstacle in the way. His application was, however, met by a distinct refusal, and, probably on consideration of the position he occupied, he wisely abstained from making any active demonstration in the matter. We now hear that a despatch has been written by the Taoutai to Her Majesty's Acting Consul, stating that the Tsunle Yamen have, after consultation with Sir R. Alcock, issued instructions to the effect that foreigners shall not in future be allowed to travel up the river or creeks in boats other than Chinese. Her Majesty's Acting Consul has received no instructions from Peking on the subject, and has accordingly expressed his opinion to the Taoutai that there must be some misapprehension.

At a meeting of the Shanghai Steam Navigation Company, which took place on the 28th of February, the accounts were passed and the action of the company in purchasing the steamers *Moyune* and *Fire Queen* approved. Messrs. Bryans and Duncanson were elected directors. The directors were authorised to construct a new steamer during the year, if necessary for the company's interests; and also to sell the *Shanse* and *Sze-chuen* if they considered it advisable. The report stated:—

The statements of earnings and expenses are made up at the usual six monthly intervals. The statement ending 30th June, shows a profit of Tls. 38,409.98 on the River and Ningpo lines and Godowns, and a loss on the Fohkien, Pembroke, and Tsatlee of Tls. 12,849.53. The statement for the last six months of the year shows a profit of Tls. 114,608 69 on the River and Ningpo lines and Godowns, and a loss of Tls. 5,323.94 on the Fohkien, Pembroke and Tsatlee. The net result is a profit of Tls. 134, 84[illegible].20 on the business of the year, which is carried to credit of profit and Loss account.

Statements of the profit and loss account, reserve account, and of the insurance and depreciation fund are now given. It will be seen that the entire balance of profit and loss account, and also that the balance of the reserve account, have been transferred to credit of the insurance and depreciation fund. The directors have decided to pursue this course with the accounts for the reason that the insurance and depreciation fund account was for the purpose of accumulating a fund for the purchase of steamers, and for the cost of repairs to the company's boats, and inasmuch as all the net earnings of the company for the past year have been permanently invested in steamers, the directors consider that these earnings should be placed to credit of this account. The reserve account could not be considered as representing any real reserve so long as the insurance and depreciation fund showed a balance at debit, and the directors believe that the transfer now made will tend to simplify the accounts. The amount that appears at credit of insurance and depreciation fund as now rendered will be required towards payment for repairs already authorised.

The meeting of the Shanghai Gas Company was held on the 27th Feb. The report stated:—

"Regular supplies of coal of a description similar to that used by the Sydney Gas Works has been ordered on from Australia, and the first vessel should arrive about the end of February. In the meantime the engineer is using the best description of gas coal that can be obtained at this port.

"Of the sum of Sh. Tls 15,000 additional loan, authorised by you to be raised for the completion and carrying on of the works, only a sum of Sh. Tls. 5,000 has been required, and now that the income of the company has commenced, and shows evident signs of a rapid increase, it is expected that not any further liability in this respect need be incurred.

"It is with regret that the directors have to announce that Mr. Dore, the engineer of the company has, in consequence of continued ill health, been compelled to tender his resignation. Steps have been taken for the appointment of a properly qualified engineer in his place, and he is expected to be here early in March.

"During the past year, the value of the shares in this company fell in price as low as Sh. Tls. 60 each, but latterly an improvement has taken place, and the most recent sales have been at Sh. Tls. 80 per share, at which rate they appear very firm with an upward tendency. It may be reasonably supposed that they will now soon arrive at par, when not any time will be lost in disposing of the remaining unsold shares, and the loans reduced to an insignificant amount.'

The report having been adopted and the accounts passed, a discussion then ensued as to whether it would be desirable to appoint a manager to the company in lieu of agents as heretofore, it being argued on the one side that a saving of expenditure would be effected by such an arrangement, while on the other hand it was thought that a resident English engineer would be constantly necessary on the spot, and that he could not be expected to devote his attention to office management; and it was also suggested by Mr. Grew that it would be essential to have the offices of the gas company in town. The meeting then proceeded to the nomination of new directors, but great difficulty was experienced in finding gentlemen willing to act. Ultimately the following were proposed and elected, namely, Messrs. Hargreaves, Hancock, Hayes and King, and after the usual compliment to the Chairman, Mr. C. J. King, combined with a courteous recognition of his services to the company since its commencement, the meeting separated.

It is under contemplation to make arrangements for the members of the Shanghae Club to lease the building from the shareholders, and a meeting is advertised for the 10th March, to take this subject into consideration.

The annual meeting of Land Renters was to take place on the 9th March. This meeting will be more than usually important as the draft of the new land regulations will be laid before it. The polling for the New Municipal Council took place on the 8th March and the result at 4 p.m., though not officially declared, is stated to be as follows:—Edward Ford Duncanson, 123; William Keswick, 121; William Probst, 121; James Cock Coutts, 111; Egbert Iveson, 107; Augustus Allen Hayes, Jr., 106; Alfred James How, 99; Edmund Henry Lavers, 39; William Davison, 20; Emil Maintz, 19.

Digitized by Google

A small native banker living in Fohkien Road was arrested a few days since on a charge of passing counterfeit dollars. The dollars are coined in Canton, and it is hoped to discover the individuals by whose means they were imported.

The *Friend of China* of the 23rd February puts forward the following as an "on dit":—Mr. T. F. Wade, C.B., Secretary of Legation, will leave Peking for England almost immediately, and be succeeded at his post by Mr. W. H. Medhurst. Mr. Markham to take Mr. Medhurst's place as Consul at Hankow, and Mr. C. T. Jones to be Vice-Consul here. Mr. Forrest takes Mr. Consul Fittock's office at Ningpo. Mr. Carroll to be Co-Judge, *vice* Mr. Chaloner Alabaster ordered to Formosa. Chang-che-wan remains as Cantonese Interpreter until a good opportunity offers for helping him to a button.

HONG KONG.

Dates are down to the 15th March. The French mail of the 17th Jan. arrived out on the 1st March, and the English mail of the 26th Jan. on the 6th March.

Governor Sir Richard MacDonnell took the oaths of office on Monday the 12th March. Her Majesty's Commission having been read, he made a short and lucid speech, in which he was understood to say, "that it devolved upon him to swear the members of the Legislative Council, but it did not appear necessary to do so that day, they having already taken the usual oaths on assuming their seats in the Council, and it did not appear that there was occasion to find fault with them. As he found himself surrounded by such a number of civil and military servants of the crown and influential residents, he would take the opportunity on assuming the honorable post of Governor of this colony in the terms of Her Majesty's commission which had just been read, of reminding those present, that in the course of their duties, Her Majesty's Ministers and representatives sometimes found themselves obliged to maintain the interests, dignity, and welfare of the Government, in opposition to the well known wishes of the people. He trusted however, that in carrying on the Government of this colony he should have the happiness to obtain and deserve the support of the people. It was his wish and hope to study the welfare of the inhabitants in all matters of general interest. But it was to be hoped that the one quality necessary to maintain all governments would be found here, namely loyalty among all classes: That, as well as the good feeling and mutual esteem, which it had been his fortune to meet with in other parts of Her Majesty's dominions to which his duty had called him, he sincerely hoped would attend his Government in this colony." His Excellency wore the usual blue and silver uniform, and looked in perfect health.

The *Evening Mail* of the 12th March says:—"The unfortunate 11th has been directed to remain in Hongkong, and the two companies at Japan are not to be withdrawn. We have reliable information, that the present arrangements are as follows:—the 9th, as is previously stated, to go to Japan, and a wing of it will proceed in H.M.S. *Adventure* under the command of Major Darling direct to Yokohama on the 9th instant. She will then return with half the 20th, and afterwards make similar voyages, thus completing the change of quarters in two trips: we also learn that the women and children of the 20th are to be left at Japan. This certainly appears a hard case, for when the regiment left for Japan they were left here for a year, and they may probably expect to pass an equal time at Yokohama separated from their husbands. The War Department seem to take a pleasure in tantalising the troops stationed in China. The 20th have first been misled by hopes of proceeding to India, and their cheerfulness at this prospect is suddenly blighted. The 11th however appear to be the peculiar shuttlecock of Pall Mall incompetency—first Japan, then a Sanatarium in India, and now the prospect of quarters in the Happy Valley."

The agency of the Asiatic Bank Corporation has been transferred from Messrs. Augustine Heard and Co. to the bank's eligible premises in the Queen's-road, under the management of Mr. James Greig.

The adjourned meeting of the proprietors of the Hong Kong and Shanghai Banking Company was held on the 3rd March, when it was resolved that each of the present shares of $250 nominal value should be exchanged for two new shares for which scrip is to be issued on the 16th proximo; say one paid-up share of $125 and another share of the same nominal value ($125), on which a first call of $25 is to be made on the 1st July next.

An emeute has taken place on board another French coolie ship the *Flore*. The following paragraph respecting it is from the *Evening Mail* of the 14th March:—We hear with regret that a fresh outrage has taken place on board one of the French coolie-ships named the *Flore*, loading at Whampoa for Havana. A disturbance, of the nature of which information has not reached us, broke out on board this vessel two or three days ago, and was quelled only by severe measures, resulting in the death of at least one of the coolies. Secrecy is, as a matter of course so prevalent in these cases, that nothing more than a bare outline of facts is likely to reach the public; but we should be glad to know whether this attempted rising has any connection with the recent kidnapping of some Chinese labourers from the East River, of which a rumour has reached Hong Kong. It has been reported that two heavily armed junks, in the guise of mandarin war boats, with Portuguese on board, recently visited Shee-lung, and that a number of labourers were induced to go on board them by the pretext that a mandarin who was stated to be in command of the junks was engaging braves and army coolies. No sooner had a number of victims been thus decoyed on board than the junks made off again for Canton. Great excitement prevails in the District between the East River and Hongkong with regard to the operations of the coolie kidnappers.

Piracy has again been heard of, though in one case which has occurred the attempt could hardly be termed piratical. It appears that last week two Chinese junks which had left Macao to pick up "emigrants" along the coast were attacked by pirates not far from Lantao, and that the money and opium carried by one of them was captured, and the captain killed. The other case is that of the *Dannevirke*, Danish brig, which was attacked off Achow point on the morning of the 1st March, and plundered of all her valuables. No lives were taken, and it is supposed that the pirates are beginning to find out the different degree of criminal responsibility attached to piracy with and piracy without murder.

(FROM OUR OWN CORRESPONDENT.)

His Excellency Sir Richard MacDonnell arrived here by the mail steamer on the 11th inst., and was sworn in as Governor on the following day. As his arrival took place on a Sunday, he landed without a military reception. In my next I hope to be able to acquaint you with the commencement of some of those vigorous reforms with which public opinion credits his Excellency's intentions. If Sir Richard does not bring too lawyer-like a mind to bear upon the great question of the government of Hong Kong, much may be expected from his well-known vigour and independence; but as the press of the colony have declared of late, with striking unanimity, the time has arrived for the application of British sense rather than British laws to the enormous criminal mass which forms the bulk of the Chinese population of Hong Kong.

In my last I alluded to the fictitious story of Mr. Hart's dismissal from the post of Chief Inspector of the Foreign Customs Establishment in China. Nothing could be wider from the truth than this report; and, as a striking contradiction of it, I hear that Mr. Hart is about to proceed to England on a year's leave of absence, taking with him a party of Chinese, who proceed semi-officially to explore the unknown regions of Europe. The principal member of this party is a small mandarin employed in the Board of Foreign Affairs, who takes with him two of the young Tartars who have been instructed in the English language during the last few years, and proceeds at the expense of the Customs to obtain an insight into the manners and arts of the various European countries with which the Chinese Government is in treaty relations. The idea is an excellent one, and is no doubt the precursor of a more official mission. The party will probably leave Hong Kong by the next French mail.

I also learn that previous to the determination to despatch this mission, the question of the continuance of the foreign Customs' establishment after the month of July next, when the indemnities are to be paid up in full, was referred to the Imperial Council. It was represented that the expenses of the department amount to three-quarters of a million of taels (£250,000), and that the Chinese are becoming more and more apt for the conduct of their relations with foreigners without an intermediate party; but the decision in reply to the reference was, that matters are to continue for the present *in statu quo*.

The triumph over the rebels in the Canton province, which I mentioned in my last, has been a great relief to the Imperial Government, and has enabled them to devote all their energies to operations against the Nien Fei near Hankow. The vic-

Digitized by Google

torious General has already left the Canton province on his way to that place, and it is reported that the mighty Li Hung-chang, under whom Colonel Gordon operated until the treachery of Soochow took place, is to be moved as Viceroy to the Hupeh province, expressly to take the field in that direction. The *North China Herald* has recently started a theory that Li Hung-chang cherishes designs of rebellion against the Peking Government. Nothing could be more absurd than an idea of this kind. The unscrupulous but able mandarin in question enjoys a plenitude of actual power in his present situation which he is far too wise to exchange for the perils of an aimless rebellion, in which he would not only encounter the resistance of the Peking Government with such means as it would retain, but the hostility of every other official in the Empire, who would crush in a month any attempt made by one of their number to raise himself above the level of the rest. The suggestion is so puerile as scarcely to merit discussion, but as it may meet with attention at home I have devoted a few words to it. The slightest acquaintance with the history of China, or the modes of thought of the people, would suffice to show that rebellion, with a view of grasping the Throne, is the last idea that would enter the mind of Chinese functionaries of high position. The true rebel and usurper has seldom been other than a successful bandit chief.

In my last I reported the mutiny of coolies on board the French ship *Hong Kong*, on the second day of her voyage from Canton to Havana. Since then it has been ascertained that a deliberate plot had been formed by a party of the "emigrants," before the vessel left Whampoa, in the belief that a large sum of money must be carried on board. The same was, no doubt, the case on board the British ship *Pride of the Ganges*. The *Evening Mail* pointed out, the other day, that disorders on board coolie-ships were invariably coincident with the carrying on of the French coolie trade. During the years that no French barracoons were opened at Canton, vessels sailed regularly from thence to Demerara with Chinese emigrants without the slightest disturbance; but the moment the Cuban trade reopened mutiny became the order of the day. Any one who has seen the doorway of the French so-called "Emigration House" at Canton, with the faces of ruffianly half-caste Portuguese peering through the bars by which it cuts off access to the streets, need not be surprised to hear of any act of violence committed either by the dealers who "export" the unhappy coolies, or by mutineers among the latter. Two fresh cases of mutiny have been reported since that of the *Hong Kong*, and I hear that a rising took place the other night on board a fourth ship loading at Whampoa, which was not quelled until one at least of the coolies on board had been shot. The Chinese authorities are said to have repeatedly protested against the manner in which coolies are forcibly compelled to emigrate, but, as may be imagined, with little success. The business is conducted in the interest of an official of high rank at Paris, which fact, doubtless, accounts for the strenuous energy with which the French authorities in China support the traffic. In the meantime, it is rapidly becoming unsafe for Europeans to venture at a distance from Canton, as they are pursued by the villagers with shouts of "kill the kidnappers!"

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 22nd March. No later advices had been received from London than those noticed in our last—viz., those of the 26th January.

The fortnight has been chiefly remarkable (says the *Straits Times*) for the farewell demonstrations made in favour of Sir Richard B. McCausland, who goes home by the present mail, after ten years' occupation of the highest judicial post in the settlement, that of Recorder of the Supreme Court of Judicature. Before his departure, a grand banquet was given to him in the Town Hall. Some of the speeches that were given on that occasion are worthy of perusal even by our home readers; for, besides showing how high is the respect and esteem which Sir Richard McCausland has gained here from all classes, they are in some measure significant of the condition of the settlement. It will be seen that Sir Richard, whose point of observation has been a very high one, is a friend to that transfer of the settlement to the Colonial-office which has been so perseveringly urged here. Undoubtedly, the evil effects of the want of any local legislation must have often presented themselves to him in the administration of the law.

The Commission appointed by Government some months ago to inquire into the plans of the Pier Company, and also of a proposed railway from town to New Harbour, as well as to take into consideration the application made by the former company to reclaim a large portion of the shore frontage of the town for building purposes, has brought its labours to a close, The decision of Government has not yet been made known.

Sir Richard McCausland is not the only distinguished passenger which the present mail steamer will take from this. His Highness the Tumongong of Johore has determined, the first of his race, to venture on a trip to Europe, and leaves by the present steamer. His own claims and the claims of his family on English consideration are very great; for to the Tumongongs we owe, in a great measure, the peaceful manner in which we came into possession of Singapore. The present Tumongong is a fine example of a native gentleman,—he is intelligent, accessible and altogether free from arrogance, though he is now supreme ruler over the kingdom of Johore.

H.M.'s steamer *Rattler*, Captain Webb, from Hong Kong, via Manila and Labuan, anchored in the harbour, March 17th. Captain Webb will succeed Captain Rowe, of H.M.'s steamer *Coquette*, as senior naval officer in the Straits. H.M.'s ship *Arabia*, Captain Madison, sailed on the 11th of March for Madras with the first detachment of the 34th M.N.I. on board.

The British brig *Jervana*, from China to Sydney, was lost on a shoal in the vicinity of Minto (Banca Straits) about the 26th January; wreck sold for 5,000f. The captain and crew arrived by the last Dutch mail steamer.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BURN—On the 19th March, at Killiney House, Singapore, the wife of Lieut. H. Burn (late Indian navy), Master Attendant, of a daughter.

CROZIER—On the 5th March, at Clairmont, Natal, South Africa, the wife of Philip Augustus Crozier, Esq., Advocate, of a son.

EMERSON—On the 19th April, the wife of Ambrose Emerson, Esq., of Willesden-lane, of a son.

FISCHER—On the 22nd April, at 55, Lansdowne-place, Brighton, the wife of Thomas H. Fischer, of Walton Oaks, Surrey, and Lincoln's-inn, Esq., of a son.

FOX—On the 12th April, at 10, Upper Phillimore-gardens, Kensington, the Hon. Mrs. Augustus Lane Fox, of a son.

GINGELL—On the 19th April, at 8, St. Mark's-terrace, Fulham-road, the wife of C. T. Gingell, of a son.

MURRAY—On the 22nd April, at Croston Tower, Alderley Edge, Cheshire, the wife of Charles W. Murray, Esq., of a daughter.

PETRE—On the 22nd April, at Thorndon, the Lady Petre, of a son.

SCHUSTER—On the 21st April, the Lady Isabella Schuster, of a daughter.

TATE—On the 4th March, at Shanghai, Mrs. J. Priestley Tate, of a son.

MARRIAGES.

CORRIE—FANYN.—On the 23rd Feb., at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting-Colonial Chaplain, Captain W. T. Corrie, 2nd Batt. 11th Regt., to Mons Antoinette Fanyn, daughter of Colonel Wyatt, 2nd Batt. 11th Regt.

TURNER—STOCKER.—On the 15th Feb., at St. George's Cathedral Capetown, by the Right Rev. the Lord Bishop, assisted by the Very Rev. the Dean, George Turner, Esq., Warley Common, Natal, second son of the late George Turner, Esq., of Fletching, Sussex, to Harriette Julia, youngest daughter of the Rev. Dr. Stocker, Draycott Rectory, Cheadle, Staffordshire.

TURNOR—GORDON.—On the 17th April, at Orton Longueville, Huntingdonshire, by the Rev. J. Watson, assisted by the Rev. J. H. Stewart, Edmund Turnor, Esq., eldest son of Mr. and Lady Caroline Turnor, to the Lady Mary Katherine Gordon, eldest daughter of the late Marquis of Huntly.

DEATHS.

BASDEN—On the 17th April, at his residence, 7, Lansdown-place, Plymouth, Rear-Admiral Basden, aged 75, deeply mourned by his relatives and a large circle of friends.

BENNETT—On the 5th March, at Shanghai, from inflammation of the lungs, Robert Bennett, of the Shanghai Medical Hall.

DUVAL—On the 11th March, at Macao, from the effects of wounds received from the coolie emigrants, Captain E. Duval, of the French barque Hong Kong.

FLEETWOOD—On the 12th April, at 127, Piccadilly, after a lingering illness, Sir Peter Hesketh Fleetwood, Baronet, of Fleetwood, in the county of Lancaster, and of 34, Adelaide-crescent, Brighton, in the 65th year of his age.

ELLESMERE—On the 17th April, at Bridgewater House, St. James's, Harriet, Countess (Dowager) of Ellesmere.

FARRELL—On the 8th March, at the Civil Hospital, Hong Kong, Henry Farrell, seaman unemployed.

LEGARD—On the 12th April, at Rome, of fever, Sir D'Arcy W. Legard, Bart., of Ganton Yorkshire, aged 22.

STANTON—On the 8th March, at the Seaman's Hospital, Hong Kong, R. Stanton, seaman unemployed.

YULE—On the 10th April, at sea, on board the Euxine, on his passage home from China, John Alexander Yule, M.D., only son of the late John Yule, Esq., W.S., Edinburgh.

EXCHANGES ON LONDON.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—The few transactions that have taken place during the fortnight are reported for India and the colonies, and, as the teamen hold out for prices even higher than those last quoted, very little business will be done until musters of the new season's teas are exhibited, which will probably be in about six weeks' time. No chops of Country Greens have come forward, and it is asserted that no more will arrive this season. In Canton-made teas the small settlements reported were effected by Parsee firms at former rates.

FOO-CHOW.—No new feature of interest to advise. Reported settlements were two small chops of Foochow-packed Congous at previous rates. The teamen were busily occupied in making preparations for the coming new season, and the first boats with treasure and opium for the interior would probably take their departure in a week or ten days.

SHANGHAI.—Black Teas: The business since our last issue has been but trifling in consequence of the market containing a very few samples, of tea of a desirable quality. One chop Ningchow has been settled at 28 taels, the remaining purchases being so small as not to be worth particularising. There have been no fresh arrivals, from either Hankow or Kiukiang. We quote prices—Ningchow, 28 taels, Hohow, 19 to 22 taels, Oonam, 22 to 24 taels. Settlements, 788 chests, and 1,067 half-chests. Stock 2 chops or 912 packages. Green Teas: There appears no desire, on the part of teamen, to realise, and the few settlements reported show no decline on last prices; particulars and prices of settlements as follows: 1 chop Moyune at 46 taels; 2 chops Fychow at 32 to 38½ taels respectively, and 1 chop Shanghai packed at 21 taels. The stock is, Fychow 26,210 half-chests, and 3,200 half-chests Shanghai packed, Japan.

HANKOW.—No news, in consequence of the season being closed.

KIUKIANG.—Green Teas: There has been very little business done here during the last fortnight; we have only heard of two purchases, at tls. 39 to 41; nevertheless, the holders of tea are still firm in their demands, and quotations closed as follows:—Fychow, and Tuckhing, tls. 30 to 35; Moyune fine to finest, tls. 36.5.0 to 42 5.0; stock 13.861 packages, against 140,910 the corresponding month last year. Black Teas: Only one settlement has taken place, a small chop of 412 half-chests, tls. 22.5, and there is now nothing left in stock.

YOKOHAMA.—Tea: Transactions have been so limited in consequence of the New Year holidays that they are not worthy of particular comment.

RAW SILK.—CANTON.—There is no stock, and none is expected until this season's crop arrives. A few purchases have been made of the commoner sorts by Parsee firms, and then only at a reduced rate.

SHANGHAI.—Settlements very trifling, not reaching 200 bales China Silk. Purchases made lately show a fall of 30 to 40 taels, but some 50 bales sold to-day (7th March) show a fall of 10 taels more, tending downward. The silk market is nearly cleared, the stock being only about some 700 bales. The export is 51,498 bales, against 34,839 bales, an increase of 16,659 bales this season. Tsatlee: No. 1 and 2, none; No. 3, 590 to 615 taels per picul; No. 4, 570 to 585 taels per picul; No. 5, 530 to 550 taels. Yuenfa and Haineens, 480 to 575 taels; these are merely nominal rates. Taysaam: No. 1, none; No. 2, 485 to 500 taels per picul; No. 3, 460 to 475 taels per picul; No. 4, 335 to 450 taels per picul; No. 5, 410 to 420 taels per picul. Shaonings and Laelyungs, none.

YOKOHAMA.—Since the last mail, the Japanese holidays have almost entirely closed the market, most of the dealers are absent, and only about 100 bales have been settled, Prices are merely nominal. Export is now about 9,000 bales; against 10,500 bales last season at same date. Ida: Best, none; Medium $830 to 860; Inferior, $750 to 800 per picul. Mybash and Sinchu: Best, $920 to 940; Medium, $820 to 840; Inferior, $800 to 820 per picul. Oshio: Best, $810 to 910; Medium, $860 to 880; Inferior, $750 to 850 per picul. Sodai: Best, $840; Medium, $780 to 820; Inferior, none. Coshoo: Best, $760 to 780; Medium, $740 to 750; Inferior, none. Hatchogee: $700 to 710 per picul. Etchezen: Best, $860 to 880; Medium, none; Inferior, none. Mashta: None.

COTTON.—SHANGHAI.—One other vessel has left, making the export now 13,492 piculs for Liverpool. The market is inactive, but owing to the paucity of stocks, there are no sellers of best quality below 20 tls. per picul.

CHINA IMPORTS.

HONG KONG.

There has been some inquiry for 28 to 32 yarn, but other sorts have not been sought after. Grey Shirtings have also been quite neglected, one or two small transactions by speculators are reported at rates which show that holders are pretty firm, $4.90 having been paid for 8.4 lbs. goods of the best chop; for the commoner qualities there has been no inquiry whatever, although many have been willing to sell at very moderate rates. T-cloths have attracted more attention, stocks are extremely small, and holders therefore very firm. Fancy cotton goods show no improvement in demand athough stocks are very limited.

RAW COTTON.—There has been little or no demand for the staple, either from Chinese or foreigners, and rates are consequently lower.

WOOLLENS.—No change to note in these, except that prices are somewhat weaker.

METALS.—The demand for Iron of all sorts appears to have completely abated, and, with the exception of a small sale of Wire, there are no settlements reported. Prices show no material change. Lead continues firm and prices are still advancing.

COALS.—There have been no sales during the fortnight and quotations are nominally the same. One cargo of Sydney Coal has arrived, which, however, was not placed on the market.

RICE.—A very active business continues to be transacted and clearances have been considerable. Of Bengal and Aracan sorts there is but a very small stock, and attention therefore has been principally drawn towards Saigon grain, which is in good supply and commands high rates. The supplies from Bengal will be very small this season.

SHANGHAI.

COALS.—Transactions have been checked of late by the numerous arrivals that have come forward. Regular purchasers have in consequence been holding off, with the hope of obtaining cargoes at easier rates hereafter. We would quote Cardiff by the part cargo tls. 10·75 English Steam tls. 9·50, Sydney tls. 8·50 and 8·75.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: Feb. 27, Grenadier. From Liverpool: 20, Eliza Hands.

At SHANGHAI.—From London: March 2, Min; 5, Burdwan. From Cardiff: Feb. 22, Glasgow. From Newport: 23, Janet Mitchell. From New York: March 4, T. Breck.

At HONG KONG.—From London; March 10. Black Prince. From Hamburg: 9, Fidelio. From New York: 1, Windward.

At MANILA.—From Glasgow: Feb. 28, Adolfo.

At SINGAPORE.—From Liverpool: March 15, Albert Victor.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London: March 6, Jubilee. For Liverpool: 3, Seawfell.

From FOOCHOW.—None.

From HONG KONG.—None.

From AMOY.—For New York: Feb. 24, Amaranth.

From MANILA.—For London: Feb. 24, Margaret Wilkier. For Havana: Prudencia.

From SINGAPORE.—For London: March 17, Como. For Bordeaux: 15, Louise Collet. For Boston: 8, Orpheus. For New York: 9, Diligentia.

From PENANG.—For London: March 15, Ocean Home.

LOADING.

At YOKOHAMA.—For London: Chanticleer.

At SHANGHAI.—For London: James Wishart. For Liverpool, Maiden Queen, Lockett. For New York: Resolute.

At FOOCHOW.—None.

At HONG KONG AND CANTON.—For London: Ethels, Fort Regent. For New York: Eastward Ho.

At MANILA.—For London: Her Majesty. For Liverpool (via Cebu): Olano. For Queenstown: Crest of the Wave. For New York: Enoch Train.

At SINGAPORE.—For London: Moneka, Peter Adolf. For Liverpool: Fortuna, Couranti. For New York: Diligentia, Cymberline.

At PENANG.—For London: Jane, Anna.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £3 nominal.

At SHANGHAI.—For home ports no new charters have been effected. To the northern ports there has been considerable activity at advanced rates.

At FOOCHOW.—No vessel on the berth for home.

At HONG KONG.—In home charters nothing has been done; vessels from 500 to 700 tons register are wanted to load at Manila at £3 10s. per ton for sugar, or other Philippine ports at £3 15s. per ton to the United Kingdom; for London, the Fort Regent with tea, and Ethels with general cargo, are on the berth, both fully engaged, and no other vessel has as yet been laid on. Rates for New York are nominal, say £2 10s. to £2 15s. per ton; and no settlements have been made during the fortnight. The amount of disengaged tonnage in harbour, according to the circular of George Holmes, is 26, representing 12,171 tons.

AT MANILA.—The Olano has been fixed for Liverpool, at £3 10s. for unclayed sugar, and £4 per ton for 500 bales hemp; a portion of the sugar (400 tons) being shipped at Cebu. The English ship, Her Majesty, loads for London, with about 750 tons sugar at £3 10s., 400 tons hemp at £4, and measurement goods at £4 10s. per 50 cubic feet.

At SINGAPORE.—The rate for sugar is £2 per ton, and measurement goods £2 10s., with but little freight offering.

PENANG.—The Devonvale is loading home, with the best part of her cargo engaged as follows:—viz., at £3 for tin and sugar, and at £2 12s. 6d. light freight, which is scarce. The American barque Rocket is taking cargo on owners' account.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—Feb. 27, Belted Will, London to Hong Kong; March 4, Garland, Hamburg to Hong Kong; 6, Ellen Brouse, Sunderland to Shanghai; 12, St. Jan, Holland to Batavia; Quartet, Amsterdam to Batavia; Bengal, Cardiff to Singapore; Soumi, England to Singapore.

From UNITED STATES to CHINA, &c.—None.

From CHINA, &c., to ENGLAND and CONTINENT.—March 4, Margerita, Manila to Spain; 5, Rio Janeiro, Singapore to Falmouth; 8, Bennevis, Japan to London.

From CHINA, &c., to UNITED STATES.—March 1, Anglo-Saxon, Foochow to New York.

COMMERCIAL POSTSCRIPT.

The meeting of the Singapore Gas Company is announced for to day. The report of the directors states that the profits for the year 1865 were £1.732, which, together with £26 from the preceding year, made an available balance of £1,758. Out of this the directors recommended a dividend at the rate of 7½ per cent. per annum on the paid-up preference capital, and a dividend at the rate of 3 per cent. per annum on the original capital, all free of income-tax, leaving £172. The report of Mr. Wells, the engineer, for the first year's working, ending the 31st of December last, stated that the undertaking thus far had been a decided success, and that the continued demand for gas fully justified him in saying that the concern would be highly remunerative. Malays, Klings, Chinese,

Digitized by Google

Armenians, Parsees, Javanese, Bengalees, and other classes of natives were consumers of gas, which had also been introduced into the Hindoo and Mahomedan temples. Gas was also extensively used for illuminations by the Chinese, and also for their theatres; a device having been made in the Chinese characters which had given great satisfaction.

SPOKEN.—Rock Light, for Shanghai, March 7, 5 S., 27 W.

ARRIVALS NOT INCLUDED IN THE TABLES.—April 22, at Hamburg from Yloilo, Condor.

DEPARTURES.—April —, from Rotterdam for Batavia, Susanne; 21, from Cardiff for Nagasaki, Caernarvonshire; from Liverpool for Shanghai, Queen of England; from Sunderland for Hong Kong, Dryden; 24, from Cowes for Batavia, Hendrina; from Rotterdam for Batavia, Willem Poolman; 25, from Falmouth for Singapore, Hollandia; 24, from Liverpool for Galle, Anna Maria; 26, from London for Colombo, Wynaud.

THE Admiralty have invited tenders for the conveyance of 20 tons naval stores to Hong Kong and 41 tons (principally combustibles) to Trincomalee, all from the River Thames.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED) will present the first report of their directors to the shareholders at the meeting on the 30th inst. After details of proceedings under various heads, the report concludes:—"The disposal of those ships which are least suited for the trade, and their replacement by others, the increased productive power of the mines, the enhanced price of coal, as well as the new sources of revenue to be expected from petroleum, lubricating oil, wood, and land, all combine to place the position of the company on a footing it has never reached before; and in placing this report so fully before the shareholders of the company, the directors can only conclude by expressing their undiminished confidence in the value of the property, and their opinion that no circumstances with which they are at present acquainted are likely to interfere with the prospect of earning a satisfactory dividend when the proposed works shall have been carried out."

THE BISHOPRIC OF HONG KONG.—A notice of motion has been given by the Rev. William Denton, M.A., for the next meeting of the Society for the Propagation of the Gospel in Foreign Parts, in relation to the bishopric of Victoria, Hong Kong, which has been vacant several months. It is said that the bishopric has been offered to several gentlemen, but refused in consequence of the unsatisfactory state of the colonial episcopate. Mr. Denton's motion is as follows:—"That the attention of his Grace the Archbishop of Canterbury be respectfully called to the deplorable state of the bishopric of Hong Kong, and that his Grace be requested to take such steps as in his judgment may seem desirable to provide a bishop for the vacant diocese."

OVERLAND ROUTE.—We observe that the company which was formed for the purpose of establishing hotels in India and China, and elsewhere in the route between England and the British settlements in India and China, have just completed the first of their establishments, which is to be opened at Point de Galle immediately. Another is in course of building at Cairo, in Egypt. Both of these will, we have reason to believe, have every comfort and convenience of the best English hotels. Any one who has been along this route must feel how much hotels of this description are required, and we only hope that the success which there is every reason to expect will attend the first efforts of the company will be such as to induce them gradually to extend their system over Egypt, India, and China, in all of which countries hotel accommodation suitable to the requirements of the present day is so much wanted.

WILLS.—The will of Sir William Gore Ouseley, K.C.B., D.C.L., was proved in the London Court, on the 21st of March, by Marcia Lady Ouseley, the relict and sole executrix. The personalty was sworn under £14,000.—The will of Charles Finch Foster, Esq., banker of Cambridge (under the firm of E. and C. F. and G. E. Foster), late of Anstey Hall, Trumpington, was proved in London under £100,000. The following are the charitable bequests: £100 to the Cambridge Royal Albert Benevolent Society; £100 to the Victoria Asylum at Chesterton; and £250 to the Cambridge Benevolent Society for Protestant Dissenting Ministers and their widows.

THE JAPANESE STEAMER "FUSI YAMA."—"We recently announced," says the *Patrie*, "the arrival at Yokohama, in Japan, of a steam corvette, purchased in America for the Tycoon. A letter from Jeddo, of the 5th March, now states that the Japanese Government, considering that the vessel was too dear and badly constructed, had decided that in future purchases of the kind shall be made only in France or England. It also censured the engineer who had been sent to New York to purchase the corvette. That official, who is brother of one of the ambassadors who came to Paris, believed himself dishonoured, and asked for and obtained permission from the Tycoon to commit suicide. He consequently ripped open his abdomen, as is the custom, in the presence of his colleagues and servants, who stood in a circle around him."

THE ITALIAN IRRIGATION CANAL COMPANY—(CANAL CAVOUR).—The ceremony of the inauguration of this stupendous work was most successfully conducted on Thursday, the 12th inst. In the morning two special trains left Turin for Chivasso with the company which had been invited to be present at the ceremony. A separate carriage conveyed the Prince of Carignano (the King's brother) and his suite. Under the tent which had been erected for the reception of the guests were assembled some of the directors of the company, the Minister of Agriculture and Commerce, the Bishop of Ivrea, the Count San Martino, the Chevalier Montezemolo, the Royal Commissioner, Deputies Ferraris, Germanetti, Massa, Sommeiller, &c., the Prefect of Turin, Count Torre, the Syndic of Turin, the Syndic of Milan, and many other persons of distinction in political and scientific circles. The notary Turvano drew up the official account of the ceremony, which was signed by the Prince of Carignano, the Minister of Agriculture and Commerce, and by the ex-Minister of Finance, Sella, who evinced great interest in the works. The Bishop of Ivrea pronounced a benediction on the canal, eulogising the object and the manner in which the undertaking had been accomplished. The Prince of Carignano gave the first turn to the crane for opening the sluice-gates, and soon afterwards the waters of the Po rushed into the canal. A breakfast followed, and the whole party returned to Turin greatly delighted with the excursion, and with the magnitude of the works of this great national undertaking.

SHIPBUILDING AT ABERDEEN.—During the some hour as the *Northumberland* was taking the water, the Messrs. Hall, Aberdeen, launched from their yard the longest, and probably the very finest vessel this famous firm of clipper-build celebrity have yet put out of their hands. The new ship is built on the composite principle, partly wood, partly iron, and the following are her dimensions:—Length 300ft.; breadth of beam, 40ft. 6in.; depth, 28ft.; with a registered tonnage of 2,300, and burden 3,000. The bowsprit and lower masts of the vessel are iron; the topmasts, bower, and double topsail yards steel; while her standing rigging is formed of galvanised wire. The *Sobraon*, for so this magnificent new ship was named as she glided into the water, by Miss Hall, daughter of one of the builders, has three complete decks. The cabins are on the middle deck, in place of in the poop—the berths, &c., of the crew occupying the maindeck. The *Sobraon* is classed 13 years, A 1, on Lloyd's register; is to form one of the Australian fleet of liners owned by Messrs. Gellatly, Hankey, and Sewell, London, and it will be commanded by Captain Swanson, formerly of the *Duncan Dunbar*. Outwardly the *Sobraon* is for beauty of outline one of the most handsome vessels ever seen in the Aberdeen docks, while inwardly she is being fitted up under the immediate superintendence of her commander in a style rarely equalled. Not a hitch occurred during the launch, which was witnessed by thousands of the citizens.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, APRIL 25.

As soon as the Second Chamber of the States General reassembles, it will at once proceed to the discussion of the East India Budget for 1867. The cost to the mother-country, for the behalf of this part of our colonies, is estimated at f.32,701,102. 48c., and the cost to India at f.92,169,029. 6c., making together f.124,870,131. 54c.; which, compared with the estimate of 1865, gives an unfavourable balance of f.13,299,600. 54c. This difference, however, arises from the fact, that all the disbursements for India are now brought into this Budget, instead of, as formerly, making their appearance in part in the Budget of the Colonial Department. The receipts are estimated in the Netherlands at f.62,477,747. 54c., and in India at f.62,392,384; together f.124,870,131.54c., or f.8,344.362.54c. more than in 1865, arising out of the circumstance that the sales of produce used to be accounted for without deducting the charges of realisation here.

The value of the produce for 1867 is estimated at f.61,951,617.84c., besides f.521,129.70c. worth of spices. In the East Indies there will be sold produce only to the amount of f.14,807,224, the rest of the income there arising from taxes, cultures, &c. Amongst the expenses appear:—Salary of the Governor General, f.295,000; Department of Justice, f.2,960,598; Home Department, f.53,587,398.08c.; Instruction and Industry, f.7,619,021.78c.; Public Works, f.9,685,353; Financial Department, f.16,484,328.11½c.; War Department, f 20,839.811.36c.; Marine, f.4,744,712.20½; Pensions, f.4,750,358.20½c.

A Bill is in preparation relative to the beetroot-sugar manufacture. Messrs. Mattie and Hoyer, functionaries of the Finance Department, remained some time in Paris, to make investigations in reference to this subject.

Mr. K. Vander Heyden, Captain in the East Indian army, now at home, is to start for Chalons, to be present at the manœuvres of the French troops. His mission will bear an official character, and will be on behalf of the East Indian army.

That dreadful epidemic, the cholera Asiatica, has made its appearance in this neighbourhood. Twelve cases are reported, of which seven were fatal. Measures were at once taken by the authorities to prevent the spreading of the malady. The official journal, *de Staats Courant*, was the first paper that announced the prevalence of the disease.

A Bill is before Parliament to authorise the Government to permit to shipbuilders, who build ships on account of foreign Governments, to send such vessels under the Dutch colours to their place of destination. The measure has arose out of a demand made by Messrs. C. Gips and Zonen, of Dordrecht, who built the *Kai-Yoo* for account of the Japanese Government, and it will no doubt be passed. This stately man-of-war will be ready to sail in the early part of August, and it is very probable that another vessel will be ordered.

The marriage of Miss M. E. Milbanke, daughter of the English ambassador to our Court to Jkr. W. W. Boreel, son of the First Master of Ceremonies to the Royal Household, was celebrated a few days since at the Hague with much pomp and magnificence, in presence of the King, the Prince of Orange, &c.

A new opera-house is to be built here, which will offer room for 11,000 persons.

Digitized by Google

Within a few weeks a Malay Illustration will be published at Amsterdam. It will bear a Christian character, and appear under the title "Nafiri Indjil. Satoe soewara wolanda bagi Radja orang Israël, kapala djamaätnja ia itoe Jezus Christus dau goena segala bangsa di tanah Hindi Nederland." Mr. J. Esser is its manager.

A third line of railway is to be laid down between Amsterdam and Rotterdam. When ready the transit will be shortened to 1¼ hours. Both the existing lines take three hours. It is an English Company that has obtained the concession.

COMMERCIAL.

COFFEE.—On the 18th the public auction of the Trading Company took place. 86,071 bags Java, Padang, and Menado coffee were offered and sold, in average at ¼ to ½c. under valuation, with exception of the clear and clear yellow sorts, which were paid with ½ to 1c. above valuation. Since the auction there is a lively demand for Menado and Malangs, but nothing is offered. The private transactions include 3,697 bags Padang, and 4,000 bags ditto ex Princess of Wales, at 45 to 46c.; 602 pic. Java, ex Batavia, and 1,694 bags Java, sold by the Netherlands Bank in auction, at 47¾c.

SUGAR (RAW).—The market remains flat, and it is impossible to sell without a further reduction in prices. Some parcels just arrived were brought into the market, but holders decline to sell for the offers made. The quotation of No. 16 is 34f., say 2f. to 2½f. nominal under the auction prices of March. Stock in entrepot on the 15th of April, 44,744,360.

RICE.—10,000 bags uncleaned Rangoon, ex Wilhelmina, were sold at secret prices. The 1,350 bags Arracan and Java (cleaned) offered in public sale by the Netherlands Bank were sold at 8f. to 9¾f.

SPICES.—The market was inanimate, and prices are rather nominal. There are no transactions to report, except an auction held by the Netherlands Bank, in consequence of a failure in Amsterdam.

TEA.—The market is inanimate, the trade being occupied inspecting the parcels of Java, which are to be sold by the Dutch Trading Company, and which consists of 249 ¼-chests and 15 ½ chests Boei, 432 ¼-chests and 40 ½-chests Congo, 50 ½-chests Pekoe Kempoei, 546 ½ chests and 33 ½-chests Souchong, 376 ¼-chests Pekoe Souchong, and 138 ¼-chests Pekoe, &c.

TOBACCO—(Java Leaves).—The market is dull, there are no transactions to report.

MANILA CIGARS.—On the 27th 490 m. 2 a. Cortados Cavita Manila will be offered in public sale.

DRUGS.—The 971 tubs (about 58,000 No.) Japan Camphor offered in public sale by the Trading Company were bought in at 74 c., and cannot be bought now without a considerable advance on this price. On the 8th of May 2918 ch. Japan Wax are to be offered in public sale. Cassia Vera is offered at 32 c. Cubeben flat, but without stock.

RATTANS.—A good business doing; in the first hand the transactions included 6000 b., ex Lady Alice; 3307 b., ex Grootmeether Nationaal; 3430 b., ex Christina; 1442 b., ex Princess of Wales; 1050 b., ex Anthony van Hoboken; 453 b., ex Macassar.

INDIGO.—There are no transactions to report; the trade is without animation, in waiting for the auctions of 1st and 3rd May. The opinion is very firm, and it is expected that full prices will be paid on this auction.

BANCA TIN.—Since our last report the following parcels were sold:—600 slabs at 47 f., 100 slabs at 47¼ f., 500 slabs at 47 f., 700 slabs at 47½ f., 250 slabs at 48 f., 800 slabs at 47½ f., 300 slabs Billiton at 46¼ f.

HIDES dull; only 194 p. Batavia Buffalo, ex Anthony van Hoboken, were sold.

COCOA NUT OIL.—2000 kilo., directly imported, were sold at 35¾ f., and 1000 kilo. Sydney at 28f.

ARRACK.—The market remains unaltered; 100 ½-casks per Lady Ann were sold at 180f.

MONEY.—The rate of the Bank discount is still unaltered; in the open market, however, money can easily be had, on good securities, at ½ per cent. under that rate.

STOCKS.—Dutch Two-and-a-Half, 59; Three per Cent., 70; Four per Cent., 92¼. Trading Company, 145; Rotterdam Bank, 101½; Dutch Railway, 118; Central Railway, 28—shares do., 117. The market in general was dull, according to the political situation of Europe.

EXCHANGE.—London, 3 months, f.11.66c.; 2 months, f.11.71c.; short, f.11.82½c. Paris, 3 months, f.46.57½c.; 2 months, f.46.72½c.; short, f.47.10c. Hambro, 3 months, f.34.75c.; 2 months, f.34.85c.; short, f.35.20c. Bremen, 3 months, f.189,40c.

SHIPPING.—ARRIVALS.—April 14, at Hellevoet, from Banjoewangie, Ellina; 15, at Hellevoet, from Batavia. St. Helena; at Texel, from Batavia, Philips van Marnix, Batavia, Baltimore, Bristolian; from Padang, Samarang: at Texel, from Tjilatjap, Stad Dokkum; from Batavia, Sophie, Webfoot; from Banjoewangie, President van Ryckevorsel; from Passareoang, Kon. Ned. Yacht Club; 16, at Texel, from Batavia, H.M.'s man-of-war Djambi, Constantia; from Banjoewangie, Souburg, Maria Regina, Lobelia; from Sourabaya, Star Queen; from Padang, Sir Robert Peel; at Texel, from Batavia, Governeur van Sureten; 17, from Batavia, Hercules; from Banjoewangie, Sandringham; 18, from Batavia, Jacob Roggeveen; at Zierikzee, from Banjoewangie, Nyverheid.

DEPARTURES.—April 19, from Texel, for Batavia, Insulinde; for Macassar, Constance; 22, from Brouwershaven, for Batavia, Susanna, Willem Poolman; from Japan, Jacob; from Hellevoet, for Macassar, Koning Willem III.

RUSSIA, GERMANY, &c.

(FROM OUR CORRESPONDENT.)

HAMBURG, APRIL 24.

As the German merchants and shipowners are every year extending more and more their commerce and navigation to the Far East, the flourishing progress of piracy in the China seas, which appears to have become a standing institution, has become an element of serious importance in their calculations of profit and loss. Of course these gentlemen are able to cover themselves from loss by the payment of a heavy premium of insurance, and do so to a considerable extent; but then the loss falls the more heavily on the underwriters and Insurance Companies, as the risk generally includes a wide margin for assumed profit and probable freight. Under these circumstances the question has been mooted what steps can be taken to avoid, or at least greatly to reduce, these losses, and an agitation has been commenced here and at Bremen for reviving the ancient Hansa or Hanseatic League, which three or four hundred years ago was so formidable as to exercise the police on the sea and overawe the pirates by the extreme severity with which they acted.

In the natural course of things it ought to be the duty of the Governments to protect their mercantile subjects by the display of an efficient naval force to put down piracy everywhere; but the singular jealousy and absence of unanimity even for their interests is unfortunately such a marked characteristic of the Teutonic character, that there is but little chance of bringing the Governments to take action in this case. The *Weser Zeitung* lately published a statistical table of the shipping returns of Hong Kong for the year 1865 from official sources, and from the subjoined extract it will be seen that the German element forms no inconsiderable part of the navigation of that port:—

Flag.	Arrived. ships.	tons.	Sailed. ships.	tons.
Hamburg..	250	81.831	245	82,077
Bremen ..	91	26,780	91	28,207
Oldenburg	14	3,990	15	4,834
Lubeck ..	2	662	2	691
Mecklenburg	6	1,771	8	2,060
Hanover ..	36	8,924	32	7,982
Prussia ..	44	13,624	61	19,012
	443	137,582	454	144,863

with crews numbering about 5,000 men. These German vessels labour under great disadvantages, and, what with low freights, risk of pirates and high premiums of insurance, have much difficulty in competing successfully with other flags. As large ships of war would be of no use in the suppression of piracy in the China seas, the only suitable class of vessels for this purpose would be gunboats. Prussia is the only North German State that has any ships of that description, but in the present threatening attitude she has chosen to assume it would be vain to expect her under existing circumstances to deprive herself of their services on such a distant station, when at any moment they may be required for active war at home. It is therefore proposed to fit out a few gunboats for the protection of German interests by the merchants, shipowners and underwriters of the different States interested. No public meeting has yet been held on the subject, but it has been taken up in a laudable spirit by the press both here and at Bremen. There would be no doubt many difficulties in the way of its execution, and I fear it will not lead to any results, simply from the above mentioned want of unanimity in the transactions of all Germans belonging to different States, not only among the Governments but also with their subjects; but the question has been and is still discussed with some chance of eventful success.

The Leipzig Fair has commenced under very inauspicious circumstances, and promises to be very bad indeed. In consequence of the unsettled state of political affairs, a great many people have been deterred from going to Leipzig at all, and the attendance of buyers is therefore very thin. The prices of leather are from 20 to 25 per cent. lower than were previously obtained, and there is also a great falling off in the value of woollen cloth. The fur trade is in a very depressed state, for the winter having been everywhere so mild the sale of furs was very meagre and the dealers have all still large stocks on hand and fresh parcels are being offered for which they have no outlet. For some hitherto unexplained reason the usual Russian supplies were greatly behindhand, and had only just begun to arrive, and in very moderate quantities.

Among the arrivals at foot will be found that of the Hamburg barque *Wappaeus* from Singapore. This vessel has been absent for nearly three years, and was reported as lost, but has now unexpectedly turned up all right, and sailed into the harbour decked out with innumerable flags and firing a salute of guns.

Letters from St. Petersburg state that the ice in the Neva broke up and put itself in motion on the evening of the 16th inst.

COMMERCIAL.

COFFEE.—Though the dread of impending war has greatly abated, there is but little improvement as yet in the produce market. Coffee

Digitized by Google

maintains its value, as the stocks are but small; the sales, however, did not amount to more than 7,000 bags.

SUGAR.—The raw article continues its downward tendency, and is again 8 Sch. Bco. lower, with but a very limited amount of business. Of refined 12,000 loaves were taken, but it was with great difficulty that previous rates could be maintained.

RICE.—This is almost the only article in which a large business was done, the chief demand being for inferior qualities and broken grain (reported to be for the Prussian Commissariat), which obtained higher prices. There is now a good assortment in the market.

SPICES fully maintain their value, being held in firm hands, but the dealings are quite trifling.

TEA.—Market firm. There have been considerable transactions in various descriptions ex the new arrivals Waitzlava, Emma, Persia, Areta, and Florentin, as well as a public sale of sea-damaged ex last-named vessel.

SPELTER.—This market is dull, and the market decidedly lower, though no sales are reported. Nominal quotations for Silesian in slabs both loco and for delivery 15 mks. 14 sch. banco.

DISCOUNT.—Money continues scarce, and the rate of discount 6½ per cent., being rather higher than last week. The Stock Exchange has fully recovered from its late panic, and Austrian Securities are higher than before. The chief object of speculation here are the shares of the Austrian Bank of Credit, the value of which fluctuates considerably every day. A month ago they were above 70 per cent., but have been gradually declining till during the late panic they fell to 59, since which, however, they have improved, and are now quoted 64 buyers.

SHIPPING.—ARRIVED.—April 17, New Ed, from Hong Kong; 19, Wappaeus, from Singapore: 20, Johann Christopher, from Foo-chow and Amoy.

SAILED.—April 19, Dorothea, to Singapore; Hanover, to Shanghai.

Naval and Military.

The Admiralty received tenders on Thursday, the 19th inst., for the conveyance of 145 tons navy provisions, and 2 tons Seamen's mess utensils, to Hong Kong.

Lieut. William F. L. Elwyn, from the Princess Royal, to the command of the Slaney, gun-vessel, in China, vice J. S. Keats promoted; Lieut. Comptom E. Domvile, late of the Meeanee, to the command of the Algerine, gun-vessel, in China, vice J. G. Tucker, promoted.

The Duke of Somerset (says the *Army and Navy Gazette*) has at length filled up the greater portion of the vacancies caused by the late large flag-promotion, and officers have at length found themselves recipients of good service pensions, and holders of the honourable posts of aides-de-camp to the Queen, when they had almost abandoned all hope of ever attaining to such distinctions. His Grace has broken through the rule which at one time, it is said, he had laid down for his guidance of declining to bestow additional income or honour upon any officer who was the fortunate holder of a lucrative appointment. Captain Charles F. A. Shadwell, C.B., now superintendent of Haslar Hospital, and of the Clarence Victualling Yard, has been proposed to and approved by Her Majesty as one of her naval aides-de camp; so has Captain H. Caldwell, C.B., now going out as Commodore of the second class to the Cape of Good Hope; so has Captain W. Edmonstone, C.B., the lucky man who was lately nominated at an improved rate of pay to Woolwich Dockyard. Captain F. A. Campbell, the private secretary of the Duke of Somerset, both from his seniority on the list and his standing in the service, could not have well been passed over, and his brother officers will naturally feel pleased at the distinction bestowed upon him. Captain F. Beauchamp P. Seymour, C.B., has obtained the fourth prize, and no one—unless Sir William Wiseman and Captain A. Cumming would have preferred the title of aide-de-camp, without pay, to the income which arises immediately from the receipt of a good service pension—can find fault with the selection made in his case. Captain Seymour not only did his work well in New Zealand, but in the Black Sea he was frequently employed by the late Lord Lyons, who was in the habit of saying, "I like to put Seymour to work; he always looks cheery, and never makes a difficulty." The good service pensions have been awarded to the following officers: Captains W. H. Hall, C.B., J. T. B. Wainwright, J. C. Prevost, Sir W. S. Wiseman, Bart., C.B., J. A. Paynter, Arthur Cumming, E. Tatham, H. C. Otter. We have so frequently expressed an opinion as to the merits of Captain Hall and Sir W. S. Wiseman that it is unnecessary for us to say more at present than we are pleased to find them figuring in a list with such deserving officers as Captain Paynter and Captain Cumming. The other gentlemen, no doubt, have served long and faithfully; but they have not, doubtless for the want of an opportunity, made themselves so well known to the country.

ADMIRALTY, APRIL 17.—With reference to the *London Gazette* of the 13th instant, the undermentioned Commanders have been allowed to assume the rank of Retired Captain from the 31st ultimo:—John Gustavus Harrison, George Kenyon, Philip de Saumarez. And the undermentioned Lieutenants have been allowed to assume the rank of Retired Commander from the same date:—St. Ledger Aldworth, Charles Edward Powys, James Hector McKenzie Robertson, Charles James Fox Campbell, Arthur Kennedy, Richard Hoops, Thomas Sibbald, Charles Bisset Bayly, Daniel Butler Dawles, Herbert Thomas Ryves, Robert Ellis, James Byrn Kinsman, William Tomlison Stanbridge.

Salamis, paddle-despatch vessel, Commander F. C. Suttie, arrived at Ascension, from England, on the 18th March, and left on the 22nd for Japan.

Orontes, 2, screw troop-ship, Captain Hire, from Hong Kong, arrived at the Mauritius on the 12th of March, and left on the 15th for the Cape of Good Hope and England.

Captain Snerard Osborn, R.N., C.B., has arrived in England.

The Netley and Minstrel, improved screw unarmoured gun-boats, 60-horse power, nominal, of engines, are ordered to be completed at Portsmouth as speedily as possible for the service in North American waters. Two other gunboats of the same class as the Netley and Minstrel are expected to be also commissioned, and form with them the nucleus of a strong squadron of small craft, the command of which rumour gives to Captain H. Burgoyne, V.C., now commanding the turret-sloop Wivern.

WAR OFFICE, APRIL 17.—Half-pay: To be Major without purcease, Captain James Stillman, from 9th Foot. Brevet: Major and Brevet-Colonel George Freeman Murray, retired on full pay 65th Foot, to have the honorary rank of Major-General. Captain and Brevet Lieutenant-Colonel Edmund John Cruice, half-pay, Unattached, and Staff Officer of Pensioners, who retires upon full pay, to have the honorary rank of Colonel. The following promotions to take place consequent on the death, on the 4th instant, of General Frederick Campbell, Colonel-Commandant Royal Artillery:—Lieutenant-General Sir William Cator, K.C.B., Royal Artillery, to be General; Major-General Poole Vallancy England, Royal Artillery, to be Lieutenant-General; Colonal John William Ormsby, from the Royal Artillery, to be Major-General. Captain and Brevet-Major Daniel William Tupper, 50th Foot, to be Lieutenant-Colonel; Captain the Honorable Edmund John Boyle, 85th Foot, to be Major.

WAR OFFICE, APRIL 20.—5th Foot: Lieutenant William Douglas Legge to be Captain, by purchase, vice Charles John Miles, who retires. Ensign Edward Harmsworth Ruddach to be Lieutenant, by purchase, vice Legge. Charles George Heathcote, gent., to be Ensign, by purchase, vice Ruddach. 11th Regiment of Foot: Thomas Stephen Coppinger, gent., to be Ensign, by purchase, vice Charles Albert Spaeth, who retires.

25TH REGIMENT.—Captain Floyd, Lieutenant Taylor, and Assistant-Surgeon Onslow, with a detachment of the 2nd battalion, arrived in the Dunphail Castle from Ceylon; as also Captain Tyndell and Ensign Evans, of the Ceylon Rifles.

A return has been issued, from which it appears that in the year 1864 there were 8,681 men whose limited term of service expired. Of these 4,711 were discharged; 3,742 re-enlisted, or were re-engaged without discharge, and 228 after discharge. It also appears that in the same year 2,004 men taking their discharge from the infantry arm of the service were brought home from India at an average cost per man of £26. 10s. 11d. for passage money, and £8. 10s. for other charges. Artillery men from the same places seem to cost £10. 3s. 4d., exclusive of passage money.

A Parliamentary return shows that the total amount of all moneys expended upon fortifications, military storehouses and buildings, and upon barracks at Hong Kong and Kowloon, from April 1 to September 30, 1865, was £3,387. 9s. 2d., which was thus distributed:—Fortifications, £46. 13s. 10d.; military store buildings, £146. 11s. 2d.; and barracks, £3,194. 4s. 2d. The total amount of moneys paid for godowns and other temporary buildings at the same places and for the same period was £957. 9s.

MASTERS IN THE NAVY—MR. PARKER, R.N., AND KAGOSIMA.

The following letter (addressed to the Editor of the *Army and Navy Gazette*) contains an apt illustration of the unjust manner in which masters in the Navy are treated under the present system. We understand that Mr. FALK, M.P., intends bringing forward a motion on the subject in the House of Commons.

Sir,—My attention has just been drawn to an article in your paper of the 17th inst. on the above subject, in which you allude to the services of Mr. Parker, R.N. This officer, in addition to serving in the Baltic, Black Sea, and Sea of Azof, when he obtained the Legion of Honour for his services ashore under Captain—then Lieutenant—Day, V.C., of the *Recruit*, was on the bridge of the *Euryalus* when both the captain and commander were killed. On our return to Yokohama, after the naval action of Kagosima, all on the station thought he would be promoted to the rank of commander, in accordance with the Admiralty rules, especially as if Captains Josling and Wilmot had survived they would have been rewarded, and two of the lieutenants on board, viz., Captains Hunter and Roe, got the death vacancies of those officers.

On the receipt of Admiral Kuper's despatch, published in the *London Gazette* of the 30th of October, 1863, in which the Admiral stated, in allusion to the services of officers generally on the occasion, "that those which have been brought more prominently to my knowledge are those of Mr. W. H. Parker, master of my flag-ship, who with the assistance of the masters of the ships present, succeeded in making a rough survey of the Bay of Kagosima, without which the squadron would have been unable to take up the eligible position it subsequently occupied whilst attacking the batteries. The steady and confident manner in which Mr. Parker steered the Euryalus within point blank range deserved my highest commendations." It was with great astonishment that we saw the extra promotions of one of every line from the commanders downwards except the masters' line. About this period Mr. Parker was invalided, and I saw no more of him until embarking with the Japanese Commissioner and suite at Devonport last December, on board Admiral Freemantle's steam yacht the *Princess Alice*. At the Commissioner's dinner afterwards, I learnt that Mr. Parker had been for six months after his return from Japan on half pay, viz., 6s. a day, and was considered to have got a good berth in the command of the *Princess Alice*, with 13s. and 2nd command pay a day for five years, but on the expiration of that period (in 1869) he reverts to his old position, and if on half pay 8s. a day. Mr. Parker has four children, and I know he has made strenuous exertions to get one of his boys—eight years old—a nomination to Christ's Hospital, but without success, and as boys cannot be entered after ten years old, I should be very thankful if this, my first letter addressed to your columns, could secure such a nomination through one of the numerous governors of that institution, of whom I believe about 150 have nominations each year. It may be well to mention that my interest in Mr. Parker chiefly arose from proceeding up the Gulf of Kagosima with Captains Borlase and Josling to test his chart of the bay, which resulted in the discovery of Prince Satsuma's three steamers—their capture next morning, and the unexpected naval action the same day, all of which is mentioned by the Admiral in his despatch above quoted.—FREDERIC BRINE, Major Royal Engineers.

THE DISASTROUS REPORT OF THE COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.

(MONEY MARKET REVIEW.)

There is a manly courage in the patient bearing of unforeseen misfortune which elevates adversity to something resembling dignity, and we think there is something of this in the report in which the directors of this company announce their losses to the shareholders. They have sustained great and signal reverses by the incapacity or default of several of their officials, but, for anything we as yet know, without any reflection upon the honour of the board. The company have recently had to face a season of almost unparalleled commercial vicissitudes in India and the East, in which, in consequence of the numerous failures of firms of high standing and repute, it would have been scarcely possible under the most favourable circumstances to have entirely avoided loss. But the circumstances under which the directors had to encounter these vicissitudes were not of the most favourable character. When this company, in January, 1865, took to themselves a transfer of the business and branches of the late commercial Bank of India, they took over, after a period of great commercial prosperity, a staff and a system which had not been organised by themselves, and had never been adequately tried and tested. They knew that some defects might reasonably be anticipated, because the difficulty of obtaining a body of properly qualified directors at Bombay was the main reason for establishing the head quarters of the bank in London. It was under these circumstances, and before the character and qualifications of the officers, and before the probable defects of the system could be properly investigated and rectified, that the period which was to try both so severely suddenly arrived.

The results have been serious, but not hopelessly disastrous. The losses incurred have swept off the whole of the reserve fund, £169,000, and the balance brought forward from the last account, £69,500, and the whole of the last year's profits, amounting to £70,439, and they leave, besides, a balance to the debit of profit and loss in the new account. But the losses, though thus heavy, are not more than the company are able to bear, and, assuming that the profits of the current year will not be less than those called ordinary profits for the past year, they will be more than sufficient to clear off the balance now standing to the debit of profit and loss. The company, therefore, at the end of the current year will again start clear of the past. The total amount of loss appears to be about £375,000. According to the report, the losses on sterling bills falling due during the past year have been estimated at £123,000, "and the directors have written off that sum accordingly." The amount of loss incurred by the imprudent advances made by their agent in Bombay to speculators and others during the recent share mania has been estimated at the sum of £89,000, "and the directors have written off that sum accordingly." Mr. Newby, the agent appointed by the late Commercial Bank of India for the purchase of bullion at San Francisco, for remittance to China, had advanced considerable sums, amounting, in the whole, to £196,782, on the security—incredible though it may seem—of certain mining shares, none of which could be realised at present except at a ruinous depreciation. The estimated loss on these advances amounts to the sum of £118,233, and the directors have written off that sum likewise. Mr. Wiggins, the late manager of the company at Shanghai, seems to have involved the funds of the bank in certain land and other speculative or irregular transactions, and the loss expected to result is estimated at £53,000. The losses from bad debts at that agency further amount to about £38,000, and the directors have written off that sum also; together with £5,000 for a bad debt at Hong Kong, and £1,500 for bad debts at Calcutta.

This history of the Commercial Bank of India is but another of the many cases illustrating what extreme care and discrimination are requisite in the selection of the managers, sub-managers, and agents of joint-stock banks, and especially where the spheres of their operations, as in this case, are at such a distance from the head-quarters. To be efficient for the purposes of the bank, they must necessarily be endowed with large discretionary powers; and their extreme desire to do business and realise profits, in order to meet the expectations of the directors and shareholders, must operate as a continual spur to their eagerness in seeking investments; and in that pursuit their judgment and discretion will be perpetually in danger of being over-ridden by their zeal. The field of their operations will most frequently be new, requiring extreme judgment on their part, and great need of control and advice, such as might be afforded by efficient colleagues, or a responsible board of directors, neither of which, in most cases, are available. The temptations to error are much greater, and the securities against it are, from the nature of the position, much less effective than in ordinary cases at home. Such appointments require men of the largest knowledge, judgment, and experience, and they are most likely to be sought after and accepted by men possessing more restless activity and enterprise than either. It would seem unjust to reproach the directors, in the present case, for want of judgment or discrimination in the selection of their managers and agents, for they have scarcely time for the exercise of either before the crisis arrived. But it will, no doubt, be a signal warning to them, and we may hope to other boards also. In that case there may still be a prosperous future for the Commercial Bank of India and the East. They have a subscribed capital of a million, and hold on deposit and current accounts nearly two millions more. They have a large field to work in, and ample means to employ in it, and in less than a year from the present time they may have written off the last shilling of their present losses, and start afresh with an enlarged connection, a valuable fund of experience, and a tried and chastened staff. We have seen so many instances of the elasticity with which the joint-stock principle rises superior even to difficulties like these that we cannot despair of the future of this bank.

CREDIT FONCIER AND MOBILIER OF ENGLAND.

The half-yearly general meeting of shareholders was held on Wednesday, the 25th inst., at the London Tavern; the Right Hon. JAMES STUART WORTLEY in the chair.

The report, which has already been published, was taken as read.

The CHAIRMAN, in moving its adoption, expressed his gratification at the large attendance of shareholders, and assured the proprietors that the directors were most anxious to avail themselves of every opportunity for imparting to them a knowledge of the actual condition of the company. He was sorry to be obliged to ask the indulgence of the shareholders on that occasion, as he had only recently recovered from a severe and protracted illness, which had totally unfitted him for business. He heartily congratulated the company on its position, and although he had not to propose so large and remarkable a dividend as on former occasions, he had the pleasure of submitting to the shareholders a dividend of 30 per cent. on their investment. He would now address himself to the balance-sheet. They would observe the small amount of liabilities of the company in proportion to their operations and their property. The bills payable—perhaps the most formidable item in a balance-sheet—were here only £270,000; and considering that they dealt in millions, he thought that was not a large amount. Their cash at the bankers' was £322,000. The debentures were still comparatively inconsiderable, amounting to £77,320, but it showed the progress of the company, and was evidence of the fact that it was gaining a solid reputation, as the calumnies against it ceased to have any effect on their property. (Cheers.) The result of the balance-sheet and of the profit and loss account, setting aside altogether the £300,000, which was the profit of the operation sanctioned by the last meeting of issuing new shares, which had not been put to profit and loss, and upon which no commission had been taken by anybody—he said this most emphatically, because on the last occasion it was hinted, and since they had letters to say, that the directors had taken the commission on that £300,000—this result he considered most satisfactory, showing the gross balance at profit and loss to be no less than £281,829. This amount, considering the character of the half-year, must be deemed satisfactory, and altogether free from objection or cavil on the part of the shareholders. They proposed to augment the £292,000 odd, resulting from the operations of the issue of the new shares, to the sum of £300,000, and carrying it to the reserve fund, which, with the £200,000 already in hand, would reach the marvellous sum of half a million. (Cheers.) In addition to this they carried to the next half-year's profit and loss account £86,000, and had £150,000 as a dividend reserve fund. The result was that their shares with £5 paid upon them were worth £8 13s. 6d. each. (Cheers.) The directors might have divided a larger dividend; but, after mature consideration, they had come to the determination to recommend the same dividend as last year, and a bonus of 10 per cent., which would be equal to 15s. per share. In adopting this course he believed they had acted with prudence and discretion, inasmuch as they left a large sum of money in hand to meet any contingencies that might arise. The dividend reserve fund would be increased to £200,000 next September, and he thought they might look upon that fact as a positive guarantee that they would receive in future a dividend of not less than 20 per cent. Some shareholders had expressed a desire to pay up their shares in full. He wished to say that that matter had been under the consideration of the board, but he was not in a position to state at present whether any definite course had been resolved upon to satisfy the wishes of the parties interested. With regard to the remuneration of the directors, he wished to inform the meeting that he had received several letters, in which inquiries were made touching that subject. They would find that by the articles of association the directors were entitled to 10 per cent. of the net profits, after 10 per cent. had been set aside for the shareholders, amongst whom the remainder was equally divided. He did not deny that this formed a handsome remuneration to the directors, but considering the character of their labour, and the responsibility attached to their names, he thought any objections to the present rate of remuneration were entirely uncalled for, especially at present, when they issued a balance sheet which gave so prosperous an account of their affairs. (Cheers.) The Chairman then alluded to the retirement of Mr. Wm. Dent from the directorship. He said that there was no doubt that there had been a great deal of popular feeling manifested against that gentleman. (Hear, hear.) Mr. Dent had explained the nature of his connection with the Joint-Stock Discount Company in a circular he had recently published. He had been a most valuable member of the board, and had been one of the largest, if not the largest, shareholder of the company, and the directors, whilst regretting his resignation, believed that he would have avoided a great deal of hostile feeling if he had adopted a similar course in other companies. The Chairman, in conclusion, expressed an opinion that the time would come when the company would rise above the calumnies that had been cast against it by persons deeply interested in its deterioration, and when by the good conduct and prosperous transaction of its business it would rise from a high commercial company to a national institution. (Loud cheers.)

Mr. LEVICK, deputy-governor, seconded the motion.

Mr. CROUCH moved as an amendment, "That it was the opinion of the meeting that the dividend proposed should be the same as last—namely, £1 per share—which would leave £45,000 to be carried to next account." He had no doubt that every gentleman present was satisfied with the dividend suggested by the directors; but the question was, did they receive the dividend to which they were entitled? A reduction of dividend would injure the reputation of the company, and on that account he objected to their going down the ladder. (Laughter and cheers.) He hoped they would not sanction a course which would add weight to the insinuations cast against them.

Mr. CORDING seconded the amendment.

The CHAIRMAN said he did not know whether the proposer and seconder of the amendment intended to persist in the step they had taken, but he would state for their information that on technical and legal grounds they could not increase the dividend.

Mr. CROUCH said he wanted an increase of bonus.

The CHAIRMAN: We can't do it.

Mr. CROUCH: What do we come here for?

The CHAIRMAN: A public meeting can diminish a dividend, but they cannot increase it. There are two courses open to you—either to negative the report, or to refer the matter back to the directors.

Mr. CROUCH suggested the adoption of the latter course.

Mr. MIDDLEMIST, while disclaiming anything like hostile feeling towards the board, thought it would be very satisfactory to the directors, and certainly satisfactory to the entire body of shareholders and the public, if steps were taken to examine the securities—(hear, hear)—and he would suggest the appointment of five independent shareholders for that purpose.

Digitized by Google

("Hear, hear," and "No, no.") If the company wished to meet the malicious reports which had been circulated to their detriment, they would adopt that course.

Mr. BRUCE in seconding the motion for a committee of investigation, said the directors had been re-discounting bills, for the purpose of "raising the wind," to get money with which to pay the dividends. (Uproar.)

Colonel DALZELL wished to ask the board what amount of their funds was advanced on their own shares? (Hear, hear.) He would ask the auditors, if they were present—and they were men of high character and unquestionable ability—whether the value they had placed upon the securities of the company was the value at which they were taken, or that which they were represented on the day on which the accounts were made up? He wished to ask whether these securities bore any liability beyond that which would ordinarily attach to them, and whether they were *bona fide* securities? They were told that their shares represented £8 13s. 6d., but the question was whether they could get that sum for them, and it should be remembered that the value of the shares depended on the character and value of their securities. If the auditors would answer his questions satisfactorily he believed the value of their shares would be raised to their proper standard. (Cheers.)

Mr. VINING would ask whether their directors held as many shares now as they did at the last half-yearly meeting, and he wished the question to apply to them individually? He wished to know if the directors had taken and now held their proportion of the new shares?

Mr. TRUST wished to know whether the statements contained in the prospectus of the Imperial Land Company of Marseilles, brought out by their company, were true. (Laughter.)

Mr. MAYNARD (one of the auditors of the company) in reply to Colonel Dalzell's questions, said the securities were not taken at their nominal value, but they were taken, he thought, at less than their warranted value. (Applause.) As regarded the other question, whether any extraordinary liability attached to the securities of the company, he begged to give an emphatic answer in the negative. (Cheers.)

The CHAIRMAN said that in consequence of his illness he was not in a position to answer all the questions put, but he had no doubt Mr. Grant, their managing director, would give all the information desired. As regarded the Imperial Land Company of Marseilles, he wished to say he was ill in bed when that undertaking came out, and therefore he could not reply to the inquiry put respecting that company, which was brought out by the Credit Foncier and Mobilier with every prospect of success, and with temporary actual success. He took that opportunity for asserting that there was a wide-spread conspiracy in existence for the purpose of deteriorating the value of their property. He thought they had information which would enable them to expose individuals to ignominy and contempt. As regarded the questions put to him, he observed that some of them were of a personal nature, inasmuch as they referred to the holdings of the directors. It had been insinuated that some of the directors had parted with a portion of their shares. He did not know that information of this kind should be asked for at a public meeting. (Hear, hear.) However, he would tell them he had no knowledge of anything of that kind. If any gentleman would come to him privately he would show him his holdings; and they recently had instances of persons coming to see the holdings of each director. His holdings were large, and perhaps more than it was prudent he should have; but he held them because he had a good opinion of the company. (Applause.)

Colonel DALZELL asked if any of the shares supposed to be held by the public were held by the company.

The CHAIRMAN: Not one. (Cheers.)

Colonel DALZELL wished to know whether any individual shareholder was responsible to the company for advances given on the security of his shares.

The CHAIRMAN replied that such a proceeding was not sanctioned, except in special instances, and then when the shares were accompanied by collateral securities.

Colonel DALZELL asked if any pecuniary advances were made to the directors or office bearers.

The CHAIRMAN replied that being absent for three or four months from London, he was unacquainted with the details which may be within the knowledge of other directors. He was told that some trifling advances were made to members of the board, but they had been accompanied by collateral securities.

Colonel DALZELL: It is most suicidal to make advances upon any consideration to the directors. (Hear, hear, and cheers.)

The CHAIRMAN said it was not the practice to make those advances. The advances made were trifling in amount, and in a short time would be extinct. The statement of Mr. Bence to the effect that they gave dividends by raising the wind was beneath his notice. (Cheers and uproar.)

The motion as to the adoption of the report was then put and carried with one dissentient.

A vote of thanks was moved to Mr. Grant, the managing director.

Mr. VINING protested that his questions had not been answered. He entirely believed in the business habits of Mr. Grant, and he would not dissent from the motion; but he wished to know from Mr. Grant whether at the last meeting he did not hold 2,500 shares, and if he had only taken 674 instead of 1,200 odd of the new shares, and now held only 300 old shares.

Mr. GRANT, who was received with cheers, then proceeded to deal *seriatim* with the questions put by shareholders. He explained in reference to the shares held by him, that he got new shares because he found them cheaper than old ones, and said his holdings of both classes of shares extended to 1,000. He begged to say he reserved to himself the right to hold as many shares as he liked, just as would be the case with any shareholder. A great deal of discussion had taken place with regard to the balance-sheet, and he wished to touch upon the subject and to give the shareholders an instance of the undesirability of observing that fullness of detail which seemed to be so much wished for. The International Financial Association wanted to give their shareholders the detail of every investment, and they formed their balance-sheet in this way:—By cash at bankers', so much; by sundry debtors for advances on securities, so much; by Hudson's Bay Company 1,740 shares at par, £342,800. They would have thought the shareholders would be extremely gratified at this information; but what was the fact? The moment the Stock Exchange saw the nature of the securities retained by the International Financial Association in their coffers, they naturally supposed they did not want them as a permanent investment, but would sooner or later sell them, and the company were in consequence unable for many months to get rid of those securities. With respect to the commission alleged to have been received by the directors, he pledged his word of honour that it was only on the balance the directors took their commission. With respect to the statement of Colonel Dalzell as to the advances made upon securities of shareholders, he wished to say that the security in these cases was accompanied by the security of the shares. (Hear, hear.) In conclusion, he assured the proprietors that although, as it had been stated, other companies had fallen through in consequence of the absence of inquiry on the part of shareholders, he thought such would not be the case with them. (Loud cheers.)

The vote of thanks to Mr. Grant was carried with acclamation, and a vote of thanks to the chairman concluded the business of the meeting.

ORIENTAL BANK CORPORATION.

The annual general meeting of shareholders was held on the 19th inst., at the offices in Threadneedle-street; H. G. GORDON, Esq., in the chair. The directors' report has already been published.

The CHAIRMAN, after apologising for the absence of three of the directors owing to unavoidable causes, moved the adoption of the report. He regretted that the dividend now proposed fell short of those which it had been his good fortune to announce on former occasions. They had had to go through a very unexpected crisis, and in common with all banks connected with the East they had suffered losses and a diminution of profit. The losses had occurred in the usual course of business, arising partly from failures in local banking business, and partly from mercantile failures in this country. The diminished receipts of the company had arisen in a great measure from the excessive competition to which they had been exposed, and moreover the board had been, by the force of circumstances, compelled to keep a large reserve when there was no prospect of a profitable employment of it. However, it was satisfactory to know that they had written off all bad debts, and made ample provision for whatever was doubtful. The capital and reserve funds were intact, and the credit of the corporation had never been in a higher position. (Cheers.) In the interval between the issue of the report and the meeting he had received several letters from friends of the corporation making inquiries which he had now very great pleasure in answering. An original shareholder had been so satisfied with the answers which he (the chairman) made him, that he expressed a hope that he would communicate them to the meeting. He (the chairman) had taken the questions put to him by the gentleman to whom he alluded, and had written the answers, and these he would now put the meeting in possession of, inasmuch as they embodied all the information which it was desirable to obtain regarding the affairs of the company. The first question put to him was whether they were involved with any banks, or finance or discount companies in Bombay, in this country, or elsewhere. His answer was in the negative, being qualified by the addition that the only connection they had with such companies arose in the usual way of business. The second question, which was no doubt suggested by recent losses consequent upon investment in land in China, was whether the company had invested any money in this way, and to that he gave a negative answer. He should add that of course they required premises there for conducting their business. The third question was what had caused the fall in their shares. (Laughter.) A reduction in dividend had no doubt in part produced that effect; but a reference to the share list showed that their shares stood as high, if not higher, than those of their neighbours. The fourth question was—how were higher dividends made by other banks? His answer was that some might make higher dividends by London business, which had been very profitable during the past few years, and some might make higher profits by running risks which they did not care to do. The fifth question was—had any officers been recalled on account of irregular operations or for doing bad business? His answer was a negative one, and he might add that although their losses had been severe they had all been incurred in the regular course of their business, and not from any exceptional or irregular transactions. The sixth and last question was whether all bad and doubtful debts had been provided for, and to that he had already given a satisfactory answer. He would add that during the last six months of 1865 no bad or doubtful debts had been incurred, and the accounts received from the branches showed that an excellent business was doing, with fair profits. (Cheers.)

Replying to questions put by shareholders,

The CHAIRMAN said, the reserve and insurance funds were invested in consols and Indian Government securities.

A SHAREHOLDER asked what was the total amount of losses.

The CHAIRMAN said it was not usual to state the losses, especially as assurance had been given that all bad and doubtful debts had been wiped off. (Hear, hear.) If it was the opinion of the meeting that information should be given on the point he would bow to the decision of the shareholders. (Cries of "No," and "Yes.") He did not wish to conceal anything, but at the same time he thought it would be advisable to abstain from giving the information. (Hear, hear.)

A SHAREHOLDER observed that information of this kind might be used to the disadvantage of the corporation. (Hear.) If any shareholder wished to be satisfied on this matter he could effect his purpose privately. (Hear, hear.)

The meeting having ruled that the question should not be answered,

The CHAIRMAN proceeded to say that they had experienced great competition in the East, but in consequence of the collapse of financial establishments there, and the proof given during the crisis of the soundness and stability of their company, that competition was gradually dying out, and would in all probability entirely disappear.

The report was then agreed to, as also a resolution in favour of the declaration of a dividend of £1. 5s. per share in addition to the ad interim dividend already given.

The retiring directors were re-elected.

The usual compliment to the chairman concluded the business.

LONDON, FRIDAY, APRIL 27, 1866.

THE MORTALITY OF TROOPS IN HONG KONG.

THE special committee moved for by Colonel NORTH to inquire into the mortality of troops in China commenced its sittings on the 19th instant. Dr. SNELL was the first witness examined. His term of service in Hong Kong extended from 1860 to 1865, during the whole of which time he states that the smells from sewers and drains were most noxious and offensive, and no remedy was attempted up to the time of his departure. There was, in his opinion, sufficient recreation for the troops, there being a gymnasium, cricket-ground, and many other places for their exercise in Hong Kong; and there were also bagatelle boards, drafts, and chess. Workshops would have been a great boon to them, and was one of the principal things required there. The soldiers did not have much drill in the hot weather, and what they did was of very short duration. The health of prisoners was better than that of the soldiers, the prisoners hardly ever suffering from fever. He attributed this to the fact that the prisoners were housed, well taken care of, and looked after, while the soldiers were out in the heat, hardly ever sleeping on a bed. All the water-closets in Hong Hong were fearfully offensive, many of them not being used, while the drains, if such they could be called, were horrible in the extreme. The number of troops who died from fever decreased wonderfully in one year, through the administration of quinine wine to them. Subsequently the Government refused to send any more for their use, but he could not tell for what reason. The cost of the quinine wine was very small, being at the rate of one halfpenny per dose, each dose being half a wine glassfull. He considered the barracks in which the troops were at that time stationed totally unfit for the purpose and badly situated, being built in a ravine or hollow. The best place for the barracks would be on the hill where the cathedral stands, which is kept cool by the constant breeze. Dr. SNELL then exhibited some interesting photographs, showing the localities, &c., in which the troops were stationed.

The first point which attracts attention in this evidence is the stress laid by Dr. SNELL on the value of workshops, as a means of occupation for the men. There was no deficiency of means of recreation, we are told; but it is self-evident that mere amusement is not all that is required. Work of a healthy and suitable description should be provided, and would not only aid in promoting the health of the troops, but would be welcomed as a boon by the majority of them. There seems, however, to be no medium between constant, exhausting fatigue, and useless idleness, which is a certain incentive to drinking and other vice. Dr. SNELL describes the condition of the prisoners in Hong Kong gaol as infinitely superior to that of the troops in almost every way, and adduces an instance of what we can only term deliberate cruelty, in the sudden withdrawal of the supplies of quinine wine, an inexpensive medicine which, during the time it was issued, had been found to act almost as a specific against fever. So far, the evidence tends rather to strengthen than to extenuate the charge of gross and wilful neglect brought against the military authorities. We shall continue to "report progress" as the Committee continues to take evidence.

PIRACY IN CHINA WATERS.

WHENEVER any great evil is shown to exist there is no lack of proposed remedies for it. Piracy, among others, has received its due share of attention, and numerous schemes, more or less practical, have been promulgated with a view to its suppression —all, so far, without effect. Our correspondent NAUTICUS, however, whose letter will be found in another column, brings forward an entirely novel suggestion, and one which is certainly ingenious in its conception, although it would prove almost impossible, we fear, to put it into execution. NAUTICUS proposes nothing less than a complete and compulsory disarmament of all native trading vessels, large or small, belonging to China and the various islands of the Eastern Archipelago; to be followed within a given period by a stringent search made by gunboats belonging to the Treaty Powers, which should then ruthlessly destroy all vessels found armed, the mere possession of arms being taken as proof of guilt. It is very true that the necessity which is at present assumed to exist for every peaceable trader to arm in self-defence, frequently serves as a shield for piratical operations, and that the difficulty which hence arises of discriminating between traders and pirates is one of the chief obstacles in the way of any effectual measures for the suppression of the evil. But how is the proposed agreement between the Chinese Government and the petty chieftains of the Archipelago to be brought about?

As regards China, we have over and over again experienced the difficulty of inducing its Government to adopt any salutary measure of internal reform, and even if the Cabinet could be induced to assent to any such arrangement, there is little chance of the various provincial authorities being either able or willing to carry it out. And the "chieftains" of the Archipelago?—Why, it would be the work of a lifetime to bring them all to act in concert for such a purpose, and even if that were accomplished there is small probability of any good resulting. Suppose, however, we could bring all these potentates to join with one accord in a hearty united effort to do away with piracy; suppose the fiat gone forth; would not the disarming of those vessels which at once obeyed the mandate be the signal for the bolder ones to renew their depredations without fear of resistance from their defenceless prey? And as for the stringent search by foreign vessels of war, the intricate and dangerous coast line of the South of China and the adjacent islands would afford as many places of shelter then as they do now. For the present we must be content to wait the result of whatever measures may be adopted by Sir RICHARD MACDONNELL, who will doubtless take one step in the right direction, when he has had time to utilize the sum placed at his disposal out of the annual military contribution of Hong Kong.

THE CHINA SQUADRON.

A PARAGRAPH in the *Army and Navy Gazette* informs us that "Rear-Admiral GEORGE ST. VINCENT KING, who hoisted his flag on board the *Princess Royal* in February, 1864, and who proceeded shortly afterwards to the Cape of Good Hope and East India station, but was, on the 17th of January, 1865, appointed Commander-in-Chief on the Coast of China, with the temporary rank of Vice-admiral, is now the second on the list for promotion, and already several officers have intimated to the proper quarter their readiness to accept the appointment of his successor." This would clearly seem to indicate that as soon as Rear-Admiral KING becomes a Vice-admiral he must necessarily resign his command, or be superseded. *Why* this should be the case is not so clear. On a station of inferior importance, which is habitually commanded by a rear-admiral, we can understand the expediency of the holder of such an appointment relinquishing it on gaining a step; just as a Commander gives up his corvette or sloop on becoming a Post-captain. But the China station is recognised as a Vice-Admiral's command. Rear-Admiral KING, to render him eligible for it, received the temporary rank of Vice-Admiral; yet as soon as he rises in the ordinary course of events to that status which would entitle him to hold the position without any temporary or fictitious rank, he is immediately deprived of it! Dundrearyisms are out of fashion, but really this is a "sort of thing that no feller can understand."

Among the promotions in the navy, under date 12th instant, we are glad to notice that Lieutenant HENRY C. ST. JOHN, commanding H.M. gunboat *Opossum*, has been promoted to the rank of Commander "in consideration of the skill and judgment "displayed by him in effecting the destruction of a large piratical "force of Chinese junks without loss in the attack and capture."

THE CHINA DINNER.

THE annual China dinner will this year be held on Friday, the 18th of May, at Willis's Rooms, King-street, St. James's; Sir John F. Davis, Bart., in the chair. Tickets will be issued as last year to officers of the army and navy and Civil Service who have served in China or Japan, and to merchants, professional gentlemen, &c., who have resided or travelled in those countries. Major Brine, R.E., is Honorary Secretary in this country, and Mr. S. Mackenzie in China.

THE FRENCH MAIL SERVICE.

AN extremely important discussion is now going on in the Corps Legislatif on the great question of free trade in shipping. The French Government, after having established an inquiry into the condition of the mercantile marine, has introduced a Bill for allowing not only commercial vessels to be built or purchased abroad, but also every kind of material to be used in the construction and rigging of vessels to be employed in the merchant service to be admitted duty free, and, gradually, to remove all the restriction on navigation. The shipbuilders, backed by the protectionists, oppose this measure with all their might, and ask instead that shipbuilding and navigation which have done so badly under protection shall have more instead of less given to it. It is not within our province to take up the general question, important as it is to the commercial interests of Great Britain, but that of the mail services and subsidies which naturally arose during the debate is one which falls directly within our scope, and cannot fail to have considerable interest for our readers. The protectionists who would, if possible, induce the Government to try and shut out foreign competition by the maintenance or the re-enactment of differential duties and charges in favour of the French flag, complain loudly of the twenty-four millions of francs, rather less than one million sterling per annum, paid in the form of subventions to the companies carrying the mails. One of the principal speakers on the protectionist side, M. POUYER QUERTIER, declared in the debate in question that the mail service had very little to do with the matter, and added—"I must say that when I see our "free-traders pocket these twenty-four millions in the name of "liberal principles my reason is confounded." Such is the view taken by a protectionist of what many other people believe to be necessary and profitable protection of a special kind.

The attacks made upon the mail companies and the whole system of subventions were furious, and gave rise to some very angry and indignant denials. It was said, amongst other things, that the transport of silk from China to London cost less than from China to Marseilles, and allusion was made to certain *contre-lettres*, said to exist, which made deductions on prices named in bills of lading; this was absolutely denied by the MINISTER of STATE on the authority of the Director of the Company. The allegation was, however, categorically repeated, the same deputy, having declared that he maintained his assertion, said, "if the Messageries Imperiales Company "produced its *contre-lettres* it would be condemned for illicit "traffic;" and, he added, "the *contre-lettre* is secret; it modi- "fies the tariff indicated by the bill of lading and permits the "company to arrange matters as it pleases. This is a fact "which defies all contradiction." The matter was allowed to drop for a moment, but it came up again in two succeeding days' debate on the same subject. A letter said to have been written by one of the first silk houses in Marseilles was read, and afterwards placed in the hands of the MINISTER of STATE, in which the writer complained that engagements made with him had been ill-fulfilled by the Messageries Imperiales, and that foreigners were treated on such favourable conditions that those French houses which have establishments in Japan are threatened with the necessity of suspending their operations. The fact specially complained of in the letter is, that while the Messageries Imperiales charge 130f. per 100 kilogrammes from Marseilles to Japan, their agent at Zurich issues a printed tariff in which the rate from the latter place is only 85f. 10c. The circular in question is printed in the report of the debate, and according to this document it appears that the rates charged from Zurich are much lower than those from Marseilles. These are as follows:—To Aden, India, and Hong Kong, 65f. 10c. the 100 kilogs.; to Batavia and Shanghai, 75f. 10c.; and to Yokohama, 85f. 10c., insurance not included. But it is only fair to mention that, according to the terms of this circular, the rates mentioned therein only apply to goods composed of cotton, of cotton mixed with a small quantity of silk, of wool or half wool, and which do not exceed in value 2,000f. per 100 kilogs.; moreover, the cases are limited generally to a weight of 225 kilogs., and those containing goods from Saint Gall, which are lighter than others, to 125 kilogs. No explanation was offered, or at least none appears in the reports of the debates, why a similar special tariff is not offered to the merchants of Marseilles, who complain, through the mouth of M. POUYER QUERTIER, by whom the question was brought before the Corps Legislatif, that the manufacturers of Germany who might choose to send their goods by way of Zurich would have not only an advantage over their French rivals of nearly 45f. per 100 kilogs., but also the option of despatching them either by fast or slow train as they thought fit, while the French manufacturers are confined to the use of the latter. We have no doubt that the Messageries Imperiales will offer some explanation of the circumstances called in question, and as it touches English as well as French commerce we shall look for it with interest.

In the course of the debate in question, M. EMILE PEREIRE gave the following as the progress of the imports and exports of silk, woollen, cotton and linen manufactures since the reduction of the duties—in 1861 the imports of these articles amounted in value to 48 millions of francs, and in 1865 the amount was 76 millions; the exports of the same classes of goods amount to 591 millions in the former, and to 905 millions in the latter year; an awkward fact, as M. PEREIRE pointed out, for those who predicted the utter ruin of French commerce to account for.

SIAM.

THE report of Consul KNOX to Earl RUSSELL, on the trade of Siam for the year 1864, is a most cheering record of the steady increase of British commerce with that country. It exhibits an increase in British shipping cleared from the port of Bangkok of 27,954 tons as compared with the year 1862. The entire imports of Siam, which, according to Consul KNOX, were but £587,658 in 1862, had risen to £1,167,597 in 1864. A glance at the list of these imports shows that by far the greater and more valuable part are of British origin and manufacture. Though the official figures given us are most satisfactory, still there is good reason to believe that they by no means represent the entire import trade of the country. They do not, for instance, give us any information as regards the import trade in junks, which is carried on from the island of Hainan, and ports in the Gulf of Tonquin. This import trade, if we may judge of its value from the nature and value of the exports of cotton from Siam to those places, must amount to £26,771 annually. Neither do the official figures in the Consular report before us represent the import trade in steamers. One of these, and the principal medium of importation from Singapore, is owned by the Chinese merchant who farms the import revenue, whose interest it naturally is, to make the value of the trade appear less than it really is, so as to deter speculators from outbidding him for his monopoly. The entire amount of square rigged shipping which cleared from Bangkok in 1864 amounted to 171,335 tons, of which only 7,395 was in ballast, 54,771 tons was British, 62,348 Siamese, 21,124 Hanseatic, 8,010 Danish, 7,323 American, 3,284 Dutch, 3,699 Hanoverian, 3,896 Norway and Sweden. The remainder belonged to France, Russia, Austria, Prussia, and Oldenburg.

The exports from Siam, in square rigged vessels during the year 1864 was as follows:—viz., Rice to the value of £903,630; sugar, £111,576; sapanwood, £24,372; paddy, £13,876; pease, £5,485; silk, £31,375; tin, £4,783; teelseed, £13,463; hemp, £1,728; hides, £5,185; horns, £4,087; salt, £10,099; salt fish, £56,534; mussels, £6,161; teak, £15,116; rosewood, £5,214; gum benjamin, £3,624; ivory, £4,764; cotton, £9,645; lukrabau seed, £529; cardamums, £11,859; gamboge, £787; mangrove bark, £890; pepper, £44,810; and sticklac, £28,328; making a total export trade in square rigged vessels, of the value of £1,317,922. To this must be added the sum of £26,771, value of cotton exported in junks to the island of Hainan, and ports in the gulf of Tonquin, making a gross total export trade of the value of £1,344,693. The import trade being set down at £1,167,597 in square rigged vessels and about £26,771 in junks, gives the sum of £2,539,161 as the total value of the trade of Siam for the year 1864. This is no inconsiderable sum, if we consider that Siam has been open to foreign trade but eight years. That this trade has been steadily progressive the annexed table, showing the principal exports from the 1st January, 1857, to the 1st December, 1864, will prove:—

The official report on the trade of Siam for 1865 has not reached us, but from private sources we learn that, with the exception of the articles, rice, sugar, paddy, sapanwood, horns, gum benjamin, ivory, teak, sticklac, and salt fish, there was an increase in all the other articles of export. The decrease in the production and supply of the articles mentioned, must of course, be attributed to the long and intense drought which prevailed in Siam in 1865. This not only put a stop to the cultivation of paddy, but was injurious to the sugar-cane, which became saturated with saline deposits, the ebb not being sufficiently strong to keep the flood tide out of the cane districts. The streams and canals in the interior, being dried up, prevented the transport of teak, gums, ivory, and other forest produce to Bangkok. In the beginning of 1865, the Siamese Government, fearing a scarcity, laid an embargo on the exportation of rice and paddy. This embargo existed till the month of November, when, owing to the cheering prospect of an abundant crop, the prohibition was removed, and the Siamese steamer *Chow Phya* took a cargo, the first of the season's crop, to Singapore. It is not at all likely that in future a drought can be so severely felt in Siam as it was last year, or that its effects can be so disastrous on the paddy and sugar crops, as the attention of the native authorities has been directed to the utility and feasibility of a system of artificial irrigation and embankments—a remedy which the Governor of the Western Province was going to apply in 1865, when the fall of abundance of rain rendered the work ,for the time, unnecessary. During the drought, however, the Chinese and foreign merchants of Bangkok were not idle. Finding the staple articles of trade likely to fall short, they sought other and new outlets for their capital. An impetus was given to the cultivation of cotton, so that the out-turn for 1865 showed an increase of 4,865 piculs, or 25 per cent. on the previous year. The production of this staple is likely to extend, notwithstanding the conclusion of the American Civil War, and a European firm, that of THEIS, PICKENPACK, and Co., having secured by some means the monopoly of the uncleaned cotton in the northern provinces, have imported improved gins and cotton presses, and intend working them in the interior, so as to save expense in bringing the uncleaned and unpressed fibre to market. The supplies of teak, too, are certain to be more regular and greater in quantity than hitherto. In 1865 the shallowness of the streams down which it was usual to float it prevented a large quantity which was then felled from being brought to market. With the expected rise in the rivers this supply must certainly come to market this year, and will no doubt lower the high figure at which it has ruled for the past year. In the circular from which we quote, an increase in the following articles of export over 1864 is reported. Peas, pepper, tin, teelseed, hemp, silk, hides, salt, mussels, rosewood, ebony, mangrove bark, and gamboge. A large increase in the articles of ivory, gum benjamin, and sticklac may be looked for during the present year, as last year's stocks will, with the rise of the water in the canals, find their way to market.

The foreign merchants are, it seems, sanguine as to the future of Siam. A fourth steam rice mill has been imported by the firm of Scott and Co. Dry docks, capable of taking in vessels of any tonnage, have been constructed and are now in use, so that foreign vessels visiting the port of Bangkok have every facility for overhaul or repair, with the very best material, by skilled workmen, at moderate charges, and with little delay. It was feared by some that a trade of such apparent mushroom growth as that of Siam would soon reach its utmost limits. This, however, is by no means the case; the trade of Siam can be limited only by the supply of labour requisite for the more complete development of its almost inexhaustible mineral and vegetable resources. At present the supply of labour used is brought from China. In 1865 the coolie immigrants from Hainan, Amoy, and Swatow numbered 5,000. The total Chinese population of Siam amounts to about 200,000. The Government tries to encourage the settlement of Chinese in the country, hence they are taxed very lightly—paying only 6s. per head per annum, while the Siamese pay about £1. 10s. per annum. In 1865 there were four tug steamers to tow vessels to and from the Bangkok Bar; two of them flew the American flag, one was Siamese, and one English. Notwithwithstanding the entire cessation of trade in rice, paddy, teak, &c., and the failure of the sugar crop, the trade of Siam for 1865 amounted to the value of $5,680,457. The imports direct from Great Britain to Siam amounted in 1865 to 133 per cent. more than in the previous year.

THE HEALTH OF TROOPS IN CHINA.

Sir,—Having served in China with the 95th, during the time that regiment was there, and afterwards with the Buffs through the late war, you will, perhaps, permit me, while the question of disease and mortality among our troops is under investigation by the Parliamentary Committee, to point out what experience has shown to be the best means of preventing the recurrence of such evils.

No matter what those may say to the contrary who have invested largely in land and houses at Hong Kong, the climate of that place and its neighbourhood is especially poisonous to European troops from about June to September. During those months they cannot live on ground floors, or even in the best barracks, without fatal results. In 1848 the 95th at Hong Kong was placed almost completely *hors de combat*. Out of an average strength of 531 men the hospital admissions amounted to 1,978, and the deaths to 127, of which 37 occurred in July and 46 in August.

This mortality and disease did not result from the regiment being quartered in the miserable way which seems recently to have been adopted in China, for we lived in the really splendid Murray Barracks, and everything was done that medical knowledge could suggest to improve their sanitary condition. The regiment was remarkable for its good officers, and it had the advantage of being under the medical care of Dr. Gordon, a man of great skill and energy, who slaved at his duty night and day. Notwithstanding the favourable circumstances of good care, housing, and excellent medical attendance, the disease continued its ravages until the regiment was removed to three good large merchant vessels that were hired for the occasion. Dr. Gordon concludes a letter to me on the subject by saying. "But for the removal of the men into the vessels anchored in the Bay the mortality would have been very much greater. It was the salvation of the regiment."

Dr. Gordon is now surgeon-major of the 69th, and, being at Aldershott, could easily give evidence if required.

When the local conditions at Hong Kong are unfavourable to health, immunity from epidemic disease might be obtained by sending out three or four of our obsolete non-working men-of-war, properly fitted up as floating barracks, and removing the troops to them till the danger is past.

The ships should be moored in well selected spots, and supplied with plenty of boats for exercising the men by rowing, and the boats communicating with the shore should be manned by soldiers who would come to no harm with proper cap covers and under good awnings. Those who did not care for this sort of exercise might be kept in health by smart walking round the decks, vaulting over spars, &c., and as for amusements, a good regiment, if not interfered with, will always find ample. I have picked capital boats crews from among soldiers, and a little of this nautical life might be made useful in the way of fitting them for some of the thousand and one emergencies that occur on active service. When the Buffs were returning from China in 1861 they so successfully worked their ship at sea that her captain declared he never missed his sailors during the seven days they were all prisoners for persisting in their attempt to desert the ship.

The floating barracks (except their mooring tackle, &c., which ought to be in charge of the harbour master) should be entirely under military control, so that a temporary residence on board them would not involve any interruption to regular military discipline.

Let there be no night sentry work on shore for European soldiers during the summer months—nothing but patrolling from a picket, and that only when absolutely necessary. During the unhealthy season the soldiers should be kept afloat, and they could be landed immediately if any emergency occurred.

Spending money upon land barracks intended to hold troops during the unhealthy season will be a mistake. The insanitary conditions at that time are local, and easily escaped, by transferring the troops to well selected spots in the Bay.

This experiment was very successful with the 95th when the land malaria was unusually severe, and produced the Hong Kong fever, one of the most dangerous disorders, because, if it does not prove fatal at the time, it destroys the constitution.

As soon as the summer months were over, the troops might safely return to the barracks on shore.

Abundant sleeping space would be indispensable to the success of the floating barracks. This was remarkably shown in the experience of the 95th Regiment, and it will be found that troops suffering from the Hong Kong or any similar climate are very sensitive to the poisonous action of vitiated air.

On board the airy barrack ships the sickness and mortality rapidly diminished, but disease broke out again on the return voyage to England, when 454 men were embarked on board Her Majesty's ship *Apollo*, and no less than 58 of them died on our passage to the Cape, and within a period of about six weeks. If the regiment had not landed at the Cape and enjoyed for a time better air and good living, scarcely any would have escaped, and as it was, notwithstanding that the most sickly were left behind, nearly all who reached England had soon to be invalided. Very few were able to carry their knapsacks on landing at Portsmouth.

Good living is essential to health in China, and all the troops there ought to have Indian pay and allowances, which the country would certainly not grudge to men defending its honour and interests under circumstances easily made perilous by stinting or neglect.—I am, Sir, your obedient servant,

J. N. SARGENT, Colonel.

Digitized by Google

(THE TIMES.)

We were reminded yesterday, to our comfort, that a committee is sitting on last year's mortality at Hong Kong. Colonel Sargent suggests for its consideration the permanent use of an expedient which has always been found to prevent, or to stop, or to mitigate considerably, the ravages of what is called the Hong Kong fever. He proposes floating barracks at the healthier stations in the Bay, and thinks that our obsolete men-of-war, of which we have a great number, might be converted to this purpose. The European soldiers might be kept afloat from June to September, and it would be easy, he thinks, to exercise and amuse them, and that would also develop useful qualities. Certainly the idea is plausible. The ships are here, in numbers and bulk enough to make anybody groan at the sight of them, at Plymouth, or Portsmouth, or Sheerness; and, under ordinary circumstances, a ship is a good house. No doubt it would have been a very happy thing if one or two of these floating castles had been lying off Hong Kong last spring when the 11th Regiment arrived, and there was no preparation to house it. In the comparison between floating barracks and permanent barracks in more healthy spots, the question of money, indeed, comes in. Our useless men of war would have to be taken there; they would have to be kept in good repair, and periodically replaced. At Hong Kong we are told that the fever is not every year, but every three or four years; that Europeans suffer more than Chinese or our Indian troops; that certain localities are much more malarious than others; and that the habits of the natives and the nuisances arising out of a large and dense population greatly aggravate the evil. But unquestionably this "barren rock" is worse than barren, and has some special dragon of unhealthiness. There is something that develops its unusual virulence beyond the ordinary seeds of disease. Hong Kong is a mountain of friable granite, from many parts of which a moisture, said to be itself deleterious, is continually oozing. Victoria spreads for several miles along the foot of this mountain, and climbs up the sides where it is possible; and its 100,000 inhabitants or more would not find room if they did not sleep as thick on the floors of their dwellings as they can lie. This is bad, but worse comes. The city faces north-east, and the sun consequently disappears behind the mountain long before it reaches the horizon of the sea. This creates a long interval, equivalent to the mild evenings and the twilight of our temperate zone, in which the glaring light and burning heat of the day are sufficiently subdued for out-door exercise, and it is the delight of the European residents. But everybody who has attended to the atmospheric vicissitudes of days and of seasons will see at once the dangers of a local twilight from such causes. It is a phenomenon which the tourist may see as well as feel in Swiss valleys on a summer's day. As the sun's rays leave the valley the air thickens and curdles so quickly that a sharp line divides the sunlit from the sunless portion of the atmosphere. English people, all over the world, brave the terrors of sunset as carelessly as they do the not always harmless chill of their own summer and autumn evenings. Indeed, there is no point of sanitary practice in which our countrymen differ more from the natives of warmer climates. Unfortunately, this recklessness leads the natives to suppose that it is really a matter of indifference to them, and an Italian, who would not for the world live out of the sun or occupy a room with a north aspect, thinks those just the quarters for a hardy English tourist, or student, or guest. To return to Hong Kong. Imagine a large and crowded city, hemmed in between a harbour and a steep mountain, with sea vapours, land vapours, and town vapours steaming up all day, left in the shade for an hour or two before sunset every evening. It is the very arrangement for malaria on the largest possible scale. The rich merchants, and all who can afford it, drive round the mountain and spend the evening and the night on the sunny side. We presume that our soldiers cannot do this, and that it would not be possible to perch them up over the town, though even that would not take them out of the deadly shadow. But whatever the dilemma, the difficulties, and the cost, we cannot afford to lose a regiment there once in three years. It appears from Colonel Sargent's letter that even the best barracks that can be built are not safe under the circumstances. So there is really much to be said for his suggestion of floating barracks, and we hope it will be well considered.

THE CHINA TRADE.

(PALL MALL GAZETTE).

An engraving in *Punch* some years ago represented the British merchant in Cathay as standing before a trembling Chinaman with a pistol in one hand and a big ball of opium in the other. This was the popular idea of a trade which really had a great deal more to do with tea and silk and cotton yarn and grey shirtings than with the fascinating drugs of Patna, Malwa, and Benares. The import of opium into China, however, served the important purpose of keeping the balance of trade from being largely in favour of the Celestials; for otherwise they, with their love of their own products and indifference to foreign manufactures, would have made China a perfect sink for bullion in return for the tea and silk which they sent out. This traffic in opium was certainly contrary to treaty stipulations, though winked at by the mandarins, and was sometimes carried on in a questionable manner by snake boats, clipper schooners, and captains of receiving ships, and was not only condemned by Exeter-hall, but, in some instances, by retired merchants who had been engaged in it. The natural consequence was that, despite the colossal fortunes which the China trade occasionally afforded, a slight shadow of suspicion and discredit rested over it; and this was increased by the merchants constituting virtually a close corporation, and keeping their transactions concealed as much as possible from each other and from the outside world. The peculiar character of the commodity in question had an effect upon the character of the entire trade. As the introduction of the drug into China was contrary both to the laws of the country and to the wishes of a very large portion of the population, it had to be either smuggled in despite the authorities, or introduced by means of pecuniary arrangements made with them. When this method was followed in regard to opium, it came naturally to be applied to all the imports and exports. "How mutchee gib my?" was the question which the Chinese Hoppo put, through the linguists, to the foreign merchant; while the merchant, on the other hand, sought to pass his goods at a rate as much under the proper duties as he could possibly arrange. This was a very objectionable and demoralising state of things, and has now been replaced by a totally different régime under what is called the Imperial Maritime Customs of China, to which reference is so frequently made in overland newspapers and telegrams.

It is unnecessary to recount the almost accidental circumstances which originated this service, or the struggles it has gone through. It is enough to note that at present it is a lucrative and important service, managed by Englishmen, Americans and Frenchmen, who are paid and employed by the Chinese Government without losing the citizenship or protection of the countries to which they belong; and that it has the management of levying dues on all the external commerce of the Chinese empire, except that which exists, or may be supposed to exist, on the land frontier. Its present head, Mr. Robert Hart, was formerly of Her Majesty's Consular Service, and is highly respected by the foreign community in China. Sir Frederick Bruce has spoken, in one of his despatches, of Mr. Hart's great influence at Peking, and Mr. Burlingham, the American Minister, has said officially, "If he shall continue at the head of the service, I do not see why the Chinese Government will not put other nations behind it in the quality of its customs force." At the various open ports the Imperial Maritime Customs has commissioners, or acting commissioners, who know or are expected to know, Chinese, and who draw large salaries. Under each of these there is a considerable staff of foreigners, some of whom belong to the higher branch of the service, while others perform the ordinary duties of tide-waiters and so forth. There is no exact parallel to this service to be found anywhere else in the world. Indeed, its position is quite anamolous, and might give rise to some curious legal complications, but its usefulness is unquestionable, and the statistics which it issues are entirely to be relied on.

As these statistics come to us only through the medium of Blue-books, being given along with consular reports, the returns for 1864 have not been published in England until this spring, but they are still valuable as affording the latest trustworthy account of our trade with China. Previous to the carrying out of Lord Elgin's treaty of Tientsin there were only five ports open in China—namely, Canton, Amoy, Foo-chow, Ningpo, and Shanghai; but to these might be added as virtually open the British colony of Hong Kong, which, through native vessels, did a great deal of business with the mainland of China and the ports of Swatow between Hong Kong and Amoy, and Tai-wan in Formosa, where foreign traders had been informally allowed to establish themselves. Besides these two, the Tientsin treaty has opened up six other ports—Hankow, Kiukiang, and Chinkiang on the great Yangtsze river, Che-foo in Shantung, Tientsin near Peking, and New-chwang in Manchuria; and it also provided for the opening of another port, one in the island of Hainan, which we believe has not yet been used. In 1864 the total value of the whole import and export trade at all the open ports was—less the amount of re-exports—190,242,159 taels; or, taking the tael at 6s. 8d., about £60,414,000. This shows a falling off of rather more than 9,000,000 of taels from the returns of the preceding year, Shanghai has itself fully a third of the trade, and after it comes Hankow, with a share of 23,944 532 taels, and Foo-chow with 20,061,485 taels. Formosa has only 927,980 taels, and New-chwang, in Manchuria, 2,388,908 taels. Canton, owing to the opening of the Yangtsze and other causes, has lost more than a third of its trade during the last few years, and comes only fourth in the list, with 14 692,165 taels.

It is impossible to tell accurately from the tables before us how much of this external commerce of China is carried on with British possessions. Nominally that is set down as imports 51,126,615 taels, and exports 49,657,156 taels, or about thirty-three millions and a half sterling; but from this sum must be deducted re-exports, the value of which there is no means for estimating precisely in regard to British trade. The value of these re-exports is certainly not less than a fifth, that being about their relationship to the entire trade; so it may be inferred that the value of our commerce—that is, the commerce of British possessions—with China was not more than £26,000,000 in 1864. This is rather a singular fact; for the Indian and English custom-houses alone for the year 1857 give returns of China trade to the value of £24,379,720, which would seem to show that all the opening of new ports in China has had but little if any effect in developing the trade, though it has certainly found employment for a great number of Englishmen in that part of the world. One favourable symptom, however, of the trade as it stands at present is that the Chinese now take more British manufactures in proportion to Indian opium than they used to do formerly, a result which shows that the legalising of the opium traffic has not had the effect of appreciably increasing the consumption of the drug, and which is worthy the notice of liquor-law humanitarians in this country.

PIRACY IN CHINA WATERS.

(To the Editor of *The London and China Telegraph.*)

SIR,—In the last China, Siam, and Straits papers I observe that reports of piracies still continue to occupy their columns. There seems to be no abatement of the evil. On the contrary, it continues to be as rife, and, if anything, more glaring than hitherto. The British Government has gone to a great deal of trouble and expense in its endeavours to suppress it, but in vain. Piracy must and will continue to exist and flourish so long as the excuse for every junk and boat trading in the eastern seas going heavily armed and doubly manned exists. All efforts to suppress piracy must be futile while the difficulty of distinguishing between pirates and legitimate traders lasts. This difficulty will continue until the Siamese, Chinese, and petty chieftains in the Eastern Archipelago be prevailed upon to agree to a total disarmament of the trading craft under their respective control. This effected, a united marine police—say men of war of every nation trading to the East—should make a simultaneous search for armed junks and prahus, and exterminate all found in the possession of offensive weapons. The fact of being found armed after the promulgation of sufficient notice of the law being taken as *prima facie* proof of guilt. This seems to me to be the only safe and certain remedy for an evil the magnitude of which cannot be comprehended by those who do not know what an exorbitant tax on commerce the arming and manning of every real trading junk and prahu is. This indirect impost on trade would be removed at once by the remedy which I have suggested, and the honest trader of every tribe and nation be benefited. This matter should be pressed on the attention of the Chinese and Siamese Governments without delay. It is absurd in the Peking Government to expect British gunboats

Digitized by Google

to continue any longer a thankless and apparently interminable crusade against every pirate who can afford to bribe the mandarins for traders' papers. It should be told that such assistance as has hitherto been rendered in the suppression of piracy must be withheld, unless it takes measures whereby the trader and the pirate may be distinguished, and the latter brought to justice. And the impossibility of distinguishing between the two (except on chance occasions) renders it imperative that a general disarmament should be proclaimed and carried out with the least possible delay. Once take away the excuse for going armed and make the mere possession of weapons of offence proof of guilt which would entail instant destruction and a comparatively small naval force will sweep piracy from the Eastern and China seas. By last accounts from the East we are informed that a scheme has been proposed to form an Eastern Trinity Board to supply beacons and lighthouses on the dangerous coasts of China and Japan, the said board to derive its authority from the whole of the treaty powers, and its funds from a tax levied on ships trading to China and Japan, and payable at the port of entry. This scheme, you say is, in your opinion, "practicable." I am of the same opinion, and with you wish it success. Its benefit to trade will, however, be but small, compared to the results derivable from that which I have suggested.

Every one in the least acquainted with the East knows that the armaments of native craft cost as much as the craft themselves; while the expense of manning them under the present system is in all cases doubled, in many trebled. The recommendation given in your last *London and China Telegraph*, in the article headed "Straits of Malacca," for trading vessels to go more heavily armed if they wish immunity from attack, cannot, I fear, be successfully carried out. Honest traders cannot, in point of armament, hope, unless at a ruinous cost, to compete with pirates; whereas the remedy which I suggest, if carried into effect, is a clear gain of at least 100 per cent. to the honest native, and leaves to the pirate but little hope of pursuing his guilty calling for any great length of time in the very teeth of native and foreign gunboats, as he now does. The importance of my subject must be my excuse for its prolixity.—Yours sincerely,

NAUTICUS.

DUTCH AGGRESSIONS IN SUMATRA.

(To the Editor of *The London and China Telegraph.*)

SIR,—In noticing your Singapore correspondent, "J. C.'s," letter in your issue before last, I omitted to remind that gentleman that Dutch, so-called, protection to the Native States in the Eastern Archipelago has been but as the shade of the fabled Upas tree to those who sought it beneath its tempting shadowing branches. Ever since the English gave up Java the natives have been at a stand-still, if not retrograding. Their agriculture is going to decay. The English left them a very promising settlement at Bencoolen. What is it now? Almost the jungle it was before the British got possession. Agricultural property in Java itself has decreased in value one-half, and in some instances three-fourths, within the last five years. Those who by the rose-coloured accounts went to Siak from 1836 till 1860 have nearly all abandoned the country in disgust—at what? I leave "J. C." to tell. There is no doubt that Siak possesses many and varied sources of wealth and fields of industry, but the Dutch system is not such as to give encouragement to their free development. It is for his reason, therefore, that the Penang merchants very justly dread an extension of their baneful influence to the whole coast of Sumatra.

Yours sincerely, PULO PENANG.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE REBELS IN CHINA.

(April 12th.) Colonel SYKES asked the Under-Secretary for Foreign Affairs whether despatches had been received from Consul Meadows at Newchang respecting the approach of rebels in December last, also from Consul Medhurst at Hankow mentioning the proximity of a large rebel force numbering 80,000, and detailing the measures adopted for the protection of British property; also, whether the Consuls had suggested to the British Government any and what measures for the future safety of the foreign settlements in China.—Mr. LAYARD said it appeared that Consul Meadows had been very much alarmed at the beginning of last winter at what he deemed to be the prospect of an attack on the part of some rebels. He, in consequence, requested the loan of some guns from the admiral on the station, by whom they were lent. The Government had, however, no ground for thinking that any attack on Newchang had taken place. With respect to the attack on Hankow, he had to state that he had no reason to believe that that city had been threatened by a large rebel force. It seemed that a considerable number of peasantry took refuge there and in the neighbourhood, that the Consul went out to see what was the matter, but that, instead of 80,000 rebels, he found eight men on horseback, armed with spears and bags, that shots were fired at them, and that they thereupon ran away, leaving behind them the bags, which were found to contain eight women. (Laughter.) There were, he believed, a few rebels still prowling about, but he was sorry to have to inform his hon. and gallant friend that the last information from China represented his particular friends the Taipings as having been almost exterminated. (A laugh.) He had simply to add, in answer to the last question, that he was not aware that any serious suggestions had been made by our consuls with regard to the necessity of taking further steps for the defence of our settlements in China. Any suggestions of that kind would come in the ordinary course through Her Majesty's Minister at Peking.—(14th.) Colonel SYKES gave notice to move for certain papers referring to the rebellion in China.

INDIAN PAY.

(12th.) Captain GRINDLEY asked the Secretary of State for War why the subalterns of Her Majesty's regiments on service in India were deprived by the passage warrant of the 2nd January, 1865, of the six months' Indian pay and allowances when on leave of absence on sick certificate, to which they were previously entitled under the furlough regulations of the 17th of November, 1854; and whether he would reconsider the subject, with the view to such pay and allowances being granted in future.—The Marquis of HARTINGTON replied that the warrant to which the question referred gave the reasons why the alteration had been made. It stated that it was done "in consideration of the privileges conferred upon the officers of the army at large by the provisions of this warrant," privileges which entailed considerable additional expense. The officers serving in China were not entitled to the allowance in question, which furnished another reason why the officers of the army serving in India should be placed on the same footing.

Monetary and Commercial.

The late active demand for silver for the East, which was chiefly for Calcutta, has almost entirely subsided, and the market is now flat, with very little inquiry, quotations, 5s. 1¼d. to 5s. 1⅞d. The Messageries Imperiales steamer of the 19th, from Marseilles, took over £400,000 for Calcutta, and the present mail takes about £20,121 for India and China, but the approaching steamers are not expected to take out any amounts of importance. Mexican dollars have also declined, sales having taken place for China within the last few days at 5s. 0¾d., which is now the nominal price, as there is no demand.

It is understood that the first meeting of Overend, Gurney, and Co. (Limited), will be held about the middle of May, when the accounts, made up to the 30th of April, and showing nine months' working, will be presented, with the view to the declaration of a dividend.

The biddings for £350,000 in bills on India took place on the 18th at the Bank of England. The proportions allotted were—to Calcutta, £245,500; to Madras, £4,500; and to Bombay, £100,000. The minimum price was as before, 1s. 11½d. on Calcutta and Madras, and 1s. 11¾d. on Bombay. Tenders on Calcutta and Madras at 1s. 11⅝d. will receive about 41 per cent.; and on Bombay at 2s. about 57 per cent. Above these prices in full. These terms show a considerable diminution in the demand for means of remittance to the East.

At the meeting on the 8th of the shareholders of the Chartered Bank of India, Australia, and China, the directors' report, which has already been published, was adopted. It recommended the payment of a dividend at the rate of 5 per cent. per annum, free of income-tax, for the half-year ended December last. The chairman, Mr. Mitchell, M.P., in referring to the losses of the bank, said that the capital remained untouched, though the reserve fund had diminished, and that they are making large profits in the present year.

The meeting of the Oriental Bank Corporation was held on the 19th. The net profit for the year 1865, including £4,489 from last account, was stated at £155,137, out of which a half-yearly dividend of £75,000 was paid in November last; and it was decided to-day to divide a like sum of £75,000, being at the rate of 10 per cent. per annum. The amount left to be carried forward is £5,137.

The meeting of shareholders of the Land Mortgage Bank of India took place on the 19th. The net profit for the year amounts to £24,399, allowing of the payment of a dividend for that period of 6 per cent., of which 2 per cent. was paid to the proprietors in April last, and an additional 2½ in October, thus leaving a balance of 1½ for present distribution. It was also decided to divide now a further sum of 2½ per cent. as a first interim dividend for the current year, such, it is mentioned, being amply warranted by the profit already earned. The directors also trust to be able, as last year, to pay another interim dividend in October next. Mr. Nelson, the chairman, congratulated the proprietors upon the progress of the bank. The company's investments in India amount to nearly a million sterling, which is producing a gross income of £90,000 per annum. The security is described as undoubted, there being, upon the average, a margin of 50 per cent. over and above the amount of the loans. A vote of thanks was passed to the chairman, and a special vote of thanks to Mr. Fitzwilliam, who, though remaining a director, retires from the managing directorship, on the ground that, the company now being fairly launched, there is no longer any necessity to burthen it with the salary of £1,000 per year attached to that post.

The report of the first meeting of the Hong Kong and Shanghai Banking Company has been published in this country, and has elicited favourable comment.

The directors of the Commercial Bank Corporation of India and the East, in anticipation of the general meeting convened for the 25th inst., have issued the following singularly unfavourable report, which shows how completely this establishment has been in the hands of unworthy or neglectful agents abroad. From the following profit and loss account it appears that the reserve fund of £169,301 has been entirely swept away, and that, moreover, the bank starts afresh with a balance of £65,757 on the wrong side of the profit and loss account:—

Digitized by Google

The directors regret to have to lay before the shareholders so unfavourable a statement as that now presented of the transactions of the bank. The losses on sterling dishonoured bills falling due during the past year have been duly estimated at £123,000, and the directors have written off that sum accordingly. During the share mania in Bombay last year, the agent, Mr. de Quadros, having involved the bank by imprudent advances to speculators, the chief manager went out in June last to inspect the condition of that agency. He has only just returned, and estimates the losses thus incurred at £89,000. The directors have written off that sum. In October last intelligence reached the directors that Mr. Newby, who had been appointed by the late Commercial Bank of India as their agent in San Francisco, for the purchase of bullion for remittance to China, had advanced moneys on the security of certain shares. On investigation it appeared that a sum of £196,782. 10s. 6d. had been lent by him on mining shares, none of which could at present be realised except at a ruinous depreciation. The directors have written off a sum of £118,233, which, in the present uncertain value of these securities, is as much as they think they are warranted in writing off as actually lost. The agents at Bombay and San Francisco have of course been dismissed. In November last the directors received intelligence of the death of Mr. Wiggins, the bank's manager in the East, and agent at Shanghai. Their new manager reports, upon taking charge of that agency, certain irregular transactions on the part of Mr. Wiggins, partly by purchases of land, partly by other speculations undertaken, as it is alleged, on behalf of the bank, which have resulted in losses amounting to about £53,000. The directors do not, of course, recognise the liability of the bank to bear these losses; and they have given directions to recover the amount from Mr. Wiggins' estate, and from the parties who assisted him in these transactions, which they hope to be able to do. The losses from bad debts at that agency have been great, and the directors have written off £38,267, being the amount as estimated. The remainder of the sum written off consists of £5,000 for a bad debt at Hong Kong, and £1,500 for bad debts at Calcutta. The directors beg to remark, that on the transfer of the business of the branches of the late Commercial Bank of India on Jan. 1, 1865, they took over, after a period of unusual prosperity, a staff and a system not organised by themselves, and which might fairly be assumed to have some imperfection, inasmuch as the difficulty of obtaining at Bombay a body of directors with sufficient time to command, was a main reason for establishing the head-quarters of the bank in London. It was under such circumstances, before the character and qualifications of its officers could be ascertained, and before faults of system could be discovered and rectified that the directors had to face a season of almost unparalleled commercial vicissitude, in which, owing to the failures of numerous firms of high standing and reputation, it would have been impossible to avoid all loss. The directors, whilst recognising the unfortunate character of the report now presented, have felt it their duty to make that report without reserve. They deeply regret that it is of course out of the question to offer any dividend; but they would call the attention of the shareholders to the exceptional character of the greater part of the late losses, as affording ground for a more hopeful view of the bank's position and prospects for the future. Since the last meeting H. D. Cartwright, Esq., has resigned his seat as director; and Walter Evans Gledstanes, Esq., has joined the board, and this election is submitted for the approbation of the shareholders. In pursuance of the terms of the deed of settlement, two of the directors, Frederick Chapman and Edward Thornton, Esqs, go out by rotation, and they offer themselves for re-election. The auditors, Robert Strong and John Ball, Esqs., also offer themselves for re-election —By order of the court. D. ALLARDICE, Sec.

The amount of bullion by the P. and O. Company's steamer *Poonah*, from Southampton on the 20th inst., was :—In gold to Madras, £1,000; in silver to Madras, £1,490; to Hong Kong, £10,111; to Yokohama, £400; to Shanghai, £5,120; to Sydney, £2,000. Total in gold, £1,000; in silver, £19,121.

ARTICLES OF IMPORT.

TEA.—Our market has been without any improvement, and transactions on a more and more limited scale, but on the average prices have been pretty well maintained. In dusty and broken-leaf kinds of Congou there has been no alteration; fair to good common are still quoted 1s. 0½d. to 1s. 1½d. per lb. In fair flavoury kinds the few sales have been at about previous prices. Good medium kinds remain as before, also fine to finest. Common black-leaf kinds have sold at from 1s. to 1s. 1d. per lb.; there has been a limited inquiry for the better kinds, ranging from 1s. 5d. to 1s. 8d. per lb.; fine to finest continue in only limited request. There has been rather more doing in new-make Canton-kinds at slightly better prices. In Oolongs, Souchongs, and Flowery Pekoes there is no new feature. Common to fair Scented Capers and Orange Pekoes have been saleable at from 1s. 2d. to 1s. 4d. for the former, and 1s. 5d. to 1s. 7d. for the latter; the better kinds of both meet with a very slow sale. Foochow Capers have been sold rather lower, also Orange Pekoes. Uncoloured Japans have been sold, in all about 5,000 packages, at full prices. In Green teas business has been to a fair extent from recent arrivals, but prices have ruled in favour of buyers for nearly all kinds. Some of the fine Moyunes have sold comparatively well, except Hysons, for which it is now difficult to get offers at previous prices, owing to larger supplies offering. Canton-made teas show no alteration. The public sales of China tea consisted of 23,958 packages, of which 17,713 packages were sold, nearly the whole being without reserve, and prices went rather lower. Telegrams have been received up to 31st March, stating the export for the fortnight at 1,000,000 lbs.

SILK.—Within the last eight-and-forty hours a marked change has come over the Silk Market; previously business was at a complete stand still, the general impression being in favour of lower prices; now, on the contrary, all are buyers, and the current of the market is reversed. The fact is, that accounts of the European crop have for some time past been indifferent, but such was the despondent feeling on the Continent that no one would be influenced thereby. Now that the hatching has become more general serious complaints are made, and it is feared that the result of the Japan seed will be most disappointing. China Silk: Buyers operate freely at our quotations, and some of the leading importers show a disposition to increase their pretensions. Japan Silk:—The better descriptions of Mibash are much in demand, but unfortunately the stock is composed principally of inferior sorts.

COTTON.—There was a recovery in the middle of last week of some portion of the decline reported in our issue of the 17th, but the advance was lost at the close, though business ceased for the week ending the 20th with less depression. On Monday the 23rd there was an improved demand, and an advance of fully 1d. per lb. was established on the low sales of last week. On the 24th there was again an active demand, which resulted in only a moderate business, owing to the extreme firmness of holders. On this last day 680 bales Tinnivelly were sold in the London market at 10d. to 12¾d. middling to good fair, and 100 bales Dhollerah to arrive, at 11¼d., January sailing, guaranteed fair. The Liverpool report of the 24th is, market firmer and rather dearer, except for Surats.

SUGAR.—Considerable languor has continued to prevail since our last, and sales were concluded slowly to the end of the business week ending the 20th, mostly on cheaper terms. On the 20th 13,000 bags Clayed Manila were sold at 27s. 6d. to 28s. On the 24th the demand had decidedly improved for both grocery and refining qualities, at a slight advance on previous low quotations. Privately 2000 bags of unclayed Manila were disposed of at 24s. 6d.

COFFEE.—Remains steady, and the bulk of the rather liberal supplies brought forward at auction has been cleared off without material change in prices. On the 24th, 220 casks, 120 barrels and bags of plantation sold steadily at the valuations; triage, 65s. to 73s. 6d.; fine ordinary to good middling, 77s. 6d. to 89s. 6d.; bold, 92s. to 94s.; peaberry, 84s. to 89s.; and 200 bags and 20 casks of native at 65s. 6d. to 67s. 6d.

RICE.—Continues very dull of sale: 10,200 bags Necranzie were retired from public sale on the 24th at 11s. 6d., and 300 bags Bassein at 10s. 9d. per cwt.

CARDAMOMS.—Steady; of 20 cases Malabar at auction, one-fourth sold at 6s. 3d. per lb. for good; and of 9 bags Madras, half sold at 3s. 5d. per lb. for middling lean.

CAMPHOR.—Japan comparatively scarce, and without any transactions. China flat and lower; 70 cases sold at auction at £5 15s. to £5 17s. 6d. per cwt.; moderate business also privately on similar terms.

CASSIA LIGNEA.—Very firm; and 200 cases sold at auction at 100s. to 101s. per cwt. for middling quality, very mixed; 98s. very coarse and dark; and 97s. badly mouldy. Buds: Nothing of any importance doing.

CINNAMON (CEYLON).—We quote 1st sort 2s. to 2s. 10d. per lb., superior 3s. to 3s. 4d.; 2nd 1s. 9d. to 2s. 9d.; 3rd 1s. 8d. to 2s. 4d; 4th and jungle 1s. 4d. to 1s. 9d.; limited business upon previous terms.

COCOA-NUT OIL.—Cochin scarce and firm; Ceylon plentiful and rather lower; business very moderate; 446 casks Ceylon and 243 casks Sydney at auction.

DRUGS.—Cubebs: Flat, and rather lower; of 290 bags at auction half sold at 78s. to 79s. per cwt. for good. Dragons Blood: Steady; and 20 cases sold at auction at £7 15s. to £12 per cwt. for fair to fine lump. Galangal Root: Rather cheaper; 250 bales sold at auction at 11s. 6d. to 12s. per cwt. for middling. Rhubarb: Good quality is scarce, and commands very high prices; ordinary selling very irregularly and upon lower terms. 208 boxes of recent import at auction mostly sold at 9s. 5d. to 9s. 9d. per lb. for fair, and 2s. 1d. to 4s. inferior and ordinary.

GUMS.—Benjamin: Siam rather lower; of 28 cases at auction, two-thirds sold at £30 to £31 5s. per cwt. for third quality, and £16 to £19 10s. dark and drossy. Sumatra flat, and 76 cases at auction all retired. Damar: Very firm; only 20 cases at auction sold at 60s. 6d. per cwt. for fine. Gamboge: Firm, but quiet; 13 cases at auction retired.

GUTTA PERCHA.—Quiet; of 6 tons at auction, half sold at 7d. per lb. for middling reboiled.

HEMP (MANILA).—Is generally rather lower, and without much business; and of 995 bales at auction, about two-thirds sold at £42 10s. to £48 per ton for ordinary to very good roping of recent import.

PEPPER.—Black: Very quiet; of 4,640 bags Penang, at auction, one-fourth sold at 3¼d. to 3⅜d. per lb.; 120 bags Singapore retired; limited business privately in Singapore at 3 9-16d. White: Flat; and of 499 bags Singapore, and 18 bags Madras at auction, one-fourth sold at 6¼d. to 6⅜d. per lb. for fair.

SPICES.—Cloves: Quiet for all descriptions; only 2 cases Penang at auction sold at 1s. 2d. per lb. Mace: Quiet; 3 cases Penang at auction sold at 2s. 2d. to 2s. 10d. per lb. for fair reddish to good palish; and 11 cases Cochin at 1s. 4d. for inferior. Nutmegs: Quiet; and of 42 cases Penang at auction, the bulk sold at 1s. 3d. to 2s. 11d. per lb. for ordinary small to mixed medium and bold.

SAGO.—Is again rather lower; but 3,105 packages sold at auction at 18s. to 19s. per cwt. for middling to fair large, and 18s. to 20s. 6d. middling to fine small. Flour: Steady, but quiet; 270 bags at auction sold at 15s. to 15s. 6d. per cwt. for good.

TAPIOCA.—40 bags Pearl, of good colour, at auction were withdrawn at 28s.

TERRA JAPONICA.—Cutch, Pegue: In very moderate demand, at a slight reduction in terms; and of 4,173 bags at auction, very few sold at 31s. per cwt. for fine. Gambier: At a slight concession in rates, demand has been active; and of 2,738 bales at auction a large proportion found buyers at and after the sales at 21s. 3d. to 21s. 6d. per cwt. for fair; and business to a good extent accomplished privately at corresponding prices.

Digitized by Google

TIN.—Large transactions have taken place in this metal, but attended with continued falls in rates; the total decline for the fortnight, since the 10th, being £4 per ton, and the market remains without any present appearance of rallying.

MISCELLANEOUS.—Blacklead: Firm; of 961 barrels at auction, two-thirds sold at 12s. 6d. to 22s. per cwt. for middling to fine lump, and 9s. to 10s. 6d. dust; remainder retired for higher prices. Galls: All Galls of the Bussorah character remain very flat, and are offering at lower prices; China again also lower, and of 309 cases at auction a few only sold at 60s. per cwt. for good; Japan inactive. Ebony Wood: Steady; 60 tons Ceylon sold at auction at £7 to £8 per ton. Musk: Rather lower, with very partial present demand. Of 119 caddies Tonquin at auction one-fifth sold at 22s. 6d. to 28s. 6d. per oz. for middling to good; and of 5 tins Grain three sold at 55s. for good. Rattans: Continue very flat; but 36,006 bundles Singapore, and 12,516 bundles Penang at auction mostly sold at 2s. 6d. to 4s. 6d. per 100. Sabanwood: Very firm; and 24 tons Siam at auction sold at £14 5s. to £19 5s. per ton, and 25 tons Manila at £14 15s. to £15 5s. Mother-o'-Pearl Shells: Singapore very scarce, and wanted; small sales at high prices. Manila considerably dearer, and 126 cases at auction sold at £7 12s. 6d. to £7 17s. 6d. per cwt. Soy: Cheaper: 16 casks China sold at auction at 3s. to 3s. 1d. per gallon. Star Anniseeds: Considerably lower; and 30 cases at auction sold at £5 5s. to £5 10s. per cwt. Sticklac, Siam: Fine quality scarce and dearer, other kinds lower; of 1,464 cases at auction, three-fourths sold at 56s. 6d. to 57s. per cwt. for fine bold, 33s. 6d. to 38s. ordinary to middling small and broken, and 33s. to 33s. 6d. block. Tortoise-shell: Steady; 8 cases Singapore at auction, mostly sold at 11s. 6d. to 15s. 6d. per lb. for inferior to good in sorts; and of 3 cases Sydney two sold at 17s. for good, and 4s. pickings.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 15s. to £7; nail rod, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 10s. to £7.

STEEL.—Swedish keg, £15 15s. to £16 5s.

COPPER.—Sheet and Sheathing, £93 to £98 per ton; yellow metal, 7¾d. to 8d. per lb.

TIN.—£89 to £91 for block; £90 to £92 for common bars. Tin plates, best charcoal, I.C., 34s. to 35s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 15s. to £24; sheet, £22; spelter, £24 10s. to £25; zinc, English sheet, £32; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—We have had a quiet market during the past fortnight, prices generally going in favour of buyers. Scotch Pig Iron: (warrants) has rather advanced in price, owing to the speculative operations, but in shipping brands there is little doing. Copper is very dull. Tin has given way further. Tin Plates: Without alteration. Lead: Firm. Spelter: Firm. Quicksilver: Yesterday the Spanish Commission announced a reduction to £7 per bottle.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

No alteration has taken place in outward freight since the date of our last impression, and our last advices homeward report no change.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £45 to £46. For Galle: £38. For Singapore: £38. For Shanghai: £51 to £52. For Batavia: £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 5s. For Manila: £1 17s. 6d. to £2. For Galle: 35s. to 36s. For Singapore, £1 17s. 6d. to £1 18s. For Shanghai: £2. 12s. 6d. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 139 tons naval stores to Trincomalee, and of 147 tons navy provisions, &c., to Hong Kong, all from the River Thames.

CASUALTIES.

The Bestevaer, Rosier, from Rotterdam for Batavia, put into Cowes April 12, with loss of jibboom.

The Regina, Linthorne, from Colombo for London, put into Simon's Bay, 8th March, leaky, with the loss of jibboom, fore and maintopmast, and misenmast.

The Trebizond, Davies, from Manila for Falmouth, put into Mauritius, 14th March, to stop a leak in her upper works.

The Jacob Roggeveen, van Marken, from Batavia, arrived at Rotterdam, 20th April, with loss of an anchor and chain.

HELENA.—Feb. 25, from Trincomalee, Anna Lange, Schweers, and sailed 26th for London; 26, from Padang, Samarang, de Groot, and sailed for Rotterdam; from Sourabaya, Souburg, Zwart, and sailed for Amsterdam; 27, from Colombo, Algernon, Mowat, Dunphaile Castle, Fleck, and both sailed for London; March 1, Albyn's Isle, Burgess, and sailed 2nd for London; from Banjoewangie, Kon Ned Yacht Club, Zwart; 3, from Batavia, Philip v. Marnix, for Rotterdam; 4, from Shanghai, Rhoderick Dhu, McPherson, and sailed 5th for New York; 5, from Batavia, Constantia, Overgaauw, and sailed 6th for Amsterdam; 6, from Foochow, Bacchante, Taylor, and sailed for London.

At TABLE BAY.—Feb. 21, from Singapore, Caroline Elizabeth, Woollen, and sailed 24th for New York; 22, from New York, N. B. Palmer, Steele, and sailed 27th for Hong Kong; 25, from Singapore, Latona, Sedgwick, and sailed 1st March for London; 26, from Bordeaux, Inez, Duserdier, sailed 1st March for Japan; from Singapore, Excelsior, McLean, and sailed 28th for Liverpool; from Cronstadt, Silome, Davidson, and sailed 28th for the Amoor; March 1, from Macassar, Laura, Moller, and sailed 4th for Amsterdam; 4, from Macao, Italia, Oates, and sailed 5th for Havana; 5, Lombard, Fages, and sailed 7th for Havana, Minaastrom; 7, from Singapore, Hermælin; 8, from Hong Kong, Layard.

At SIMONS BAY.—March 1, from Java, Lœvenstein, Hulshoff, for Amsterdam, leaky.

At ST. HELENA.—March 12, from Sourabaya, Launceston, Pearson, with about 60 tons of cargo thrown overboard; 13 from Batavia, Capella, Timm, with loss of suit of sails and damage to rudder. The former vessel sailed for New York on the 14th, and the latter for Falmouth on the 13th. 7, from Batavia, Jacob Roggeveen, v. Marken; 8, Azira, Tapper, and both sailed 8 for Amsterdam; from Galle, Lile, Morgan, and sailed 9 for London; from Yokohama, Vinco, Hughes, and sailed 9 for Boston; 9, from Batavia, Glenforth, Mills, and sailed for Amsterdam; 10, from Banjoewangie, Alblasserwaard, Zach, and sailed 12 for Rotterdam; 11, from Canton, Caroline, Bomhis, and sailed 13 for Havana; from Padang, Uncas, Mackintosh, and sailed 13 for Falmouth; 13, from Batavia, Capella, Timm, and sailed for Falmouth; from Banjoewangie, Zeepard, Crucq, and sailed 17 for Middelburg; 16, from Yokohama, Lucerne, M'Neill, and sailed for New York; 17, from Singapore, Chineseren, Hoyer, and sailed for New York; from Sourabaya, Delft, v. Geelkerkem, and sailed for Amsterdam; 18, from Batavia, Affghan, Fisher, and sailed for Falmouth; from Banjoewangie, Cortgene, Wemmerus, and sailed for Amsterdam; from Phillippine Isles, Redbreast, Dent, and sailed 19 for Falmouth; 19, from Banjoewangie, Gysbert Karel Graaf v. Hogendorp, Fabritius, and sailed 21 for Rotterdam; 21, from Manila, Moulin, Ballantyne, and sailed for London.

At SIMON'S BAY.—March 9, from Hong Kong, Agincourt, Harvey, for Portsmouth.

Off ST. HELENA.—March 22, from Singapore, Auguste and Meline; 23, from Ceylon, Lansdowne.

At ASCENSION.—March 22, from Java, Hippocampi, and sailed 23 for —; 23, Anna Digna, and sailed 24 for Rotterdam; from Batavia, Affghan, and sailed 24 for Falmouth; 24, from Sourabaya, Three Bells, and sailed 25 for Rotterdam.

Off ASCENSION.—March 5, from Penang for Rotterdam, Samarang; 13, from Singapore for London, Arab Steed; 17, from Colombo for London, Garibaldi.

At TABLE BAY.—March 10, from Macao, Ammerland, Hegemann, and sailed 12 for Havana.

Advices from St. Helena, under date March 23, state that the crew of the Queen of Ceylon, Maillard, from Colombo for London, refused to proceed in the vessel, stating she was making too much water. Upon examination she was found to have 16½ inches of water in her, and was making 2½ inches per hour. She was consequently declared seaworthy, and proceeded.

Off CAPE OF GOOD HOPE.—March 5, from Java, for Amsterdam, Constance.

YOKOHAMA.

A 1 British SHIP		—

Loading in Prince's Dock.

Apply at 43 and 43, THE ALBANY, Liverpool.

FOR HONG KONG and WHAMPOA, with quick despatch (to follow the Yaratilda), the well-known iron clipper-ship PORTLAND, A 1 12 years, 872 tons register, JAMES PETERS, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

LINE OF PACKETS FROM LIVERPOOL FOR JAVA.

FOR BATAVIA and SOURABAYA, with immediate despatch, having two-thirds of her cargo engaged, the splendid Dutch clipper barque CATHARINA, Captain VISMAR; 240 tons register; built in 1864, and classed 3-3rds L 1 1 for nine years; the highest class in French Lloyd's; coppered and thoroughly copper-fastened, and a most eligible conveyance for fine goods. Loads in Prince's Dock.

For BATAVIA and SINGAPORE, an A 1 twelve years Ship.

Apply to NUTTALL and Co., 19, Chapel-street, Liverpool.

LINE OF PACKETS FOR YOKOHAMA, JAPAN.

Has the bulk of her cargo engaged, and will have prompt despatch,

THE splendid Liverpool-built clipper barque CARIOCA, D. HUGHES, Commander; 312 tons, A 1 at Lloyd's for thirteen years, only two years old, has proved herself to be one of the fastest vessels belonging to the port, and in every respect an unrivalled conveyance.

For Freight or Passage apply to Messrs. WAKEFIELD, NASH, and Co., to Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co.

COLOMBO, CEYLON, Direct, will have very quick despatch, having room for light measurement goods only, the magnificent new clipper ship STAR OF DEVON, A 1 thirteen years, 340 tons register, JOHN CORNISH, Commander; loading in the West India Docks. This splendid vessel having just completed her first voyage, has a very lofty cabin, with accommodations of the first order for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK (late W. A. Winkley), 23, Birchin-lane, Cornhill, E.C.

Will have very quick despatch.

DIRECT for COLOMBO, the magnificent copper-built ship SPANKER, A 1 10 years, 477 tons register, JAMES CANDLISH, Commander, West India Docks. This splendid Vessel is well known for her very rapid Passages, and the good order in which she invariably delivers her Cargoes, thus offering a favourable opportunity to Shippers of fine Goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will have very quick despatch.

DIRECT FOR COLOMBO.—The beautiful new Jersey-built Clipper Ship CAROLINE HUTCHINGS, A 1 Eleven Years, 287 tons register, G. H. COTHER, Commander; lying in the West India Docks. This splendid new ship, from her fine lines, is expected to make a very rapid passage.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will have very Good Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship CELESTIAL QUEEN, A 1 thirteen years, 842 tons register, WILLIAM WATT, Commander; lying in the St. Katharine Docks. This magnificent ship, from her size, high class and fast sailing qualities, having made her last passage from Calcutta in 98 days, offers an unusual opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will meet with quick despatch.

DIRECT for BOMBAY, the splendid new clipper ship, MARINE MINISTER VON ROON, 3.3rds L 1. 1.—A 1 9 years, 1,018 tons register, J. C. ELLER, Commander, lying in the East India Docks. This magnificent new vessel having the greater portion of her cargo engaged, is confidently recommended to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, No. 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "MARINE MINISTER VON ROON," and will have quick despatch.

DIRECT for BOMBAY, the magnificent clipper ship WHITEHALL, A 1 fourteen years, 936 tons register, WILLIAM CHAPMAN, Commander; lying in the East India Docks. This splendid high classed ship is now quite ready for cargo, and being one of the fastest vessels afloat (having made the passage to Sydney in 76 days), offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

NOTICE TO PASSENGERS
BY THE OVERLAND ROUTE.
HOTEL AT POINT DE GALLE.

THE ORIENTAL HOTELS COMPANY (Limited) will open "THE ORIENTAL HOTEL" at POINT DE GALLE early in May. The Hotel will combine the comforts, cleanliness, and all the recent improvements of the best English Hotels with moderate charges. It possesses a large Table d'hote Room, Billiard Room and Reading Room, having the English and Indian Newspapers. Provisions, including Wines, Ales, &c., are supplied direct from England.

Suites of Apartments, Private, Sitting, or Bed Rooms, may be engaged by telegraphing or writing to Mr. T. M. Barker, the Manager at Point de Galle.

75, Cannon-street West, London, April 25, 1866.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel stores, &c., when requiring to discharge them.

Amoy, March, 1865.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS.—Sores which are daily extending, ulcers which are hourly deepening, may be arrested in their torturing progress and induced to take a healthy action by applying this healing Ointment and taking these purifying Pills. It soothes all distempers of, and extracts all morbid humours from, the skin. Old ulcers of the legs, inflammations caused by varicose veins, and cramps of the lower limbs, can sensibly be eased and shortly cured by Holloway's never-failing Ointment, which represses excessive, and stimulates sluggish, vascular, and nervous action. In constitutions breaking down under piles, fistulas, and other similarly painful maladies, a few applications of this cooling ointment will give comfort, and a persistence in its use will effect a cure.

JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.
JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words "DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

It was on the success of the SODA WATER MACHINE supplied to the 7th Dragoon Guards that Sir Hugh Rose based his recommendation that these Machines should be established in every Regiment. This Machine was made by SAMSON BARNETT, expressly for that Regiment.

Full Directions for preparing ALL the above Drinks are sent with each Machine.

SAMSON BARNETT, 23, Forston-street, Hoxton, London,

Above Twenty Years Foreman to Messrs. TYLOR,

FROM 30 years' manual practice in the above branch, and having constructed most of the Machines now at work in various parts of the world, is enabled to offer the most complete and durable machinery, and by confining his manufactory to only two branches, namely, SODA WATER MACHINES and DIVING APPARATUS, and his whole attention being given to these branches, it must be obvious that every part has been the subject of his most careful study, so that any derangement of parts can hardly occur. All the Machines made by S. BARNETT are construc ed under his own superintendence, and proved to four times the pressure they are ever required to be worked at. S. B., being so well aware of all the requirements of persons using Machinery where MECHANICAL ASSISTANCE CANNOT BE OBTAINED, has paid full attention to this point, as the great number of testimonials in his possession will prove. He has also lately introduced larger condensers, and more powerful frames than those previously in use, while his prices have not been increased.

HUBBUCK'S PATENT WHITE ZINC PAINT.

THE most durable and beautiful paint known, is cheaper than White Lead, and is proved to be superior for all purposes than the pernicious Lead Paint, and equally adapted for all climates.

Its whiteness is unaffected by bilge water, boiling sugar, or noxious gases.

It is free from any poisonous ingredient, and suited in all respects to the use of the painter.

Each Cask of Pure White Zinc is Stamped "HUBBUCK, LONDON PATENT."

Inferior Zinc Paint, so marked, having been sold in Foreign Markets, the Patentees offer a Reward of FIFTY POUNDS for information which will lead to the conviction, in an English or Colonial Court, of those who have pirated their Mark. Both Exporters and Retailers are liable for its sale.

THOMAS HUBBUCK AND SON,

WHITE LEAD, OIL, PAINT, AND VARNISH WORKS,

24, LIME-STREET, LONDON.

HUBBUCK'S ANTI-CORROSIVE PAINTS

Are very durable, and the most valuable protection to Iron Roofs, Bridges, Piers, Ships and Buildings, exposed to stormy weather and scorching sun; they soon become extremely hard, and do not blister.

They are made of Stone, Slate, Copper, White, Blue, Green, or any other Colour that is desired.

HUBBUCK'S ANTI-OXIDATION COMPOSITION,

For Coating Iron and Wood Ships' Bottoms; a preservative against fouling and corrosion. This Composition is ready for immediate use, and obviates the waste of carrying unmixed Paints, Oils, Driers, &c. It is also applicable to all the purposes of other Paints.

HUBBUCK'S PALE BOILED OIL

Has less colour than Raw Linseed Oil, is a quick, hard and certain drier for White and Light Coloured Paints

PAINTS AND OILS PROPERLY PACKED FOR EXPORTATION.

THE ORIGINAL
CHLORODYNE,

Invented by RICHARD FREEMAN, PHARMACEUTIST,

IS allowed to be one of the greatest discoveries of the present century, and is largely employed by the most eminent Medical Men, in hospital and private practice, in all parts of the globe.

It rapidly relieves pain from whatever cause, allays the irritation of fever, soothes the system under exhausting diseases, and gives sleep without producing any one of the unpleasant feelings so commonly arising from the use of opiates.

Cholera, Diarrhœa, Dysentery, Spasms, Cramps, Rheumatism, Gout, Fever, Ague, Asthma, Hooping Cough, Consumption, &c., &c., immediately relieved and in most cases cured.

Conclusive evidence of the value of it in Cholera, Diarrhœa, and Dysentery is afforded by the following from the Right Honourable Earl Rusell, who graciously transmitted to the Inventor of Chlorodyne. Mr. R FREEMAN, and to the Royal College of Physicians of London, the following:—

Extract of a Despatch from Acting-Consul Webb, dated Manila, September 17, 1864:—

"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be Chlorodyne, and with a small quantity given to me by Dr. Burke I have saved several lives."

Manufactured by the Inventor, RICHARD FREEMAN 70, Kennington Park Road, London, S.

Sold in Bottles, ½-oz., 1s. 1½d.; 1½ oz., 2s. 9d.; and 20 ozs., 20s. each, by all Chemists.

CAUTION.—Beware of Spurious and Deceptive Imitations. The genuine has engraved on the Government Stamp, outside each bottle, "FREEMAN'S ORIGINAL CHLORODYNE."

LONDON OFFICE—25, OLD BROAD STREET.

Agent—W. H. VACHER.

London Bankers—LONDON AND COUNTY BANK.

FIRST REPORT,

Read at a GENERAL MEETING of SHAREHOLDERS, held at the Banking Office of the Company, Wardley House, Hongkong, 12th February, 1866, the Hon. FRANCIS CHOMLEY, in the Chair :—

To the Proprietors of the HONGKONG AND SHANGHAI BANKING COMPANY (Limited).

Gentlemen,—In accordance with the terms of the Deed of Settlement, the Directors have now to submit to you their First Annual Report on the position of the Company's affairs.

The first call of 25 dols. per share was made on the 1st January, 1865, and the second call of 100 dols. was due on the 31st March; these payments were made with great promptness.

The Company's Offices at Hongkong and Shanghai were opened for the transaction of business in the month of April last, but were not in fair working order until the middle of May. The operations of the Bank to the 31st December have, therefore, extended over a period of less than eight months.

The following is the Statement of Accounts, which have been duly audited by the Hon. W. H. Rennie and Caleb T. Smith, Esq.:—

ABSTRACT STATEMENT of LIABILITIES and ASSETS of the HONGKONG and SHANGHAI BANKING COMPANY (Limited), on 31st December, 1865.

LIABILITIES.	Dols.
Paid up Capital (125 dols. on 20,000 Shares)	2,500,000 00
Deposits and Notes in Circulation	3,384,876 62
Exchange Acceptances, &c.	5,731,434 62
Branches and Agencies	1,548,219 18
Rebate	31,696 96
Profit and Loss Account	193,358 97
Sundries	7,069 07
Total	13,396,655 42

ASSETS.	Dols.
Cash balance on hand, and at Bankers	1,250,338 78
Discounts, loans, credits, &c.	3,144,446 75
Exchange remittances, &c.	5,554,279 13
Branches and agencies	3,393,430 75
Sundries	344 00
Preliminary expenses	32,827 62
Furniture and stationery account	20,988 39
Total	13,396,655 42

PROFIT and LOSS ACCOUNT, December 31, 1865.

	Dols.
To dividend at the rate of 8 per cent. per annum, or Dols. 6.66 per share	133,200 00
Amount carried to reserve fund	33,300 00
Amount written off preliminary expenses, bonus to constituents and depositors, &c.	14,577 97
Rebate on bills not due	31,696 96
Balance, being undivided profit carried forward to next half-year	12,281 00
Total	225,055 93
By account of net profit for the eight months ending Dec. 31, 1865, after deducting all expenses, and interest paid and due	225,055 93

Hongkong, Feb. 5, 1866.

From the profits shown, the Directors recommend payment of a dividend at the rate of 6.66 dols. per Share, which is equivalent to 8 per cent. per annum for the period of working. The sum of 132,200 dols. will be absorbed by this dividend, and of the remaining amount the Directors propose to place the sum of 33,300 dols. to the Reserve Fund, and carry forward 12,281 dols. to the credit of the present year's accounts, in addition to 31,696 96 dols., being rebate on bills not due.

The Directors have considered it advisable to defer their claims for remuneration for the present year, as provided for under the Deed of Settlement, under the adjustment of accounts, presuming that this course will meet with the approval of Shareholders.

HALF-YEARLY ACCOUNTS AND DIVIDENDS.

The rendering of half-yearly accounts and the payment of interim dividends are not provided for by the Deed of Settlement, but the Directors propose to carry out these measures, as likely to prove satisfactory to the Shareholders as well as to themselves.

BRANCHES AND AGENCIES.

The appointment of a Special Agent in London was found necessary, and for this post the Directors engaged Mr. W. H. Vacher, on whose experience and ability they can fully rely.

It has already been found advisable to open Agencies in Bombay and Calcutta, in order properly to carry out the business entrusted to the Bank, and this will be done as soon as arrangements can be made for this purpose.

NEW CAPITAL.

The Directors, after having given very careful consideration to the subject, have determined upon recommending an increase of the Capital of the Bank, and have, therefore, caused the requisite notice to be given. The Directors have full confidence in recommending this step, as the growing business of the Bank undoubtedly calls for such a measure.

INCORPORATION.

The application of the Directors for a Charter or Act of Incorporation has been favourably received by the Lords of the Treasury and Her Majesty's Secretary of State for the Colonies, and in a despatch from the latter, addressed to His Excellency the Governor, it is stated that Government is prepared to accede to the Bank's petition, and grant incorporation on the basis of the Charter of the Asiatic Banking Corporation. The Directors are urging forward the arrangements for obtaining a Charter under these provisions, and hope at an early date to be able to inform the Proprietors that the matter is finally and satisfactorily concluded.

DIRECTORS.

Messrs. Rustomjee Dunjeeshaw and Waldemar Schmidt having resigned, the Court of Directors, in virtue of the power conferred on them by Clause 66 in the Deed of Settlement, have appointed Mr. H. W. Wood (Manager, Borneo Company, Limited) to one of the vacant seats in the Direction.

In conclusion, the Directors have the satisfaction of reporting that, up to the present time, the Bank has suffered no losses whatever, although the period at which the Company commenced operations was one of unprecedented embarrassment in the Eastern trade. The depression arising from the latter causes produced its natural effect in greatly restricting general business, while at the same time it was necessary, even within circumscribed limits, to work with extraordinary caution. Under these circumstances the operations of the past few months form only an inadequate criterion of the field open to the Bank in ordinary times, but your Directors have seen sufficient during this period to look forward very confidently to the future. They are happy to say that the difficulties which must attend the first establishment of a business such as this are now fairly surmounted, while the support of Shareholders and other constituents throughout China and Japan is steadily increasing, and the anticipated advantages of the Bank's local standing are being every day more fully realised.

(Signed) FRANCIS CHOMLEY.

The above Report was unanimously adopted, and further consideration of the mode of augmenting the Capital of the Bank was to take place at a Special Meeting, to be held 3rd March.

Printed for the Proprietors by WOODFALL and KINDER, Milford-lane, Strand; and published by JOHN ELLISON, at the Office of the LONDON AND CHINA TELEGRAPH, No. 13, George-yard, Lombard-street, in the Parish of St. Edmund the King, in the City London.—Friday, April 27, 1866.

To Shanghai: Mr. R. V. Grahame. To Singapore: Mr. Meikleham.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

From this port our latest date is to the 3rd March. The outward mail of the 10th January had not arrived.

The most interesting intelligence relates to the hostility said to be exhibited by the Prince of Satsuma to the opening of Hiogo. There is much room for doubt how far the apparent desire on the part of foreigners for the opening of new ports is real. In Japan, as in China, large firms have been withdrawing their agencies from the small ports, and this cannot be taken to indicate any great anxiety for the opening of new ones, of the commercial capabilities of which we are necessarily uncertain. The inference drawn from Satsuma's disposal of his palaces at Yedo appears to have been exaggerated. Out of eleven, he could well afford to sell two without the act implying any intention to withdraw from the capital.

NAGASAKI.

Our advices from this port are to the 11th March, but there is an entire absence of news. A line of steam packets has now been established between Shanghai and Nagasaki. The *Hiogo* is already known as a regular trader on this line, and the *Aviso* will henceforth run with the *Hiogo* week by week.

CHINA.

PEKING.

From Peking and Tientsin we have dates to the 12th March. Mr. Hart was then leaving Peking for Europe, with an official of high rank named Ping, who is under orders to proceed to Europe and make such observations on the trade, &c., of western countries as may be useful to his own Government. He has been connected with the Customs, and his intercourse with foreigners has rendered him eminently fitted for the post to which he has been appointed, and he is said be a man of liberal and enlightened ideas. No doubt this is the first step towards an embassy, but Ping has not been accredited, although the foreign Governments have already been apprised of his departure. He is a brother-in-law of Kang Kee, well known to foreigners as formerly hoppo at Canton. Messrs. Bowra and De Champs, of the Customs service, will accompany Ping to Europe as interpreters, and his native staff consists of three mandarins bearing the white button, and one bearing a gold button.

Wen Seang has gained a victory with the disciplined contingent over the northern insurgents. The Imperial troops are said to have behaved remarkably well.

The Peking spring race meeting is appointed for the 4th April. That it will prove a marked success is confidently expected, as the Tientsin people have offered a Tientsin Cup, and the Customs have given a Haiquan Challenge Cup, such worth Tls. 100.

HANKOW.

From copies of the *Hankow Times* it appears that the Imperialist authorities are contemplating and taking active measures for the suppression of the insurgents in the neighbourhood. In addition to the "braves" who have advanced, Li Hung-chang has ordered 3,000 of his troops to the scene of action.

Native reports from Hupeh inform us that seventy-seven spies and Nienfei agents have been arrested in Wuchang and at Hankow, and that there is serious ground to fear that the attempts of the insurgents to overthrow the Imperial power in the field are seconded by the efforts of traitors within the camps. It is almost needless to say that after a kind of drum-head court martial the seventy-seven unfortunates who were seized were beheaded, and their heads exhibited on the walls of Wuchang.

M. Giquel (Commissioner of Customs) has started a Franco Chinese Force with ten Europeans (as officers) all Frenchmen. They are to live on the Wachang side of the water; their pay is from 200 dols. to 400 dols. per month, M. Giquel is at the head of it. He gets 500 dols. in addition to hit own salary, which is 500 taels. At a meeting held at the Hankow Club on the 27th February, it was resolved to establiah a Chamber of Commerce on the same basis as the Shanghai Chamber.

SHANGHAI.

From this port we have dates to the 20th March. The outward mail of 26th January had arrived on the 16th March.

Digitized by Google

A lengthy correspondence has taken place between the stewards of the Shanghai Club and twenty-one of its members who have seceded on account of alleged neglect of duty on the part of the former. Some scandal is said to have arisen, which in the opinion of the seceders called for an investigation by the stewards, who however take a different view of the matter. The correspondence terminates by the stewards declining to receive the last letter sent to them.

A case of some importance, although the amount involved was trifling, has been decided before the puisne judge. Messrs. Oppert and Co. sued Mr. Fergusson for the value of some tin which the latter alleged he had bought as broker for a Chinaman, who, however, never took delivery. Messrs. Oppert alleged that Mr. Fergusson never mentioned the Chinaman, but bought as for himself. The judged ruled that parol evidence of a bargain could not be admitted, and as there was no written evidence the decision must be adverse to the plaintiffs.

A large quantity of copper cash is in circulation which has been imported from Japan, and forms part of the coin in which the Mikado paid the Simonoseki indemnity instalment. As many as 210,285 strings, of a thousand each, had been reported at the Custom-house as landed; and as the average market value is 950 per Mexican, this gives a sum of say $221,350. As compared with Chinese in similar number and equivalent, the Japan import weighs three quarters of a Canton catty less than the very debased article heretofore passing in the market as current coin of the celestial realm—that is to say, 950 of the Japan import, weigh 4¼ catties; the Chinese 950 weigh 5 catties. Notwithstanding this difference in weight of metal, Chinese traders and house compradors, both at Shanghai and at the river ports, give Japanese import the preference, although they seem to feel extreme astonishment at seeing the device on the coin take equal place with that of their Sovereign regnant.

A serious accident had occurred to S.S.N. Co.'s steamer *Kiangtse*, running between Shanghai and Ningpo. It appears that leaving Shanghai at her usual hour, she encountered one of those thick fogs so prevalent at this season of the year, and Capt. Law suggested to the native pilot, a man who has been on the route for years, the advisability of anchoring. This was about 4 A.M. The pilot said "No, go on," and the consequence was that, about five, just as day was breaking, stem on they went to the island marked on the chart Tapang, close to Kintang, and about ten miles from Chinhai, the entrance of the Ningpo river. The shock was so great as to lead to a supposition that there was immediate danger; though the way the water rushed in, and soon rose to the level of the furnaces, showed that it was even dangerous to back off,—soundings on the quarter giving a depth of five fathoms. The moment was critical—but the man in command was equal to the emergency; and leaving the engineers to keep the fires up with tallow and other things the best way they could—(no draught could he get to help the coals)—he at once lowered the boats and landed the passengers, 120 Chinese and one European (Mr. Cerruti). Some thirty chests of opium were got ready for bundling into the boats, if necessity arose, too, and this being effected, he directed the engineers to back astern, and when off it was found that no more water was made than could be kept under till they got to their journey's end, where the vessel was so far secured by sail cloth, &c., over the damaged part, as to enable her to return to Shanghai in the usual course. On being docked, it was found that the dead wood, from the copper line down, was ground away to the depth of three feet inwards, so necessitating the removal of all the bow planking to lengths in some places of twenty feet. Such a wound in a ship's frame, and yet for her to live under it, is described as unexampled; and the report goes that the delay of a quarter of an hour more would have seen the last of the S. S. N. Co.'s *Kiangtse*.

The question with the Chinese authorities relative to the recovery of half duties on repacking teas has been satisfactorily settled by the French Minister. A proviso is made in the agreement entered into that an inspector shall be sent from the Custom-house to superintend the repacking. We participate in the benefits of the arrangement made by M. Bellonet under the "favoured nation" clause.

There has been no further interference on the part of the Chinese with respect to native theatres on the foreign concessions.

The Taoutai has sent a despatch to the Acting Consul, stating that the Tsungli Yamen have, after consultation with Sir Rutherford Alcock, issued instructions that no foreigners shall be allowed to go up the river except in Chinese boats. This may not seem important in itself, but as "a straw shows how the wind blows," it may prove to be the narrow end of the wedge which the Chinese Government are wishing to insert with a view of keeping at a distance the "irrepressible" foreign devils whom they condescended to affect friendly relations with, and ask assistance from, during the time of their greatest need.

On the morning of the 8th March the body of a French policeman named Barron was discovered in the Yang-king-pang, close to the bridge which leads from the old racecourse into the French Concession. He had been on duty in the back streets during the night, and had evidently been set upon and foully murdered, no less than thirty-five wounds having been inflicted on his head and neck. A large pool of blood outside a house in the neighbourhood of the bridge pointed out the scene of the outrage, but the house itself, together with those in the immediate vicinity, had been deserted. Eighteen natives, supposed to have been implicated in the murder, have been arrested and subjected to examination, and no doubt torture, by the Chi-Hien. The inquest on the body and the necessary examination of the scene of the crime took up a very considerable time, and thus the investigation by the native magistrates has not yet been concluded.

A case of much importance to shipping interests in general was tried lately before Sir Edmund Hornby, the Judge of the Supreme Court at Shanghai. The plaintiffs sued for a claim on bottomry against the British ship *Nimrod*, the indebtedness having been incurred by the master on the part of the owners of the ship, for repairs done to the vessel, and other expenses. The point of law involved in this case was the meaning of the words "foreign vessel" in the wording of the 6th section of the 3rd and 4th Vict. ch. 65, which runs as follows:—"That the repairs should be 'in the nature of towage or for necessaries supplied to any foreign ship or sea-going vessel.'" The judge decided by precedent that the term "foreign vessels" applied to all not under the British flag. It is very important (says the *China Mail*) that merchants and others, before advancing money on bottomry, should see that the repairs for which they advance the necessary funds are absolutely required to enable the ship to incur a sea risk, and that the master is unable to raise the money in any other way. In the case in question it appeared that the ship at the time the bottomry bond was executed had no engagement, and that the repairs were not absolutely necessary; it was therefore decided by the judge that the plaintiffs could not recover; and while giving judgment admitted the hardship which was thus entailed upon them, at the same time mentioning that the greatest circumspection should be observed in all cases in which money is advanced to masters of ships, for repairs, &c., in any other way than in the ordinary routine of business.

HONG KONG.

From Hong Kong we have files of papers to the 27th March, on which day the French mail steamer left. The outward mails of the 10th February had not arrived.

The following notification has appeared in the *Hong Kong Government Gazette*:—His Excellency Sir Richard Graves MacDonnell, C.B., Governor and Commander-in-Chief, has been pleased to appoint Lieutenant Hopton Scott Stewart, of Her Majesty's 11th Regiment of Foot, to be Aide-de-Camp and Private Secretary from the 12th instant inclusive.—13th March.

Popular report, which in Hong Kong at least is not the most truthful medium of news, asserts that it is the intention of Sir R. MacDonnell to take steps for the construction of a new road round the island. Without inquiring too curiously into the question as to whether he has actually enunciated such an intention, says the *Evening Mail*, we may be permitted to express the hope that any of his ideas which may tend to the comfort of the residents may be successfully carried out; and in so doing would draw attention to the fact that, by some unaccountable mischance, the roads of Hong Kong are by no means in so satisfactory a state as those under the vigilant care of the Governor of Macao. We are aware that the engineering difficulties are much greater at Hong Kong than on the Portuguese peninsula, but it certainly does not reflect much credit on us that we should be so vastly excelled by a colony which we are apt, and pretty rightly in many cases, to hold up as an example of a good deal which is the reverse of what it is pleasing to the public to witness.

It was said that Mr. S. Leyard Phelps, formerly of the United

Digitized by Google

States Navy, and now agent in China for the new line of steamers to run next year between Hong Kong or Shanghai and San Francisco, was about to proceed to Shanghai in the *Wyoming*, for the purpose of making the necessary arrangements touching the establishment of the projected line. With regard to the other vessels forming the U.S. squadron appointed to serve on the China station, the flag ship *Hartford* (Admiral Bell, 22 guns, 1,900 tons) is now at Hong Kong; the *Relief* (store ship) is at Macao; and the *Shenandoah* (Captain Goldborough, 8 guns, 1,378 tons) is on her way to Hong Kong, having left Philadelphia on the 2nd of December.

The *Evening Mail* says:—"From private letters we learn that the War-office authorities contemplate sending a West Indian regiment to Hong Kong, in order to avoid the payment of Indian allowances. A regulation more unfair to officers stationed at a place so expensive as Hong Kong could hardly be put in force, and we trust the influence of such men as Sir Hope Grant, Sir John Mitchel, and Sir Charles Staveley, who are well acquainted with the circumstances attending life in the East, will be exerted on behalf of the already under-paid military officers in China and Japan."

The *Opossum*, Lieutenant St. John, arrived in harbour on the 23rd March, bringing in a piratical junk with thirty-four prisoners, which was captured in the very act of attacking a lorcha, while employed in attempting to raise the treasure lost in the accident which happened to the *Kinshan* some time ago, when several boxes of specie were washed overboard by a heavy sea. The vessel it appears is a fishing junk, but when business is slack takes a piratical cruise, for which she is well prepared, being armed with nine heavy guns, and the usual miscellaneous assortment of boarding pikes and stinkpots. The crew will no doubt be handed over to the mandarins at Canton.

The *Opossum* left again to cruise on the West Coast, where she went to place where she lately did such execution; on arriving there she could neither see nor hear of them, so returned to Macao. We are happy to hear that Mr. Thomas and the man lately injured in the blowing up of a pirate junk, have nearly recovered from their injuries, and will soon be able to return to their duties.

We learn from Whampoa that one of the coolies on board the British ship *Pride of the Ganges*, now loading again for Demerara, has been recognised as having been one of those who were on board at the time of the rising on her first voyage. The man, though not believed to have taken part in the mutiny has been secured.

It is satisfactory to find that a new channel of trade has been opened in the neighbourhood of Hong Kong. Some time ago it was announced that Consul Robertson had obtained from the Chinese authorities of Canton permission for the river steamers to call at Chuen-pee. Mr. Heard's company has already availed itself of this permission, and has opened trade with the place. The permission is at present limited to three months, so that the wishes of the Peking government can be ascertained before any permanent arrangement is made, but the first is the important step. The company is to be allowed to have a receiving ship at Chuen-pee, and as a temporary measure has stationed the steamer *Fee-Pang* off the place, to be used as a hulk. The steamers call for cargo and passengers both in going and coming. There are four European custom-house officials stationed on board the hulk, but cargo destined for Chuen-pee has in the first instance to be taken up to Canton to be passed there. Cargo from Canton to Chuen-pee can, of course, be discharged without difficulty. Chuan-pee may, in consequence of the communication now opened up, become a very important outlet of trade. It ought to drain the Shoklung sugar district, and be the port of Taiping.

Governor Amaral (says a correspondent of the *Evening Mail*) has been trying to relieve Macao of the old stigma in regard to coolies. The laws are strictly carried out, and a coolie can no longer be kidnapped; all those who leave Macao now voluntarily assent to an agreement read in Chinese and Portuguese, which they can reject or decline, but which, when signed by themselves and the Procurador (a Portuguese Government officer), binds them to proceed to the countries mentioned. Two examinations of this kind are necessary before the intending emigrant goes on board ship, and every ship before sailing is inspected by a Portuguese officer appointed for the purpose. Governor Amaral himself visits repeatedly the several barracoons in Macao, and generally exerts himself (he is a most active independent man) to see that none of the abuses for which Macao formerly had such a bad name exist in the present day. When he has succeeded in catching those infringing the regulations in any way, he has been severe and unrelenting in his sentences and punishment. I visited some houses called barracoons and expected really to find men lying about in a confined space like penned cattle, I was dissapointed; the door of the house stood open, and the Chinamen I saw (wretched half starved looking creatures certainly they appeared) could go out or in just as easily as I did, and I did not see a soul either at the door or guarding them in any way. Some were sick, and were in separate rooms with attendants at their sides. The result of my visits and inquiries induces me to believe that some of the justly condemned iniquities of the coolie trade can no longer exist in Macao. Governor Amaral has also erected new barracks for the Portuguese garrison, which are large, airy, and light; the poor troops must think them a wonderful change from the low, damp, and dark quarters they have hitherto occupied. The lighthouse also is a late innovation, and reflects not only a welcome light visible to the distant vessel of all classes, but wonderful credit on the Governor, who conceived and carried out the project.

With reference to the above the *Evening Mail* says:—"Our correspondent's remarks respecting Governor Amaral are, we have every reason to believe, true. We have long been aware that no one has been more solicitous to remove the 'coolie scandal' from Macao than he has been for some time past, and we doubt not that he has also been properly seconded by those under his immediate control. But admitting all this, we must still point out that the means he has taken must be inefficient so long as the present system of 'crimps,' *i.e.* Chinese brokers, procurors, or agents is allowed to continue. The fact that the 'barracoons'—call them 'lodging-houses' not to tread on tender toes—are open and unguarded, goes for nothing, and for the following reasons. To obtain 'volunteers' for emigration, Chinese agents travel through the county much as our recruiting officers do, and having dazzled the eyes of the Chinese chaw-bacons and their friends, with the unaccustomed gift of a few dollars, send or accompany them to certain coolie emigration offices. So far nothing is unfair, always presuming that the Chinese agents act honestly; the Chinese themselves assert, however, that the said agents kidnap many of the coolies sent down to the ports; of this we have no means of judging, except from the native proclamations issued by Chinese of good repute; but the question is immaterial as regards the point we are now seeking to prove. The coolies on arrival at the ports are then taken to the emigration office, where, as described by our correspondent, they sign a document binding themselves to proceed to the countries indicated, and the remainder of the programme, which is open and above board enough, is carried out."

The report of the colonial surgeon, Dr. Murray, for the year 1865 had been published in the *Government Gazette*, and presents some very interesting features. The first paragraph of Dr. Murray's report, says the *China Mail*, will somewhat astonish those who have of late both at home and abroad been painting a residence at Hong Kong in such sombre colours. The actual proportion of mortality amongst all classes of the inhabitants during 1865 is stated by Dr. Murray to have been enormously greater than in preceding years. But, on the other hand, "the general average mortality of the resident European and American population has been below that of the two years immediately preceding." From this we may fairly argue that so long as the predisposing causes to disease can be avoided, the chances of exemption are increased to a very satisfactory extent.

Small-pox was not particularly active during 1865, and cholera might be said to have been absent in its epidemic form; but Dr. Murray's report informs us that a disease which has hitherto been confined to Africa and the Western hemisphere has at length made its appearance in Hong Kong.

The report says:—"An epidemic, however, of quite as startling a character was first recognised in Victoria Gaol upon the 3rd of March, when a prisoner, who was said to have come directly from Macao, was seized with symptoms closely resembling those of yellow fever. No new case occurred until the 15th of the same month, and during the whole of March there had been 5 cases only, but of these three had terminated fatally. The disease increased rapidly until it attained it acmé on the 2nd of May, on which day there were 46 cases in hospital, inclusive of 15 admissions on that day. From that period it commenced to decline, but did not entirely disappear until there had been 373 admissions and 40 deaths.

Digitized by Google

"As far as I could ascertain the fact, the disease proved to be contagious but not infectious, and the period of incubation about 10 days. It was undoubtedly a form of yellow fever.

"The disease was not, however, limited to Victoria Gaol, but prevailed throughout the town, among the lower classes principally. There are 103 cases recorded as admitted into the Government Civil Hospital, of which no less than 40 died; but it is a little doubtful whether these were all ascertained cases of the epidemic and not in some simply a severe form of bilious fever. Many of the men admitted were nearly or quite moribund when sent to hospital, and 20 dead bodies were sent there or examination after death, in which the same epidemic had been the active agent. I notice that two cases of bilious fever were admitted into the Seamen's Hospital, both of which proved fatal. Possibly they may have been cases of the epidemic.

"The disease was most easily studied in the gaol, and upon the observation of it, as it there presented itself, I have based these remarks. As I have already said, the number of admissions were 373 and the deaths 40, giving a percentage of 10.75 deaths, which after all is not very high for any epidemic, and nothing in comparison to the usual mortality in cholera. Very few Europeans were attacked, a comparatively small number of Indians, and no females were brought under its influence.

"It is a curious fact that the British ship *Tricolor* left this port for Dutch Guiana on the 2nd of May, when this epidemic was at its worst, with 480 coolies on board, and that upwards of 200 died on the voyage, as far as can be ascertained, from the effects of somewhat similar epidemic.

"Poverty and destitution appeared to be one of the most marked predisposing causes of the disease, and the long drought and great heat were probably in some measures the exciting causes."

The "China Directory" of Messrs. Shortrede and Co. for the current year has at length been published. The illness of the late proprietor for some considerable period anterior to his death, materially interfered with the progress of a publication which required an extensive correspondence with the ports in China, Siam, and Japan, besides involving a great increase of work in the compositors' department. On the firm passing into the hands of the present proprietors it was found necessary to almost recommence the work afresh, on account of a large portion of the copy having been mislaid, while the unavoidable delay caused by the necessity of awaiting fresh corrections from the more distant ports increased the difficulties of an earlier publication.

A startling accident has taken place at the new dock, now in course of construction at Aberdeen. The bar of earth left in its natural state as a dam to keep out the water while the works were proceeding at the upper end of the dock, gave way, and admitted a rush of water which flooded and speedily filled the excavation. The men at work at the time were enabled to make their escape, and fortunately none have been drowned. The progress of the works must be delayed considerably, however, as a dock 400 feet long and 20 feet deep cannot be emptied so readily as it may be filled. We are informed that the necessary pumping apparatus has been sent for. It seems strange that the natural dam should have been weakened to such an extent as to allow of this catastrophe.

The following particulars are published of the piratical attack on the Danish brig *Dannevirke* briefly noticed in our last issue:—The *Dannevirke* left Hong Kong on the 28th of February at 7 A.M; at half-past 12 the pilot went on shore abreast of A-chow point. At half-past 1 P.M. they had a lorcha close to windward, but did not suppose her to be a pirate, but all at once they saw the stinkpots hoisted aloft, which left them without doubt concerning her real character. They made everything ready for action, fired from the bow, and midships six-pounders, the lorcha dropped astern out of the way of the big guns and followed the brig in her skidwater, where they could reach him only with small one-pounders; they kept on firing out of the latter guns—the lorcha came nevertheless closer and closer. Suddenly he hove a lot of stinkpots on deck. Captain Mogensen, and his mate went aloft, and the men retired to the forecastle because it was impossible to stand the sulphur smoke of the stinkpots. The pirates came on deck and ordered the mate to come down from the maintop. He obeyed, and they asked him whether he had any money, and where the captain was. He answered that he had no money, whereupon the pirates let him free, but ordered the captain to come down from the foretop. He would not obey, but some of them went aloft with pistols and swords to fetch him, whereupon he came down. They asked him if he had any money; he said "No." The pirates would not believe it, and several grasped him to heave him overboard; they had lifted him already from the deck, when the pirate chief ordered his men to leave Captain Mogensen alone; whereupon he ordered him to deliver up all valuable goods, as well those belonging to the ship as his own and the crew's, otherwise he would burn the ship and murder the crew. Thereupon Captain Mogensen resolved to save his and his crew's life, and the ship from destruction, and did what the pirates wanted. After the pirates had taken every valuable thing away, they left the ship, and the *Dannevirke* continued her voyage to Saigon.

STRAITS OF MALACCA.

SINGAPORE.

It was noticed in our last that a dinner had been given to Sir R. B. McCausland, on the occasion of his resigning the office of Recorder and of his departure for home. The committee selected to conduct the affair consisted of Messrs. W. H. Read, G. H. Harrison, J. J. Greenshields, J. Davidson, E. J. Leveson, R. C. Woods, D. Rodger, A. E. Schmidt, S. Short, J. S. Scrymgeour, A. von der Hyde, and Dr. Little. The banquet took place in the Town-hall, Mr. W. H. Read officiating as Chairman and Mr. J. J. Greenshields as Vice. To the former it fell, of course, to propose the health of the Recorder as the guest of the evening. In the course of his reply the hon. and learned gentleman said:—

What my future lot in life may be, it is impossible for me to say; that remains in the hands of the great Disposer of Events; but whatever it may be, I shall ever remember with honest pride and gratitude that to Singapore I am indebted for that exalted position and those high honours to which I could scarcely have hoped to have attained by remaining at the practice of my profession in my native land; and whether my lot be one of peaceful retirement and obscurity, which I very much covet, or versed once more in the active duties of public life, the inhabitants of Singapore will always be entitled to command any services which it may be in my power to render to them. (Loud and repeated cheers.) Now, gentlemen, I have again to thank you for the kindness which you have shown to me on this occasion, for this magnificent entertainment, and for the enthusiastic manner in which the mention of my name has been received. It is not my intention to trespass longer upon your indulgence, but before I sit down I wish to avail myself of the privilege usually, I believe, accorded to a guest on these occasions, and I feel confident that the toast which I am about to propose will meet due honour at your hands; for I am happy to say that, though there are clouds still lowering over the West, I have been assured by one of your best known and most honourable merchants that a great deal of money has been lately made in Singapore. Long may it continue so. My toast is, "The prosperity of Singapore," coupled with a name which, when it shall be mentioned, will I am sure be received with rapturous applause. I shall not venture or attempt to enumerate all the public services which that distinguished individual has rendered; for the omission of any one might be fatal to the task. But whether it be free-trade, or Freemasonry; gas works or a gambling farm; a secret society which has just started up, or a grand jury presentment to put it down; a screw-pile pier, or a railway; Patent Slips and Docks; the Suez Canal, or any other diggings of *The Delta*; and lastly, but by no means least, the total and absolute transfer of the entire of the Straits Settlements and its Government from the cold embraces of poor old John Co. (now alas no more), to the fostering care of a Colonial Secretary and the tender mercies of a Chancellor of the Exchequer,—for each and all these services the inhabitants of Singapore, and I myself among the number, feel deeply indebted to our worthy chairman, William Henry Read.

To this the Chairman responded—

Gentlemen,—In return for the very flattering terms in which my health has been proposed, I can only say that our guest has taken no unfair advantage of me, for although I certainly anticipated that the chairman's health would be proposed, I thought it would be late in the evening, by which time I could have collected my ideas and steadied my nerves. But really after such good words and such a catalogue of offences or virtues, I hardly know which, I feel at a loss to return thanks. I can only say in a general way, that my wish has always been to do what I can for the benefit of Singapore. The whole matter is comprised in a very small compass. Singapore was claimed by the English, and the British flag was first hoisted on the 6th February 1819, and I came into this world on the 7th of the same February. My father was one of the earliest merchants of the place—my mother passed several years of her life here—the first place I knew on the map was Singapore; in fact Singapore has been intimately interwoven with my whole life from its beginning, and will possibly continue to be so to its end. (Cheers.) I have therefore felt more than a common regard for the place. In fact I love it, and whether it may be considered a malformation of the man or mind, I have always considered it my duty to look after the interests of Singapore, to promote the prosperity, whether political or commercial, of the place. (Cheers.) There may have been instances in which I have made mistakes—("No, no")—but these must be attributed to over zeal; but that I have done some good in my time is proved by the manner in which you have received the toast. (Cheers.) Whether the Colonial Minister or the Chancellor of the Exchequer may be of the same opinion as myself or not, I do think that if we get here a Legislative Council we shall be able to legislate on the spot, and we shall then probably obtain laws which ought to have been granted long ago. (Cheers.)

Digitized by Google

I thank you much for the manner in which you have received the toast so handsomely proposed by his Honour the Recorder; and I can only say that my services, such as they are, are at your disposal at any time you may require them. (Loud cheers.)

Mr. Greenshields proposed the next toast, the health of the Governor, Colonel Cavenagh, whom he lauded for his accessibility and readiness to attend to any proposal that tended to the good of the place, noticing also the zeal and interest he displayed in the cause of education. The Governor replied, expressing his earnest desire to deal fairly and justly with every matter brought to his consideration, and to advance to the utmost the interests of the important settlement committed to his charge. The toast of "Our Guests," introduced by Mr. Davidson, was eloquently acknowledged by the Rev. Mr. Waterhouse, who took the opportunity of eulogising Sir R. McCausland as "a judge, a gentleman, a friend, and a man." His Honour the Governor then gave "The Merchants," thanks being returned by Mr. Paterson, who said:—

Colonel Cavenagh had remarked that only forty years had elapsed since this settlement was founded by Sir Stamford Raffles, and had enlarged upon its present position; he would therefore only add that with free trade as its basis the progress of commerce in this part of the world during the ensuing forty years promised to be more surprising. It had been said that twenty languages might be heard daily in our streets, and he would state without fear of contradiction, the speakers thereof, when they returned to their respective countries, would heartily testify not less to the justice they received than to the freedom which they had enjoyed under the British Government.

Dr. Little gave the toast of "the Bar," stating that among the lawyers he had formed many true and lasting friendships:—

Twenty-five years ago I made the acquaintance of Mr. Napier. (Cheers.) A more honest or a better man never lived, who now enjoys a comfortable independence, on the fruits of long labours in his professional career. Next to him I must name Mr. Abraham Logan, whom you well know as a sound lawyer. Of his brother, Mr. J. R. Logan, words would fail to express his worth. I know him well—both personally as a friend and as the promoter of the "Journal of the Indian Archipelago," which had it been published at home would have earned him a wreath of eternal fame (cheers):—as a lawyer, the soundest in the Straits—and of an unequalled judgment. These, gentlemen, are the friendships of a generation ago, but we have among us one who worthily represents them now. If permitted to trace his career, where could we find a better lesson of industry and determination—one who has earned the honourable respect of every one who knows him, and now enjoys amongst his family a comfortable independence?

Mr. Wood returned thanks on behalf of the Bar, and Mr. J. Murray having proposed "the Ladies," the Governor and the Recorder retired shortly after, the banquet terminating about eleven o'clock.

The three seamen whom we have referred to before as having been converted to Mahomedanism (observes the *Free Press*) may still be seen any day walking about in their petticoats, apparently unconscious of the deserved contempt they must excite in every one, whether native or European. We hope that ere long some means may be adopted either to reclaim them from their silly course, or to send them out of the island. Happily for all, we live in the days of religious toleration, and every one may be of what faith or creed he may consider best for the welfare of his soul; yet we much fear that no such consideration has moved the minds of these deluded wretches. And indeed, as we have already shown, the inducement was the payment of certain debts they had contracted in the low public-houses, as well as the additional incentive of a bribe in money paid down in hard cash. We wish for the sake of example that these three seamen, whose names we publish in full, in hopes of arousing in their minds some small sense of shame, could be compelled to march round our town decked in a fool's cap and bells, which would be a becoming addition to the garb they now wear, and further, that after their peregrination had been completed, the magistrate had power to order James Bryce, Bernard Cunningham, and George McLaine, to be thrashed with that rod which has ever been considered good for the fool's back.

The schooner *Water Lily* reports that on her recent passage from Batavia she fell in with the British ship *Grassmere*, from Shanghai to London, ashore on the mud bank off first Point Banca Straits. The vessel had been then three days ashore. The *Water Lily* offered assistance in lightening her, which was refused, though offered at intervals during five days that the *Water Lily* remained by her, expecting her assistance to be required. But the captain of the *Grassmere* determined to do without help, broke out his cargo of tea and threw ballast overboard, as well as all the superfluous ship's stores, after which she came off. Captain of *Water Lily* supposes the *Grassmere* would have to go to Batavia for ballast.

The Russian steam man-of-war *Isumrude*, 5 guns, 200 men, Commander C. Brilzen, from Batavia, arrived in the harbour on the 8th March at 5 P.M. She left Batavia on the 4th, and is bound for Japan. The Russian steam corvette *Ascold*, 330 men, 17 guns, Commander Polozoffs, from Batavia, arrived in the harbour on the 9th March. Bound for Hong Kong, and expected to sail on the 13th March.

A charge of stabbing was investigated before Lieut. H. Burn, Marine Magistrate, on the 16th and 17th March. Captain Overbury, of the British ship *Albert Victor*, which vessel lately arrived from Liverpool, brought the charge against a European seaman named Peter Short, belonging to the said ship, for stabbing the chief mate, Mr. Walter Thomson, on the 20th January last, at sea, in lat. 34.30 N., long 92.30 E. The magistrate was of opinion that the case was one of assault merely, as the man appeared to have acted in self-defence, and therefore sentenced the prisoner to four months' imprisonment in the House of Correction with hard labour.

PENANG.

During the last four or five years (says the *Gazette*) coffee planting has had a pretty fair trial in Penang, and we are constrained to come to the conclusion that here coffee culture will not pay—in fact, that it is nearly a complete failure. The plants during the first twelve or eighteen months grow well and are strong enough, but as soon as they commence bearing, and when the long droughts set in (which by the way we have had for the last three years), the plants become scraggy, lose their leaves—partly through drought and partly from the ravages of insects—and eventually die. In a rich soil and under a shade the plants stand better and do not appear to suffer much from insects, but the crop is inferior in quantity, and, except near dwelling-houses, the cultivator has a small chance of reaping any harvest whatever. This is not cheering, but it is a fact, and we cannot advocate an extension of coffee planting in Penang. These remarks apply especially to the plain; the plants on the Great Hill still bear, but their extensions seem bounded to the present localities round the Bungalows. In the province the only coffee plants that are worth anything are those planted near houses. Some remarks made twenty years ago by Mr. Thompson and Colonel Low, both acute observers, fully bear out what we have here written.

We have repeatedly called attention (remarks the same journal) in these columns to the ravages made by the Koombang beetle amongst the cocoanuts near town. The evil is getting worse every day, and we are not exaggerating when we say that thousands of trees have already been killed, the destruction of which might easily have been avoided. The dead stumps are allowed to remain until they fall, or in some places are cut down and allowed to rot upon the ground; in either case they become hot-beds for the larvæ of the beetle and the best possible nurseries for their propagation. Owners can of course do nothing but examine their trees and catch as many as possible; but no attention can prevent trees being attacked when your next door neighbour's compound is full of dead and dying trees. The matter has become so serious that it requires very little gift of prophecy to foretell that in ten years hence, unless some stringent remedy be applied, we shall have the same failure of cocoanut trees as we have already experienced among the nutmeg trees. Until some means or other, whether by Government or otherwise, are taken in the matter, we advise owners of cocoanut trees to burn every dead stump and keep no manure heaps in their compounds.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

FABRIS.—On the 14th March, at Shanghai, Mrs. E. A. Fabris, of a daughter.

INNOCENT.—On the 3rd Feb., at Tientsin, the wife of the Rev. J. Innocent, of a son.

MARRIAGES.

COMBER—CHAMBERS.—On the 10th March, at Christ Church, Gowahatty, Assam, Bryan Eyre Coote Comber, Esq., son of the Rev. H. G. W. Comber, rector of Oswalkirk, Yorkshire, to Isabella Ewbank, daughter of the late Lieut.-Colonel R. E. Chambers, commanding 5th Bengal Light Cavalry.

BOREL—HUSKISSON.—On the 19th April, at the British Legation, at the Hague, Mons. William Borel, eldest son of Mons. Robert Borel, of the Hague, and of Ysson, near Paris, to Miss Mary Emily Milbanke, eldest daughter of His Excellency Sir John Ralph Milbanke Huskisson, Bart., British Minister in Holland.

NEWTON—NEWTON.—On the 20th March, at the Catholic Cathedral, Hong Kong, Alexander Newton, Manager of the Hong Kong and China Gas Company, to Kate, second daughter of George Newton, of Hammersmith, London. No cards.

RIDDELL—ARNOT.—On the 21st March, at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, R.N., Acting Colonial Chaplain, Walter Scott Riddell, Asiatic Bank Corporation, to Agnes, eldest daughter of the Rev. David Arnot, D.D., of the High Church, Edinburgh.

WHITE—REED.—On the 15th March, at St. John's Cathedral, Hong Kong, by the Rev. John Wilson, Acting Colonial Chaplain, John R. White, to Maria Reed, of Macao.

DEATHS.

BATE.—On the 9th of March, on board H.M.S. Melville, Daniel Bate (stoker), H.M.S. Adventure, aged 19 years.

THOROLD—On the 26th April, at Syston Park, Sir John Charles Thorold, Bart., in the 50th year of his age.

PETERSEN.—On the 12th March, at the Seamen's Hospital, Hong Kong, Hans Petersen.

TAX PAYERS AND TROOPS.

Under the above heading the *Hong Kong Evening Mail* has the following apt remarks on the benefits which really accrue to the colony in return for the unjustifiably heavy tax levied upon it for the support of its shamefully misused garrison :—

In accordance with our expressed intention, we proceed to make a few observations as to how this colony will be affected by the intended reduction of the troops stationed here. The difficulty of procuring anything like reliable information regarding military details has precluded us from doing so ere this; but, having taken much trouble to institute inquiries, we can vouch for the accuracy of the subjoined statements.

The point to which we will primarily advert must necessarily be that which most concerns the tax-payers of the place, namely, the annual contribution of £20,000 towards the cost of the garrison. That this demand in the first instance was most unjust we hope to prove below; but that its continuance hereafter would be iniquitous cannot be doubted. The fact of the Legislative Council having acceded to the demand is only to be accounted for by the pressure brought to bear by the Colonial-office on the official members thereof; for, if what is whispered be true, one of such holding a high Government position who had the honesty (or, as Downing-street would say, the audacity) to vote against it, has received a caution to be more submissive in future.

With these preliminary remarks we will proceed to lay before our readers a few facts as to how the troops stationed here are employed, defining as far as practicable the Imperial and colonial services. The principal duty of the troops here is to protect the public buildings and stores. To do this there are near a dozen guards, only two of which (those at Government-house and the Treasury) can be said to be for the benefit of the colony. The remainder, with one or two exceptions, are for purely Imperial purposes; such as the three or four mounted over the magazines and at the naval yards.

The above constituting the main duties of the troops, it will be perceived that the only advantage Hong Kong derives in exchange for its £20,000 per annum is (irrespective of the moral effect produced on the Chinese by their presence) that of two guards of a few men each. But as there are military establishments here in addition to soldiers, we must take into consideration the object for which they are maintained, which we do not hesitate to say are entirely Imperial. There is firstly the Major-General and his staff. This cannot by any process of argument be considered chargeable to our tax-payers, for he is commanding the troops in China and Japan, and were none of H. M.'s forces anywhere in these regions but here, no officer of such rank would be sent to command so small a garrison. There is next the Military Store Department, which would have to be kept up to almost its present strength were the whole of the troops withdrawn tomorrow, as it certainly has ten times as much work to do with the navy as with the army. And then there is the Commissariat, more Imperial than any of the others; for it is, so to speak, the agent of the British Treasury, through whom all its monetary transactions in China and Japan are conducted, and by whom all disbursements on account of it, for naval, diplomatic, and consular services are made.

We submit to our readers that we have proved most conclusively that the demand made by the Colonial-office for £20,000 a year was in the first instance most disproportionate, and therefore exorbitant, unjust, and in the manner of its enforcement arbitrary.

If such was the case when there were two regiments here, it will become

Digitized by Google

absolute dishonesty if the claim be persevered in after the reduction of the garrison.

There is one other point of very great moment to the colony which seems to have escaped the observation of everybody, and that is, how will the prospects of the Mint be affected by the withdrawal of the troops? That its success depends entirely on its security nobody will question; and that its situation affords none is proved by the piracy which recently took place under its very wall. Unless it is properly protected nobody will entrust dollars or specie to its care, and to assure that object it was originally intented to have had a captain's guard of some fifty men over it.

This arrangement cannot under present circumstances be carried out, and we hear that the building of the guard-house has been suspended. We should much like to know what is proposed to be done to meet the difficulty. The promised time for commencing operations is very near, and delay means loss of revenue. We do not believe that even a Hong Kong Government would propose to entrust the safety of the Mint to Hindoos and Lascars, and where Europeans are to be procured we cannot opine. So that we may as well prepare ourselves for the adjournment *sine die* of the opening of this much vaunted establishment. In conclusion we express a hope, that as the Legislative Council will meet on Tuesday, some independent member will procure for the community more exact intelligence on the various points mooted in this article, which so deeply interest every resident here, by requesting his Excellency the acting Governor in the first place to lay on the table a copy of the despatch received some mails ago, stating that one regiment was to be withdrawn, and then asking for information on the following subjects, viz., as to whether any intimation had been received of the intention of the Colonial-office to abandon or lessen its demand for a yearly contribution towards military expenses, whether any protest had been made against the reduction of the garrison, and, lastly, what steps it was proposed to take to protect the Mint.

HONG KONG AND SHANGHAI BANKING COMPANY.

An extraordinary meeting of the shareholders of the Hong Kong and Shanghai Banking Company was held as the company's offices, Wardley-house, Hong Kong, on Saturday, the 3rd of March. Present.—Messrs. Chomley, Sutherland, Heard, Lapraick, McLean, Nissen, Sassoon, Pallanjee Framjee, Landstein, Bosman, Meyer, Hauschild, Arnhold, Pollard, Smale, R. Pestonjee, Bourjau, A. Pestonjee, Menke. Rennie, Foster, Dr. Murray, Dr. Schetelig, Van Reesema, Groom, Von Bergen, Deetjen, Walker, J. Whyte, Taffs, Pattell, Deacon, Oomhalla, Kresser, Norouha, Turner, Hutchinson, Price, J. J. dos Remedios, Cox. Carvalho, Turing, Rozario, Diack, Ahlmann, Lambert, R. R. dos Remedios, Purdon, Moody, Hobson, J. Rustomjee, Schwemann, &c., &c.

The Honourable FRANCIS CHOMLEY presided as chairman, and the Honourable THOMAS SUTHERLAND as deputy-chairman.

The CHAIRMAN opened the proceedings by reading the circular published to the shareholders calling the present extraordinary meeting.

The DEPUTY-CHAIRMAN then rose and said that he had now to propose a resolution in regard to the capital of the bank, in conformity with the directors' circular dated the 26th February, which he would read to the meeting. It was to the following effect:—

"With reference to the notice of the 9th January, and the resolution passed in general meeting on the 12th inst. with regard to an increase of the capital of the bank, the directors now beg leave to intimate their intention of bringing forward the following proposal at the extraordinary meeting to be held on the 3rd proximo, viz.:—

"That the existing 20,000 shares of $250 each which constitute the capital of the bank shall be divided into 40,000 of $125. That of the latter 20,000 shares fully paid up shall be exchanged for the scrip held by the present shareholders, and that the remaining 20,000 shares on which a call of $25 per share will be made on the 1st July be offered at par to the present shareholders, rateably according to the number of shares held by each person.

"The directors considered that this proposed redistribution of shares will more fully meet the interests of shareholders at the present moment than would be done by an increase of the subscribed capital.

"By order of the court of directors.

(Signed) "V. KRESSER, Manager.

"Hong Kong, February 26, 1866."

Mr. SUTHERLAND said the proprietors had unanimously consented, at the general meeting, to suspend discussion on this point till the present moment. It would be observed that the proposal now before the meeting differed considerably from the directors' first announcement of their views with regard to increasing the capital of the bank, the reason of which simply was that the status of the bank had, since that time, been altered in very important respects. He had already explained, at the general meeting, what the views of the directors were in desiring to increase the capital. First, that the bank really required a larger amount to be paid up. Secondly, that it would be a desirable policy to widen their constituency. And thirdly, that the reserve or unpaid capital of the bank, being only $2,500,000, was held by the most competent authorities to be insufficient. On the last of these points he should explain that London bankers, and others from whom the bank had to receive very large credit, in order to carry on it operations properly, always looked to the amount of unpaid, rather than of paid capital, as the reserve from which to make good unforeseen losses. They had therefore been advised to increase their nominal capital to $10,000,000, only calling up actually such a very moderate amount of it as the bank really required for working.

Taking this and the other objects they had in view into consideration, the directors had intended to propose the issue of new capital to the extent of $2,500,000, which would have made the subscribed capital of the bank equal to $7,500,000. This they entertained under the impression that the bank would continue, for some time at least, under the Companies Ordinance of 1865. But before they could bring their proposals forward, the Secretary of State disallowed the operation of that act as far as concerns banks; while he, at the same time, offered to grant the Hong Kong and Shanghai Banking Company a distinct incorporation on terms which he (the speaker) trusted would prove even more advantageous than ordinary registration under the "limited liability" law. Of these conditions he would only say at present that they were under discussion, and any delay in completing the incorporation could only arise from the desire of the directors to secure the most favourable terms for the interests of the bank. One of the most prominent conditions of incorporation they however already knew, namely that the shareholders would have, as is usual with all chartered banks, to be answerable for twice the amount of subscribed capital. They would, therefore, be bound to the extent, not of five, but of ten millions of dollars.

This would fully meet the reserve of unpaid capital looked for from London and elsewhere; and it rendered the directors, therefore less anxious than they had been to issue new shares. In fact they felt that if they called for an additional $250,000 of subscribed capital, that the proprietors being then answerable to the extent of $15,000,000, their responsibility would be almost needlessly increased without any commensurate object. Of course the question of responsibility for such an amount was not one likely to occur practically, but it was as well to avoid it in any shape, beyond what was absolutely necessary. This then was the reason which induced the directors to vary their original proposals. The proprietors would understand that the primary reason for additional paid up capital continued in force. To carry on the business entrusted to the bank, the directors would require $500,000 additional paid up capital in the course of the present year. Comparing their business and their paid up capital with those of other Eastern banks, it would be seen that the latter was inadequate; and as the bank had to spread out in other directions than merely Hong Kong and Shanghai, in order to satisfy the wants of their constituents, a call on the shares or an issue of new stock was imminent. In recommending the former, the directors considered that there would be a great advantage in diminishing the nominal or subscribed value of the shares to half its present amount, and they therefore recommended that course. The subscribed share of $125 would be a far more manageable commodity than one of double the amount; and there would also be an advantage in having one class of shares fully paid up, and one with a smaller sum paid on them.

With regard to the extension of the proprietary, although the directors considered it a most desirable object, they did not, as they were not now recommending a fresh issue of capital, feel themselves justified in asking the existing shareholders to yield their claims in respect of any portion of the $5,000,000 which they had originally subscribed. Still if any of them felt inclined to reject the shares to be offered them under this proposal, the directors did not doubt their ability to allot those shares otherwise for the advantage of the bank. With these few explanatory remarks, he would beg leave to propose as follows:—

"That the existing 20,000 shares, $250 each, which constitute the capital of the bank, shall be divided into 40,000 of $125. That of the latter, 20,000 shares, fully paid up, shall be exchanged for the scrip held by the present shareholders; and that the remaining 20,000 shares, on which a call of $25 per share will be made on the 1st of July, be offered at par to the present shareholders, rateably according to the number of shares held by each person."

Mr. NISSEN rose to second the resolution, and the CHAIRMAN invited the shareholders to put any amendment they might think advisable.

Dr. MURRAY addressed the chairman with a view to know whether every shareholder, in return for his scrip, was entitled to one share fully paid up, and one share on which a call of $25 per share would be made in July next; and whether each holder of scrip would be at liberty to accept or refuse the share; and also whether the present shareholders would be entitled to claim any shares refused by others. He would beg to move, as an amendment, that all unappropriated shares be divided *pro rata* among the shareholders according to application, and that none should be offered to the public until the whole proprietary had refused to accept them.

The DEPUTY-CHAIRMAN said that he thought that very few shares, if any, would not be taken by the original shareholders, but that should any remain unallotted, the directors might be able to dispose of them at a premium. He thought that Dr. Murray's amendment would be better put in the form of a separate resolution if the main proposal was carried.

Dr. MURRAY agreed to this, and Mr. Sutherland's proposal being put, was unanimously carried.

Dr. MURRAY proposed, and Mr. BOSMAN seconded, a resolution to the effect that any surplus shares rejected by one set of proprietors should be tendered to the other shareholders.

Mr. WHYTE expressed his opinion that the directors were the best judges of what would be most advisable in the case referred to, and proposed, as an amendment to Dr. Murray's resolution, that the appropriation of any unalloted shares should be left entirely to the directors.

Mr. WALKER seconded the amendment, which being put to the meeting was carried by a large majority.

Mr. HEARD then rose and proposed that clauses 5, 6, 7, 8, 9, 23, 28, 42 and 55, all referring to the resolution passed, be expunged from the "Articles of Association," and the amended clauses be incorporated in their stead, and that No. 118 providing for the winding up of the company be struck out altogether.

Dr. MURRAY said that the question being of importance he would advise delay, that the attention of the shareholders might be drawn to the proposed new clauses.

After a few remarks from Mr. WHYTE, Mr. POLLARD, at the request of the Vice-Chairman, read the amended clauses illustrating that the alterations made were merely those made necessary by reason of the change in the number of shares, and that their bearing and character were unchanged.

Some remarks were made by a Shareholder to the effect that the 1st of July was too short a notice of a call, but Mr. POLLARD drew attention to the fact that shareholders must have agencies here to collect their dividends, &c., and that four months was ample to communicate with any part of the world.

At the conclusion of Mr. Pollard's remarks Mr. BOSMAN, seconded by Mr. RENNIE, proposed as an amendment to the original resolution that the maximum call be reduced from $50 to $25 per share, and the notice of call increased from one month to four months. This amendment was agreed to.

The amended clauses were then passed, and clause 118 was repealed.

The proceedings terminated with a vote of thanks to the chairman, manager, and directors, proposed by Mr. WHYTE.

LONDON, FRIDAY, MAY 4, 1866.

CHINA.

AT length, it seems, the Chinese have followed the example already set by their more enterprising neighbours, the Japanese, by sending a mission to Europe. At present, PING, the chief member of it, accompanied by Mr. HART, has arrived at Marseilles by the present mail, and the others will doubtless follow shortly under the care of Mr. WADE. This is a welcome event, for two reasons. In the first place, it entirely sets at rest all doubt regarding the security of Mr. HART'S position, which some ill-founded rumours lately represented as doubtful. The rumour alluded to came to us from China, where it certainly was current, having been given in more than one of the local papers, and mentioned in several private letters; we heartily rejoice, however, to learn that it was entirely without foundation. But the chief reason for gratulation is the good effect on the mutual relations between China and the Treaty Powers which must result from a party of intelligent officials visiting Europe under the guidance of two gentlemen so well versed in the Chinese language and Chinese diplomacy as Messrs. WADE and HART. No one doubts that the two visits of the Japanese Envoys to Europe have had a marked effect in promoting the development of amicable relations with their Government; and we have every reason to look confidently for an equally satisfactory result in the case of China. It is unfortunate that Prince KUNG cannot visit us himself; it is to be hoped, however, that an able and intelligent representative has been selected.

CHINA STEAMSHIP AND LABUAN COAL COMPANY.

A PANIC is a most unaccountable thing, and when it has once set in will generally run its course somewhat after the fashion of a rabid dog, doing senseless and causeless injury to all that comes in its way. All attempts to check it are futile; but an effort may be made to confine it to a certain channel, and this has been to some extent accomplished in the case of the late panic in finance shares, which, while ruinously depreciating all property of that description, was for a long while prevented from inflicting any serious injury on other branches of trade. Latterly, however, the feeling of insecurity seems to have diffused itself over a wider range, and shares in many first-rate banks and public companies have been unduly depressed. In a certain degree, this must of course be looked for as one of the results of any financial crisis; and it is unfortunate that at such a time shareholders should be so eager to publish their dissatisfaction at any temporary reverse, and to pour out a storm of indignation upon their directors and managers when they experience a lack of prosperity arising from untoward circumstances entirely beyond their control.

At the adjourned meeting of the China Steamship and Labuan Coal Company, held on the 30th ultimo (minutes of which, together with the directors' report, we publish in another column), a number of the shareholders present vented their discontent at the absence of an immediate dividend with unusual vehemence; forgetting that the effect of this unreasoning disparagement of their own property was equivalent to what a homely aphorism terms "cutting off one's nose to spite one's face." The Chairman was assailed by a perfect storm of complaints because the ships first acquired by the company had to be resold; because a dividend of 20 per cent. had not been declared (!); because there was a heavy arrear on the first call; because the shares were not at a premium; and because, in fact, everything was not *couleur de rose*. The Chairman, whose courteous bearing under very trying circumstances was deserving of all praise, was at last permitted to explain that it was quite as possible to sell steamers at a profit as at a loss; that as the company had only got fairly to work in the middle of the year, there had really been no time to make a profit out of which a dividend could be declared; that the arrears of the first call were being collected (by the way, it does not seem to have struck these shareholders that the non-payment of calls was a default on the part of a portion of their own body, and not a fault of the directors); and, with regard to the present depreciation in the value of the shares, the Chairman wisely counselled that virtue which will have to be largely exercised by shareholders in other companies besides their own—patience. A gentleman having sensibly pointed out that the course adopted by the dissatisfied shareholders in "bullying" the directors did more harm to their own property than anything else, a threatened vote of want of confidence—which must, if carried, have exercised a disastrous effect on the interests of the company—was averted, and the report was finally adopted.

In reality, the prospects of the company are excellent. It is admitted on all hands that neither of the companies as they separately existed achieved any success, but from the amalgamation of them the best results were, and are, confidently anticipated. With enlarged facilities at their head-quarters in Labuan; ready access to numerous profitable markets; new and important sources of revenue in timber, petroleum, and coal oil, the operations of the company will necessarily become very extensive and proportionately remunerative. The amalgamation having been so recently effected, some little time must yet elapse before the resources of the company can be fully developed. That the next annual report will be of a more encouraging nature there can be little doubt, if the shareholders will in the meantime be patient and "pull together."

THE BISHOPRIC OF VICTORIA.

AT the monthly meeting of the board of incorporated members of the Society for the Propagation of the Gospel in Foreign Parts, held in March, a notice was given by the Rev. W. DENTON of a resolution to be adopted by the society to present a respectful address to his Grace the Archbishop of CANTERBURY, calling his attention to the injurious effects to the English Church in China caused by the long delay in filling up the vacant bishopric of Victoria.

At the April meeting of the board, held on the 20th ultimo, it was stated that the standing committee of the society, at its weekly meeting, had adopted the proposal in concurrence with the recommendation of Bishop SMITH, one of the Vice-Presidents of the society and an ex-officio member of the standing committee; at whose suggestions a few slight verbal alterations were made in the wording of the resolution, as finally adopted by the monthly board. An address in accordance therewith is to be presented to his Grace, as the President of the society.

It will be seen from the reply of the SECRETARY of STATE for the COLONIES to Mr. SELWYN'S question in the House of Commons on the 24th ult., that the long-promised general legislative measure for the regulation of the Colonial Church and Episcopate is to be introduced at an early period. It is expected that the vacant bishopric of Victoria will thus soon be filled by a new appointment.

THE HONG KONG VOLUNTEERS.

By last mail there was sent out by this corps through their late commandant, Major Brine, R. E., a sword of honour for presentation to the Governor of Macao, and an ink-stand for the Municipal Chamber. Messrs. Wilkinson and Son, 27, Pall-mall, made the former, and Messrs. Page, Keene and Page, of Plymouth the latter.

The inscriptions were:—

"Presented to his Excellency J. R. COELHO DO AMARAL, Governor of Macao, Minister Plenipotentiary of his Portuguese Majesty in China, Japan and Siam, by the Hong Kong Volunteers, as a tribute of respect for the kind reception given them by

Digitized by Google

his Excellency, on the occasion of their visit to Macao, on the 19th to 21st of November, 1864."

"Presented to the Municipal Chamber of Macao, by the Hong Kong Volunteers, as a tribute of respect for the kind reception given them on the occasion of their visit to Macao, 17th to 21st November, 1864."

Considering that the Hong Kong Volunteers subscribe annually to the National Rifle Association funds, that the China Volunteers last year gave a 500 guinea cup for annual competition at Wimbledon by the Home Volunteers, and some Hong Kong friends gave a 100 guinea cup last year also to Lord ELCHO, for the London Scottish Volunteers, our colonial volunteers cannot be called illiberal.

THE ANNUAL CHINA DINNER.

Amongst the names already as down intending to be present we notice Sir John Davis, Bart., K.C.B., the Chairman, Major Frederic Brine, R.E., the Honorary Secretary, late commanding Hong Kong Volunteers, Lord Richard Grosvenor, M.P., Sir James Matheson, Bart., M.P., Lieut.-General Sir Hope Grant, G.C.B., late Commanding in Chief in China, Sir Henry Keppel, K.C.B., Chairman last year, Sir John Bowring, late Governor of Hong Kong, Sir Macdonald Stephenson, Col. Caine, late Lieut.-Governor of Hong Kong, Mr. Montgomery Martin, Messrs. P. Robinson, M.P., James White, M.P., Arthur Smith, Holliday, Braine, Silverlock, Brown, Johnston, Rawling, Broughall, Dr. McSwiney, R.N., Colonel Sargent, C.B., Commanding Inns of Court Volunteers, Lieut.-Col. Greaves, late Commanding Canton Volunteers, Mr. Potter, &c., &c. On the whole, there is reason to believe that there will be a larger gathering of influential persons connected with China and Japan than last year; and that the annual China Dinner will become an important institution

THE "CONSTANCE" AND "OTENTOSAMA."

The following letter was accidentally omitted in our last issue :—

(To the Editor of *The London and China Telegraph.*)

SIR,—We take leave to correct a mistake in your impression of the 5th April. The *Otentosama* is a *twin* screw, and is fitted with engines of the ordinary construction. H.M.S. *Constance* has *one* screw, and is fitted with our patent compound expansive engines, and has in addition surface condensers and superheaters. The object of this construction and these appliances is to economise fuel to the greatest possible extent.—We are, Sir, yours truly, RANDOLPH, ELDER, and Co.

THE CHINESE MISSION TO EUROPE.

(PALL MALL GAZETTE.)

There is truth, we are glad to learn, in the report, on which doubt has been thrown by the Hong Kong journals, that the Chinese Government is on the point of sending a mission to Europe. So great and unexpected a departure from "old custom" might well be received with a little incredulity, and the "Brother of the Sun," as the Celestial Emperor has been called in Europe (not in China), has not yet got the length of accrediting envoys to Her Majesty the Queen; but he is so far departing from all precedent as to send an unofficial mission to Europe. It is to be composed of two mandarins, one of whom is a member of the Chinese Foreign-office, and the other secretary to one of the six boards; and it will be accompanied by several students, who have been selected from the Chinese Foreign School at Peking. This arrangement, which was suggested to Prince Kung by Mr. Hart, the head of the Maritime Customs, has been approved of in an Imperial decree, and was about to be formally notified to all the treaty Ministers for the information of their Governments. The officials are not to be accredited in the ordinary international way to European Courts, and are coming simply to see what is to be seen in London, Paris, St. Petersburg, Copenhagen, and Berlin, and to take notes. They will be accompanied by a French and by an English interpreter, both belonging to the Customs, and it is probable that the students will make a prolonged stay in this part of the world.

This appears really a great step in advance, when we consider how careful the Chinese Government has always been to guard itself from the admission that it could possibly learn anything from foreign nations and how closely a contrary pretension has been bound up with the very theory of that Government. Though the Chinese are a remarkably literary people, and their mandarins are officially literati, they have up till now shown no desire to make themselves acquainted with foreign languages, literatures, ideas, and customs, and have adhered to the notion that their own writings contain the *ne plus ultra* of wisdom. Only a few "linguists," shopkeepers, and servants have, for purposes of immediate gain, learned to talk the barbarous dialect called "Pidgin English," which consists of a very limited number of English words, mingled with a few of Portuguese, and two or three of Arabic, elongated and softened by Chinese pronunciation, and used in accordance with Chinese idiom in such a wonderful manner that new comers from England not unfrequently fancy, on first hearing it, that they are listening to the ting tong of real Chinese. It is said in the histories of China that so early as B.C. 2000 foreign ambassadors paid their respects to that highly favoured country, and since that period numerous embassies have been sent to it from various parts of the world; but the only missions sent *from* China, of which we have been able to find any trace, were two informal ones, like the present, despatched to Manila by the Celestial Emperor in the year A.D. 1603 to ascertain the truth of a rumour that the port of Cavité was formed of gold, and to inquire into a massacre of Chinese who had been living in the Philippines. The present mission from Peking may be a small matter in itself, but it helps to show that the Government there is beginning to step out in the right direction, and is preparing to enter the comity of nations.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED).

The adjourned general meeting of the shareholders in this company was held on the 30th ult. at the London Tavern; Sir J. ELPHINSTONE, Bart., in the chair.

Upon the usual proposition of the chairman to have the report taken as read, a shareholder objected, and several complaints were made that the reports had not been sent out early enough to be of practical use to shareholders living at a distance.

The CHAIRMAN explained that the publication of the reports had waited upon the arrival of the Indian mail, and that it was impossible to get them prepared until the middle of last week.

The report, which we publish below, was then taken as read.

The CHAIRMAN, taking up each point in the report, and enlarging upon it, moved its adoption.

Two or three shareholders rose at once to ask questions, and the meeting decided to hear them in preference to Mr. Morel, whom the chairman wished to speak. Various questions were asked and complaints made because the ships which in the prospectus were described as well fitted for the service had now to be sold as worthless; because a dividend of 20 per cent. had not been declared; because the balance-sheet showed a loss of £30,000 and no gains; because the company's property, assets and prospects, had not been sufficiently described; and because there was a heavy arrear on the first call. One shareholder pointed out that although there was cause for much complaint in the past, the word of the hon. baronet in the chair ought to be a guarantee as to the future. It should be remembered that to come there and "bully and blackguard" the directors injured their own property as much as anything else.

More than a dozen shareholders, whose names did not transpire, denounced the report as highly unsatisfactory, and the chief portion of an hour was spent in asking questions, in reply to which,

The CHAIRMAN said as to what had been asked respecting the cost of forming and bringing out the company, the company was brought out under the auspices of the Credit Foncier, who it was well known did not do things for nothing. (Laughter.)

Several SHAREHOLDERS: State the amount.

The CHAIRMAN said any shareholder who chose to apply to the proper quarter might obtain further details, but they ought not to be given at a public meeting. ("Oh, Oh," "Tell us now," "Be honest," &c.) He begged respectfully to ask the meeting to accept this as his decision. (Renewed uproar, during which one gentleman moved the instantaneous adjournment of the meeting, and another charged the chairman with being afraid to tell the truth.) No loss, but on the contrary, a profit, was anticipated from the sale of ships. Details as to the profit and loss account might be obtained at the company's office. As to the low state of the shares, if shareholders would only exercise patience they would have no reason to complain. (Laughter.) The remuneration to directors had been fixed at about £250 each. The board thought they could see their way to meet all liabilities coming due without making further calls. They were pressing for various arrears of calls, and had no doubt upon being able to get them without trouble.

A SHAREHOLDER said the information as to remuneration of directors had taken a good many gentlemen by surprise, especially as it was stated at the former meeting that none was to be allowed.

The CHAIRMAN explained that the statement made upon that point at the former meeting related only to the Labuan Coal Company.

Mr. MILLER, M.P., said he was for many years a director in that company without receiving any remuneration.

Mr. PRICE, the manager, said that there was every ground to calculate that the Labuan mines would from this time yield at the rate of 30 000 tons of steam coal per year, at 25s. per ton, making an income of £37,500. As the expenses in Labuan were but £12,000, there was nothing to prevent the difference being absolute profit to the company. As to the ships, the revival of freights which had been so long expected had already begun, and this company had a collateral security against loss which other shipowners had not in consequence of their being possessors of coal mines as well as ships.

Mr. MOREL, the surveyor, said if the yield of coal came up to the expectations, the railway he had surveyed would pay 6 per cent. The difficulty of getting the coal from the mine to the harbour was the chief obstacle to be overcome, and that would be met by the railway. The quality of coal was equal to English cannel, and he had heard it spoken very highly of by eminent engineer officers who had visited the island. Petroleum in Labuan was no doubt very plentiful. The railway would run through the very heart of the jungle which abounded with valuable camphor wood, so that the means of communication were close by the sources whence the supplies of petroleum and wood would be derived.

The SOLICITOR of the company, in reply to various references which had been made to the difference between the prospectus and the report, said it might satisfy some gentlemen to know that some shareholders who were proceeded against endeavoured to evade payment by trying to raise the plea of a fraudulent prospectus. Their solicitors, however, proved to them that there was not the slightest ground for such a plea, and the result was the whole money and costs had to be paid. The statement of accounts was all that the company was bound by its articles to supply, and indeed as much as it was prudent to give.

Two amendments were proposed. The first was to adjourn the meeting to give the directors an opportunity of reconsidering the report; and the second was "That the report be referred back to the directors for amendment, also that a committee of shareholders be appointed to investigate the affairs of the company, especially with a view to consider the nature and value of the company."

Digitized by Google

The CHAIRMAN said it might save the time of the meeting to state that he had sufficient proxies to defeat these amendments, which the board would look upon as motions of no confidence.

By the wish of the meeting the amendments were then withdrawn, and the report was unanimously adopted.

The auditors, Messrs. Harding, Pullein and Co., were reappointed.

A vote of thanks to the chairman for his courtesy concluded the meeting.

REPORT.

The directors have now to submit to the shareholders the accounts of the company made up to the 31st December, 1865.

SHIPPING.

Though the company was formally established in February last, from the necessary delays attendant on arranging and uniting the establishments of the two old companies, and selecting a competent superintendent, it was not until the middle of the year that the company actually could get to work, and not until August that Mr. Pitman could arrive in China. Hence it is that your board are unable to show in the accounts now presented the effects of supplying the company's ships with Labuan coal, which will of course materially reduce their working expenses.

Mr. Pitman, the new marine superintendent of the company, since his arrival in China, has been most satisfactorily engaged in reducing the expenditure and making arrangements for the extension and effective working of the shipping trade of the company, by opening up relations with new ports, in addition to those usually visited by your vessels. In accordance with his advice, as well as that of the company's agents, your board have decided to sell the *Vulcan*, *Teen Chang*, and *Titan*, and to replace them by vessels similar to the *Mona*, which experience has shown to be well suited for the company's trade in the China Seas and the Straits of Malacca.

The *Andromeda*, a teak frigate purchased from Her Majesty's Government in 1864, has been fitted out, and proceeds immediately with a good freight to Hong Kong, where she will act as receiving ship and coal depot for the service of the company, effecting a large saving in house and store rent, as well as landing and shipping charges of every description.

LABUAN.

With respect to this important branch of the company's business, your board have the pleasure to report as follows:—

LEASE.—Her Majesty's Government having fully satisfied themselves of the ability of the company to develop the resources of the island, and taking into consideration the large sums already expended by them in opening out the coalfield, have at length granted the company, on most favourable terms, a lease, conferring extensive and valuable rights, in addition to the coal: namely, of raising petroleum, cutting timber, and working the other marketable products of Labaun, as well as a large concession of land. This secures the local position of the company, and will enable your board to carry out their views for the production of coal oil and petroleum, the sale of wood, and the settlement of emigrants, which they could not fully undertake with safety until the security of a lease had been obtained.

WORKS AT COAL POINT.—The works at Coal Point consist of the A pit, 45 fathoms deep, with adits and other workings, winning a very considerable coalfield, and capable, with a full supply of labour, of producing 200 tons of coal and upwards daily; also a second pit, called the B pit, in course of sinking, which has made considerable progress. This latter shaft will be 90 fathoms deep, and will win as much coal as the company can work for some years. (Mr. Sinclair estimates above a million of tons, exclusive of the field already won.)

The company at the outset suffered from two causes neither of which is now in operation, but both were equally prejudicial to their interests. First, the effects of the American war, which induced ships seeking cotton cargoes to take out coals from this country at nominal freights; and, secondly, the persistent depreciation of the Labuan, by interested parties who were engaged in the disposal of English, coal. The statements and reports circulated respecting the quality and properties of Labuan coal, though perfectly groundless, were nevertheless most damaging. And it was only by the most energetic conduct in the first instance of Mr. Price, during his mission to China, and subsequently on the part of Mr. Pitman, that they were completely and satisfactorily disproved. Labuan coal has now taken its place on a footing with the best English coal in the markets of China and Singapore, and is in demand at remunerative prices.

MR. SINCLAIR.—Mr. Edward Sinclair, the manager at Labuan, who had resigned his appointment, has since entirely recovered his health and returned last month under a new agreement, taking his family with him. The board look to the results of his superintendence with great confidence.

PETROLEUM.—The directors were of opinion, from various indications in the coal field at Labuan, that the existence of petroleum springs there was extremely probable, the more so as they had found by experiment that the coal contains a large portion of the products to which petroleum is nearly allied. They therefore instructed Mr. Morel, a civil engineer of experience, who proceeded to Labuan to survey the country for the proposed railway, to inspect those places where it was probable the oil might be found. He returned lately, and reports springs to exist in three places in large quantities, and his report is fully confirmed by Mr. Pitman, Mr. Fenwick, acting superintendent, and Dr. Coulthard, the resident medical officer.

COAL OIL.—In consequence of the success of the experiments as to the oil-producing qualities of the coal, reported to the last meeting, the directors have ordered twelve retorts, which will be sent out immediately, to distil oil from the small coal, which has not been hitherto utilised. This is very important, as the result of native labour is that a large percentage of the coal sent to bank is too small for shipping purpose. A person experienced in the manufacture of oil and other products from coal and shale goes out with these retorts, and it may be noticed here that the most valuable shale for this purpose exists in enormous quantities in Labuan, no less than 15 fathoms of it being in the strata through which the A pit is sunk.

TIMBER.—The island of Labuan is covered with forest consisting of many sorts of marketable woods, of which the camphor tree and others grow to great size, and command high prices in the China market. The new lease empowers the company to fell this timber; and the wood which it will be necessary to cut on the line of the railway alone will meet a considerable portion of the cost of that undertaking. Mr. Sinclair has been directed to develop this branch of the property, and the directors look upon the result as a valuable additiont to the future income of the company.

RAILWAY.—The present mode of shipping coal is by lighters filled at a jetty and taken alongside vessels loading in the roadstead at the north end of the island, contiguous to the pits. During the spring and summer this mode only involves delay and breakage, but the inconvenience is very severely felt in the autumn and winter during the prevalence of the north-east monsoon, when it is sometimes impossible, for three weeks at a time, to get lighters alongside, and then not without wetting the coal, which causes it to heat. On this account more than one cargo has been rejected. At the south end of the island, and seven miles distant from the present workings, is the capital of the island and seat of Government, called Victoria, with a fine harbour of safe and easy access, perfectly sheltered from all winds, with 30 feet of water within 200 feet of the shore. As the produce of coal increases, a tramway to this point will become of absolute necessity. In September last, therefore, Mr. Morel was sent out to survey the line and estimate the expense of constructing a tramway to Victoria capable of discharging the coal into the ships, thereby saving all delay as well as the damage from water and breakage. The directors have to report that this survey has been made in a space of time which does the highest credit to Mr. Morel's activity, energy, and ability. He reports that there is no difficulty whatever, and that the whole works, including jetty and rolling stock, can be completed for £27,000. His plans, sections, and estimate are before the board, and they will lose no time in arranging to carry out the works. The Government have conceded 650 acres of land per mile of railway to the company, which will be cleared and settled as the work progresses.

LABOUR.—This question has been the cause of much anxiety, but as soon as the heads of agreement were settled with the Government, the directors at once proceeded to obtain emigrants to place on the company's lands. The first body, consisting of 100 families, have landed at Labuan, where houses had been provided for them, and they will now be regularly followed by others, which will obviate all difficulty on the score of labour; and as these people are most frugal and industrious, they will assist the revenue of the company by occupying and leasing their lands.

BORNEO.—In addition to the company's lease in the island of Labuan, they hold a charter from the Sultan of Borneo of the right of mining coal in a district extending from Minkabong to Tanjong Barram, a distance of 120 miles. The company's superintendent has concluded an agreement with the Sultan, by which he has granted the free navigation of the Bruni river to the vessels of the company, a most valuable concession, as the tonnage duties to other vessels of one dollar a ton operate as a bar to all commerce.

The directors look forward with much confidence to the results of these arrangements.

The disposal of those ships which are least suited for the trade, and their replacement by others, the increased productive power of the mines, the enhanced price of coal, as well as the new sources of revenue to be expected from petroleum, lubricating oil, wood, and land, all combine to place the position of the company on a footing it has never reached before; and placing this report so fully before the shareholders of the company, the directors can only conclude by expressing their undiminished confidence in the value of the property, and their opinion that no circumstances with which they are at present acquainted are likely to interfere with the prospect of earning a satisfactory dividend when the proposed works shall have been carried out.—By order of the board of directors,

J. D. H. ELPHINSTONE.

MARKED BY SMALL-POX.

The following letter from Major Brine embodies some valuable information on the influence of light in aggravating the effects of this disease:—

SIR,—Since the year 1849, when I was first quartered in Ireland, I have given this "most dreadful scourge" a great deal of consideration, and have carefully watched its results in the East and West Indies, Turkey, China, Japan, and at home.

The numerous comparisons I have made on the subject with the natives of those parts, as also with our own soldiers and sailors, have all impressed me with the idea that light tends to mark the patient. Air is highly necessary, but light should, as far as possible, be avoided, if only by the use of yellow blinds. As a rule, it has been my observation that our soldiers are more marked than our sailors, which I attribute to the absence of great light between decks in our ships; although sailors, especially in the mercantile marine, are more frequently attacked. This latter circumstance arises from their being more crowded, their frequenting a larger number of foreign ports, and their irregularity of living when there, all of which causes render them more susceptible to the disease.

Now, I have always noticed, and I think your readers will, on reflection, find they have noticed also, that those patients most exposed to light are the most often marked. Again, the face is always more marked than the body, which may be accounted for by the previous action of light, and the fact of the body being kept covered, after making every allowance for the natural inclination of patients, particularly women, to feel their faces. For the prevention of this, looking-glasses often are moved out of reach, and masks are fortunately sometimes resorted to. In tropical countries Europeans are always more disfigured than the natives, also more than they would be in colder latitudes, which, again, may be attributed to the action of the sun, and likewise to the propensity of Europeans in great heat to throw aside their bed clothing. Generally, I dare say that clergymen who visit small-pox wards or cases would bear me out in remarking that the patients in the beds most exposed to the light are the most marked.

A year ago, when I was attacked by small-pox in China, I made various experiments on myself, and the result was that the parts of the body most carefully concealed from the light were the least marked. Lately, I have made trial on a few other cases of small-pox; some of the patients to

Digitized by Google

whom both air and light were allowed were slightly, and one badly marked; none of those from whom light was excluded were marked at all. At the famous French hospital of St. Louis, for skin-diseases, it was declared that when the hospital became over-crowded those patients placed in the cells fared the best.

The present system, as pursued by private medical practitioners, of causticising the face and painting with collodion, helps to exclude light, and thereby reduce inflammation; so does oiling the face, as practised at the Smallpox Hospital at Highgate, although there the light is not excluded, nor are masks employed. Mr. Marson, the resident surgeon of that institution, and who during the twenty-eight years of his residence there has had 15,000 cases of small-pox through his hands, told me that he could only attribute the circumstance of the extremities, viz., the face and hands, suffering so severely, to their having been previously so much exposed to the light and air. It is a peculiarity also that the hands of persons who use soda in large quantities, as potmen and laundresses, bear terrible traces. Although medical men know pretty well when a patient will be badly marked, still no average amongst the attacked can be calculated, as so many persons become gradually marked after recovery. This, I think, is attributable to the subsequent effects of their being exposed at too early a stage to the light. Whilst I am on this point allow me to draw attention to the total absence of a convalescent hospital for small-pox patients. The result of this omission in our charities is that the patients are too soon turned into the streets, thereby being hastily exposed to the rays of the sun, to say nothing of their spreading the disease broadcast in our towns. Why—if infection is not dreaded at that stage of their recovery, why do other convalescent hospitals refuse, as they at present do, to take them in? As a broad principle, fair people are marked more than dark—white races more than black—although the latter suffer the most fatally from the disease—as Jamaica, the West Indies, and the Coast of Africa, where small-pox rages often in a most malignant form. In England, at the worst, it is always of a modified character. Sir James Gibson, Director-general of the Army Medical Department, informs me that no experiment on the subject of light in its influence on small-pox has ever been made, and, further, that no means exist of making any; Mr. Marson also says that he is unaware of any trial. Yet Professor Owen, Dr. Bruce Jones, Dr. Kirk, of the Zambesi expedition; Dr. Protheroe Smith, Mr. Nunn, and Mr. Du Chaillu (lately returned from the equatorial region of West Africa owing to the fatal ravages of this dire disease), with all of whom I have recently communicated, are of opinion that the theory is well worthy of experiment.

Hence my troubling you to try and bring this about, also to advocate a convalescent hospital for small-pox patients. The former can do no harm, and the latter cannot fail to produce most beneficial results.—I am, &c., FREDERIC BRINE, Major Royal Engineers.

THE MORTALITY AT HONG KONG.

(PALL MALL GAZETTE.)

There is a remarkable contrast, which can hardly fail to strike even the most superficial observer, between the care taken of our troops in India and the utter neglect, if not worse than neglect—the deliberate and invidious parsimony—which is displayed by the War Office in regard to our soldiers in China. In the former instance we find the health of the men made the subject of elaborate medical reports; the doctors are consulted as to how they should be lodged, and what they should have to eat and drink, and their advice is carried out at a large, but undoubtedly a wise and economical expense. In the new barracks there is an ample supply of pure air, light, and water; provision is made for gymnastics and other recreations; good beer and light French wines are offered at the canteen, instead of the inflaming rum and arrack; and there is even talk of furnishing the luxury of ice. But directly we pass beyond a certain mysterious line to the further East, we find almost all traces of care and consideration for the health and well-being of the soldiers suddenly disappear. We are exceedingly liberal when we are spending Indian money; but it is quite different when we have to pay anything out of our own pockets. The sanitary conditions of the situation in which the troops are posted are apparently ignored. If doctors send in reports, they are left unread. If generals remonstrate, their remonstrances are unheeded. Troops are despatched to China without any arrangements being made for their accommodation when they reach the end of their voyage. They are huddled anywhere, in warehouses and "go-downs" hired for the occasion. When disease begins to play havoc in their ranks, no relief is sent to diminish the burden of their duties; and overwork steps in to aid the too active pestilence in reducing the garrison to the mere skeleton of itself. Even then a shrewd clerk in Pall Mall sees a chance of saving some paltry £50 a year by stopping the issue of umbrellas to orderlies and others, and the poor fellows, already exhausted by double duty, are left to trudge about unsheltered in the sultry heat. The saving which the War Office hoped to gain by withdrawing the Indian soldiers from Hong Kong, and forming a garrison exclusively of Europeans, was, no doubt, more considerable; but when the Chancellor of the Exchequer comes to pay the bill for sending home the sick, and the War Office count up the able-bodied soldiers they have lost, at a time when soldiers are so scarce, the economy will be found to have been really a ruinous extravagance. The 2nd battalion of the 11th Regiment lost 42 per cent. of its entire number in less than nine months at Hong Kong. The 2nd battalion of the 9th also suffered severely. Altogether, some 150 soldiers have died, to say nothing of women and children, and men sent home with shattered constitutions. About £5,000 was saved in the first instance by the removal of the native Indian regiments, as the pay of the English troops was then reduced from the Indian to the colonial standard. But not less than between £30,000 and £50,000 has been swallowed up in the expenses caused by the sickness and mortality of the troops consequent on this change in the garrison.

A select committee of the House of Commons is to investigate this subject, and we have no desire to anticipate or to prejudice their report. We should like, however, to see the inquiry as searching and impartial as possible. The War Office is sure to take care of itself, but there is some risk that officers at a distance may be made to feel the truth of the proverb, "Les absents ont toujours tort." We shall therefore venture to suggest one or two points which the committee ought not to overlook. Lord Hartington, in the debate on Colonel North's motion for a committee, endeavoured to throw the blame on the local military authorities. But there is a discrepancy between this charge and the official correspondence. On November 12, 1864, General Guy writes to the War Office:—

"There will then remain no available accommodation for troops in this command, except the barracks and huts at Hong Kong and Kowloon, which will be absolutely required for the 2nd battalion of the 9th Regiment, their families, and those of the 8th battery 2nd brigade R.A. I would therefore request your lordship's instructions as to the disposal of the 2nd battalion of the 11th, which, by the Horse Guards letter of the 26th of August last, it is proposed to send to China, as under existing circumstances it will be impossible to provide for it in this country."

In reply to this despatch Lord de Grey disclosed his plan of providing accommodation. It was proposed to make room for the 11th by sending away the Indian regiments. But the War Office ought to have been perfectly aware that accommodation which is quite sufficient for native troops is totally unfit for European troops. The General, however, seems to have felt himself fettered by the emphatic orders as to economy; and hence the inadequate accommodation provided for the English troops. The state of the hospitals has been compared, by those who had witnessed both, to the hospitals of Scutari, and yet, such as they were, the cost of hire was £13,158. When General Guy informs Lord de Grey that he has sent away the Indian regiments, and again points out the impossibility, under existing circumstances, of providing for the 11th in China till additional accommodation be prepared for a second regiment at Hong Kong, Lord de Grey answers, "Well, then, send them to Yokohama." General Guy's reply is, "I cannot do this, for I must leave all but about 150 men at Hong Kong and Kowloon, for the withdrawal of the native regiments renders their presence absolutely necessary for the performance of the garrison duties." Lord de Grey in other despatches harps on his having given permission for the removal of the 11th to Japan, always forgetting that, as he had withdrawn the native regiments from Hong Kong and Kowloon, the 11th was wanted there. But here is the focus of the correspondence.

On April 8, 1865, General Guy encloses a medical report to Lord de Grey, and urges that it affords matter for—

"Serious consideration, both in a financial and a sanitary point of view, as to the expediency of substituting a regiment of Native Infantry from India for one of the two regiments of the line in the China command;" and adds, "I am of opinion that many of the duties which soldiers are called upon to perform in this climate should be done by native troops, with a view to preserve as far as possible the health and efficiency of British soldiers, and at the same time to diminish the great expense attending on replacing the casualties in a regiment of the line in such a climate as China."

Lord de Grey, however, while concurring as regards the interest which attaches to the results exhibited in this report, was not prepared to sanction the substitution of native for European troops as suggested, and on October 31 General Guy returns to the charge:—

"I would, in conclusion, request your lordship's attention to the often expressed opinion of the medical officers who have served in China, viz., that the presence of a native battalion for the performance of garrison duty during the invariably unhealthy summer season at Hong Kong is absolutely essential for the preservation of the lives and health of the European troops."

In No. 32, p. 31, the same fact is twice repeated, as the "result of a consultation with the senior medical officers."

Next, H.R.H. the Commander-in-Chief steps in and remonstrates with the War Office, bringing forward the necessity of native troops, "at least two native corps, in addition to one European regiment," and suggesting the foundation of a local corps in China. On January 4, 1866, his Royal Highness again urges "the necessity of the garrison being reinforced by native troops as a measure of the utmost importance."

In answer to all these urgent appeals, Lord de Grey at last hits upon the expedient of sending to Hong Kong "a portion of the Ceylon Rifle Regiment" (who do not receive Indian allowances). In No. 52, p. 46, his Royal Highness points out serious objections to this proposal, and then, after waiting ten days, addresses a strong and peremptory letter to War Office. But in the meanwhile the mischief was being done. A whole year was wasted in a red-tape controversy, and on the 30th of June, just when the tragedy was culminating at Hong Kong, the War Office gave a flat refusal to the oft-repeated request for native troops.

TEA.

(TRAVERS' CIRCULAR.)

With the exception of the Indian tea sales, held on the 26th April, it can hardly be said that there has been any market during the week. Merchants evince little disposition to sell at present prices, and most of the principal brokers have for the time withdrawn the teas they had on show, so that there is little or no tea offering, and the few who are willing to buy have to seek for what they require instead of having, as is commonly the case, numerous samples forced upon their notice. As the time for the publication of the Budget is announced, the state of uncertainty which has produced this stagnation will soon be removed, and it will then be seen whether the anticipations of those who look for a general rise will be realised, or whether the improvement will be confined to the resumption, on the usual scale, of a partially interrupted trade. The amount of business done in the market is usually accepted as a fair criterion of the country demand for the time being, whether with justice or not is doubtful, but the rule certainly does not appear to hold good on this occasion; from our own observation we are led to the conclusion that the retail trade have bought about an average quantity during the week, whilst the wholesale dealers have certainly held their hands. As this is not the first time this year that we have observed a discrepancy between the purchases of the wholesale and those of the retail trade, at the same period, we are somewhat inclined to doubt the soundness of the conclusion that a rise must be expected because the stocks held by the retail trade are low. The unadvisability of holding heavy stocks of tea has been probably made apparent to the retail trade as much from the recent agitation of the question

Digitized by Google

of their liability in case of fire, as from the dearness of money; but both these causes, and a perception of the economy effected by short stocks, have tended to decrease the purchases in anticipation of wants by most retail grocers; and we are glad to observe that the practice of purchasing in a quiet, in preference to an excited market, is gaining ground; indeed, if all were agreed on the propriety of purchases for immediate wants only, less fluctuations of price would take place in the tea market, and a greater evenness of value would result, such as would not fail to check those violent changes which are in the long run very doubtful benefits, even to those who profit most largely by them.

Nearly 3,000 packages of Indian tea were offered at public sale. The prices obtained were in most instances about 2d. per lb. lower, except for the finer kinds, and the quality was unsatisfactory. Green teas have been most in demand in the private market, but to effect sales lower prices have in some instances been accepted; uncoloured Japans and Souchongs, from 1s. 9d. to 2s. 4d., have also been taken to some extent for export. For other descriptions there is scarcely any inquiry, and very little business has been transacted. The *Cambalu*, from Foo-chow, is the only arrival reported since our last. About 7,000 packages of China tea are advertised for sale, and the larger proportion will be offered without reserve. The market price of Common Congou is 1s. per lb. Broken leaf cannot be bought under 8½d. per lb.

The most important intelligence that we have received from the Chinese mails, just arrived, differs materially from all that we have been in the habit of receiving of late from the same quarter, in that the news conveyed at the present time is of a highly satisfactory character. It appears from a telegram that the insurgent forces and the Nienfei have been compelled to abandon their contemplated attack on the inhabitants of Hankow, and to meet the Imperialist forces, by whom they have been routed, after an obstinate conflict lasting two days. It is uncertain whether credence can be given to the rumoured death of the rebel chief; but that the Imperialist victory was of a most decisive character is evident from the fact that a considerable portion of the Imperial army was immediately disbanded after the battle, whilst the residue went in quest of the Nienfei. The immediate consequence of this is that all fears as to the safety of Hankow and its European settlement are now removed; and the natives, laying aside their timidity, are once again resuming their former commercial enterprise. Security from wrong and violence is a condition as essential to commerce in its early stages as credit is in its later developments. And now that the natives are regaining confidence, the usual improvement in trade may be expected to follow. The slackness in business that has prevailed in Shanghai during the last fortnight of which we have any news, that ending March 8th, is to be accounted for to some extent by the military events going on in other parts of the Empire, but principally by the paucity of desirable teas in the market at this time, the close of the season. This remark applies more especially to black teas, of which the quantity sold during the fortnight ending March 8th was only 788 chests, and 1,067 half-chests, that is, about 120,000 lbs. A rather better feeling prevailed with regard to greens, of which Moyune and Fychow obtained the readiest sale; the shipments of these for the fortnight amounted to only 370,880 lbs. There was nothing doing at Hankow, and hardly anything more at Kiu-Kiang, though considerable shipments of greens were reported, as being forwarded to Shanghai on native account. From Foo-chow we hear that there are at present no vessels loading with tea for any port; but one more—the concluding one of the season—is expected shortly to sail for London; the settlements at this port have been only 30,000 lbs. of Congou during the fortnight. This temporary cessation from commercial interchange with European merchants gives opportunity to the teamen to make their usual preparations for a new season; and our latest advices inform us that they are extensively engaged in this occupation.

The rumour of a proposed embassy from China is, it is to be hoped, something more than the advent here of some half-dozen young men, as reported in the daily papers a few days since. A properly constituted suite, including a few of the more enlightened Chinese officials, might carry away with them views respecting British rule and British commerce that would be far more effectual in paving the way for us in China than the ordinary methods at present in vogue among diplomatists. Seeing, it is said, is believing; and we apprehend that nothing short of ocular demonstration will ever pierce the obtuse obstinacy of the Chinese mind, which so resolutely refuses to acknowledge any greatness, any power, any antiquitity even, that is not invested with the prestige of Chinese associations. A telegram dated April 1st, from Hong Kong, states that an important convention has been concluded between China, Great Britain, and France, represented by Prince Kung, Sir Rutherford Alcock, and the French Minister.

We extract the following figures, showing the comparative exports of tea from China ports, from the Circular of Messrs. Dent and Co., of Hong Kong, under date March 14th:—

EXPORT OF TEA TO GREAT BRITAIN.

From	Season, June 1, 1864-5.	June 1, 1865, up to present date.
Canton	9,044,400	12,539,700
Hong Kong	11,000	85,900
Macao	1,639,100	850,100
Amoy	453,000	548,000
Foo-chow	43,470,200	44,880,400
Shanghai	56,265,700	48,766 800
Japan	1,617,300	1,812,200
	112,500,700	109,483,100

EXPORT OF TEA TO THE UNITED STATES.

From	Season June 1, 1864-5.	June 1, 1865, up to present date.
Canton	824,200	2,223,700
Hong Kong	134,800	—
Amoy	2,127,400	3,477,400
Foo-chow	5,334,900	7,066,100
Shanghai	1,609,300	10,727,500
Japan	249,800	5,748,000
	10,280,400	29,242,700

HOTELS.—The company which was formed for the purpose of establishing hotels in India and China, and elsewhere in the route between England and the British settlements in India and China, have just completed the first of their establishments, which is to be opened at Point de Galle immediately. Another is in course of building at Cairo. Both of these will, we have reason to believe, have every comfort and convenience of the best English hotels. Any one who has been along this route must feel how much hotels of this description are required.

Monetary and Commercial.

The Chartered Mercantile Bank of India, London, and China has issued its eighth annual report, to be presented at the meeting appointed for the 15th inst. Considering the adverse circumstances against which all Eastern banks had to contend last year, the result must be highly satisfactory to the shareholders. After providing for all bad and doubtful debts, and defraying cost of management at all points, the net profit amounts to £38,203 6s. 11d., to which has to be added a sum of £65,760 7s. 3d., undivided profit brought forward from the preceding year, making a total £103,963 14s. 2d. Out of this sum £101,250 has been paid in two half-yearly dividends, namely, £63,750, or 8½ per cent. on the 1st July, and £37,500, or 5 per cent. on the 1st January last, making together 13½ per cent. for the year. The unappropriated balance of £2,713 14s. 2d. is carried forward to the profit and loss account of the current year. The Mauritius agency was closed on the 31st December last.

At the meeting of the Singapore Gas Company, held on the 30th ult., the report of the directors was adopted, and a dividend at the rate of 7½ per cent. per annum on the preference capital, and at the rate of 3 per cent. on the original capital, free of income-tax, was declared. £172 1s. 6d. is carried to new account.

Bank shares have continued to decline, consequent upon the failure of Barned's Banking Company and the recent disclosures of the gross mismanagement in the East of the affairs of the Commercial Bank Corporation of India and the East. Actuated by a feeling of fright, holders have indiscriminately forced upon the market shares in a large number of undertakings, many of which are known to be managed with extreme care and prudence. Anglo-Egyptian, Asiatic, Chartered Mercantile of India, London, and China, English Joint-Stock, Australian Chartered, Hindustan, Imperial Ottoman, National of Liverpool, and North-Western have all given way. There has been a demand, however, for Agra, Alliance, London Chartered of Australia, London Joint-Stock, Mercantile and Exchange, New South Wales, and Union of London, at better quotations.

The Board of Trade Returns for the month and three months ended 31st March present very favourable results. The in-

Digitized by Google

crease in the value of our exports is steady, and is in a great measure to be accounted for by the gradual improvement in cotton and cotton manufactures. The total value of exports for the month of March was £17,520,354, against £13,770,154 in 1865, and £13,555,674 in 1864, showing an increase of £3,750,200 over the former period, and of £3,964,680 over the latter. For the three months of the present year the total declared value was £46,991,165, for 1865 it was £35,635,707, and for 1864 £36,667,381. The increase, therefore, over 1865 was £11,355,458, and over 1864 £10,323,784, and extends to nearly all the leading staples of export, and is especially observable in the American trade. The present tables state also the value of the chief Imports in February, which was as under:—1864, £13,214,541; 1865, £12,854,779; 1866, £16,610,159. And for the months of January and February, 1864, £20,734,897; 1865, £19,253,701; 1866, £26,457,723. The increase is therefore almost as great in the import as in export branch, and argues a generally active condition of trade, which involves, of course, a corresponding demand upon the money market. The figures in these Returns specially referring to our commerce with the Far East are the following:—

EXPORTS TO CHINA AND HONG KONG.

Quantity for the Month ended 31st March.

	1864.	1865.	1866.
Cotton yarn	63,042	263,990	523,710 lbs.
Cotton manufactures	8,437,906	11,569,177	15,386,761 yds.
Worsted stuffs	1,231,482	1,175,182	1,572,053 „
Woollen & Worsted cloths.	110,969	143,092	110,888 „
Lead	549	50	577 tons.

Quantity for the three Months ended 31st March.

Cotton yarn	447,172	515,762	1,210,168 lbs.
Cotton manufactures	13,362,332	21,592,901	40,311,175 yds.
Worsted stuffs	2,876,495	3,179,205	4,179,911 „
Woollen and worsted cloths	413,146	351,583	505,948 „
Lead	1,546	683	1,655 tons.

Value for the Three Months ended 31st March.

Cotton yarn	£56,591	£53,316	£132,313
Cotton manufactures	386,967	547,523	1,018,850
Worsted stuffs	192,859	243,968	312,757
Woollen and worsted cloths	67,185	62,098	81,997
Lead	33,609	15,191	37,014

The Cotton Manufactures forwarded from the United Kingdom to other ports and countries in the Far East during the month of March, and their value for the three months are presented thus:—

Quantity for the Month ended 31st March.

	1864.	1865.	1866.
Ceylon	1,188,614	1,592,521	1,257,500 yds.
Singapore	3,080,464	7,344,557	3,130,008 „
Java	1,857,213	3,213,562	6,050,450 „
Philippine Islands	2,402,362	462,620	—

Value for the Three Months ended 31st March.

Ceylon	£159,148	£74,072	£125,182
Singapore	276,231	316,590	245,641
Java	173,059	149,981	275,252
Philippine Islands	162,159	189,201	91,289

Of Cotton Yarn, the quantity exported to Singapore during the month of March in the present year was 68,730 lbs., and the quantity for the three months 205,310 lbs. The value for the three months was £24,688 in the present year, against £43,934 in 1865, and £41,134 in 1864. To Ceylon the export for the month was 18,000 lbs.; and for the three months 56,000 lbs. The value for the three months being £9,540 in the present year, against £3,450 in 1865, and £9,137 in the year preceding.

IMPORTS.

Of Raw Cotton the import is greatly on the increase as compared with the two years preceding, but China, it will be observed, is still absent from the list during the year now passing.

Quantity for the Month ended 31st March,

	1864.	1865.	1866.
Egypt	149,500	154,700	98,629 cwts.
British India	225,383	218,506	151,543 „
China	76,488	60,494	—
Total from all parts	587,211	621,673	872,287 „

Quantity for the Three Months ended 31st March.

Egypt	309,091	477,363	246,897 „
British India	459,028	404,610	457,450 „
China	105,476	106,146	—
Total from all parts	1,131,968	1,433,274	2,026,409 „

Value for the Two Months of January and February.

Egypt	£1,999,104	£3,046,485	£1,485,690
British India	2,252,206	1,261,003	2,152,530
China	265,905	269,858	—
Total from all parts	6,060,229	7,057,244	10,055,150

Of Unrefined Sugar from the Philippine Islands we received during last March 10,389 cwts. of 3rd quality, and 38,111 cwts. of the 4th quality. There had been no import thence in either of the two preceding months.

Of Hemp we received from the Philippine Islands 15,698 cwts. during the month of March, being the first importation in the present year.

Of Coffee, Ceylon delivered to us 3,879,338 lbs. in the month of March, and the comparative figures are as follows:—

	1864.	1865.	1866.
Quantity to 31st March (lbs)	8,012,292	9,553,501	7,343,298
Value to end of February	£165,777	£117,887	£113,107

The present Returns furnish the declared value of the British and Irish Produce Manufactures exported from the United Kingdom during the first two months of each of the three years. The figures set against the various ports and countries in the Far East are as follows:—

To	Exports during January and February, 1864.	1865.	1866.
Egypt	£927,242	£988,545	£1,680,464
China (exclusive of H. Kong)	359,993	493,137	688,666
Hong Kong	186,654	161,655	448,595
Singa. and Eastern Straits	280,110	264,609	264,305
Ceylon	181,117	81,408	129,980

FREIGHTS AND CHARTERS.

Our last advices from China report continued activity in the coasting trade, but no improvement in general charters homewards. In outward freights we have nothing to remark.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai:

Digitized by Google

40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £45 to £46. For Galle: £37 to £38. For Singapore: £36. For Shanghai: £51 to £52. For Batavia: £35. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 5s. For Manila: £1 17s. 6d. to £2. For Galle: 35s. to 36s. For Singapore, £1 14s. 0d. to £1 15s. For Shanghai: £2. 12s. 6d. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 41 tons naval stores (principally combustibles) to Trincomalee, and 81 tons naval stores, and 746 hhds. of porter to Hong Kong, all from the Thames.

CASUALTIES.

The Gem of the Ocean, Pritchard, from Canton for New York, split her sails, lost quarter boat, and was thrown on her beam ends during a hurricane whilst off Madagascar, Feb. 14.

The Drydens, Elliott, from Sunderland for Hong Kong, put into Portsmouth April 29, to ship a seaman, having lost one overboard.

THE ANNUAL CHINA DINNER

WILL BE HELD AT

WILLIS'S ROOMS,

On FRIDAY the 18th MAY,

Sir JOHN F. DAVIS, Bart., K.C.B., F.R.S.

(Late British Plenipotentiary in China, and Governor of Hong Kong), in the Chair.

TICKETS, ONE GUINEA AND A HALF.

DINNER ON THE TABLE AT EIGHT O'CLOCK.

Gentlemen intending to dine are requested to leave their names with Messrs. Willis, 26, King-street, St. James', S.W.

FREDERIC BRINE,
Honorary Secretary.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for D ckyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel stores, &c., when requiring to discharge them.

Amoy, March, 1865.

CHARTERED MERCANTILE BANK of INDIA, LONDON, and CHINA.

DEPOSITS.

DEPOSIT CERTIFICATES,

With Quarterly Interest Warrants attached,

ISSUED BY

THE CREDIT FONCIER & MOBILIER OF ENGLAND (Limited).

NOTICE IS HEREBY GIVEN, that on and after 1st May next, until further notice, Money will be received on Deposit, for which Deposit Certificates with Interest Warrants attached, payable quarterly, will be issued for the following periods, at the following fixed rates for such periods, viz.:—

For 1 year	7 per cent.
For 2 years	7½ „
For 3 years	8 „

The distinctive features of these Deposit Certificates are—

1. The perfect security afforded to Depositors by the large Subscribed and Paid-up Capital.
2. The large Reserve Funds.
3. The convenience of the Quarterly Interest Warrants, which can be detached and paid in through any Banker.

Forms of Application can be obtained of the Secretary to whom all communications must be addressed.

By order of the Court,
ALFRED LOWE, Secretary,

17 & 18, Cornhill, London,
27th April, 1866.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

THE "LONDON AND CHINA EXPRESS" ON SALE

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentist's Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

HOLLOWAY'S OINTMENT AND PILLS.—EFFECTS OF COLD.—Numerous and severe are the diseases resulting from exposure to low temperatures. Skin, muscles, lungs, and circulation become disordered, and serious illnesses succeed, unless the derangement receive timely attention. Holloway's Soothing Ointment well rubbed upon the afflicted parts is an inestimable remedy. When the lungs or heart have an irregular action the Ointment must be well rubbed upon the chest, and assisted in its curative efforts by Holloway's Pills. These noble medicaments mutually assist each other. All disorders springing from neglected colds, chills, wet, or other atmospheric vicissitudes are thus safely and speedily checked and freed from pain and danger by Holloway's preparations.

Prospectuses, with through rate to a thousand places, free on application.

G. W. WHEATLEY and Co. (late Waghorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W., and 23, Regent-street, S.W.

INDIA AND CHINA.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Tyburnia ...	E.I.D.	With des.
Kanagawa and Yokohama	Corea ...	W.I.D.	With des.
Kanagawa and Yokohama	Heroes of Alma ...	W.I.D.	With des.
Penang	Algernon ...	L.D.	With des.

Apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following high classed VESSELS to their respective destinations:—

Ships.	Class.	Destination.	Docks.	Date of sailing
Winchester ...	A 1 13 yrs	Calcutta ...	E.I.D.	June 12
Lord Macaulay	A 1 13 yrs.	Hong Kong & Whampoa.	E.I.D.	May 15 To follow.
Tavistock ...	A 1 10 yrs.	Ditto	E.I.D.	
Assyrian ...	A 1 10 yrs.	Shanghai ...	E.I.D.	May 20
Result ...	5-6ths ...	Melbourne ...	E.I.D.	June 5

For Freight or Passage apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, E.C.

CHINA and JAPAN.—The following splendid first-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	Last Ship. Day.
Shanghai ...	Lammermuir	A1 12 yr.	E.I.D.	May 18.
Shanghai ...	Albuera ...	A1 13 yr.	E.I.D.	To follow.
Hong Kong & Whampoa ..	Robin Hood.	A1 10 yr.	E.I.D.	With des.
Hong Kong & Whampoa ...	Lobelia ...	A1 13 yr.	E.I.D.	With des.
Kanagawa, Yokohama and Nagasaki ...	Merse ...	A1 13 yr.	E.I.D.	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destination.	Ships.	Class.	Tons	Dock.
Hong Kong & Whampoa	Sea Belle ...	A 1 10 yrs.	650	E I.D.
Bombay ...	Albert Victor ...	A 1 12 yrs.	1184	E.I.D.
Bombay ...	Whitehall ...	A 1 14 yrs.	936	E.I.D.
Colombo ...	Spanker... ...	A 1 10 yrs.	475	W I.D.
Colombo ...	Celestial Queen.	A 1 13 yrs.	842	S.K.D.
Colombo ...	Gladiator ...	A 1 —	503	L D.

No. 22, Great St. Helen's, E.C.

FROM LIVERPOOL.

Destination.	Ships.	Tons.	Class.	To Sail.
Shanghai ...	Bogota ...	383	A 1 12 yrs.	Imm.
Hong Kong & Whampoa ...	Kate Carnie...	549	A 1 13 yrs.	"
Batavia & Singapore ...	Giffrard ...	334	A 1 12 yrs.	"
Batavia & Sourabaya ...	Astrea ...	312	—	"
Calcutta ...	William Fairbairn ...	—	—	"
Calcutta ...	Bolton Abbey	—	—	"
Bombay ...	Margaret Pugh ...	692	A 1 12 yrs.	"

For terms of Freight or Passage apply to McDIARMID, GREENSHIELDS, and Co., Liverpool.

STEAM from LIVERPOOL to CHINA.—The following screw STEAMERS are intended to be despatched with cargo and passengers, for Mauritius, Penang, Singapore, Hong Kong, and Shanghai, at their respective dates:—

Vessel.	Tons register.	Captain.	To sail.
Ajax	1670	Kidd ...	June 30.
Achilles	1672	Russell ...	Sept. 10.
Agamennon ...	1672	Middleton.	To follow.

Each vessel carries a surgeon and stewardess.

Apply to ALFRED HOLT, 1, India-buildings, Liverpool; or to J. M. CURRIE, Havre.

FOR HONG KONG and WHAMPOA, with quick despatch (to follow the Yaratilda), the well-known iron clipper-ship PORTLAND, A 1 12 years, 872 tons register, JAMES PETERS, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

With very quick Despatch.

FOR HONG KONG and WHAMPOA, the beautiful clipper ship SEA BELLE, A 1 ten years, 650 tons burthen, J. HIBBARD, Commander, East India Docks. This splendid vessel is well-known in the India and China Trades, and offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

LINE OF PACKETS FROM LIVERPOOL FOR JAVA.

FOR BATAVIA and SOURABAYA, with immediate despatch, having two-thirds of her cargo engaged, the splendid Dutch clipper barque CATHARINA, Captain VISMAR; 240 tons register; built in 1864, and classed 2-3rds L 1 1 for nine years; the highest class in French Lloyd's; coppered and thoroughly copper-fastened, and a most eligible conveyance for fine goods. Loads in Prince's Dock.

For BATAVIA and SINGAPORE, an A 1 twelve years Ship.

Apply to NUTTALL and Co., 18, Chapel-street, Liverpool.

LINE OF PACKETS FOR YOKOHAMA, JAPAN.

Has the bulk of her cargo engaged, and will have prompt despatch,

THE splendid Liverpool-built clipper barque CARIOCA, D. HUGHES, Commander; 312 tons, A 1 at Lloyd's for thirteen years, only two years old, has proved herself to be one of the fastest vessels belonging to the port, and in every respect an unrivalled conveyance.

For Freight or Passage apply to Messrs. WAKEFIELD, NASH, and Co., to Messrs. C. SAUNDERS and Co.; or to E. C. FRIEND and Co.

COLOMBO, CEYLON, Direct, will have very quick despatch, having room for light measurement goods only, the magnificent new clipper ship STAR OF DEVON, A 1 thirteen years, 340 tons register, JOHN CORNISH, Commander; loading in the West India Docks. This splendid vessel having just completed her first voyage, has a very lofty cabin, with accommodations of the first order for the comfort and convenience of passengers.

For Freight or Passage apply to F. TALLACK (late W. A. Winkley), 23, Birchin-lane, Cornhill, E.C.

Will have very quick despatch.

DIRECT for COLOMBO, the magnificent clipper-built ship SPANKER, A 1 10 years, 477 tons register, JAMES CANDLISH, Commander, West India Docks. This splendid Vessel is well known for her very rapid Passages, and the good order in which she invariably delivers her Cargoes, thus offering a favourable opportunity to Shippers of fine Goods.

For Freight or Passage apply to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

Will have very Good Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship CELESTIAL QUEEN, A 1 thirteen years, 842 tons register, WILLIAM WATT, Commander; lying in the St. Katharine Docks. This magnificent ship, from her size, high class and fast sailing qualities, having made her last passage from Calcutta in 98 days, offers an unusual opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT FOR COLOMBO, the magnificent Aberdeen clipper ship GLADIATOR, A 1, 503 tons register, J. MURRAY, Commander; London Docks. This beautiful vessel, built by Messrs. Walter Hood and Co., Aberdeen, offers a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT for BOMBAY, the magnificent clipper ship ALBERT VICTOR, A 1 twelve years, 1,184 tons register, T. J. CLARKE, Commander; lying in the East India Docks. This splendid high classed ship, built in 1864, is now quite ready for cargo, and being one of the fastest vessels afloat, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

To follow the "MARINE MINISTER VON ROON," and will have quick despatch.

DIRECT for BOMBAY, the magnificent clipper ship, WHITEHALL, A 1 14 years, 936 tons register, WILLIAM CHAPMAN, Commander, lying in the East India Docks. This splendid high classed ship is now quite ready for cargo, and being one of the fastest vessels afloat (having made the passage to Sydney in 76 days), offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, No. 31, Great St. Helen's, Bishopsgate-street, E.C.

The next inward mail, bringing dates from Hong Kong to the 15th April, is due on the 27th inst.

List of Passengers.

PASSENGERS INWARD.

By this mail per P. and O. steamer Poonah, arrived at Marseilles May 11th.—From Shanghai: One second-class passenger. From Hong Kong: Mr. and Mrs. Peacock, Messrs. Pemberton, Lowe, Wilkinson, Price, and J. Bailey. From Singapore: Lieut. Cooper, Captain Bing and infant. Dr. Coulthard. Don R. Roche.

To Southampton, per Ripon, expected to arrive May 18.—From Hong Kong: Commander Ward, Mr. Arnould, and one second-class passenger. To Gibraltar: Don and Donno Carilho and daughter, Don F. Reyes and daughter.

Per French mail, arrived at Marseilles on 2nd May.—For Messina: Mr. and Mrs. Fittock, from Ningpo, and Mr. Schmidt, from Shanghai. For Marseilles.—From Shanghai: Mr. Hart, Inspector-General of Chinese Customs, Mr. Bowra and Mr. Dechamps, Interpreters, Mandarin Ping, four first-class attendants, and six servants.

Per Italian line via Brindisi.—From Hong Kong: Mr. M. P. Hamlin. From Manila, and Singapore: Mr. R. Jardine.

PASSENGERS OUTWARD.

Per P. and O. steamer Ceylon, from Southampton, May 4.—To Shanghai: Mr. J. Kidner Miss E. Meade, Mr. T. G. Meade. To Hong Kong: Messrs. F. Holden, J. Plowright, H. F Strugnell, J. Petts, J. Manley, and G. A. Moses; Mr. A. J. W. Neville, R.N., Mr. F. C. Corbet, R.N., Staff Assistant Surgeon Creed, and four second-class passengers. To Ceylon: Mr. E. S. Grigson, Mr. T. Parsons, and one second-class passenger. To Singapore: Four second-class passengers. To Calcutta: Mr. A. W. Croft, Staff Assistant Surgeon Fletcher, Miss Weaver, Mrs. Hill, Mr. Spottiswood, Mr. H. Vacher, and eleven second-class passengers. To Madras: One second-class passenger. To Suez: Ten second-class passengers. To Alexandria: Mr. R. Humphrey, five second-class passengers, and one child.

From Marseilles, May 12.—To Shanghai. Mr. R. R. Westall, Mr. R. Conolly, Mr. E. Z. Holme, Mr. J. Sutcliff, and two first-class passengers. To Yokohama: Mr. and Mrs. Dohmen. To Hong Kong: Dr. F. C. Sibbald, Captain Pixley, Don Antonio de Lara and wife, Don V. Barrantes and wife, Mr. and Mrs. C. D. Williams. To Calcutta: Mr. W. Good, Mr. John Kavanagh, Mr. Jenkins. To Madras: Mrs. Shafto and one second-class passenger. To Alexandria: One second-class passenger. From Suez to Hong Kong: Mr. Cederlof. To Calcutta: Mr. and Mrs. Markby. To Penang: Mr. J. Lamb.

Per P. and O. steamer, from Southampton, May 20.—To Ceylon: Mr. and Mrs. H. S. Oldnall Russell, Mr. and Mrs. Hampton, two infants, and child, Mr. P. W. Stavers, Ensign Konarski, Mr. G. Mac Gregor. Miss Brake. To Singapore: Mrs. Swanston and child. To Hong Kong: Mr. E. G. Hamilton, Mr. P. M. Roe, Lieut. C. E. Domville, R.N., Mr. F. K. Taylor, R.N. From Marseilles.—To Yokohama: Mr. R. V. Grahame. To Hong Kong: Mr. F. Goodridge. To Ceylon: Mr. H. J. Dealandes. To Shanghai: Mr. Kemptner. To Singapore: Mr. Meikleham.

Per P. and O. steamer, from Southampton, June 4.—To Ceylon: Lieutenant-Colonel Phillips, R.A. From Marseilles, June 12.—To Ceylon, Mr. H. W. Tombs.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The P. and O. mail of January 10 arrived out on the 12th March, followed on the same day by the French mail of the 17th. The dates are now down to the 16th March. The following summary of news is from the *Japan Herald* of that date:—

The emissaries of the Japanese Government, who left this last year on an errand of a commercial rather than a political character, returned in the *Dupleix*. They express themselves as thoroughly satisfied with their trip—both as to the universal kindness of their reception and the attention that was everywhere shown to them, and as to the successful attainment of their commercial ends. They have purchased largely on behalf of their Government and three officers arrived with them from France, who are engaged to superintend and assist them in the formation of an arsenal. These officers left yesterday for Yokuske. About 30 or 40 more, including artizans, are engaged, and will arrive at no distant date.

The last intelligence from Osaca was to the effect that Prince Satsuma continues most determined in his hostility to the opening of Hiogo. The Karo, or principal retainer of Prince Satsuma, recently paid a visit to the settlement. It appears that only two of the Yatcheskees of that Daimio in Yedo have been sold, and that he has nine remaining. From Choshiu there is still nothing decisive. It is said that six articles were proposed to him by the Mikado, and that he has accepted them all. Of the truth of this we have no means of judging.

Our Municipal Council has met once since the departure of the last mail. It is now brought to a pause in its operations, for want of funds for carrying out the necessary works in the settlement. Funds have to be raised; the law, as yet, gives them no help in the collection of them; and undoubtedly the people will not submit to taxation unless they have a voice in the manner of taxation, the amount they are to pay, and the disbursement of the funds when raised. To this end, the Council must no longer be a pocket burgh in the hands of a few landrenters, but the franchise must be liberally extended.

H.M.S. *Princess Royal* left the harbour at daylight on Thursday, the 15th. She proceeds to Nagasaki to meet Admiral King, who is expected there in H.M. transport *Adventure* from Hong Kong. In all probability we may see the *Princess Royal* back in about a month. The destination of the 2nd bat. 22nd Regiment is changed. It is to be stationed at Hong Kong; the 11th is to proceed to India, and the 9th is to come to Yokohama.

The same paper gives an interesting account of the way in which the native New Year holidays are celebrated in Yokohama :—

There is a notion prevailing amongst Europeans, that curios of all kinds can be more cheaply purchased just before the close of the old year—as all accounts must be squared at that time—and to a certain extent this would be true; but, in reality, the fact is rendered nugatory by the inpouring of foreigners of all classes, to make the most of the supposed advantage. The consequence is, that the curio shopkeepers make a great harvest out of these few days, asking higher prices than ever, and coming down with difficulty, even then asserting their doing so i. only owing to their desire to realise before New Year's-day The Japanese cannot be said to be good merchants, but the art of petty finesse on the part of the small traders, and more especially the curio vendors, is understood by them to perfection; whilst the knowledge of the length of the foreigners foot is most exact. The whole of the Japanese town from this day week assumed an appearance of activity, such as is witnessed at no other period of the year, and in passing through for the purpose of observation, we do not think that we saw half-a dozen Japanese houses undecorated. All have at least a few boughs of fir or other evergreen before them, and most have the addition of the plaited straw, intertwined with flowers, paper, and supplemented by the emblems of plenty—a lobster shell and fruit. All the people, old and young, were figged out in new clothes, and the numerous officials in their dresses of ceremony moving about to pay complimentary visits were conspicuous. On both Thursday and Friday the streets of the foreign settlement have had the appearance of desertion, but in the Japanese town the people of all ages and of both sexes have enjoyed themselves to the full, flying kites or playing battledore and shuttlecock in the streets, to the top of their bent. There is no country in the world where the common people give strangers so strongly the idea of perfect simplicity and contentment; and their merry ringing laughter cheers the spirits and lightens the hearts of mere lookers on.

The following notice of the P. and O. Company's service is from the *Japan Times* :—

The P. and O. steamer *Ganges*, which brought us the English mails, was several days late. The cause of her delay was an accident which happened to her in a place called Speck's Straits, a few hours' sail from Nagasaki. She was to have come *via* that port and the Inland Sea, but touching a rock in the place named above, although with Japanese pilots aboard, was forced to put back to Nagasaki for repairs, and completed her voyage to Yokohama by the usual route. She had on board Mr. Black, a gentleman who has for some years managed the company's affairs in Bombay, and is now making a tour of inspection along the line. If his trip brings with it the conviction that thorough and searching reform is necessary all along the route, and that the company must abandon all thought of competition with its energetic young rival, the Messageries Imperiales, unless a wise expenditure is immediately substituted for the present false economy and a little more liberality shown to shippers and passengers in the East—his time will not have been thrown away. The fact that, at a season of the year when Japan is not particularly attractive, sixteen passengers were induced to take tickets for a trip through the beautiful Inland Sea at the present most exorbitant rate of passage money is sufficient proof that the adoption of a more liberal tariff on the line, at all events, between China and Japan would be profitable to the company. At present the fare from Shanghai to Yokohama, a trip of five days in such vessels as the *Cadiz* and *Granada*, costs more than the twelve days' transit from Liverpool to New York in the magnificent ocean palaces which perform the service on that line. We have little doubt, however, that during the approaching summer the P. and O. Company will see the advantage of reform in this particular. A trip of a month or six weeks from China to Japan is now found to be far cheaper and nearly as effectual a restorative as a short run home, and we have no doubt whatever that any fine private steamer, with large passenger accommodation, whose owners would send her on a round trip from Hong Kong and Shanghai to Yokohama *via* the Inland Sea would readily get 50 excursionists at $150 a head. Returning from Yokohama to Hong Kong in time to catch the first August mail, she would, moreover take from both the P. and O. and M. I. steamers, then going by the usual route, the whole of the first silk freight of the season. We recommend the plan to the consideration of shipowners in China.

HAKODADI.

As usual at the Japanese New Year holidays, all business operations were suspended at this port. Instructions had been received from Sir Harry S. Parkes relative to the Aino cemetery affair, the men concerned in which had remained in custody from the time of the trial. A sum of money is to be paid to the families whose graves were desecrated, and an investigation is to be held as to the sculls still missing.

CHINA.

PEKING.

The following account confirms the first paragraph of the telegram of Reuter's agency, published on the 11th. The other two paragraphs were alluded to in our last issue :—

A convention has been entered into between the British and French Ministers and the Chinese Government, whereby it will now be permitted, under proper restraints and regulations, for any person residing in one of the open ports of China to obtain from his Consul a licence to open a coolie emigration office. Previous to granting a licence the Consul will have to assure himself of the solvency and respectability of the applicant, but when the licence has been granted it cannot be withdrawn except upon sufficient grounds, and then only with the consent of the Consul. The Chinese employed by the emigration agent to find him emigrants will be provided with a special license, and will be alone responsible for any actions he may commit in contravention of the laws of the empire. Strict rules are laid down to secure the Chinese coolie from ill-treatment or from the chance of not being able to return to his country. No obstacles are thrown by the Chinese Government in the way of their subjects embarking for foreign countries of their own free will; but any attempt to induce them to do so otherwise than the regulations provide is strictly forbidden, and Chinese subjects are punishable by death for the offence of kidnapping men and sending them abroad against their will.

We have received a very interesting account—dated Peking, 5th March—of a visit to Corea, but the first portion not having arrived we shall give the account in our next.

The report of the Medical Mission Hospital for 1864 has been published, and contains the following interesting information regarding small-pox and vaccination in China :—

Cases of vaccination have not been so numerous at this hospital as might have been expected; which is accounted for by the fact that establishments of a more systematic character than we had been led to believe exist in the city. It was introduced into Canton in 1805, by Mr. Pearson, a surgeon of the East India Company; and a tract written by him on the subject was translated into Chinese by Sir G. Staunton. Several other tracts have been written on the subject, some concealing and others openly acknowledging its foreign origin. The people in the North trace it to Canton, but for the most part are ignorant of its English origin. Several Cantonese were instructed in the practice, and the hospital established there was placed in the hands of a native, who continued for ten years to practise among his countrymen, and small-pox was observed to be on the decrease. Inoculation, which probably took its rise in the south of China, is now almost obsolete; the small-pox matter was inserted into the nostrils. A patient, a respectable merchant here, informed me that neither

Digitized by Google

inoculation nor vaccination were known or practised in his native province—Shansi; no foreigners having yet settled there, and no philanthropic countryman having introduced it. The mortality, he informed me, was very great. Without inoculation, it is stated that in the most favourable circumstances 20 to 30 per cent. died; in worse cases 50 to 60 per cent., and after inoculation only 4 per cent. proved fatal. It has been known and practised in China since the time of the Sung dynasty, about 800 years ago. It was first introduced into England by Lady Montague, the wife of the British ambassador at Constantinople in 1721, and doubtless had found its way to Turkey across the centre of Asia from China. The Turks who lived on the Chinese frontier must have carried the knowledge of it when they moved westward. The utility of vaccination soon became known, and the practice quickly spread over the empire. It was brought into this city thirty-seven years ago, and at present there are three establishments, one of them having a branch establishment in the neighbouring city of Tientsin. Small-pox is still a great scourge, owing chiefly to the carelessness of the people in not availing themselves of vaccination in time. It is said to be endemic—all children, they assert, take it by the will of Heaven—there is no escape, *sic volvere Parcas.*

The "Son of Heaven" has not been vaccinated; his ministers dread to mention the necessity of it; and even he is certain, it is said, to have "the heavenly flowers." What more natural? The princes of the blood and the eunuchs have all been vaccinated, and there is perhaps, therefore, on account of the monastic life the boy emperor is obliged to lead, a reasonable hope that he may prove an exception to what is considered inevitable.

The native tract on vaccination, published at Canton in 1817, was republished in Peking in 1828, when vaccination was introduced by the Prefect Tseng, who had formerly been a mandarin in the South. Sir G. Staunton's tract was printed in 1808, part of which has been incorporated into the Chinese one. Its discovery is ascribed to a barbarian doctor named Chan-na in the west, and the story of its having been brought by a ship from Manila to Macao, which had children on board for the purpose of vaccination, is related. The terms English and England are studiously avoided.

Vaccination had been practised by the Russians in Peking previous to 1828. As early as 1820 the medical gentleman attached to the Legation, ecclesiastical at that time, practised vaccination among the Albasines — now Chinese naturalised subjects. They were taken by the Chinese on the Amoor about the year 1688, and were brought to Peking, where certain privileges were granted them by the Emperor.

The vaccine establishments here are well conducted; attendance is given every eighth day, or oftener if the weather be dry and the lymph operates rapidly; tickets of admission are granted, the name, address, age, and sex are carefully noted down in a register kept for the purpose. A note is taken of the number of vaccination days each year; the number of children vaccinated, those in which it succeeds among those who return. The statistics for 1863 of the oldest and principal establishment here I subjoin as given by the vaccinator. No. of vaccination days, 64; No. vaccinated, 2,227 children; No. of those who returned, 1,229; No. of successful vaccinations, each child being vaccinated in 6 places, 6,060. No. of vaccination days during 37 years, 811. The establishments are not only gratuitous, but a gratuity is granted to the parents to bring the children back. In spring, when the cases are numerous, they receive on their second visit about 2d.; in the autumn and winter, when the cases are few, they receive about 2d. on their first visit and on their return about 9d. When there is least danger of the lymph becoming exhausted, beggar children are hired to be vaccinated, who live in the hospital. When called upon to vaccinate the nobility, these children are taken in a cart to the residences of the aristocracy, in order to have the lymph in the recent state transferred from their arms to those of more fortunately situated children. This method, which could not always have been of the most agreeable description, has been superseded by tubes from this hospital. When it was first proposed to introduce vaccination into the metropolis, it was arranged to have a relay of boys upon the road, to be vaccinated in succession every eighth day; but this plan was abandoned when the means of conveying scabs was found out. The dried scabs on reaching Peking were mixed with mothers' milk. Twice within the last three years the supply of lymph has failed, and on both occasions application was made to this hospital. The tracts and sheets printed and distributed on the subject betray a great ignorance of the true principles of physiology. They suppose the poison of small-pox to be located about the insertion of the deltoid muscle, and hence direct the lymph to be introduced at three distinct places in each arm; the upper one to be 4 inches from the shoulder and the lower one 2 inches from the elbow. They give drawings of the position and of the lancets, which, by-the-bye, are all of foreign manufacture. They are very particular regarding the diet, warning most carefully to avoid the smells of whisky, opium, heated kangs and dirty or decaying matter. For at least 100 days after vaccination, cocks, certain kinds of fish, beef, eggs, bean and bean flour are to be avoided. For 3 years after vaccination buckwheat and cherries are to be shunned. The things enjoined are vegetables, pork and salted ham. Three days after vaccination they are allowed to eat shrimps, with rice spirit, Mongolian mushrooms and mutton; and only in winter must bird's nests steamed with sugar candy be eaten. The Vaccinator at the principal establishment was presented with a crystal button from the Board of Revenue.

The total number vaccinated in Peking in one year, at the 3 establishments, does not exceed 1,000. Supposing this city to contain half the population of London, where in 1863 the number of births exceeded 100,000, then the number vaccinated would be about 8 per cent. on the whole number of births.

TIENTSIN.

A letter from this place, dated 9th March, states that the ice was breaking up after a mild winter. One or two vessels had been able to get up. A considerable quantity of cotton was ready to export. Mr. Grant was prepared to open the courier service between Kiachta and Tientsin as soon as the navigation was open. The accounts speak well of the reception of Sir R. Alcock, and our relations were on the best possible footing.

HANKOW.

It appears that an official notification was issued of the execution of Hwangpe by the Nienfei on the evening of the 14th March. The treasurer's forces having besieged the city, the Nien-fei found their position becoming so uncomfortable that they left the city and went east, down the river. It is not stated that any opposition was offered to their getting away safely, or that they were pursued and harassed in their retreat. While the treasurer takes to himself the credit of this victory it is claimed by another warrior; but so long as the story proves true and does not turn out to be another canard, we care very little whether the conqueror be called Tang or Wang.

SHANGHAI.

The dates are now down to the morning of the 26th March. The P. and O. mail of January 26 arrived out on the 16th March.

At a meeting of the creditors of Messrs. Jarvie, Thorburn and Co., which took place on Saturday, 17th March, before Sir Edmund Hornby, Chief Judge at the Supreme Court, Mr. Lawrance appeared for the petitioners and Mr. Myburgh for the estate, when claims were put in on behalf of the Agra and Masterman's Bank; the Chartered Mercantile Bank; the Compoir d'Escompte; the Chartered Bank of India, Australia, and China; the Central Bank; the Banking Corporation; the Oriental Bank; the Commercial Bank; the Bank of India; Messrs. Gibb, Livingston and Co. and Gilman and Co., and the election of assignees was proceeded with, resulting in the choice of Messrs. McLellan, Lavers, and Jackson, the latter two being ties. A difficulty arose as to the manner in which the rate of exchange should be settled, to enable the holders of bills on Messrs. Buchannan, Hamilton and Co., to claim against the estate, the holders being almost all at variance on the point. It was, however, decided to note the claims subject to a subsequent decision of the matter. A question also arose as to the right of Jarvie, Thorburn and Co's. estate to certain bills drawn by the Agra Bank here upon their head-office in London, and also certain others by the Chartered Bank of India, Australia, and China, on the City Bank, London, in favour of Jarvie, Thorburn and Co., and by them remitted to Buchannan, Hamilton, and Co.; but which, upon presentation, were refused acceptance by the London banks, on the ground of their holding at the time drafts on Buchannan, Hamilton, and Co., sent subsequently to that firm's bankruptcy. This question, his Lordship noticed, was at the present time before the law courts at home for decision, and it would be best for the claims to be noted subject to the dividend received from the acceptor's estate. If it be ruled that the banks at home have not the right of withholding acceptance, then the parties in whose hands the drafts against Buchannan, Hamilton, and Co. are will have to claim against Jarvie, Thorburn, and Co.'s estate.

The monthly meeting of the Municipal Council took place on the 14th March, when the usual reports of the committees were submitted and passed. The finances showed a satisfactory balance, and the taxes were being promptly paid. The guarantee from the landrenters for Tls. 78,500 for the loan of Tls. 81,200 has been deposited in the Comptoir d'Escompte de Paris and the old one destroyed. The 10 per cent. drainage loan contracted in September, 1862, and the loans from Messrs. Russell and Co. and Messrs. Dent and Co., have been finally paid off. Mr. Fitzroy has not consented to pay a tax on the Custom-house. The annual report of the Works Committee has been completed. Negociations are pending with the Provincial Committee for Administering Municipal Affairs in the "French quarter of the foreign settlements," by which it is expected that the cleansing of the Yangking-Pang creek may be commenced forthwith. The Pekin-road will shortly be opened up fully; the naming of the bye streets and lanes is being proceeded with, the native designations in use being adheared to; the Honque streets will also shortly be named; the dimensions of the new boat-house have been agreed upon, and the last monument of troublous times, in the form of the barrier at the Maloo has been removed. The unslightly flat in front of H.B.M. Consulate is shortly to be converted into a public garden, the Council having received 4,780 taels from the trustee of the fund set aside for that purpose, being the proceeds of the investment of 10,000 taels, the original sum given to the public. Mr. Oliver took the duties of the surveyor's office on the 1st inst. Offers were received from several gentlemen for the post of Consulting Engineer to the Council; but decision is for the present deferred. The present condition of the police cells at the central station requires im-

Digitized by Google

mediate attention, as they are quite unfit for the custody of prisoners, and it will be necessary to make provision for erecting new cells in the yearly estimates.

The gas company of the French concession, for the success of whose projects the Municipal Hall was hypothecated to shareholders by the disrupted municipality last year, have laid the foundations of their laboratory and promise to put gas into either settlement within six months. They propose to supply gas to applicants at a rate equivalent to three dollars per thousand cubic feet—or one-third less than is now charged by the company which, in contradistinction, is called "the English." In time, as coal can be procured at cheaper rates, the price will be even less, the capital of the concern being so limited that a small amount of profit on gas will yield a fair dividend to shareholders. The last call of ten taels per fifty tael share is now being made, and with this there will be quite enough money, it is believed, to do all that is requisite without an increase in the number of shares, or by raising money on bank interest.

The concurrence of the French Consul-General to the new land regulations has not yet been obtained. There appears to have been some misunderstanding as to his not having been consulted, but it is supposed that matters will now be satisfactorily arranged. At a meeting of landrenters on the French concession, held at H.I.M. Consulate on the 10th March, M. de Montmorand announced that the land regulations which have hitherto been believed common to the three settlements have no force in the French concession, not having met the approval of the French Government.

NINGPO.

The Shanghai papers announce that the return of the trade at the port of Ningpo during 1865-6 shows that there has been a decrease in the total value, as compared with the preceding year, of 2,651,467 taels; this appears principally attributable to a falling off in foreign imports. The Foutai of the Chekeang province has been appointed to the governorship of Kwantung.

HONG KONG.

The following items are from the *China Mail* of March 31:—

A meeting of the captains of the French ships now present in harbour has been assembled by M. du Chesne, Consul for France, at which they were informed that in compliance with an international convention or code of regulations signed at Peking on the 5th instant, between the Prince of Kung on the part of China, Sir Rutherford Alcock on the part of Great Britain, and M. Henri de Bellonet on the part of France, it is absolutely forbidden that French agents or French captains of vessels take part in any scheme having for its object the enlistment of Chinese Coolies at Macao.

There has been some talk of a Sanitary Commission having been formed by Sir Richard McDonnel, for the purpose of reporting thoroughly on the sanitary condition of the island generally and the city of Victoria more especially; such an idea would naturally form one of the first which a new Governor for this Colony would wish to carry out, considering the unenviable light in which the climate of Hong Kong must have been represented to him in England.

We hear that the officers of the 9th and Royal Artillery now stationed at Canton to instruct the Chinese are to be withdrawn at once. We have not been informed of the reasons which have led to this movement.

On the night of the 26th instant a fire broke out in some mat sheds and wooden buildings at the end of Queen's Road, West, but was extinguished without material damage having been done. What most surprises us is that so few fires occur, considering the careless way in which the Chinese use fire,—but probably the crowded state of their dwelling houses is their best protection against a fire gathering any head before being discovered.

An accident, luckily unattended by loss of life, has occurred at Aberdeen, part of the earth dam at the entrance of the new dock now building giving way, having caused the dock to be flooded. None of the workmen, very fortunately, were injured, but the pecuniary loss to the proprietors of the dock will, however, be heavy, as the dock has to be pumped dry before the works can be proceeded with.

The publication of a semi-weekly paper at Foochow, of which the first number was issued on the 17th, speaks well for the increasing importance of the foreign community at that port. Our fellow-countrymen do not usually come up to the mark of American communities in respect to newspapers, and it can be safely asserted that had Hong Kong been an American, instead of an English colony, it would long since have witnessed journalistic undertakings of a more extensive nature than those now put forth. The difference in style, and quantity of matter in American journals, as well as in the effects produced by using a different description of type to that commonly made use of by the printers of English papers, is very marked, and it seldom happens that an American will condescend to bring out so small a specimen of the journal class as that which the last steamer has brought from Foochow; but as we may presume that its size is adapted to the wants of the Foochow residents, we welcome the "little stranger" in all sincerity.

A Government notification issued on the 22nd March announces that, owing to the non-arrival of the necessary dies from England, the opening of the Mint was deferred until further notice. As the dies, however, left here some time since, the delay would not be of long duration.

The committee of the Diocesan Female School have issued a circular, in which it appears that after an experience of four years it is found that the institution has not fulfilled all the objects for which it was formed; and, with a view of giving a more extended effect to the benevolent design of the originators, the committee, which comprises some of the most useful people in the community, have decided upon admitting children of every race and nationality to the benefits of the establishment. This is acting on the broad unsectarian principle which true Christianity inculcates, and in a small community like Hong Kong it is very gratifying to see such liberal views displayed. The advantages of the school will be specially appreciated by the married men amongst the troops in the garrison; the difficulty of giving their children even the mere outline of an ordinary education in this country on their meagre pay being apparent to all.

A brig called the *Mary Jane* has been plundered by pirates on her way from Ningpo to Hong Kong. Mr. Tookey, a passenger on board, reports as follows:—The *Mary Jane* left Ningpo on the 10th ult. bound for Hong Kong, with a general cargo; whilst beating through the Lema Channel, and when abreast of Aberdeen, about 7 o'clock on the evening of the 25th March, the brig was attacked by two piratical junks, which ran alongside and threw a number of stinkpots on board, and then boarded the vessel, plundering her of every article of value, including chronometers, spy glasses, &c., leaving the vessel and sailing away after having done so. After the pirates had left, the captain and two of the crew were found missing, and it is supposed that they were killed and thrown overboard. Mr. Tookey states that he would be unable to identify the junks, or any of the pirates, as the night was so dark, but that he would know the property missing from the brig. The gunboat *Janus* had left the harbour in search of the pirates.

The educational report by Mr. Stewart for the year 1865 has been published, and (the *Daily Press* says) gives a very clear explanation of the effects produced by the Government grant. About $8,500 appear each year on the colonial estimates as an education grant, and for this sum twelve native schools are kept on foot. The central school has almost as many scholars as all the village schools put together. The maximum enrolment during the past year was 207, the minimum 179. The total maximum enrolment in all the schools together was 597, and the total minimum 418, but the attendances were not so good in the outlying districts as at the central school, where they were nearly equal to the enrolments. Mr. Stewart has endeavoured to obtain statistics which embrace all the schools in the island, the Government schools and others, and he comes to the conclusion that the total number of children receiving instruction is 1,870. Of the total number of children in the colony, according to the computation of the Registrar General, he assumes that 8,300 may be too young to be taught, but this leaves 14,000 children of an age to receive instruction, all of whom (the 1,870 at school excepted) are growing up in barbarism, training to be the pirates and street thieves of the next generation. The deliberate recommendation of Mr. Stewart is that there should be an education tax, and that all the native children should be compelled to attend the schools. Up to a certain period Mr. Stewart says that the Chinese children make a rapid advance, but after this the progress is not so satisfactory, and out of a class of thirty, not more than five or six attain any degree of proficiency in subjects which call for anything like an exercise of their own faculties. The memory, that is to say, is retentive, but all the more important mental powers weak. This fact illustrates the worthlessness of that

Digitized by Google

which is called education in China. "The Chinese," says the report, "have no education in the real sense of the word. No attempt is made at a simultaneous development of the mental powers. These are all sacrificed to the cultivation of memory. The boy who can repeat correctly the writings of Confucius and Mencius is considered a great scholar, although he may be as ignorant of their meaning as if they were written in a language of which he did not know the alphabet." We hear a great deal about the literary acquirements of the Chinese, the examination in the provinces, and the great cultivation of the men who reach high official rank in China, but it is very much to be doubted if the education of any Chinese properly deserves the name. The low cunning of a monkey or a wild Indian is often the only approach to the intellectual genius that they show; and yet we are told that these people are the most highly cultivated race in the world, a population of metaphysicians, not alone learned, but admirers of learning to such an extent that literary cultivation is the only avenue to high public employment—the only means of obtaining personal consideration. These assertions are flagrantly inconsistent with facts which meet us at every turn, but they are put forward with such daring confidence that observers are driven to say the phenomena presented by the Chinese are incomprehensible to us. They forget that while the intellectual feebleness we behold is apparent to every one who watches the intercourse between China and Great Britain, the intellectual strength of which we are told may exist merely in the imagination of persons who have mixed with the Chinese so long as to have grown bewildered by the multitudinous hypocrisies of an empire which is perhaps the most colossal "humbug" on the face of God's earth.

At a meeting of the Legislative Council, held on the 28th March, the new Governor, Sir Richard MacDonnell, presided. The only business on this occasion was the reading of an Ordinance for the expenditure of 1865. It will be remembered that when the vote for the £20,000 military tax was proposed Mr. Sutherland (unofficial), and Mr. Forth, Colonial Treasurer, opposed it. It appears that the latter gentleman gave offence to the powers in Downing-street by this course, and hence the following:—

The Honourable Thomas Sutherland said that he wished to ask a question which was not relative to the motion before the Council. He wished to ask if there was any difference between the official and non-official members of the council in respect to voting upon questions upon which the Colonial Secretary had already expressed his opinion?

The Governor said any member of this Council was equally free to speak and vote as he liked. Each member might entertain his own opinion upon every question brought before the Council, and it was not to be supposed if he voted that he did so otherwise than in accordance with his own convictions. He (the Governor) would sit a long time in that Council before they would find him offering any opposition to that Chamber to perfect freedom of speech and voting. If the opinion of any official member of Council differed from the settled policy of H.M. Government and he publicly opposed a positive decision of the Secretary of State the latter or the Governor might possibly seek explanations affecting that member's continuance in office whilst using his office publicly to thwart the avowed policy of the Government which he served.

The Hon. Thos. Sutherland said that he referred to an official member's position as a member of this Council. Would such an act as voting in opposition to the Secretary of State's views entail any special consequence as to a government?

The Governor said that he apprehended the Hon. member's question must limit itself to the privileges of a member of this Council; as anything connected with the other rules and customs of the Civil Service could not conveniently be discussed there. He would say that at that board every one could speak and vote as he liked. Every member had in that respect equal freedom with the Governor, and if the official members had any further responsibility they were only those responsibilities which they shared with all office holders in Crown Colonies and which were well understood.

The conversation then dropped.

His Excellency then expressed the pleasure he felt at meeting the Council for the first time for the transaction of business, and as they could have but one common object in their discussions, viz., the promotion of the general prosperity of the Colonies, he trusted that their future meetings would be characterised by united action and cordial sympathy between himself and the members.

His Excellency then adjourned the Council.

JAVA.

We have dates from Batavia to the 2nd April.

On the 18th March the steamer *Sunda*, belonging to the Netherlands India Steam Navigation Company, arrived in Batavia, *via* St. Vincent, Madeira, Ascension, St. Helena, the Cape, and Mauritius, having had a voyage of 105 days. This little steamer is 125 feet long and 18 feet broad, her deck being 2½ feet above water, with a gangway of 2 feet, a draft of 6½ feet forward and 9 feet aft, with a crew of sixteen. She has proved a good sea ship throughout the voyage, which was rather a dangerous one for a ship of her dimensions.

Heavy shocks of earthquake have again been felt for several days at Ambarawa, Banjoe Biroe, and Willem I. Notwithstanding, these shocks are not to be compared to those of the 17th of July last year, when the three above-mentioned places were destroyed. Great fears are entertained for another severe earthquake, which might have still more serious consequences than the first.

News from the Moluccas, concerning the expedition to Ceram, is most satisfactory.

The state of affairs on the west coast of Borneo (Pontianak) remains much the same as before; reinforcements are being sent from Java, amongst which is a company of African soldiers, who, it is expected, will cause a great havoc amongst the enemy.

The French ship *Vellore*, Captain Didier, is said to have been wrecked on the Island "Amsterdam"—six lives lost. The information has been given by a gentleman of the name of E. Morisse, dated St. Paul and Amsterdam, 16th February, and brought to Batavia by the ship *Jan Van Schaffelaar*, Captain Van Duyn, bound to Singapore.

Captain Langmald, master of the English ship *Charlotte of Derby* (which arrived in Batavia on the 20th March), has given information that he has seen the wreck of a full rigged ship at three-quarters of a mile from Tjelaka point (Poeloe Liat) in the Strait of Macclesfield. He could not succeed in getting the name of the ship. As far as the eye could reach no sign of life was visible, either on board or on shore, although a little more in the interior a kampong and the rigging of a schooner could be seen. A strong current ran southward, which made it impossible to lower a boat to make further inquiries.

We understand (says the *Straits Times*) that after next month the new Netherlands Steam Company will run four instead of two steamers monthly to Java. Two of these will, as at present, go direct to Batavia, the other two, leaving this (Singapore) at intermediate dates, will proceed to Samarang, and, after a few hours' stoppage, on to Sourabaya. We also believe that this company intends to despatch next month (May) one of its most powerful steamers by way of Torres Straits to Brisbane in, North Australia, with a view ultimately to the establishment of a regular monthly mail between there and Batavia.

STRAITS OF MALACCA.

SINGAPORE.

Our dates hence are to the 9th April. The latest mail from England was, as noticed in our last number, that of the 26th February, which arrived out on the 3rd April.

The settlement was much distressed at learning that the transfer to the Crown was likely to be yet longer delayed. The *Straits Times* remarks:—"The intelligence to hand respecting the progress of the transference of this settlement to the Crown as gathered from the Parliamentary reports of the 20th Feb. have created here a profound sentiment of chagrin and disappointment. This is not so much the case because the ultimate realisation of the measure is in any way despaired of, as on account of the uncertain delay which threatens to mark its final accomplishment. When a member asks whether any steps have been taken towards the fulfilment of the measure, or if it has been definitely abandoned, and a minister replies that, though not abandoned, it is postponed, waiting the inquiry of the War or any other department (an inquiry which to our knowledge has hung over the last two years), there is room for but little encouragement to those whose interests are perilled on the decision. Nor is there any consolation to be derived from the circumstance that all this delay arises not from opposition but from indifference. In anticipation of the accomplishment of this transfer, the settlement has been almost entirely withdrawn for the last four years from participation in the general legislation of India. It is now, therefore, far too late to think of drawing back,—to go back would simply be to retard, if, indeed, not to violently throw in arrear by so many years the progress of the place."

Her Majesty's steamer *Basilisk*, Captain Hewett, from England *en route* to Hong Kong, anchored in the harbour on the 28th March.

Sir Benson Maxwell had arrived from Penang, and would commence his first Criminal Session on the 9th April. Sir Benson succeeds to the Recordership of Singapore, and a new judge will have to be appointed for the Penang division of the

Digitized by Google

court; but these changes had not been yet formally announced. The hon. and learned gentleman had been employed in disposing of a suit for wages on the Admiralty side of the Court, brought by the second officer and two of the seamen belonging to the British ship *Venilia*, at present lying in the harbour, bound to Macao, against the said vessel for the recovery of their wages, amounting altogether to about £194.

The Bishop of Labuan was expected at Singapore at the end of April.

Great preparations are being made for the ensuing spring race meeting, to commence on the 24th instant. A large number of horses have been put in training, and considerable interest is exhibited.

The pilgrim ship *Alliance*, of Singapore, has been totally wrecked on an island in the neighbourhood of the Consular port Mussowah, near Jeddah, in the Red Sea. She ran on shore in the night time, and next day began to make water, and eventually filled. Her cargo consisted of sugar and pepper, about 20,000 dollars' worth, which was uninsured. Crew and pilgrims all saved, as well as a portion of the cargo, by boats from Mussowah.

The British brig *Utternissah* was put up for sale by auction on the 22nd March, and realised $2,775.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

COOPER—On the 24th March, the wife of W. M. Cooper, Esq., of H.M. Consulate, Swatow, of a son.

CONNOLLY—On the 6th May, at Clunagh House, Tullamore, King's County, Ireland the wife of Andrew Connolly, Esq., late of Shanghai, J.P., of a son.

COPLAND—On the 5th May, at 3, Bedford-terrace, Clapham-rise, the wife of P. Copland, Esq., of a daughter.

LOUREIRO.—At Macao, on the 27th March, the wife of Mr. Pedro Loureiro, of a [illegible] daughter.

WADE—On the 6th May, at Upper Seymour-street, Portman-square, the wife of Richard B. Wade, Esq., of a son.

MARRIAGES.

BOREL—HUSKISSON.—On the 19th April, at the British Legation, at the Hague, Mons. William Borel, eldest son of Mons. Robert Borel, of the Hague, and of Ysson, near Paris, to Miss Mary Emily Milbanke, eldest daughter of his Excellency Sir John Ralph Milbanke Huskisson, Bart., British Minister in Holland.

BABECOST—BANDY.—On the 31st March, at St. Andrew's Church, Singapore, by the Rev. C. J. Waterhouse, Captain Charles Babecost, of Bangkok, to Miss Elizabeth Bandy, of Singapore.

DARBY—ANDERSON.—At Foo-chow, on the 7th March, on board the American barque Forest Belle, M. Darby, to Miss Hannah Anderson.

DEATHS.

ALLAN—On the 30th April, at Albert-terrace, 191, Renfrew-street, Glasgow, Agnes youngest daughter of the late John Allan, Esq., Writer.

BALL—On the 27th March, at Canton, the Rev. D. Ball, M.D., Missionary to the Chinese, of the A.B.C.F.M., aged 69 years; 28 years in China.

BARROW—On the 8th March, at Shanghai, John Barrow, of the French Police Force, found brutally murdered near the American Mission House, French Concession.

BOXER—On the 30th March, at Hong Kong, Sophia Charlotte Boxer, wife of William Boxer, chief storeman of H.M.'s Naval Victualling Store Department.

FUNFSGELD—On the 26th March, at Hong Kong, Mr. T. Funfsgeld.

HEDSTROM—On the 24th March, at Hong Kong, Mary, wife of Captain Hedstrom, of the British ship Vortigeur, aged 23 years.

HANSARD—On the 5th May, at 19, Upper Berkeley-street, of scarlet fever, Albert William Hansard, Esq., in his 45th year.

HAWKE—On the 26th March, on board the P. and O. Co.'s S.S. Simla, of bronchitis Richard Treryn Morison, infant son of R. F. Hawke, Esq., of H.M.'s Naval Yard, Hong Kong, aged seven months and 26 days.

MCCARTHY—On the 21st March, at Shanghai, Margaret Catharine Ann, the youngest daughter of J. H. and Eugenia McCarthy.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—CANTON.—Very little has been done in this market, and the few transactions reported show no alteration in prices. Some musters of new Canton Gunpowders and Young Hysons have been shown, consisting principally of only medium quality, but as the bulk has not yet been

Digitized by Google

made up, no opinion can be formed of the general character of the new crop. Prices asked by the teamen at present are extreme, as high rates were at first paid for the leaf in the country, but which are now declining considerably.

FOOCHOW.—The only settlements of the fortnight consist of 515 chests and 543 half-chests of Congou at 9¼ to 19½ taels. Stocks are reduced to 600 chests Congou, 300 chests Pekoe, 100 half-chests Oolong, and 800 boxes Scented. The season may be said to be over. The Medina is expected to load, and to take the remainder of the old teas.

SHANGHAI.—Black Teas: There has been no business beyond the purchase of 500 chests of Shanghai packed Congou at Tls. 19 to 21, and 220 chests of Dust at Tlt. 11¼ per picul. About 1,300 chests have been reshipped, and 700 chests common Oonam remain in stock. Contracts are being entered into for the purchase of the new crop, and several teamen have already left for the tea districts. Green Teas: After the arrival of the mail reporting lower rates in London, holders were induced to make a concession on previous prices, and settlements have taken place of 11,200 ½-chests, showing a decline of two taels on fine and three taels on medium kinds. The arrival from Kiuklang of about the same quantity leaves the stock much as last stated.

KIUKIANG.—Black Teas: The settlement of 500 chests local packed tea at 13¼ taels is the only business reported. One other similar chop of 300 chests composed the stock. Green Teas: Only three chops had been settled during the fortnight at 21, 23 and 30 taels respectively, but a total of nearly 8,000 packages had been shipped to the Shanghai market chiefly on native account. Only 1,700 half-chests remained in stock, against 120,700 half-chests at same date last year.

YOKOHAMA.—Since the departure of the mail there has been very little business done in the Tea market, and prices are rather easier. There have been no transactions for the London market, the bulk of the purchases being made by the American houses. The season for tea here may be said to be nearly closed, the arrivals from the interior gradually falling off and the stock of qualities suitable for export being very low.

RAW SILK.—CANTON.—A further decline has been established on all the descriptions at present obtainable, and the purchases reported are for India, with the exceptions of the rereeled Cumchuck for America and Waste Silk and Pierced Cocoons for Europe. The new crop it is expected will open at very much lower prices.

YOKOHAMA.—Japanese dealers, unable to form an opinion for themselves on the prospects of our home markets, and induced by their experience of the past to expect a further advance in prices, have, as was noted in the last report, deposited large quantities of silk with foreigners, taking advances against it in order to gain time. During the past fortnight, a few only of these deposits have been redeemed. Foreigners have shown so little disposition to buy at previous quotations, that settlements hardly reach one hundred piculs, and the unsold stock, both in foreign and native hands has increased to a total of from 3,000 to 3,500 Japanese bales. In spite of facts so opposed to their expectations, the Japanese dealers remain remarkably firm in their pretensions. Transactions during the fortnight have been so limited that most of the quotations are nominal, and only show how unsettled the market is. The export is now 9,000 bales, against 10,735 bales last season at same date. The quotations are:—Ida, best, none; medium, per picul, $800 to 850; inferior, $700 to 790; Mybash and Sinchu, best, $900 to 950; medium, $800 to 880; inferior, $750 to 800.

DRUGS AND OTHER SUNDRIES.—CANTON.—Cassia Lignea: No stocks. Supplies of the new gathering are expected in about a month, when the present nominal quotation of $19.50 is expected to undergo a reduction. Cassia Buds $41. There is nothing doing, though 50 piculs have been offered. Galangal is still depressed, and is quoted at $2 per picul—stock about 300 piculs. Cassia Galls have been reduced to $15 by the arrival of 200 piculs, which are now on offer. Vermilion $38.50 per box of 50 catties. Rhubarb remains as last reported.

CAMPHOR.—HONG KONG.—Further sales of Formosa have taken place at $26 per picul packed, leaving a small stock of 150 piculs in hand.—Further supplies are shortly expected.

CHINA IMPORTS.

HONG KONG.—The ship Belted Will, from London, with general cargo, arrived on 29th March. She brings 85,000 pieces of Grey Goods. There has been a very small business transacted in all staple articles of import, save Rice, throughout the fortnight, notwithstanding the favourable news received per Ottawa. Yarn has been neglected. 8.4 lbs. Grey Shirtings have been sold "to arrive" at from $4.55 to $4.70, and $4.75 is the highest price that has been obtained for first-class goods on the spot, while some of inferior quality have been sold as low as $4.45 per piece. Many holders, however, will not entertain such rates, and withhold their goods from the market for better prices, and for this reason we make no change in the higher quotation, which, however, is quite nominal. T-Cloths have been inquired for by Chinese, and sales slightly exceed last fortnight's. Fancy Cotton Goods have also attracted attention, but to effect sales some concession in price has had to be made.

RAW COTTON.—A considerable decline in prices will be observed, owing to the total absence of demand both on the part of Chinese and foreigners during the first part of the fortnight.

WOOLLENS remain unnoticed, and prices still have a downward tendency. The last steamer from Japan brought news of a great fall in the price of Camlets, large sales having been effected there at very low rates.

METALS.—More business has been done in Iron than was reported in last circular, but the demand continues very moderate. In Lead there is no change to note; the settlements reported are at former rates, and are chiefly made up of the inferior qualities.

COALS.—There has only been one settlement during the fortnight, at a rate which fully supports quotations. $14.50 has been offered for first-class English coal "to arrive." There have been no arrivals.

RICE.—Shortly after the departure of last mail a large number of rice ships came into port, and owing to the anxiety (principally of native holders) to sell ex-ship, a serious fall in rates took place, and sales were made at 30 to 40 cents below last quotations. This has been followed by a slight rally, but the market remains very weak. There are thirty rice-laden vessels in harbour, and it is difficult at the moment to obtain even an offer from the native dealers. Many holders are very firm, however, and show no anxiety to sell at present rates.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London: March 12, Taeping; 23, Flying Spur. From Sunderland: 13, Emerald. From Cardiff: 14, Vanguard; 23, Fairleader. From Hamburgh: 15, Catherina.

At HONG KONG AND CANTON.—From London: March 29, Belted Will. From Liverpool: 23, Timavo. From Boston: 22, Sooloo.

At MANILA.—From Liverpool: March 22, San Luis.

At SINGAPORE.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For New York: March 15, Resolute.

From HONG KONG and CANTON.—For London: March 29, Fort Regent. For New York: 24, Eastward Ho; 24, Tailee.

From MACAO.—For Havana: March 15, Altagracia, Burdens and Havana No. 1; 24, I.A.V. Burdens and Havana No. 2, D'Maria Pia.

From MANILA.—For Liverpool via Cebu: March 10, Otano. For Queenstown: 16, Crest of the Wave. For New York: 19, Enoch Train.

From SINGAPORE.—For London: Como, Moneka—cleared for Liverpool, Pieter Adolf. For New York: Cymberline.

VESSELS LOADING.

At YOKOHAMA.—For London: Norfolk, Chanticleer.

At SHANGHAI.—For London: James Wishart, Vanguard. For New York: Finzel.

At FOOCHOW.—None.

At HONG KONG and CANTON.—None.

At MANILA.—For London: Her Majesty.

At SINGAPORE.—For London: Strathmore.

FREIGHTS AND CHARTERS.

YOKOHAMA.—To London: Tea and cotton, £2 10s. to £3 per ton; silk, £4 to £4 10s.

SHANGHAI.—No new charters have been effected for home; the rates, which are nominal, are: London and Liverpool, £3 to £3 10s., and New York, £3 10s. A good demand exists for suitable vessels for the coast ports.

FOO-CHOW.—There is no vessels loading or on the berth, but the Medina, expected from Shanghai for London, will close the season's export.

HONG KONG AND CANTON.—Nothing has been done from these ports in home charters, but several settlements have been made to load at the Phillipines, with a continuing demand for vessels at £3 10s. to Great Britain, and 5s. extra to Continent.

MANILA.—There have been no settlements for the U.K., since last mail, no suitable tonnage having been available; but to a direct port £3 10s. for sugar and £4 per ton for hemp could be obtained. The Adolfo (Spanish) has been taken up to load a cargo of rice for Havana, at £4 per 20 cwt.

SINGAPORE.—The Strathmore, the only vessel on the berth for England, is loading very slowly at £2 dead weight, £2 10s. light freight; no new charters, have taken place. The Pieter Adolf has cleared for Liverpool, and the Cymberline for New York.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—March 20, Luconia, from Newport to Singapore; H.M.S. Basilisk, England to China; 23, Union, Bordeaux to Batavia; 24, steam packet Amsterdam to Soumbaya; 15, Stad Delf and Joh Anthonius, Rotterdam to Batavia.

From UNITED STATES to CHINA, &c.—March 14, Daniel Draper, Boston to Batavia.

From CHINA, &c., to ENGLAND and CONTINENT, &c.—March 17, Ærolite, Shanghai to Liverpool; J. Shephard, Shanghai to London; 20, A. Beyling, Batavia to Rotterdam; D. Hermanos, Emelie, Macao to London; 28, Independent and Bengale, Macao to Havana; L. Berginta, Japan to London.

From CHINA, &c., to UNITED STATES.—17, Appelina, from Singapore; 18, Diligentia do., Amaranth, from Amoy; 21, Spirit of the Day, from Japan; 28, Diamond do., all to New York.

COMMERCIAL POSTSCRIPT.

The tea market remains very flat. A sale of unpaid prompt lots will be held this week. The Canton new makes, which arrived per last French mail, have not yet been placed. The price asked is 2s. 6d. Last year they fetched 2s. 10d. and 3s.

The Circular of Mr. Page notices:—

BAR SILVER.—The demand for India has for the present entirely ceased; at commencement of the mail a few transactions occurred at 61 1-16th to 61¼, but the small quantity of silver subsequently received by the Royal Mail packet was taken at 61¼d. for the Continent. The aggregate shipments to the East recorded since 25th April amount to £74,525, the bulk of which was settled prior to close of last mail. There is a good demand for the Continent, and the supply being extremely limited, the price has nominally advanced to 61½ to 61⅝d.

MEXICAN DOLLARS.—The Royal Mail packet brought about £80,000, which was settled on 3rd inst. at 60d., showing a further decline of ⅛d. per oz. on last transactions. Notwithstanding this reduction in price only £15,983 was shipped to China, the remainder being taken for the Continent. There is at present no appearance of enquiry for China, and there is little or no supply on the market.

ARRIVALS NOT INCLUDED IN THE TABLES.—May —, at Deal, from Colombo. Garibaldi; 12. from Manila, Maulmain; at Falmouth, from Batavia, Zeepaard (leaky); 11. from Padang. Uncas.

DEPARTURES.—April 27, Anita, Captain Askins, for Shanghai, from New York; 28. J. W. Seaver, Captain Snow, for Nagasaki, from New York; May 10, from Cardiff, for Hong Kong, Evangeline; 12, from London, for Hong Kong and Canton, Robin Hood, Portland; for Colombo, Spanker.

SPOKEN.—Elizabeth Ann, Colombo to London, May 25, 7 S., 15 W.; Noach, Rotterdam to Batavia, May 1, 49 N., 6 W.; Caldera, Sunderland to Hong Kong, March 21, 15 S., 27 W.; Anna, for Batavia, March 29, 1 N., 28 W.; Runnymede, London to Hong Kong, March 21, 8 S., 29 W.; Rajah of Cochin, Shanghai to London, April 1, 16 S., 6 W.; Suffolk, Java to Amsterdam, April 7, 12 N., 31 W.; No. 0248, 3rd d.p. Colombo to London, March 12, 27 S., 3 E.; Burgermeister, v., Middelburg, Newport to Singapore, March 20, 11 S., 29 W.

LAID ON.—At London: For Hong Kong and Canton, Red Riding Hood.

MISCELLANEOUS.—Off Ascension: April 10, from Banjoewangie for Amsterdam, Telanak, Popken.

THE LEVEE.

By command of the Queen a levee was held on Saturday, the 12th inst. at St. James's Palace, by his Royal Highness the Prince of Wales on behalf of Her Majesty. The presentations exceeded 180 in number. His Highness Datu Tumongong Abubakar, Sri-Maharajah of Johore, accompanied by his cousin, Unkoo Mahommed Hadji, his private secretary, Bantara Jaffir, and Dr. Scott (in charge), was presented by the Earl de Grey and Ripon, Her Majesty's Principal Secretary of State for India. The Nawab Syud Asghar (Khan Bahadoor, of Moorshedabad), and the Nawab Syud Ahmad Ali, were also presented by Earl de Grey and Ripon. Among the general presentations were the following:—Viscount Halifax, on being created a Peer, by Earl Russell; Rear-Admiral Sir John Hay, Bart., M.P., on promotion, by Sir Thomas Cochrane; Lieut. Kuper, R.N., by Vice-Admiral Sir Leopold Kuper; Vice-Admiral Sir Leopold Kuper, by the Duke of Somerset; and Sir Richard Bolton M'Causland, on his return from Singapore, by the Secretary of State for India.

APPOINTMENTS.—No step has yet been taken for filling the Lordship of the Treasury vacant by the appointment of Mr. Knatchbull-Hugessen to be Under-Secretary for the Home Department. The Hon. G. James Agar-Ellis, now Second Secretary at Paris, has been promoted to be Secretary of Legation at Athens. Mr. Francis Ottiwell Adams, Second Secretary at Washington, has been appointed Second Secretary at Paris. Mr. Edwin Corbett, now Secretary of Legation at Munich, has been appointed Chargé d'Affaires and Consul-General in Central America. Mr. Fenton, Secretary of Legation at Athens, has been appointed Secretary of Legation at Munich. Mr. Henry Grant has been appointed Consul at Brindisi. Mr. Wm. Robinson, lately administering the Government of Montserrat, has been appointed Governor of the Falkland Islands, in the room of Captain Mackenzie.

THE LOSS OF THE STEAMER "JEDDO."—A court of inquiry has been held at Bombay on the wreck of the Peninsular and Oriental Navigation Company's steamer *Jeddo*, which occurred on the 2nd of February last on that coast, involving a loss of £120,000. The *Jeddo* was an iron-built screw-steamer, 1,631 tons register and 450-horse power, and was employed on the China and India trade. She left Hong Kong on the 15th of January last for Bombay, with the mails, passengers, and cargo, under the command of Captain George Alexander Grainger, who has held a master's certificate of service since 1855. The Court suspended his certificate for six months.

THE CHINESE MISSION.—Ping, the Commissioner, and suite, who has been in Paris during the past week, is expected to arrive in London on the 16th. We understand that Mr. Hart is already in England.

Continental Intelligence.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 8.

For the last six days the Second Chamber of the States-General has been discussing the Culture Bill, which is destined, if it be passed by both the Chambers, to introduce a social revolution in our East India possessions. Without any doubt it will be a measure of much more importance than that by which slavery was abolished in our West-India possessions. A great many speeches have been delivered upon the subject, and of course I can only trace their general tendency. The opinions put forward may be divided into three classes:—those of the Conservatives, who reject the principles of the Bill; those of the Liberals—say Ministerialists—who approve of them; and those of the Radicals, who do not agree with the Bill, because its principles do not go to the root of the matter, and a policy of compromise is attempted. The first defend the policy, *à tort et à travers*, of maintaining that culture system which, since 1830, has poured about 200,000,000 guilders into our treasury. The Liberals applaud the first step to abolish that system, but advocate that all the cultures should not be left to private industry, and warmly approve that Government still desires to retain the revenues of the coffee-culture. The Radicals defend stoutly their opinion that the measure must be final and that all inveterate abuses must be abolished at once. They do not profess themselves satisfied with the present measure, which will be accepted by them as an instalment, if they do not succeed in improving the Bill by the amendments they intend to propose. But nevertheless they do not hesitate—as was proved by the speech of Mr. Van der Linden—to urge on the House the expediency of accepting the Bill. The principal point of the debate, however, was the question whether it would be for our interests and those of the natives to give the latter the faculty of individual property in land, and to leave the mercantile part wholly to European industry. You know that till now our King is the sole possessor of the soil in our East-India colonies.

To-day Mr. Fransen van de Putte replied to the several arguments. The power and the impetuosity of his eloquence were never more apparent than in this reply, but the question is whether he has warded off defeat. But as a defence of his Bill, as a reply to the arguments and the doubts of those who avowed their hostility to the Ministerial measure, it was a good display of parliamentary eloquence. He stated that the coffee culture would be maintained, that the sugar culture would be abolished within a certain period, and that the taxes for India will be revised. The Minister of Finance defended the measure from a financial point of view.

To-morrow the general discussion will be continued, but it is thought it will soon be closed and a beginning will be made with the clauses, when an amendment will be proposed by Mr. Van der Linden, which, it is said, will be supported by Mr. Thorbecke, who has not yet spoken. It is impossible to foresee the fate of the Bill, but every one will be greatly surprised if the Government were supported by a large majority. That the Ministry is not at ease is proved by the fact that no proposals will be made to any one to accept the portfolio of Marine, till the decision on the Culture Bill has been come to.

On the first of May all communal excises were abolished.

The first steps are being taken to realise the plan for turning into dry land the greatest part of the Zuyder Zee—a public work which will cost nearly 40,000,000

The cholera epidemic happily does not increase here. Since it broke out 204 persons have died, and now about forty persons daily are attacked, of whom a tenth die. The sickness, however, spreads, and has made its appearance in several villages in the neighbourhood, as well as in Utrecht and Amsterdam. As to the cattle plague, it is still decreasing. In the week ending on the 28th of April only 879 rinders were attacked, while the number reached 1,647 in the week preceding.

COMMERCIAL.

COFFEE.—The market closes rather dull, and the private transactions were done at decreasing prices. The following parcels were sold:—1,570 b. Java ex Anthony van Hoboken, at 44½ cents; 6,000 b. ditto ex Friedrich and Hendrik Jdo. Ambacht, at 40 to 47 cents; 4,500 b. Padang ex Princess of Wales, at 38 to 47½ cents; 5,093 b. Java ex Friedrich, at 40 to 51½ cents. The 5,730 b. Java, 813 b. Padang, and 266 b. Macassar offered in auction on the 1st were partly sold at very low prices. The 2,500 b. Java ex Marie, Copernicus, and Philips van Maring were sold at prices which did not transpire. The total stock amounts to 473,200 b., against 656,300 b. in 1865. The Dutch Trading Company will sell in auction on the 16th inst. 83,640 b. Java, Padang, and Macassar.

SUGAR.—The condition of the market is rather favourable, and about 4,000 Kranjangs were sold floating at prices kept secret. On the 24th the Trading Company will offer in public auction 64,700 mats Java. The stocks consist of—Trading Company, 183,315 mats; private, 30,268 mats.

RICE.—The market is unaltered. Only 6,800 b. Rangoon were sold floating at 6¾f.

SPICES.—There has been very little inquiry, and there are no sales worth reporting. Stock:—Nutmegs, 6,263 casks; Mace, 1,782 casks; Cinnamon, 2,357 fard.; Pepper, 3,185 b.

TEA.—The 17,514 ¼, and 996 ½ chests Java offered in auction by the Trading Company were all sold; the valuation, however, was not paid in full, but the general opinion was that the brokers had valued too high. A great part of the auction, and in particular the fine sorts, were bought for English account. The prices paid were:—Boey, 800 ¼-chests, 16 ½-chests, 55-97c.; Congo Boey, 240 ¼-chests, 75-103c.; Congo, 6,432 ¼-chests, 44 ½-chests, 71-151c.; Pecco Congo, 140 ¼-chests, 92-124c.; Kempoey, 83 ¼-chests, 103-107c.; Pecco Kempoey, 75 ¼-chests, 143-169c.; Souchong, 4,743 ¼-chests, 43 ½-chests, 64-154c.; Pecco Souchong, 718 ¼-chests, 47 ½-chests, 76-106c.; Pecco, 1,311 ¼-chests, 223 ½-chests, 90-300c.; Orange Pecco, 198 ½-chests, 107-161c.; Thunkay, 1,640 ¼-chests,

Digitized by Google

34 ½-chests, 48-104c.; Schin, 385 ¼-chests, 46-71c.; Hysant, 993 ¼-chests, 55-146c.; Uxim, 20 ¼-chests, 70 ½-chests, 82-150c.; Joosjes (G. B.), 9 ¼-chests, 160 ½-chests, 112-173c.; Joosjes (F. B.), 86 ½-chests, 151-189c.

TOBACCO.—The market has been very quiet, and a limited business has been done. On the 9th some parcels were offered in auction, being the stocks of the houses which stopped payment in the last weeks. The first hand stocks consist of 16,079 b. Java; 3,665 b. Manila.

MANILA CIGARS.—Enormous quantities, say 790,000 ps., were offered in private auction since our last report, but buyers decline to operate at the actual prices, so that the very greatest part was bought in at 36f., and only a trifling quantity, 2 a. Cortados Cavita, were sold at 34f.

JAVA INDIGO.—The 3,245 piculs offered in auction by the Trading Company were sold. The prices paid, compared with those of the last autumn, give the following results:—Ord., 10 to 40c. lower; good ord., pari to 20c. lower; middling, pari to 25c. higher; fine, 30 to 50c. higher. 100 Cer. Guatemali were partly sold at 265 to 395c., and 7 ch. Bengal were paid with 600 to 625c. At private auction there were offered 170 ch. Java, of which 141 ch. were sold at 260 to 655c.

COCHINEAL.—The 21 ch. offered in auction were sold, No. 1, at 235 to 240c.; No. 2, 210 to 215c.; Zaccetelli, No. 8, 190 to 195c.; No. 9, 200 to 215c.

RATTANS.—The imports being very unimportant, the market closes dull. Only 110 piculs, ex Hendrik Jdo. Ambacht, 250 piculs per Lichtstraal, 173 piculs ex St. Helena, and 650 piculs, ex Lady Ann, were sold.

MOTHER O'PEARL SHELLS.—50 piculs Macassar ex Macassar were sold by inscription at secret, but very high prices. There is much inquiry for this article.

SAPANWOOD.—460 piculs Manila (floating) are brought into the marke at 9f., but there are no buyers at this price. The nominal quotation 8¾f. for 1a Manila; 8f. for Bunas; Java 6½ to 7f.

BANCA TIN.—The market is dull. 1,200 slabs were sold at 47½f. and 400 slabs at 47¾f., but now can be sold easily at 47¼f. The stock amounts to 66,165 slabs, against 163,201 in 1865.

HIDES.—The following parcels were sold since our last report, 920 ps. Batavia ex Marie 6,000 ps. Saurabaya, Rinder ex Baltimore, and 2,516 ditto ex Bristolian.

ARRACK.—There has been no animation in the market, and business has been of a very trivial character. 18 half and 50 quarter-casks Batavia, ex Lady Ann, only were sold, at prices which are kept secret.

DRUGS.—The market remains firm for nearly all the articles. Camphor:—In consequence of the English market there is more inquiry; but holders demand too high prices, so that business is stopped. Cassia Lignea can be bought at 63c. Gum Elasticum: With a trifling stock; very high prices are demanded. Japan Wax in waiting for the auction of the trading company, on which 2,918 ch. will be offered, without business.

CURCUMA unaltered; the nominal quotation is 11½f.

GAMBIER.—Only a limited business was done at 13f.; but nothing can be bought now under 13½f.

COTTON.—The market is dull, and the transactions in East India and Japan qualities of no importance.

MONEY MARKET.—Since the warlike news a panic has shown itself on the Exchange, and makes daily, in almost all descriptions of stocks and shares, further progress; and there seems no alternative but to permit it to have its course. The time will arrive when reason will return; but when? It must come quickly, because ruin will inevitably follow should the panic continue a little longer. The sellers now urge that no rational hope can be entertained for peace; quotations are forced down, and with them the transfers. The supplies of money are very scarce, and the Bank was compelled to raise the discount ½ per cent. Dutch Two-and-a-Half per Cents., 56¼; Three per Cents., 68½; Four per Cents., 89¼. Trading Company, 141; Rotterdam Bank, 101. Five per Cent. Austrian Metalliques (Amst.) 62; Silver, 1865, 49⅞.

EXCHANGES.—London, 3 mo., 11.53f.; 2 mo., 11.60f.; short, 11.72f. Paris, 3 mo., 46.40f.; 2 mo., 46.57½f.; short, 47f. Hambro, 3 mo., 34.75f.; 2 mo., 34.85f.; short, 35.20f. Bremen, 3 mo., 119.40f.

SHIPPING.—ARRIVALS.—April 26: At Brouwershaven, from Banjoewangie, Erbherzog Ferdinand Max; May 4, at Texel from Batavia: Azia; 5, from Banjoewangie: Zeenimph.

DEPARTURES.—April 27: From Texel for Batavia and Japan: Princess Amalia; 29, for Batavia: Den Elshout; for Samarang, Drie Gezusters; from Brouwershaven for Batavia: Noach; May 2, for Singapore (via England) Nieuwland.

PASSENGERS OUTWARD.

For Java, per Three Gezusters: Mr. A. Mulle and family, H. Klokke, Mrs. R. Moritz; per Princess Amalia: Messrs. Bosscher and family, Schenck and family, Boogmans and family, Grœnhoff, Draayer, Conard, Winter, Lastdrager, and ter Poorter, Mrs. Munnich and family, Misses Ouwens, van Duyn, and Walen; per Noach: Mr. Hoorweg and family.

PASSENGERS INWARD.

From Java, per Azia: Mr. H. M. Dabroek, Mrs. Hazel and family, Mrs. Heerman van Loon and family.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, May 7th.

The six young Japanese sent to Russia have arrived at St. Petersburg and been presented at the Asiatic Department to the Minister for Foreign Affairs. The *Northern Bee* says: "It is well known that the Government of Japan, in sending these young men to Russia, had in view a scientific object; the eldest of them is only eighteen years of age, and the two youngest are only twelve. They are to receive a European education, and thus acquire knowledge that will enable them on their return home to introduce many improvements and inventions hitherto totally unknown in Japan. Other young men have been sent to France, England, and Holland for the same purpose. The Japanese now at St. Petersburg were brought over in the Russian corvette *Bogatyr*, which landed them at Cherbourg, whence they came on by the railway through France and Germany. When they presented themselves at the Asiatic Department, under the protection of which they will remain during their stay in Russia, they wore European dresses and had had their hair cut, notwithstanding which their features bear such a striking Asiatic type as to cause them to be immediately recognised as genuine natives of Niphon." The *Bogatyr* arrived the day before yesterday (5th May) at Kiel, on her way up the Baltic to Cronstadt.

By the last overland mail despatches were received at Vienna, announcing that on the 12th of March last the Imperial Austrian Consulate at Bangkok was formally and officially opened with the consent of the Siamese Government, and before the conclusion of any treaty. Herr Augustus Redlich has hoisted his flag, and officiates as the first Austrian Consul, which may be considered a distinguished mark of goodwill on the part of Siam.

The Leipzig Fair is over, but without much improvement, and it is seriously contemplated discontinuing it after next year, when it will have been in duration for four centuries, but has outlived the object for which it was originally instituted. Woollen goods had a heavy sale down to the close, though many manufacturers were obliged to dispose of their goods at any price, and this only tended to dampen the market still more. The prices of leather were also not able to rally, and the article continued depressed to the end. More animation obtained at last in furs, and several parcels of country fox-skins, as well as 8,000 stone-marders, were bought for Russia at former rates. The Greeks purchased 10,000 Virginia red fox, and were still buyers to the last. Some few parcels of Hamsters, which were in request, were 10 per cent. better than at the last fair. Black cats were quite neglected, though generally a favourite article. The Boles bought a good number of land beavers, and paid full value. The Russian peltries arrived just before the close of the fair. Grey squirrels sold rapidly at higher rates, but ermines found no demand, and might have been bought at ridiculously low prices. Squirrels' tails were very scarce, and fetched remarkably high rates. The supplies of furs from the Crimea and Ukraine did not arrive in time, and from Astrachan only in small quantities.

A violent shock of earthquake was felt at Irkutsk on the 8th of March, but the inhabitants were more frightened than hurt. Within three minutes two shocks took place and the houses shook as if about to crumble to pieces. As it happened in the middle of the day, the inhabitants rushed into the open air. Fortunately the only real damage done was confined to the fall of a wall at the back of the post-office and a few columns of the gymnasium. During the whole of the month of February the cold was very severe, the thermometer ranging between 35 and 40 degrees of Reaumur, or 47 to 58 degrees below zero of Fahrenheit.

The ice of the Wolga broke up on the 14th of April, and began to drift on the following day, in consequence of which the communication between the inhabitants of the two banks is for the present suspended, and will remain so till the river is clear of ice.

The Senate of Hamburg, in conjunction with the Senates of Lubeck and Bremen, have appointed Herr Carl Johann Mestern, of Canton, to be Hanseatic Consul at that port. Patent dated May 2, 1866.

COMMERCIAL.

Owing to the uncertainty of political events the produce market has been and still is in a very unsatisfactory condition. The sales of coffee during the fortnight were not more than 15,000 bags, but prices remain well supported, as the holders are not intimidated, and feel convinced they have only to bide their time. On the other hand sugar, both raw and refined, has given way fully 12 sch. bco. per centner, and even at this reduction is difficult to sell. A fair amount of business has been done in rice at former rates. Nothing of consequence has taken place in spices, though the market is firm, and higher prices are demanded for mace and nutmegs. Tea is steady, with considerable sales by importers of the fresh arrivals, among which were 402/2 and 311/8 chests Congou ex Asia, 248/8, 167/16, and 228/4 chests Pecco ex Florentin, 867/8 chests Congou, and 215/4 chests Souchong ex Aldebaran, 600/16 chests Imperial and 200/8 chests Souchong ex New Ed., and about 500 chests, principally Congou, out of the other stocks in warehouse. Spelter: Considerably lower, and no purchasers. The only transaction reported was 2,000 centners of Short Slabs in loco at 14 marks 8 sch. banco. Discount 6½ per cent., with a tendency to go higher. On the Stock Exchange the panic continues, the securities mostly affected being Austrian and Italian.

SHIPPING.—ARRIVED.—April 25, Condor, from Iloilo; 28, Jessy Beazly, from Iloilo.

SAILED (from Cuxhaven).—May 3, Pudel, to Hong Kong.

LONDON, MONDAY, MAY 14, 1866.

ASIATIC MISSIONS TO EUROPE.

WE have lately been favoured by the visits of distinguished natives of three Eastern nations, not very far apart as regards distance, but widely different in their manners, customs, and habits. It will be curious as well as interesting to note the varying effects of European intercourse on the different nationalities. First came the Japanese, representatives of a highly intellectual race, whose assumed *nonchalance* and indifference speedily gave way to an honest admiration of the wonders of Western civilisation. The peculiar turn taken by their researches soon became evident. Many things which might have been supposed likely to claim their earnest attention were passed over with comparative indifference, while an eager desire was manifested to acquire knowledge concerning agricultural implements and processes, naval architecture, and engines of war. The Mint, with its wonderfully ingenious machinery, worthily claimed a considerable share of their attention, and we doubt not the knowledge they acquired on the subject of coining both here and in France will soon be turned to good account in their own country. But the major portion of their time was devoted to the inspection of arsenals, dockyards, and establishments of a similar nature. Thus their attention would seem to have been strangely divided between warlike science on the one hand and agriculture—essentially an art of peace—on the other; to the apparent neglect of arts and sciences which would be invaluable to them as a means of utilising many of the rich products of their favoured islands.

Next comes his Highness the Tumongong of JOHORE, who visits Europe, we believe, with precisely the same object as the Japanese, namely, to judge from personal observation of the merits of our social, moral, and political system—our arts, manufactures, and sciences. Now, with regard to the last named portion of the TUMONGONG'S investigations, we shall be very much surprised if his attention be not specially directed to those very things that would seem to have been neglected by the Japanese, that is to say, machinery and processes adapted for utilising raw material, such, for instance, as steam saw-mills, sugar refining works, &c. As most of our readers are doubtless aware, the TUMONGONG has long since acquired a reputation for readiness to avail himself of, and to introduce into his territory, any European inventions of commercial value, and there is no reason to doubt that he will continue this policy.

We now come to the third and last nationality—the Chinese. Their representative, PING, has not yet reached our shores, but may be expected in a few days. It is stated that this official comes to Europe specially to make such observations on our trade as may be useful to his own Government, and it is hard to say whether he will confine himself strictly to his object or not. In all probability the *nil admirari* creed, universally adopted by his countrymen, will be duly observed by PING, and whatever degree of astonishment he may experience, he will make no sign. One thing, however, is certain; he cannot fail to carry back with him a thorough conviction of England's greatness and superiority, and of the expediency of good faith bein kept with us by his Government in our future relations.

THE PEPPER DUTY.

OUR readers in the Straits Settlements will be glad to learn that pepper has received its fair share of attention in Mr. GLADSTONE'S Budget, and that the exorbitant duty hitherto levied on it is now repealed. The mention of pepper seems to have excited some laughter in the House of Commons, but Mr. GLADSTONE justly remarked that it should rather excite commiseration. It was a condiment, he said, that was common to all classes of the community, and, though it could well be dispensed with by the wealthier classes, and even by those of the working classes who partook largely of animal food, it was a necessary to those whose diet consisted in a much larger degree of vegetable food, and he believed "it was largely consumed in Ireland." This excited "much laughter," but another fact or two which Mr. GLADSTONE mentioned might have excited some other feeling. The duty on pepper is no less than 200 per cent., and the revenue from it £124,000 per annum; but, whilst all the spices and condiments in which the wealthier classes indulge have been long since set free from all duty, this enormous tax upon the pepper of the poor man has been retained. This fact alone was sufficient to condemn the duty, apart from its prejudicial effect on an important branch of trade. When the petition against this duty was presented by Lord Stanley—to whom, for his able advocacy of its merits, no small share of credit is due—we expressed a conviction that so unjust and so anomalous an impost must be swept away.

THE BRINDISI ROUTE.

WE have had the pleasure of seeing several gentlemen who have lately arrived from India and China by this route, and with some exceptions, easily remedied, they describe the steamers between Alexandria and Brindisi and the whole line of rail through Italy as most satisfactory. The entire distance from Alexandria to London can be performed in six days and a few hours. The line traverses a most beautiful country, and, with the late completion of lines, Rome may now be reached by a branch from Ancona *en route* to or from Brindisi. We shall shortly be able to lay before our readers a full report on this most agreeable change in the route to the Far East.

We are glad to observe that a Consul has been appointed to represent British interest at Brindisi. When a place becomes of importance to English traffic it is a great assistance to it to have a representative of our Government. By a little overzeal on the part of the last gentleman who acted as English Consul he lost the post,—not a lucrative one, as he rendered his services gratuitously; but nevertheless it was unpleasant to be cancelled from a post on grounds so opposed to the liberal views of the English Government. It appears that Mr. Nervegna had made constant efforts to engage the attention of the Home Government to the port of Brindisi as a postal station for our India and China mails, and not finding any response, he wrote to *The Times* in September last describing the advantages of Brindisi, but not upbraiding the Government. Shortly after this he received an intimation that it was exceedingly inconvenient that any representatives of the Home Government should address newspapers (*i.e.*, open their mouths), and that consequently his services were dispensed with. The gentleman who now enters on the office is Mr. Henry Grant.

CHINA STEAMSHIP AND LABUAN COAL COMPANY.

By the last mail from Manila we have advices that the Company's Marine Manager at Hong Kong had obtained the sanction of the Spanish authorities at Manila to open a mail line of communication between that place and Singapore, and that the Company's steamer *Mona* had already opened the service. The *Mona* is spoken of as a fine vessel, with excellent accommodation for passengers, and it was much desired by the mercantile communities that the service might become permanent. The Spanish steamers now conveying the mails via Hong Kong have long been a standing grievance for inefficiency and discomfort. The route by Singapore has also the great advantage of bringing Manila into the chain of communication with London by about a week in advance of that by Hong Kong. We trust the special privileges of carrying the Spanish flag will be awarded to the China Steam Ship Company, to enable them to carry goods on the most favoured terms.

THE OPENING UP OF WESTERN CHINA.

CAPTAIN SPRYE, whose indefatigable exertions in this cause have never flagged, has printed for private circulation a pamphlet showing how earnestly the question has been taken up by almost every commercial body in the country, and how persistently it has been ignored by Government, notwithstanding repeated efforts to bring it before them. The pamphlet gives a detailed *resume* of Captain SPRYE's proceedings from the commencement, and concludes with a correspondence with Mr. GLADSTONE, which appears to have been his last attempt to procure some attention to the scheme. We are glad to learn that even now its originator is not discouraged, and intends to persevere instead of relaxing his efforts.

THE FRENCH IN SIAM.

FROM Paris we hear that "The French Consul at the "Siamese Court, M. AUBARET, who has been in France for "some time on sick leave, is about to proceed to Bangkok. "He has had an audience of the EMPEROR, who has given "him a sword as a present from himself to the King of SIAM, "and a dagger from the Prince Imperial for the KING'S son." This M. AUBARET, it will be remembered, is the notorious person who last year was guilty of a gross outrage on the person of a relative of the King of SIAM. The fact of his being reaccredited to the Siamese Court, unless he be under orders to make a full apology for his former disgraceful conduct, can hardly be considered otherwise than an insult to the KING.

THE CHINA DINNER.

On the China dinner list we observe the following additional names :—R. C. Antrobus, Esq., J. Hudson, Esq., W. Schmidt, Esq., Rev. H. Huleatt, H. Severs, Esq., J. Durrell, Esq., Assistant-Commissary-General Eichbaum, Col. Browne, C.B. (44th Regt.), Rev. John Scarth, &c., &c.

THE TUMONGONG OF JOHORE.—The Tumongong of Johore and suite have arrived in London, and taken up their residence at No. 22, Manchester-square. We believe his Highness, who is the first Malay Prince that has visited this country, is accompanied only by Dr. Scott, and a small retinue of five or six native attendants. His stay will extend to three months, but, we understand, his visit has no official object.

THE MORTALITY AT HONG KONG.

TO THE EDITOR OF "THE TIMES."

SIR,—Your leading article of the 20th of January has been read with much interest and surprise by all those officers here who are acquainted with the events on which it comments.

I am sure you will excuse my troubling you with the following particulars, the correctness of which you can easily ascertain, and for which I vouch :—

The 2nd battalion 11th Regiment arrived at Hong Kong on the 28th of May, 1865, several weeks before it was expected, and before the completion of the temporary barracks intended for their reception.

These buildings were hired, and their alterations and fittings (comprising the erection of upper stories), commenced as soon as the order notifying the destination of the 2nd battalion of the 11th Regiment was received at Hong Kong, and they were selected by a board composed of the Commandant at Hong Kong, the Commanding Royal Engineer, the Principal Medical Officer, the Deputy Assistant Quartermaster-General, and the Acting Barrack Master from the various buildings tendered for lease, and were not only the best tendered, and hired irrespective of the amount of rent demanded, but were in themselves well built, dry, airy, and lofty.

The strength of the 2nd battalion of the 11th Regiment on its arrival was 704 non-commissioned officers and men, and to provide for their accommodation until such time as the new barracks were ready suitable buildings were hired at $1,000 a month, for 200 men, who were at once disembarked and occupied the buildings.

Of the remainder of the regiment 150 were transhipped to the *Hercules*, an old line-of-battle ship anchored off Kowloon, and which for some years had been occasionally used as a military hospital ship; 250 were landed at Kowloon, and placed in huts; 70, including 20 families, were sent to Stanley, an out station about eight miles from Victoria, and the remainder were put on board Her Majesty's ship *Princess Charlotte*, the receiving ship at this port.

In July the temporary barracks were completed, and occupied by the 2nd battalion 11th Regiment, who were landed from the *Princess Charlotte* and the *Hercules*, and withdrawn from Stanley and Kowloon, where only a detachment of 110 men was left to furnish the guards over the naval stores and Government property.

The men were now lodged in large well-ventilated rooms on the first and second floors (the ground floors being used as stores, &c.), giving each man a cubic space of 1,000ft., with 75 square feet floor space.

Early in August two companies, together 150 strong, were sent to Japan, and the detachment, which had been regularly relieved weekly, withdrawn from Kowloon, the guards at that place being furnished daily from Hong Kong.

Since then the regiment has continued to occupy the same quarters. It has never been encamped since its arrival in China, and the statement that it was encamped near a native burying-ground is not only false, but I fear I must add maliciously so—a point on which you, as knowing by whom the statement was made, can easily arrive at a conclusion.

So much for the manner in which the 2nd battalion 11th Regiment has been quartered. As regards its destruction I will only add a few figures. It arrived on the 28th of May 704 strong. During 1865 there were 54 deaths in the regiment and 185 men were invalided, and up to the present date there has occurred two more deaths, of which one was caused by hydrophobia.

There now remain at Hong Kong 313 non-commissioned officers and men, of whom 38 are in hospital, and at Japan 146, making a total of 459 non-commissioned officers and men of the 2nd battalion 11th Regiment actually serving in China and Japan.

I may be permitted to add that, having been stationed in China for nearly six years, I consider the past hot season to have been unusually unhealthy for Hong Kong, but it certainly contrasted favourably with the year 1862, when the European troops in Shanghai suffered much more severely than did the 2nd battalion 11th Regiment last year, the death-rate at Shanghai, as given in the Army Medical Statistical Report, having been 163 per 1,000, while that of the European troops at Hong Kong in 1865 was 75 per 1,000 (the death-rate of the 2nd battalion 11th Regiment was 102 per 1,000), and that of the European Police Force 78 per 1,000. I mention this last fact because the Colonial Surgeon has published a statement of the comparative health of the garrison and of the police, and has included in the latter the natives of India and Chinese, who compose nearly seven-eighths of the force, and who have suffered much less severely than the Europeans. The colonial surgeon's statement, if not corrected, would lead the public to form erroneous conclusions, and I have therefore given the actual death-rate of the European police at Hong Kong, which, as I have stated, was 78 per 1,000 in 1865.

In conclusion, I beg to state that the *Gresham*, on board which so many deaths unfortunately occurred, was considered by all the inspecting officers to be one of the finest ships they had ever seen taken up for invalids.

Your obedient servant,

A. GAMMELL, Major, Deputy Assistant Adjutant-General.

Hong Kong, March 25.

*** Major Gammell appears to think an annual death-rate of more than 10 per cent. merely normal, even when accompanied by such an amount of invaliding that a force of 704 was reduced to 459 in less than two years. We trust the committee now sitting will not take his view of the subject.

HOUSE OF COMMONS.

THE CIVIL SERVICE IN CHINA, JAPAN, &C.

(May 10th.) On the vote of £121,978 to complete the sum for services in China, Japan, &c., General DUNNE complained of augmentations in the allowances for the Civil Service, while the allowances of the military authorities were cut down.—Mr. READ called attention to the sum of £20,000 for consular buildings required at several of the stations in China. —Mr. LAYARD said that a number of buildings were required for the consular service, but no accurate estimate could be made out. An officer had, however, been sent out, under whose direction the money would be laid out. In reply to a question from Mr. GRIFFITH, Mr. LAYARD said the salary of the Minister at Peking was reduced from £8,000 to £6,000. In the committee last year the former sum was thought to be excessive The vote was then agreed to.

LABUAN.

On the vote of £2,244, to make up the sum of £3,644, the charge for Labuan, General DUNNE asked what were to be the future arrangements for Labuan. Who were the garrison there?—Mr. CARDWELL said that expenses had been incurred in consequence of the coal to be found there. The garrison was composed of Sepoys.—Mr. POWELL asked whether any portion of the vote was applied to the investigation of the coalfields.—Mr. CARDWELL said the coalfields were already open, and coal had been brought to the surface, so that it was now too late for inquiry on that head. Petroleum also had been discovered there; but it was too early yet to say anything with respect to that.—Mr. POWELL inquired what was the extent of the coalfields.—Mr. CARDWELL said the coalfields were considerable. (A laugh.)—Agreed to.

THE REBELS IN CHINA.

(11th.) Colonel SYKES rose to call the attention of the House to the official notification and address of Consul Meadows at Newchwang to the foreign community, dated the 4th October, 1865, respecting the danger to life and property from the proximity of rebels; also to the official notification and address of Consul Medhurst, of Hankow, to the foreign community, dated 21st of January, 1866, to devise measures against an expected attack from a body of revolted Imperial troops, and the advance of the Nienfei rebels. He had about a month ago called the attention of the Under-Secretary for Foreign Affairs to the despatches of Consul Meadows at Newchwang, on which occasion his hon. friend told him Consul Meadows had been very much alarmed at the prospect of an attack on the part of some rebels, but the Government had no ground for thinking that any attack on Newchwang had taken place, or was likely to take place. The Consul and the community had, however, very serious grounds for suspecting the safety of their lives and property. Mr. Consul Meadows had issued a circular, dated December 4, 1865, calling a meeting of the foreign residents to consult upon the measures of defence necessary to be taken. The meeting was attended by various consuls and the foreign community, and Mr. Meadows, as senior Consul, took the chair. He said that there were no means of defending Newchwang, that the rebels were in possession of the neighbourhood, and might at any time ride into the city, slaughter the inhabitants, and destroy the property. That was not a matter to be considered lightly by his hon. friend (Mr. Layard). With respect to the great commercial *entrepot* of Hankow the hon. and gallant gentleman read a statement to show the threatening nature of the circumstances under which Consul Medhurst called upon the community to meet in order to take measures for their own defence. It appeared that a force of 8,000 revolted Tartar troops and some 30,000 or 40,000 robbers called Nienfei were surrounding the city on all sides, and creating the greatest alarm among the inhabitants. The meeting which took place was attended by both the French and English Consuls. His

Digitized by Google

object in reading the statement was to prove that the two Consuls, instead of being pusillanimous, as was necessarily implied by the ridicule thrown on the affair by his hon. friend, were men of judgment and sound discretion. When he called the attention of the Under-Secretary to the matter his hon. friend said:—

"With respect to the attack on Hankow, he had to state that he had no reason to believe that that city had been threatened by a large rebel force. It seemed that a considerable number of peasantry took refuge there and in the neighbourhood, that the Consul went out to see what was the matter, but that, instead of 80,000 rebels, he found eight men on horseback, armed with spears and bags, that shots were fired at them, and that they thereupon ran away, leaving behind them the bags, which were found to contain eight women."

His hon. friend was not now in his place; if he was he would have pitched into him for what he said on that occasion. He was sorry his hon. friend did not show better feeling than to suppose that if it had been only eight robbers carrying off eight women in bags at their saddle-bows—though that was not a thing to be laughed at—the French and English Consuls and the people of Hankow would have been so greatly alarmed. Having read a long extract from the *Hankow Times* to show the gravity of the case, and the danger of starvation from the influx of people flying in terror into Hankow, he proceeded to say that the danger was still impending, and that the Imperial Government was incompetent to protect the place. What was, therefore, to be done? Were we or were we not to make such arrangements as would give confidence to our merchants for the security of their lives and property and the lives of their wives and children? There must be some documents in the Foreign-office which would confirm what he had stated, but his hon. friend could say nothing about them. He wished, by calling attention to the matter, to show that our Consuls, instead of having exposed themselves to ridicule, were entitled to praise, and to urge that measures ought to be adopted to insure security. He concluded by moving that copies of the official notifications and addresses referred to should be laid on the table of the House. The motion was negatived without a division.

THE TROOPS AT HONG KONG.

(11th.) Mr. LOCKE asked the Secretary of State for War whether the 20th Regiment (2nd Battalion) had been ordered, or whether it was the intention of the Government to order it, from Japan to Hong Kong, to occupy the quarters vacated by Her Majesty's 11th Regiment, in which great mortality had lately occurred, or whether it was the intention of the Government to send native troops to that station.—The Marquis of HARTINGTON said the 2nd Battalion of the 20th Regiment had received orders to proceed from Japan to Hong Kong, to relieve the regiment at present stationed there; but it would not be necessary that they should occupy the quarters vacated by the 11th Regiment, which had proceeded to the Cape. In March last orders were sent by telegragh to Ceylon to send four companies of native troops to Hong Kong as a temporary measure.—Colonel NORTH asked the noble lord whether the order was accompanied by unlimited authority to General Guy not to act on economical principles, but to spare no expense in securing the health of the battalion, and whether he was authorised to employ native watchmen, so as to allow the proper relief from duty.—The Marquis of HARTINGTON said orders were sent that the duties at Hong Kong should be diminished by the employment of native police or watchmen, and that under no circumstances were the troops to be kept too long on duty. With the barrack accommodation, and with the authority given to General Guy to hire proper quarters, there was every reason to believe that ample provision would be made.

TRANSFER OF CEYLON RIFLES TO CHINA.—The following is from the *Colombo Times* of the 31st March:—"An important telegram from the Horse Guards was received here yesterday. It was to the effect that 'four companies of the Ceylon Rifles were to be held in readiness to embark for service in China by the end of April!' The companies are to be of the full strength of 100 men each, with three officers to each, two assistant surgeons, and a field officer in command. We understand that Colonel Macdonald will probably be selected for this service, and that the 10th, 11th, 12th, and 13th companies, commanded by Captains Fielding, Gash, Trydell (absent on sick leave), and Meaden, will form the detachment. Hong Kong will doubtless be their destination, and it is very possible that the Home authorities have decided upon maintaining a garrison of Malays there permanently, in consequence of the terrible mortality amongst the European regiment last stationed in that colony, and that the Ceylon corps has been chosen to supply the detachment in accordance with the recommendations of the Commission, that the regiment should be reduced to eight full companies. It is very hard lines for the officers, however, if the present regulations with respect to allowances in Hong Kong are to remain in force; for, although it is a far more expensive place, the allowances are considerably less than those in Ceylon."

THE REDUCTION OF DUTIES IN JAPAN.—The American papers state that the President has proclaimed the convention between the United States and the Empire of Japan for the reduction of import duties. The following articles, used in the preparation and packing of teas, shall be free of duty:—Sheet lead, solder, matting, rattan, oil for painting, indigo, gypsum, firing pans and baskets. Second—The following articles are to be admitted at the reduced duty of five per cent.:—Machines and machinery, drugs and medicines, iron in pigs or bars sheet iron and iron wire, tin plates, white sugar in barrels or crushed, glass and glassware, clocks, watches and watch chains, wines, malted and spirituous liquors. The prohibition of the importation of opium, according to the existing treaty, remains in full force. The citizens of the United States, importing or exporting goods, shall always pay the duty fixed thereon, whether such goods are intended for their own use or not.

NUMISMATIC CURIOSITIES.—A Mr. Lake, who, besides being cashier of the Manufacturers' Bank of Chicago, is an enthusiastic numismatologist, has obtained, by the assistance of various missionaries in China, a complete set of Chinese coins from the year 245 B.C. to the present dynasty. The earlier specimens are in odd shapes, such as a razor, a padlock, although the common shape is circular with a square hole in the centre so that they may be strung together. They vary from three inches diameter and half an inch in thickness (in numismatic measure, size 48) to that of a farthing.

Naval and Military.

Her Majesty's screw troopship Orontes, Capt. H. W. Hire, which arrived at Spithead on the 3rd. went into Portsmouth Harbour on the morning of the 4th, and disembarked the officers, seamen, marines, &c., she brought home from China at the transport jetty of the dockyard. Her list of officers and passengers comprised:—Commanders.—H. P. Knevitt and R. Adams. Lieutenants.—A. W. Warry, C. A. Watts, E. M. Dayrell, D. K. Grant, S. J. Pitt, G. F. Morrell, R. H. W. Cornwall, F. Echlin, J. R. Butt. Masters.—H. W. Burnett, J. H. Thomas, F. Piper, W. F. Clifton, S. Darbishire, H. B. Hunt, B. H. Speer. Surgeons.—R. Eustace, Dr. Adams. Paymasters.—Thomas Seccombe, D. W. Wise, W. T. Grieve, Charles Barrs. Chief Engineers.—H. Cooper, H. Cook, R. Hodge, J. Snell, M. Forman. Assistant-Surgeons.—S. M'Bean, W. M'Mahon, R. R. M'Curdy, J. V. N. Blake, G. W. Sutherland, James J. Parr. Sub-Lieuts.—W. Cotton, D. G. Proby, E. Wingfield, J. R. Aylen, H. P. Smith, Thomas James, Alan F. Gardner, A. C. M. Coulsen, L. F. Wells. Second Masters.—T. C. Forte, H. W. Campion, W. Scriven, J. M. Lloyd. Assistant-Paymasters.—Alfred Clements, J. J. Wilcocks, George M. Snell, H. H. Grant. Midshipmen.—C. G. Michalson, F. B. Lacy, L. F. Wells (sub-lieut.); six masters-assistants, three clerks, five engineers, nine assist.-engineers, 18 assist.-engineers, first class; 14 assist.-engineers, second class; 13 gunners, six boatswains, four carpenters, 502 seamen, 92 marines, and eight boys, returned to England on relief from the China and Japan squadrons; and 59 seamen and marines invalided. The passengers on board include Col. Jenner, 11th Regiment on leave from Hong Kong; Mrs. Jenner and son; Mrs. Mayne and three children, from Singapore; Mrs. Rock and servant, and Mrs. Mynhennick, from the Cape of Good Hope; Lieut. G. F. Morrell, R.N., and Mr. H. H. Grant, R.N., invalids from Ascension. The Orontes left Hong Kong on the 17th of February, and has performed the passage home in 74 days, including stoppages, 60 being the number of days the ship has been under steam. On arriving off Madeira a strong wind and rough sea on the island prevented communication with the shore, and the ship was steered for Brest to obtain coal. On arrival there the French authorities placed her in quarantine for 24 hours, although there was no sickness on board. She arrived at Brest on the 30th April, and sailed again on the 2nd inst. On the 29th of April a screw steamship was passed, outward bound. Three deaths occurred during the voyage home, and one man fell overboard and was drowned off Mauritius. Piracy was exceedingly rife in China when the Orontes left for England. The English gunboats out there are all described as being perfectly rotten. Most of them are unable to steam more than four knots per hour. Great dissatisfaction existed with the Itzibou exchange in Japan. It speaks well for the discipline of the ship and the good understanding existing between the officers and crew that there has not been a case of corporal punishment on board since the Orontes left England. The ship requires docking and the usual course of refit, without serious repairs being necessary, before she will again be ready for sea.

The Pearl, 21, screw corvette, was commissioned at Portsmouth on the 5th inst., for the China squadron, by Capt John T. Ross. Lieutenant Edward Frederick Keppel, recently promoted from the Bristol, for service on the West Coast of Africa, and formerly of the unfortunate Bombay, has been appointed to her; and Mr. George Patterson, who served in the Wanderer, 4, gun-vessel, in the Mediterranean, from 1861 to 1864, joins as master. Lieutenant, M. J. Dunlop. Naval Cadets: Frank Finnis, W. C. H. Snell, Robert P. Ray, Henry Harris, William H. Webster, and Charles W. P. Bouverie. Chief Engineer: John G. Shearman. Engineer: Charles McKeener. First Class Assistant Engineers: Thomas J. Warburton and Edward Watson.

An order has been received at Chatham garrison from the Horse Guards directing Lieut. F. Brinkley, of the second depot brigade, Royal Artillery, to embark on board the Robin Hood, at Gravesend, for Hong Kong, to join the brigade of Royal Artillery in China.

The Agincourt, Capt. Harvey, Lieut. Dunlop, R.N., naval agent, sailed from Hong Kong on the 16th of January, arrived at Singapore on the 24th of the same month, sailed thence again on the 26th, arrived in Simon's Bay, Cape of Good Hope, on the 9th of March, and sailed again on the 16th, calling in at St. Helena on the 31st of March. On the 13th of April she exchanged signals with the bark Ada Mary, from Sunderland for Simon's Bay, 38 days out. She has brought home a number of naval and military invalids, with a few time-expired men from Hong Kong, who are accompanied by Assist.-Surgeon Betts, R.N., in medical charge, Lieut. Hind, 9th Regiment, and Lieut. Robinson, 11th (2nd battalion) Regiment. The Agincourt disembarked her troops by the aid of steamers from Portsmouth dockyard at Spithead on the 10th inst. and afterwards sailed for London, the invalids being sent to the Military and Naval Hospitals at Netley and Haslar, and the time-expired men to the depots of their regiments, and to Her Majesty's ship Victory in Portsmouth harbour. The Agincourt afterwards sailed for London.

NAVAL APPOINTMENTS.—Rear-Admiral the Hon. James R. Drummond, C.B. (a Naval Lord of the Admiralty), to be Rear-Admiral Superintendent of Devonport Dockyard, vice Symonds, promoted. Vice-Admiral Lord Clarence E. Paget, C.B., to be Commander-in-Chief in the Mediterranean, vice Vice-Admiral Sir Robert Smart, K.C.B., K.H., whose period of service has expired. Captains: William C. Chamberlain, of the Resistance, to the Asia, for service in the Reserve, vice Caldwell; Donald M'Leod Mackenzie to the Formidable, 26, as Flag-Captain to Vice-Admiral Sir Baldwin Wake Walker, Bart., K.C.B., Commander-in-Chief at Sheerness; George Wodehouse to be additional of the Pembroke, for service as Deputy-Comptroller-General of the Coast Guard, vice G. W. Tarleton, C.B., to be Commodore Comptroller-General, vice A. P. Ryder, advanced to flag rank on the Active List; the Hon. J. W. S. Spencer to the Pembroke, vice Johnson, whose period of service has expired; Gerard J. Napier, of the Terrible, for the Canopus, vice Mason, promoted; J. E. Commerell to the Terrible, vice Napier; J. F. Ross, to the Pearl, commissioned; C. M. Aynesley to the Jason, commissioned; Richard C. Mayne to be additional to the Fisgard, for service in the Nassau, 5, screw surveying vessel, at Pembroke; Henry S. Hillyer, C.B., to the Resistance, 18, armour-plated ship, at Malta, vice W. C. Chamber-

Digitized by Google

lain, to the Asia, for service in the Reserve; John Bythesea. V.C., to the Duncan, 81, flag-ship, at Halifax, as additional for special service.

Vice-Admiral Lord Clarence Paget, C.B., the Commander in-Chief of the Mediterranean squadron, is to have the dignity of Privy Councillor conferred on him in recognition of his services at the Admiralty. Captain Joshua Taylor has been awarded a naval pension, vice Staff-Commander Sir Joseph A. Douglas, deceased.

The Admiralty have very wisely resolved to have a powerful armour-plated ship permanently stationed at Queenstown, and their lordships have decided that Rear-Admiral Frederick shall transfer his flag from the Hastings to the Black Prince, the crew of the former being turned over to the latter. The Hastings, until further orders, will also remain at Queenstown.

Mr. E. J. Reed, the Chief Constructor of the Navy, has undergone a very painful operation, and is now in the Isle of Wight, with a view of recruiting his health.

The *Army and Navy Gazette* understands that Captain Cowper Phipps Coles has at length received the sanction of the Admiralty to construct a turret-ship on his own plans and designs. The Admiralty are not to interfere with the building of the vessel in any way. She is to be contracted for by private firms, and their lordships only[reserve to themselves the final approval of the plan which may be determined upon by the inventor. We believe that the following list of establishments was handed in the first instance to Captain Coles, from which he was allowed to make his choice, viz.—Messrs. Laird Brothers, of Birkenhead; Messrs. Palmer, of the Jarrow Works, on the river Tyne; the Millwall Ironworks Company; Messrs. Napier and Son, of Glasgow; Messrs. Samuda Brothers; the Thames Iron and Shipbuilding Works, and Messrs. Wigram and Sons. This list has, however, been reduced to five. Captain Coles, with increased years, has increased in wisdom; and if he had in the first instance taken the advice of friends who could have had no other object in view but his good, and have had recourse to a practical shipbuilder, the stormy discussions which have taken place from time to time in the two Houses of Parliament would have been for the greater part avoided, and the display of much ill-feeling would have been spared. Captain Coles no doubt has gained a victory; and, while offering him our congratulations, we must be permitted to say that the Duke of Somerset is entitled to the thanks of the public for the straightforward English-like manner in which he has comported himself during the whole transaction.

The following is a list of ships at present under orders to return to England to be paid out of commission. The stations whence they proceed, their commanding officers' names, and the date of their being commissioned are also given:—The Swallow, 9, Master Commander Edward Wilds (1861), from China; the Coquette, 4, Commander Arthur G. R. Roe (1862), from China; the Leopard, 18, Captain Charles T. Leckie (1862), from China; the Swan, 35, Captain Frederick B. Montresor (1862), from the East Indies; the Devastation, 6, Captain William K. Jolliffe (1861), from the Pacific; the Tribune, 23, Captain the Lord Gilford (1862), from the Pacific; the Stromboli, 6, Commander Alexander Philips (1862), from the South-East Coast of America; and the Sparrow, 5, Commander William A. Gambier (1863), from the West Coast of Africa.

WAR-OFFICE, May 1.—94th Regiment of Foot: Major-General Edward W. Forestier Walker, C.B., to be Colonel, vice General George Powell Higginson, deceased. 4th West India Regiment: Lieutenant-General George Thomas Colomb to be Colonel, vice Lieutenant-General John Julius William Angerstein, deceased. 5th Foot: Captain Alfred Robert W. Thistlethwayte, from the 32nd Foot, to be Captain, vice J. Hartley, who exchanges; May 1. Cape Mounted Riflemen: Lieutenant-Colonel Lewis Edward Knight, from half-pay, late 17th Lancers, to be Lieutenant-Colonel, vice Brevet-Colonel Robert Newport Tinley, who retires upon half-pay. Brevet: The following promotions to take place consequent on the death of Major-General Charles Wright, Royal Engineers, on 9th April, 1866:—Colonel William Turnbull Renwick, Royal Engineers, to be Major General; Major Charles Elgee, 23rd Foot, to be Lieutenant-Colonel; Captain Thomas Hodgetts, half-pay Unattached and Staff-Officer of Pensioners, to be Major.

We are glad to notice a disposition (remarks the *Army and Navy Gazette*) on the part of the authorities to provide for the cavalry officers placed upon half-pay against their will. Lieutenant-Colonel Knight, late of the 17th Lancers, who was in this unfortunate position, has just been appointed to the command of the Cape Mounted Rifles. The vacancy arose under circumstances which custom and good reason combine in prescribing should not cause promotion to be given in the regiment; and although the Major is an excellent officer, and was not all mixed up in the proceedings which led to Colonel Tinley's retirement to full-pay, we cannot quarrel with the authorities for adhering to the usual course in passing him over. It is hard on an officer not to get the promotion to which he has been looking forward, but it is much harder to be turned out of one's profession for no fault, and not reinstated when an opportunity offers. May we hope that the authorities will be equally just in the case of the two or three cavalry majors who are in a similarly unhappy position? Nearly every year an opportunity offers of providing for one, the cavalry regiments going to India in the summer being given a second major. In the case of the 5th Lancers and 18th Hussars the opportunity was not turned to account. In each case promotions in themselves far from objectionable were made, but the excluded majors were not restored. It is a deep disgrace to the authorities that it should be so, and we hope the blot will be removed upon the despatch of the next cavalry regiments to India.

On the 30th ult. there was launched from the building-yard of Messrs. A. Stephens and Sons, Dundee, a clipper ship 600 builders' measurement, named the Sree Singapura. The vessel was built for Messrs. M'Taggart, Tidman, and Co., London, and is intended for the China and East India trade. She is to be commanded by Captain James Tosh, Dundee. This is the third vessel built this year in Scotland for the same company, the two previous ones having been built in Montrose. The vessel is constructed on the composite principle.

A fine iron screw-steamer, of 637 tons, was launched by Messrs. Alex. Stephen and Sons, from their shipbuilding works at Kilvenhaugh. The vessel, which was named the *Osaca* by Mrs. John Stephen, is for the East India trade, and was contracted for through Messrs. James Howden and Co., who are to supply her with engines of 90 nominal horse power.

SILKWORMS.—A letter from Lyons states that numerous complaints come in from the silk-producing districts in the South of France of the failure of the foreign seed imported last year. It appears that the seed which arrived from Japan at the end of last year was more carefully packed than that of 1864, and sanguine hopes were entertained of an excellent crop. The temperature of last December was nearly the same as that of the corresponding period of the preceding year, but the heat became too great during the next three months, and the seed could not support it, especially that from Japan, which is of a very delicate kind. It became evident that if cold weather set in a great number of worms would perish. This has occurred in many places, but full credit is not given to all the reports in circulation. Many purchasers, however, have refused to fulfil their engagements with the import merchants, on the ground that the merchandise was of bad quality. Should the law courts decide against the merchants, the consequence will be injurious to the trade in the south of France, for merchants will not import seed if they are to incur the risk of the weather becoming prematurely hot.

GARROTTING IN ALEXANDRIA.—A circumstance occurred recently at Alexandria which is deserving of note, as an instance of the insecurity of the public streets in that city. Personal violence at night has been rife for many years, but it has been reserved to two Englishmen to introduce the system of robbery by garrotting. A short time ago the Russian Consul-General was attacked in the public square in the evening, and severely handled by men who adopted the process of garrotting, and by whom he was robbed of all the valuables in his possession. This was the first of a series of attacks on European gentlemen, and it was considered of the utmost importance to bring the delinquents to justice. This was accomplished by the arrest of two British subjects, named Glover and Parker, formerly in the American army, who were caught in the act of attacking a French gentleman. The British Consular judge (Francis), was prompt in setting an example to the consuls of other nations, and after a few hours the culprits were condemned to two years' imprisonment with hard labour in the galleys. The foreign community have reason to congratulate themselves upon the prompt action of the British authorities in this matter, seeing that from that moment no repetition of these outrages has occurred.

THE CHINESE DWARF.—BANKRUPTCY CASE.—James Goodman, described as a boarding-house keeper, appeared before Mr. Commissioner Winslow. It was alleged that he was in possession of a lease or right to exhibit a Chinese dwarf, and the question arose whether this ought not to be assigned for the benefit of his creditors. Mr. Reed opposed; Mr. Abrahams supported. Mr. Nugent deposed that he was proprietor of the Royal Cambridge Music-hall, and had a contract for the exhibition of the Chinese dwarf Chee-mah. The contract was made with the bankrupt. He was the principal person in the contract, and the money was paid to him. The contract was for a month. Witness wished to extend it, but the bankrupt required an increase of salary, and then a Mr. Smith was put forward as the party to make the contract. Witness refused to renew it. The bankrupt denied that he had any interest in the dwarf at present, and asserted that his agency had been revoked, and that it had passed to Smith. The dwarf had been living at his house since the 1st of January last. Mr. Reed asked that the bankrupt should be required to produce Chee-mah, and said that he might do that without difficulty, as he could put the little fellow in his pocket. (Laughter.) His Honour said there must be an adjournment for the examination of witnesses as to the alleged property of the bankrupt in the dwarf. If it were necessary to examine Chee-mah, it must be done at a private sitting. He must not be made a show of in the court.

BRITISH AND FOREIGN BIBLE SOCIETY.—The annual meeting of this society was held on the 2nd inst., at Exeter-hall. The Earl of Shaftesbury presided; and there were on the platform, among others, the Earl of Harrowby, Bishop Smith, of Hong Kong, the Rev. H. Suter, Bishop designate of Nelson, New Zealaud; General Clarke, General Lawrence, Colonel M'Donald, Admiral Warden, C.B., Captain Littlehales, Professor Leoni Levi, &c. The report was read by the Secretary. After stating the operations of the society in various parts of the world it set forth the receipts of the past year ending the 31st of March, as exhibiting an increase over those of the preceding in almost ever item, with the exception of legacies, in which there was a diminution of £23,470. 13s. 7d. The sum applicable to the general purposes of the society amounted to £80,525. 12s. 10d., and the amount received for bibles and testaments had been £81,303. 2s. 5d., being £2.913. 10s. 9d. more than in the preceding year. The total receipts from the ordinary sources of income have amounted to £161,828. 15s. 3d. To this must be added the sum of £605. 14s. 8d. received for the China Fund, £16. 2s. 5d., for the special fund for India, and £8,924. 17s. 10d. further contributions in aid of the Building Fund, making a grand total of £171,375. 10s. 2d. The ordinary payments have amounted to £176,157. 0s. 11d., and the payments on account of the special fund to £6.245. 2s. 6d., making the total expenditure of the year to amount to £182,402. 3s. 5d., being £12.658. 8s. 7d. more than in the preceding year. The society was under engagements to the extent of £109,121. 5s. 7d. The issues of the society for the year were—from the depots at home, 1,471,044; from depots abroad, 825,086, making together 2.296,130 copies. The total issues of the society now amounted to 50,285,700 copies. The committee had the pleasure of announcing that his Royal Highness the Prince of Wales had been pleased to accept the invitation of the committee to lay the foundation stone of the new building which the society were about to erect, and that the ceremony was appointed to take place on the 11th of June next. The Earl of Harrowby moved that the report be received and printed, and said that he saw no reason for despondency on the part of the advocates of Christianity, notwithstanding the efforts that were now being made by the opponents of the Christian faith. Bishop Smith, of Hong Kong, seconded the resolution, which was supported by the Rev. B. Noel, and unanimously adopted. A vote of thanks was then passed to the President and Vice-Presidents and officers of the various associations throughout the country and the colonies.

Monetary and Commercial.

The panic which has run riot during the past week has very seriously affected the shares of India and China banks, and we may add most unjustifiably, excepting of course the Commercial Bank Corporation of India, which institution, according to its own report, has had a most unfortunate career in 1865. The chief disasters have been incurred through the recklessness and in some cases incompetency and dishonesty of their own managers abroad. This institution is one of the oldest in India, and consequently should have had matters in such good training as to suffer least in times of disaster. The amount paid on each share, issued here at £10 premium, is £25, say £35 in all. These shares are now hardly quoted at any price. The report and accounts of the Chartered Mercantile Bank of India, to be presented for approval at a meeting tomorrow, show a very satisfactory state of affairs, and the late fall is we believe to be entirely attributed to vague rumours of losses by the late panic in Bombay. The £25 shares, some of which were issued at a high premium and at one time stood at £70, are now quoted at £33 to £35. The Oriental Bank shares have suffered from the same vague rumours, and have fallen from £50 to £40. The Agra and Masterman from £55 to £30. The Chartered Bank of India, Australia, and China from £24 to £17. The Asiatic, £10 paid, issued at £15 premium, is now quoted £4 to £7. The Hindustan £25 paid has fallen from £17 to £8 to £10. It is to be hoped that the reckless —villanous we may say—attacks made by Stock Exchange speculators on these banks will in time meet their reward. Unfortunately it is not permitted for directors to protect their shares from such unprincipled attacks, or they might have got the "Bears" into a grip they would not easily have escaped from. The number of *bona fide* sellers are as nothing compared to these pests.

At the meeting of the London, Bombay, and Mediterranean Bank no dividend was declared, and a committee of three shareholders was appointed to confer with the directors on the position of the concern. In the course of the discussion it transpired that the expenses are extremely large, that there is a want of capital owing to the non-payment of calls, and that an attachment has been placed on the funds of the bank in the hands of their bankers.

A general meeting of the shareholders of the Bank of Hindustan, China, and Japan (Limited) is called for the 24th inst., and will be made extraordinary, to enable the directors to hold half-yearly instead of annual meetings.

The Anglo-Egyptian Bank have announced an interim dividend of 10s. per share, being at the rate of 8 per cent. per annum for the past half-year, and have also made a call of £7 10s. per share, payable in two instalments, viz.:—£4 on the 31st inst., and £3 10s. on the 15th of June next.

The Admiralty received tenders on the 3rd May for the conveyance of 8 tons naval, 9 masts, 1 ton navy medicals for receiving ship, 27 tons light powder, 5 tons light empty cartridges, to Trincomalee; 20 tons naval, 11 masts, 26 tons heavy loose shells, 35 tons light blankets, 186 tons light, 746 hhds. of porter, to Hong Kong.

The biddings for £325,000 in bills on India took place on the 2nd at the Bank of England. The proportions allotted were to Calcutta, £167,900; to Madras, £57,100; and to Bombay, £100,000. The minimum price was as before—1s. 11½d. on Calcutta and Madras, and 1s. 11¼d. on Bombay. Tenders on Calcutta and Madras at 1s. 11¾d. will receive about 52 per cent., and on Bombay at 1s. 11$\frac{7}{8}$d. about 47 per cent. Above these prices in full. It thus appears that a considerable diminution has occurred in the demand for means of remittance to the East, the terms obtained being more than one 1 per cent. below those of the previous occasion.

Mr. Birt, of Messrs. Henry Birt and Co., wholesale tea dealers, Mincing-lane, has absconded, leaving liabilities of about £150,000. In some cases fraud has been committed in order to obtain cash advances on weight notes, warrants, &c. Some of the leading brokers in the trade have been duped, and also country dealers. His partners do not appear to have been implicated in the frauds, and have had no other alternative than to pass through the Bankruptcy Court.

The amount of bullion by the P. and O. Company's steamer *Ceylon*, from Southampton on the 4th inst., was:—In gold to Madras, £2,248; in silver to Calcutta, £5,100; to Hong Kong £10,108; to Shanghai, £13,075. Total in gold, £2,248; in silver, £28,283.

MANCHESTER MARKETS.

The depression in these markets has become more decided with lower prices both for goods and yarns. Sales are difficult even at the reduced prices, and the market closes in favour of buyers. Quotationsare:—Grey Shirtings, 7 lb., 11s. 6d. to 11s. 9d.; 8lb. 4 oz., 14s. Yarns, Nos. 16-24, 1s. 7d. to 1s. 8d.; 28-32, 1s.9d. to is. 10d.

ARTICLES OF IMPORT.

TEA.—We have still to report a state of great inactivity and dulness in our market, there having been no improvement in the home trade demand, whilst export orders continue on a limited scale; thus the amount of business transacted has been far below the average. Importers, however, generally hold firmly, looking to the now moderate quantity afloat, which is very small compared with the deliveries. Prices generally show but little alteration, though in some cases the tendency has been downward. Black.—The transactions in red-leaf have been, in good flavoury kinds at 1s. 1d. to 1s. 3d. per lb., and medium to fine Kaisow at 1s. 9d. to 2s. 2d. per lb. A few purchases have transpired in Amoy kinds at 1s. 0¾d. to 1s. 1½d. per lb., and of imitation Kaisow, made from Tayshan leaf of medium quality, at 1s. 4d. to 1s. 7d. per lb. Black-leaf.—Good common to fair has been in moderate request for export at 1s. 0½d. to 1s. 1d. per lb., and there are still buyers at the former quotation; good useful kinds to medium have been occasionally dealt in, and of fine and finest at 1d. per lb. decline. There is nothing to report either in Souchong or Oolong. Scented Tea.—For Canton Orange Pekoe we hear of no transactions; Caper, of fair to good quality, is scarce, and in request at 1s. 1d. to 1s. 3d. per lb.; in other grades nothing of note has transpired. Foochow Orange Pekoe, of fine quality, within the past day or two, has been inquired for; good to medium kinds are still in excess of requirements. Green.—There were considerable arrivals early in the month, the greater portion of which have found buyers, but at lower prices for all kinds, except medium to fine Young Hyson. Japan leaf: There have been no further imports since the "Seringapatam," which cargo realised an average price of 1s. 6¾d. per lb. Coloured sorts have continued readily saleable, though last sales, now the shipping demand has ceased, are hardly up to the range of prices ruling last month. The public sales of the 1st instant comprised 8,752 packages, of which 7,622 packages were sold, 7,404 packages being offered without reserve. The stock in the United Kingdom on the 30th ult. was estimated at 107,500,000 lbs., against 108,000,000 lbs. last year, and the quantity afloat at 12,500,000 lbs. against 20,237,220 lbs.

SILK.—During the greater part of the past month the position of the Silk Market remained unchanged, but a prevalence of unfavourable reports as to the prospects of the European crop at length led to a revival of demand, followed by considerable business, and some improvement in prices. The transactions in Asiatic silk would doubtless have been on a much larger scale, had not political complications on the Continent checked the ardour of buyers, and unfortunately the renewal of war rumours within the last few hours leads us to fear that this impediment to business will not at present be removed. In China silk current descriptions have latterly sold well, the better qualities as usual realising relatively high rates, the last quotation for classic No. 3 Tsatlee being 29s. 6d. per lb. Japan Silk.—Fine Mibash has been eagerly taken during the recent "spurt," and the market is now cleared of all inferior sorts, for which there is little or no demand.

COTTON.—At the close of the business week ending the 26th April, about ½d. per lb. of the advance obtained in the early part was lost. The decline has continued, and prices may be said to be altogether fully 2d. per lb. lower. In the London market 195 bales of Tinnivelly were sold on the 7th at 9¾d. to 10¼d. for fair to good fair. On the 8th 500 bales Tinnivelly, to arrive, were sold at 9d., February to April, guaranteed good fair. Dhollerah is quoted at 8¾d. to 11d. The Liverpool quotation for American, on the same day, was 10d. to 16½d.

SUGAR.—The market was inactive during the week ending the 4th, and closed quietly. At auction, on the 8th, the same quietness prevailed, except for the better descriptions of Mauritius, which realised firm prices. Prices varied, from low to good brown, bought in at 25s. 6d. to 28s.; to fine yellow, 38s. (duty 11s. 8d.), and middling white, 39s. to 39s. 6d.

COFFEE.—The colonial market has suffered an average reduction of fully 1s. per cwt. At auction, on the 8th, the whole of the parcels brought forward were bought in and withdrawn.

RICE.—1,800 bags Bengal at auction on the 8th were withdrawn at 14s. to 14s. 6d. Late last week 15,000 bags Bassein were disposed of at 10s., and Necranzie 10s. 3d. per cwt.

CARDAMOMS.—Firm: only 24 bags Madras at auction, half sold at 4s. 6d. to 4s. 8d. per lb. for middling Aleppy, and 131 bags Ceylon sold at 3s. to 3s. 9d. per lb. middling to good.

CAMPHOR.—In better demand; somewhat large business done: latest prices obtained £66. 3s. per cwt. for Japan, and £65 China, and the market remains firm.

CASSIA LIGNEA.—Very firm, with limited business upon former terms. No auctions. Buds: Scarce, and firm: a single case fair but mouldy sold at auction at £11. 5s. per cwt.

CINNAMON (CEYLON).—At the Quarterly Sales superior realised an advance of 3d. to 4d. per lb.; fair to good 1d. to 2d.; whilst ordinary to middling ruled at par to 2d. decline; 1,863 bales mostly sold; 288 bales 1st sort at 1s. 11d. to 3s. per lb., with superior up to 3s. 7d.; 886 bales 2nd 1s. 8d. to 2s. 8d.; 450 bales 3rd 1s. 7d. to 2s. 4d.; and 239 bales 4th and Jungle 1s. 3d. to 1s. 9d.; 106 bales Tellicherry sold at 1s. 9d. to 1s. 11d. 1st; 1s. 8d. 2nd; and 1s. 6d. 3rd.

COCOA-NUT OIL.—Cochin, being scarce, remains firm; Ceylon plentiful, and again lower; as also Sydney, and the market altogether very dull: 253 casks Cochin, and 258 casks Sydney at auction.

DRUGS.—Cubebs remain flat; but of 387 bags at auction, a few sold at 85s. per cwt. for fine sifted. Dragon's Blood quiet; 11 cases at auction, all retired. Rhubarb: In some demand at former rates to a little advance; 14 cases only at auction, and retired.

GUMS.—Benjamin: Steady; of 78 cases Sumatra at auction, one-third sold at £12 to £12 7s. 6d. per cwt. for good 2nd quality, and £10 7s. 6d. fine 2nd, but false packed. Damar: Very firm, but quiet; 15 cases at auction retired. Gamboge: Steady; of eight cases at auction, three-fourths sold at £17 to £22 per cwt. for middling to good, and £12 5s. chips.

GUTTA PERCHA.—Not any business of interest doing.

HEMP (MANILA).—Quiet; and a parcel from New York, 255 bales at auction sold at £45 to £45 15s. per ton for fair roping, being 20s. to 30s. cheaper.

HIDES.—At sale on the 26th ult., prices ranged from those of the last sales to ¼d. per lb. decline. 287 Penang Cow Hides offered and sold, heavy, 5d. per lb.; 238 Java Buffalo Hides offered and sold at 5d. per lb.

INDIA RUBBER.—Scarce and firm, with limited business.

JAPAN WAX.—Quiet; and of 263 boxes at auction, half sold at 61s. to 83s. per cwt., for ordinary mealy to good but yellow saucers.

OILS.—Anniseed: Quiet, with limited business upon former terms; 11 cases at auction retired. Cassia: Flat, and again cheaper; and 19 cases at auction mostly sold at 7s. 7d. to 7s. 8d. per lb. Cinnamon: Quiet, a single case at auction, retired. Citronelle: The demand has in some degree subsided, and prices are the turn lower; of 28 cases at auction, two-thirds sold at 3¾d. to 4d. per oz. Lemon-Grass: A single case sold at auction at 1s. 4d. per oz.

PEPPER.—Black: Up to Thursday, the 3rd inst., the market had been flat, and Penang had receded to 3½d.; of 2,648 bags Penang at auction, one-fourth sold at 3⅝d. to 3¼d.; since the 3rd, when the remission of the duty was announced, the market has improved, but only to a small extent; moderate business has been done for cash, and with short prompt up to 3⅝d. for Sumatra, and 3½d. West Coast Penang. White: Consequent on the remission of duty, prices have risen 1d. to 1½d. per lb., with fair business up to 7½d. per lb. for middling; supply very moderate.

SPICES.—Cloves: Zanzibar quiet; Penang steady. 13 cases at auction sold at 1s. 2d. per lb.; 2,820 bags clove stalks all retired. Mace: Scarce, a single case Penang at auction sold at 3s. per lb. for fine reddish, being dearer. Nutmegs: Quiet; 25 cases Penang at auction sold at 4s. 1d. per lb. for fine bold, and 1s. 2d. to 2s. 5d. ordinary small to fine medium, being the turn cheaper.

SAGO.—Large kind again 6d. per cwt. lower; small and medium unaltered; 1,016 boxes sold at auction at 18s. 6d to 19s. for middling to fair small, and 17s. 6d. to 18s. 6d. middling to fair large. Flour: Steady; but nothing of importance doing.

TERRA JAPONICA.—Cutch, Pegue: In moderate demand, at a further slight reduction in terms: 1,193 bags at auction, all retired: business to a fair extent accomplished privately. Gambier: Not any auctions have been held, and only limited business done privately upon former terms.

TIN: This market has again been much depressed; sales have been effected, but at lower prices. Banca has sold at £80 to £80. 10s. per ton cash, and Straits £77 to £80, and the latest price of the latter is £77; very dull.

TOBACCO.—Manila Cheroots and Segars. Of the former there is a fair supply, but consisting of heavy weights, which are unsalable; of the latter but few cases to obtained. Manila Tobacco: There is a better inquiry for the leafy classes, of which the market is bare. Japan: The recent arrivals have been readily placed at full market rates, having been of good average quality. Java: Stock on hand of useful descriptions being limited, no transactions worthy of notice have taken place. Quotations: Manila Cheroots, 6s. 9d. to 7s. 6d.; Manila leaf, 6d. to 3s.; Java, 5½d. to 13d.; Japan, 4½d. to 8½d.

MISCELLANEOUS.—Blacklead: Demand diminished; and of 746 barrels at auction, half sold at 17s. to 22s. 6d. per cwt. for middling to very fine lump; 13s. chips; and 9s. to 10s. dust. Galls: All Galls of the Bussorah character remain very flat, but without further change in prices; China steady at the recent reduction; buyers at 60s. per cwt.; 20 cases at auction retired; 101 cases Japan sold at 61s. to 61s. 6d. for good sifted. Musk: Limited business privately in Pod and Grain upon previous terms; only 3 tins Grain offered at auction, and retired. Rattans: Without change; 18,666 bundles Singapore and 5,872 bundles Penang at auction sold at 3s. 2d. to 5s. 1d. per 100. Sapan Wood: Steady; only 6 tons Ceylon at auction sold at £14 to £16 15s. per ton. Star Anniseeds: Again rather lower; and of 100 cases at auction half sold at £5 to £5 2s. 6d. per cwt.

EXPORT OF BULLION TO CHINA, &c.

United States Gold Coin	3 16 4
Silver in Bars	0 5 17 16
Mexican Dollars	0 5 0

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 15s. to £7; nail rod, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 10s. to £7.

STEEL.—Swedish keg, £15 5s. to £15 15s.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7¾d. per lb.

TIN.—£85 to £88 for block; £86 to £89 for common bars. Tin plates, best charcoal, I.C., 34s. to 35s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 15s. to £24; sheet, £21 15s.; spelter, £22 15s. to £22; zinc, English sheet, £30; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—The Metal Market the past month has been dull to an extent almost without precedent, and nearly every article has more or less receded in value, which we consider is owing in a great measure to the disturbance in monetary matters caused by the operations of the "Financial Companies," assisted by the unsettled state of Continental politics.

IRON.—Both Welsh and Staffordshire are without change. Scotch pig, after being forced up to a height out of all proportion to other descriptions of Iron—having reached the high figure of 82s. a week since—appears at length on its way to its proper value, having fallen to-day to 64s.

COPPER.—The smelters on the 30th ult. reduced their quotations £5 per ton: but sales had been made at as low a figure for some weeks previous. However, the present being the lowest official quotation made for copper during the last fifteen years, it may be looked upon as probably the lowest point now to be descended to.

TIN.—In English there is no change in nominal prices, but purchases are to be made at a much lower rate. In Holland, Banca tin has suffered considerable depreciation, having been sold as low as 46¾ guilders. This must be attributed to a panic amongst holders, in prospect of a German war. The last few days it is rather stronger. In this market there is an evident disposition to talk the article down; and at a time when general dulness prevails, these efforts meet with more success than they deserve. Straits: Fine has been sold at 79s., which is the lowest price for really fine quality at which business has been transacted. At this period last year Straits was 94s., and the stocks were about the same as now. The quantity of Straits tin afloat for Europe is about 974 tons, against 1,499 in 1865, and 1,307 tons in 1864.

Digitized by Google

TIN PLATES.—Charcoal remain without change. Coke are a little easier. The exports last month were 110,000 boxes, against 100,000 boxes in April, 1865. Lead: The best brands command full prices, and the smelters are well employed. Spanish has been sold at £20 10s. Spelter: Is flatter, with but little business. Quicksilver: Is now £7 per bottle, which is 15s. to 20s. per bottle fall during the month.

Office, 12, George-yard, Lombard-street, London, E.C.

THE ANNUAL CHINA DINNER

WILL BE HELD AT

WILLIS'S ROOMS,

On FRIDAY the 18th MAY,

Sir JOHN F. DAVIS, Bart., K.C.B., F.R.S.

(Late British Plenipotentiary in China, and Governor of Hong Kong), in the Chair.

TICKETS, ONE GUINEA AND A HALF.

DINNER ON THE TABLE AT EIGHT O'CLOCK.

Gentlemen intending to dine are requested to leave their names with Messrs. Willis, 26, King-street, St. James', S.W.

FREDERIC BRINE,
Honorary Secretary.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel stores, &c., when requiring to discharge them.

Amoy, March, 1865.

A. SHORTREDE & CO.

Hong Kong, Jan. 1, 1864.

THE BANK OF HINDUSTAN, CHINA, and JAPAN (Limited).

Notice is Hereby Given, that the Meeting of this Company, advertised to be held at the London Tavern, on the 22nd day of May inst., at One o'clock P.M., will not take place, owing to the impossibility of getting a room at the London Tavern of sufficient size.

NOTICE IS HEREBY GIVEN, that the FOURTH ORDINARY MEETING of the Company will be held at the London Tavern, Bishopsgate-street, in the City of London, on THURSDAY, the 24th day of May next, at 12 o'clock precisely, when the Report of the Directors will be presented, and Directors and Auditors elected. The retiring directors, viz., Philip Shore Fletcher, Esq., Thomas Cotterell, Esq., and Sassoon David Sassoon, Esq., being eligible, will offer themselves for re-election; and the retiring Auditors, viz., Frederick William Spooner, Esq., and Frederick Maynard, Esq., also being eligible, will offer themselves for re-election.

And take Notice, that immediately after the termination of the above-named Meeting, an Extraordinary Meeting of the said Company will be held, and the business to be transacted thereat will be to alter Section 46 of the Rules and Regulations of the Company, so as to enable the Directors to hold half-yearly Meetings of the Company, instead of once in every year, as now provided.

The Transfer Books of the Company will be closed from the 12th day of May, until the 24th day of May, both days inclusive.

By order of the Board,

R. SWIRE TOMLIN, Secretary.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS.—UNERRING PRECISION.—When the health is breaking down from the continuance of some weakening discharge, when ulcers refuse to heal, and extending mischief is threatened, then is the time to try the potency of Holloway's healing Ointment and purifying Pills. No treatment for giving ease and safely leading to a cure can be compared to this. The Ointment cleans and cools the foulest and most angry sores, diminishes the inflammation, reduces the swelling, prevents the growth of proud flesh, and spares both pain and danger. Thousands testify, from their own personal experience, to the unvarying success attending the use of Holloway's medicaments in cases of ulcerated legs, enlarged veins, scurfy skin, and swelled ankles.

PILULES DE BLANCARD,

PILLS CONTAINING UNALTERABLE IODURE OF IRON

APPROVED BY THE PARIS ACADEMY OF MEDICINE.

Authorised by the Medical Council of Saint Petersburg.

TESTED IN THE HOSPITALS OF FRANCE, BELGIUM, IRELAND, TURKEY, &c.

Honourable Mention at the Universal Exhibitions of New York, 1853, and Paris, 1855.

Uniting the properties of **Iodine** and **Iron**, these Pills are specially valuable in the many maladies resulting from a **scrofulous** habit (*tumours, congestion, cold humours, &c.*), diseases against which simple preparations of iron are **ineffective**; in **chlorosis** and other **female diseases, consumption, constitutional syphilis, &c.** In short, they supply one of the most energetic therapeutic agents for stimulating the action of the organs, and thus modifying **lymphatic, feeble,** or **debilitated** constitutions.

N.B.—Iodure of Iron, when impure or deteriorated, is not only ineffective but irritating. In order to ensure the pure and authentic **true Pilules de Blancard,** insist upon our **silver seal** and our **signature,** as opposite, printed at the foot of a **green** ticket.—Beware of imitations.

TO BE HAD OF ALL CHEMISTS.

Blancard

Chemist, 40, rue Bonaparte, Paris

GOLD MEDAL—PRIZE OF £664.

APPROVED BY THE PARIS ACADEMY OF MEDICINE AND THE MEDICAL COUNCIL OF RUSSIA.

VERY SUPERIOR TO THE WINES AND SIRUPS.

QUINA LAROCHE

THIS tonic and restorative ELIXIR is suitable for delicate and weakly constitutions; it quickly modifies PALLOR and CHLOROSIS, and is especially effective in GASTRALGIA, DYSPEPSIA, EXHAUSTION, the EFFECTS of ACCOUCHEMENT, SLOW CONVALESENCE, WANT of APPETITE, and FEBRILE AFFECTIONS.

DEPOT: 16, RUE DRUOT, PARIS.—AGENTS: Alexandria, M. BARBET; Bahia, M. PLATON; Bombay, CHESSON and WOODHALL; Calcutta, SAUNDERS, CONES, and Co.; Singapore, J. LITTLE and Co.; Hong Kong, J. BRAGA; Shanghai, E. C. KIRBY.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

"I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

"I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Musseriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

OUR SPECIALTY

PETROLEUM LAMPS

DIETZ & Co.,

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

The dates are down to the morning of the 1st April. The London mail of 26th January arrived out on the 23rd March. The following summary of news is from the *Japan Herald* of the 31st March:—

H.M.S. *Adventure* arrived yesterday morning, bringing up from Hong Kong a wing of the 9th Regiment under the command of Major Darling. The debarcation commenced at two o'clock the same afternoon. The commandant of the garrison and several officers of the 2nd 20th and 11th Regiments were on the Hatoba to receive them, and a large proportion of the European residents were present as spectators. The men appeared much as did those of the 20th on their arrival—many looking pale and thin, but not weak or unhealthy. At a little after three o'clock they marched up to barracks preceded by the band of H.M.'s 2nd 20th. We cannot too highly praise the admirable arrangements that were made on this occasion. The artillery waggons took many of the weak up the hill, whilst comfortable stretchers, covered with a canopy, were provided for the sick. We could but be pleased to see this result of our comments on the mismanagement on the previous arrival of the *Adventure*.

We find that the garrison of Yokohama is about to lose the services of Staff-surgeon Woolfreys, the principal medical officer, who leaves by H.M.S. *Adventure* for Hong Kong. In all sincerity, we say, he takes with him our good wishes, and our regret that the folly and indiscretion of his friends persisted in making him the scapegoat to turn attention from the misdoings of others on a former occasion. Major General Guy, commanding Her Majesty's forces in China and Japan is not, after all, coming up to Yohohama until October next, although it was previously understood that he was to arrive next month. Our readers can count upon their fingers as well as we can. Let them call to mind our statements of the circumstances of the Hong Kong and Yokohama Garrison, and the officials, at the time of the arrival of Her Majesty's 11th Regiment,—and look to the three facts stated above—and then use their own judgment. The debarcation of the 9th perfect in all its accessories; the principal medical officer, or, as we shall call him, the supernumerary medical officer removed from Yokohama, where so many medical officers were unnecessary, to Hong Kong where his services could be so ill spared; and the Major-General remaining through the trying months at head quarters, after notification had been received of his intended arrival in Yokohama. These facts tell a tale which all the hushing up in the world cannot prevent being fully understood.

H.M.S. *Osprey* arrived from Hakodadi on March the 16th, bringing as a passenger Captain Vyse, H.B.M. Consul, on his way to Nagasaki, his present post. A correspondent writes from Hakodadi:—"Capt. Vyse goes down by this vessel, to the great regret of all the foreign community here, whose good wishes follow him to his new seat of office. His successor, Mr. A. A. J. Gower, appears to have left a similar impression behind at Nagasaki, so we may esteem ourselves fortunate in our Consuls."

Some interest has been excited at Hakodadi with reference to the sentence of one year's imprisonment which has been passed on three foreigners concerned in the desecration of the

Digitized by Google

Aino cemetery; much sympathy has been expressed for them and a petition has been forwarded to Sir Harry Parkes for a commutation of their sentence.

CHINA.

SHANGHAI.

The dates are down to the morning of the 9th April. The P. and O. mail of the 10th February arrived on the 4th April, and the French mail of the 17th February on the 5th.

The following items are from the *Commercial Record* of 8th April (Sunday):—The item of news of most general interest during the past fortnight is that some positive steps have been taken with regard to establishing the line of telegraphic communication to Europe via Kiachta. Mr. Grant has contracted with a Chinaman for the conveyance of intelligence from Tientsin to Kalgan, and it is hoped that no difficulty will be in the way of his being able to complete the line of couriers to Kiachta. It is noticeable that the Chinese Mandarins have, as usual in all such matters, turned up as obstructives. Mr. Grant, after completing his contract with the Chinaman for Tls. 2,000, was forced to pay an additional Tls. 500 to buy off the opposition to some official.

The nature of the agreement entered into with the Chinaman is that he is to convey despatches from Tientsin to Kalgan in 48 hours under penalty, and Mr. Grant is in hopes that no difficulty will stand in the way of this agreement being duly carried out. The greatest difficulty to be guarded against is undoubtedly interference by the Chinese Mandarins; but it is satisfactory to notice that the assistance of Sir Rutherford Alcock has been obtained, and that he has caused the Peking Government to instruct the authorities on the frontiers that Mr. Grant is proceeding to Mongolia with a view to carrying out the scheme, and that all the provisions of the Treaty are to be carried out with regard to him. So far matters appear in a satisfactory train; and we have reason to hope that before long this important project will be brought to a satisfactory conclusion; we also notice that, should the project succeed, the subscribers have determined to transmit messages for the general public.

A correspondence between H.B.M. Consul and the Municipal Council with reference to Chinese taxation in the settlements has been published. The principle which the Government are desirous to uphold is that the Chinese must be allowed full liberty to collect Imperial taxes from their own subjects whether residing in foreign settlements or not. The question appears likely to lead to some difficulty, and will probably be referred to Peking for settlement.

* Included in the above total—12 bales Tama silk, per British barque Cleveland, to London.

The silk inspectors in Shanghai have addressed a memorial to the Chamber of Commerce with reference to damp silk, begging them if possible to devise means by which they may claim against the Chinese merchants from whom it was bought. The Chamber, however, have replied that inasmuch as the silk was accepted after being duly inspected, it did not appear to them that any claim could be instituted.

A meeting of the shareholders in the French Gas Company took place on the 27th March, when the president read out the report, showing that of the original sum of Tls. 30,000 subscribed, a surplus of Tls. 2,000 would be left after defraying all necessary outlay for plant, salaries, and all other expenses up to August next, at which date it was fully expected that the company would be in a position to commence the supply of gas. The engineer's report was also read out to the meeting, showing an estimated cost of $0.12 per cubic metre. After the reports had been read, it was decided that one month be allowed to shareholders who had not yet paid up their calls (amounting to Tls. 1,700 in all) to do so, after which the said shares would be disposed of on account of the subscribers. It was also agreed that the reports of the meetings of shareholders should be published from time to time. After some discussion, an amendment by Mr. Morel, upon a proposition by Mr. Ortmans, was carried, to the effect, namely, that Tls. 2,000 residue should be kept in hand as a surplus, and that interest on the shares should be calculated only from the time when the company commences to supply gas to the Concession, and that, if in consequence of any unforeseen circumstances the company be not able to do so before the end of the current year, the shareholders will exercise their right from that date against the French Municipality with regard to the guarantee of 8 per cent. The reports having been duly passed, the following gentlemen were elected to fill up three vacancies out of four, consequent upon some of those at present in office being about to proceed to Europe, namely Messrs. Menitz, Hanssen and Cliquet. Mr. Ortmans, one of the four above named, will continue to act up to the time of his departure.

Judgment was given on the 27th March in the case of A. Provand *v.* Oxford and Co., being a re-hearing of the cause previously tried before the Assistant Judge. The Chief Judge has reversed the decision then given, and has given judgment in favour of the plaintiff. The chief point upon which it turned was the fact that the evidence went to show that the plaintiff had been able and willing to execute such repairs as were necessary, and also that the matters requiring remedy were not such as could be looked upon as structural defects. In the Bankruptcy Court there have been proceedings with reference to the estates of S. Clifton, Hugh Rose Innes, and Jarvie, Thorburn, and Co.

Six thousand more troops have been sent to the Shinking province in addition to the two thousand foreign drilled troops who were despatched some weeks ago from Peking to put down the rebels who have been overrunning the province in large numbers, and who as yet had defied all the force the mandarins could bring to bear upon them. The district was in such a frightfully disorganised state that the Government were offering mandarin buttons to all the chiefs of the robber bands infesting the country, if they would give in their allegiance to the Imperial Government. This gives a very cheerful view of the bravery and efficiency of the 8,000 *braves* already mentioned as having taken the field against these Celestial brigands. Some of these picturesque vagabonds have not been able to resist the temptation of gaining the distinction of "a button" without the tedious course of book lore which usually precedes such an honour, and several have accepted the doubtful distinction and have become respectable mandarins. Having been brought up in a good squeezing school they have been using their new position to extort money from the peacable and orderly inhabitants. The rebels, numbering about 7,000, are encamped some hundred miles or so north of Moukden, having captured several cities; the Peking troops are commanded by Wenseang, and the Mongol cavalry by a son of the deceased warrior San-ko-lin-sin. The whole of the Imperial forces as thus comprised are on the march to attack the rebels.

Newchwang is now open, the ice having broken up; a considerable number of vessels were about to start for the Southern ports. A disturbance has occurred at Newchwang. The American Consul's boy having been kidnapped, he proceeded unarmed in company with some other gentlemen to attempt his recovery. The party was twice fired on, and for some time

Digitized by Google

there was an apprehension of a general rising of the "Sword-wracks" taking place. By the last advices matters were quiet, but Mr. Consul Meadows seems to have been no vain alarmist in warning the settlers at Newchwang to be constantly well armed and on the alert when moving about amongst the natives.

FOO-CHOW-FOO.

From Foochow we hear that the weather on the coast has been more severe than has been known for years. Several steamers have taken as much as eight days on the passage between Hong Kong and that port. H.M. gun-boat *Havoc* and the U.S. corvette *Wyoming* were in port, the latter being still in dock; the heavy repairs which she required, and which were being carried on, fully prove the extensive capabilities of the dock at Pagoda anchorage.

HONG KONG.

Dates are down to the 15th April. The London mail of 26th Feb. arrived out on the 10th April; the French mail of 17th Feb. on the 1st.

The intimation conveyed in the last number but one of the *Government Gazette* to the effect that Ordinance No. 13 of 1865, providing for the rendition of pirates to the Chinese authorities, has not been sanctioned by Her Majesty, may be taken as a significant indication of a design on the part of the home Government to deal comprehensively with this important subject.

The Sanitary Commission which has been sitting at the Gaol on the causes, nature, &c., of the epidemic which has again appeared in that establishment, has completed its labours; the conclusions come to, we believe, are, that the disease is a true type of yellow fever, that the treatment pursued by the colonial surgeon has been most succcessful, and that the precautionary and preventive measures, as to isolation of those infected, &c., which have been taken by the Superintendent of the gaol, have been very effectual. The number of cases has decreased from about 30 to 9 or 10.

We hear with great regret that an accident occurred to Sir Richard McDonnell, while on a visit to the gaol and the police barracks. His Excellency had made a lengthened inspection of the prison, and whilst walking across the compound in front of the police barracks, and having just descended the steps leading from the police court, was apparently seized with a faint ing fit; his feet slipped, and a severe fall backward was the result. Prompt assistance was rendered, and his Excellency was assisted into the charge room of the police barracks; and the Colonial Surgeon having been sent for, accompanied him home to Government House. Very fortunately his Excellency wore at the time of the accident a stiff felt helmet, which broke the force of the blow on the head, as he fell backwards, and we trust that a severe shaking is the worst which may be anticipated.

Considerable interest has been excited in military circles here by the announcement that Colonel North has applied in Parliament for papers relative to the mortality of troops at Hong Kong during the last hot season, and the amount expended on rent of godowns, &c.; this may lead to a thorough investigation, and perhaps the War Office may be convinced of its grave blunders. It is to be hoped that the next budget may include, under the head of Military Expenditure, a margin for the erection of suitable buildings for any possible accession of troops to the colony, so that there may be no repetition of the mournful decimation of British soldiers which marked our last summer.

During the past week cases of piracy have been "conspicuous by their absence;" probably it is the season of some Chinese festival, and the freemasonry of piracy are enjoying themselves in the bosoms of their families, preparatory to returning to their old cruising grounds, Mirs Bay and the Lema and Ly-ee moon Channels.

A ball was given on the 11th by the Hong Kong Club to Mr. and Mrs. Mercer, and universal satisfaction was expressed as to the arrangements.

The weather during the past week has been, with short exceptions, dull and cloudy, with almost constant rain; this, though rather trying in some respects, will perform the most important duty of cleansing and flushing the drains, and at present the "clerk of the weather" is pretty good.

The *China Mail* has the following items:—

"On the 5th April an interesting case was argued before the Chief Justice. A person named Lobscheid had applied for a rule to oblige the editor of the *Evening Mail* to show cause why he should not be indicted for libel. Previous to the case being heard, the plaintiff wrote privately to the judge in order to "make him acquainted with certain facts," an odd idea of how to obtain justice in an English court of law. The case was dismissed on all grounds, as nine-tenths of the community had anticipated."

"From Macao a report has arrived that a small steamer, called the *Prince Albert*, belonging to Quok Acheong, the Compradore of the P. and O. Company here, has been seized by a Chinese Customs revenue cruiser in the port of Shuey tung, and confiscated as being in a non-treaty port. As trade by foreign steamers and vessels with the West Coast ports has been more than winked at by the Chinese authorities for some years past, it is rather "sharp practice" on their part to pounce suddenly upon a vessel in this way, without notifying their intention of stopping all foreign traffic by confiscation of offending vessels."

We learn that advices have been received per French mail by the American Trading Company of Borneo, from the officer administering the Government of the colony, founded by them in December last on the territories leased from the Sultan of Borneo, of the most satisfactory description.

On the sale of the business of Messrs. A. Shortrede and Co. and the *China Mail* the following advertisement has appeared:—

The business, stock in trade, plant, &c., of Messrs. A. Shortrede and Co., as well as the proprietorship of their several publications, has been disposed of to Mr. Edward Andrews; and the undersigned hereby gives notice that the interest and responsibility of the late James Kemp in the firm ceased on the 31st December last. All persons indebted to the firm on 31st December last are requested to pay the amount of their accounts to the present proprietor without delay.—G. FALCONER, Executor of the late James Kemp.

With reference to the above announcement our business will be conducted under the style or firm of A. Shortrede, as heretofore.

Mr. N. B. Dennys will continue the editorial and general management of our business, and sign our firm procuration.—A. SHORTREDE and Co.

(FROM OUR OWN CORRESPONDENT.)

Sir Richard MacDonnell has fairly worked himself into harness since the date of my last letter, and has startled as well as amused the entire colony by the energy and activity he displays. Here, there, and everywhere, prying at unexpected hours into all sorts of sleepy offices, now bringing up one functionary with a sharp rebuke for disregarding the sacred rule of "office hours from ten to four," and now anathematising another for the neglected state of Government House, the new Governor has made every one of his subordinates look decidedly alive. His Excellency is understood to be devoting much labour to making himself thoroughly acquainted with the organisation and state of efficiency of the police, as well as to the subject of piracy, and the best means of grappling with this growing danger. The financial state of the colony is another most important subject calling for immediate attention, as, notwithstanding the very handsome revenue annually raised, the enormous expenses for police and public works, coupled with the War-office "squeeze" of £20,000 towards the military expenditure, and the very heavy cost of the Mint, make the prospect of a loan unpleasantly pressing. Among the suggestions that have been made here of late for the raising of additional revenue is that of imposing a fractional tax on the note circulation of the various banks, which would probably produce a very comfortable sum without being perceptibly oppressive. It is argued that inasmuch as the note circulation, which has reached so large a development in Hong Kong, is in direct competition with the operations of the Mint, the Government would be justified even in placing restriction to some extent upon the note-issue, and fully so in deriving an amount of revenue from that profitable branch of business. The Mint itself has not yet been got into working order; but as the dies that have been so long expected arrived by the last mail, we may expect soon to see the new dollar replacing the wretched, defaced currency on which we now have to depend.

Rumours are current of sundry embarrassments in connection with the rice-trade, but such are always rife at this season. It is certain, however, that the market is for the moment overstocked.

The new Convention signed at Peking on the 5th ultimo by Sir R. Alcock, the French Minister, and Prince Kung, has been sharply criticised in the local press. The circumstance is pointed out that whereas the acknowledged evils of the coolie trade have been long officially declared to arise from two principal sources, viz., the conduct of immigration by commercial speculators, and the employment of native brokers (crimps) to collect emigrants, the new Convention, instead of applying checks to these evils, rather affords countenance and increased facilities to their continuance. It is whispered, indeed,

Digitized by Google

that in the framing of this code of regulations the influence of the French Minister has prevailed, and has been influenced on behalf of the Cuban dealers, whose establishments at Canton are driving (under French colours) a lively trade. Their native agents or crimps are scattered over the entire province, and several affrays have occurred between them and the country people in various parts. It is at least a great pity that the flag and authority of the second European Power should be made use of cover the undisguised trade in human merchandise which the Cuban coolie business in reality is.

Some curiosity has been excited here by the recent despatch of two small vessels for ports in Corea, a country which now remains the last solitary instance of national isolation; but I hear that although nominally despatched for Corea, these vessels have in reality been sent with opium to the Russian territory adjacent to the Corean frontier, where considerable settlements of Chinese exist. The introduction of this drug is, however, sternly prohibited by the Russian Government, so we may hear of the seizure and confiscation of these vessels.

A small steamer owned by a wealthy Chinaman in this colony was recently seized at a port between Macao and Hianan, where a considerable amount of irregular trade has been carried on of late. The Chinese authorities having become alive to this fact, have taken measures to protect their revenue, and after issuing a warning along the coast, have seized this vessel, the *Prince Albert*, which was caught in a non-treaty harbour. The question as to her confiscation is to be decided next week at Canton.

ANOTHER COOLIE TRAGEDY.

The present mail adds another to the long list of massacres on board of coolie ships already reported. In the present instance, an Italian barque, the *Napoleon Canevaro*, had been selected for the purpose of this nefarious traffic. The vessel having cleared from Macao for Callao, with six hundred coolies on board, had been some days out when the coolies began to show symptoms of insubordination. The accounts to hand state that, having refused to wash the decks, the crew were mustered, and the coolies still refusing, were fired on down the hatchway. This being without effect, the hatches were battened down. The coolies, in revenge, or seeking release from confinement, adopted the desperate and suicidal course of setting fire to the vessel. The dense volumes of smoke soon warned the crew of the catastrophe; flames shot out from the portholes, and the crew made every effort to repress them, unassisted, however, by the coolies, who, with true Asiatic passivity, watched the progress of the devouring flames. The attempts of the crew to put the fire under were unavailing, and finding that to linger longer was certain death, the captain and a portion of the crew took to the boats. No sooner had the boats cleared the vessel than it was discovered that the doctor, a European, and seven of the crew were missing. To return, however, was impossible. The coolies, now fairly awakened to their situation, would have swamped any of the approaching boats. They were picked up by the *Madura* and conveyed to Saigon, from whence the French mail steamer conveyed them to Hong Kong. A few of the coolies were subsequently picked up by the Bremen brig *Triton* bound for Hong Kong from Bangkok which conveyed them to that port, arriving there on the 1st of April. It is by no means clear that the Italian barque went down; it being just possible that the coolies, under the direction of the doctor and those of the crew left behind, might have succeeded in extinguishing the flames. We allude to this as a contingency to be taken into account until fuller details come to hand. We find this catastrophe and others designated by the mild phrase of modes of evading engagements, but it is well that those concerned in this iniquitous traffic should learn from the coolies themselves that injustice is not to be carried on with impunity. When will this diabolical system cease? How many more victims are there to be?

STRAITS OF MALACCA.

SINGAPORE.

Dates hence are to the 22nd April. The London mail of the 10th March arrived out on the 11th April, and the Messageries mail, with London dates to the 17th March, on the morning of the 18th April.

The interest of the past fortnight (says the *Straits Times*) has chiefly centred itself upon an important case, which occupied the criminal side of the Supreme Court here for four days, and was only brought to a close about midnight on the 19th. The charge was one of conspiracy, brought against the Deputy-Commissioner and other officers of the police, in which they were accused of having received bribes from certain natives to permit or condone a series of illegal acts. As the purity of this department of the public service is of even greater importance here than it can be at home, the case was viewed with anxiety both by Government and the public. His Honour the Governor sat on the bench with the Judge, and a large number of natives were examined with a patience worthy of a far different quality of evidence. Early in the proceedings it became apparent that no jury could place much reliance upon the depositions of such witnesses, who, native like, exceeded by a long way what was necessary for their purpose, and told a tale altogether so improbable and absurd as to secure beyond all question a verdict of "not guilty." But the trial has exposed a danger to the public service which can be guarded against only by receiving with a wholesome qualification all descriptions of native evidence and depositions; for if natives of this class find that they can have any public servant arraigned by simply swearing a criminal charge against him they will be enabled to exercise a species of intimidation more dangerous to the State than any corruption we are likely to find subsisting under the scrutiny of an observant Executive.

It appears by a letter addressed to our contemporary by Mr. Edwin A. C. Cooke, who was the foreman of the jury in the case, that the defendants, Mr. Robertson and the Jemadar "were considered to have 'acted with culpable indiscretion.' his Lordship the Recorder did not deem it necessary to take notice of what was added to the verdict with regard to the above named persons," but Mr. Cooke submits (and several of his fellow jurors were of the same opinion) that the decision come to should have been given *verbatim*.

The case of postage stamp stealing, against a Kling man named Noorsah, formerly employed as a letter carrier by Messrs. Cumming, Beaver and Co., resulted in his being sentenced to seven years' transportation. It will be recollected the person had torn up the letters, appropriating the stamps.

A difficulty which has also pressed of late upon consideration here is the manner of dealing with the numerous destitute Europeans who are now from time to time, by the increasing trade of the port, cast upon our shores. The provisions of the Board of Trade extend only to men who can prove themselves seamen, and of course leave all others to be provided for by local public charity. The only means hitherto resorted to of administering this charity has been the House of Correction, to which all Europeans detected in the misfortune of having no means of livelihood, though willing to work, are peremptorily consigned. But this sort of treatment, which is neither creditable to our justice or liberality, can scarcely be practised much longer, and it has been suggested that a species of workhouse should be established where such unfortunate creatures would find shelter and food in return for a day's honest work. Some such plan must in the end be adopted. [These observations of the *Straits Times* were called forth by the case of one John Dunn, who—

Shipped in the barque *Medora*, at Shanghai, as cook and steward, was sent from Swatow by the Consul to the hospital at Hong Kong, where he remained 17 days; was then discharged, and shipped in the Jersey brig *Spy*; was discharged from this vessel at Amoy before the Consul, but has lost his discharge—worked his passage from Amoy to this in the *Golden Dragon*, belonging to Penang, and was landed here 8th January from that vessel. He went to the master attendant, asking for admission to the Sailors' Home, who told him he would have nothing to do with him; slept on the green under the trees, begged a few cents occasionally from charitable people and tried incessantly to get employment, but the want of a discharge always prevented his getting anything to do. About five weeks ago he was arrested while sleeping in one of the sheds erected for the workmen near the New Court House, and stating to the Magistrate that he had no place to live in was committed to the House of Correction for a month—hard labour,—came out last Sunday morning and took to his old life under the trees on the Esplanade; testifies to the extreme generosity of the Kling boat-men, who have frequently fed him from their own meals, and says that without their assistance he would have been almost if not quite starved.

The following notifications are from the *Government Gazette*:—

The Rev. J. Mathison, being about to leave the settlement, has been permitted to resign his appointment as Registrar of Marriages at Singapore, as well as his seat at the Board of Examiners for Government scholarships.

Lieutenant-Colonel R. Macpherson returned from the privilege of leave granted to him in G. O. No. 67, dated 12th March, 1866, and resumed charge of the office of Resident Councillor, Singapore on the 31st ultimo.

His Honour the Governor has been pleased to grant Surgeon-Major J. Rose, Senior Surgeon Straits Settlement, leave of absence for fifteen months, from date of embarkation for the purpose of proceeding to Europe on medical certificate.

Under the provisions of Act V. o 1852, his Honour the Governor has been pleased to appoint the Rev. William Jeffrey a Marriage Registrar of Singapore.

Digitized by Google

The Straits Government steamers in harbour have been flying the blue ensign, instead of the red one as formerly. This is in consequence of orders having been received by the authorities from the Government of India, directing that the Straits Government steamers should in future fly the blue ensign, as is the case with the steamers belonging to the late Indian Navy.

The annual public meeting of the subscribers and supporters of the Raffles Singapore Institution was held on the 10th April in the Exchange Room; the Hon. Col. Macpherson in the chair. There had been a previous meeting of the trustees of the institution, at which vacancies caused in that body by the resignation of J. D. Vaughan Esq., and the departure of the Rev. John Mathison, were filled by the election of R. C. Woods, Esq., and the Rev. W. Jeffrey. At the public meeting, the report for the past year was read by the Hon. Secretary. It contained a grateful allusion to the valuable bequest of $1,000 by the late Alex. Guthrie, Esq., and a donation of like amount from James Guthrie, Esq., for the endowment of scholarships; and also to the kind gift of $440 from the Singapore Chamber of Commerce for the general purposes of the institution. But regret was expressed that, owing to the inadequate support rendered by the general public of Singapore, many most desirable improvements were put entirely out of the power of the Trustees to realise. The report was adopted, and the meeting separated after the usual votes of thanks.

The *Free Press* regrets to record that "the Klings have succeeded in pursuading two more of our sailors to turn Mahometans." The further remarks of our contemporary should be read with the case of John Dunn, recorded above, fresh in the memory:—"It is very evident that these conversions are simply brought about by the force of circumstances. Jack sees that his own countrymen will not provide for him, and that the Klings are kind and hospitable, feed, clothe, and lodge him, therefore he deserts the religion which has been his from childhood, because he finds that its charity as applied to himself is a mere tinkling cymbal, sounded in his ears, but extending no farther. Kindness goes a great way with Jack, and we have not the least hesitation in saying that it is owing to the benevolence of the followers of Mahomet that he is kept from starving." It appears they are not so tolerant of these conversions at Batavia as we are at Singapore. The *Press* says—"Our Dutch neighbours understand better than we do how to deal with the sailors who have lately become Mahomedans. One of them having recently gone to Rhio, probably as a religious mendicant, was seized by the authorities there on landing, and very properly put in prison for four days, as a rogue and a vagabond. After this he was released, and sent back here by the *Koningen*."

The British barque *J. H. Willis, Junr.*, and British brig *Jane Mitchell*, have lately been sold privately, the former for $4,500 and the latter for $5,000.

One of the heaviest storms of rain and wind that has occurred for many years, broke over Singapore about one o'clock on Sunday morning, the 15th April. Many large trees were blown down throughout the island, and much of the low lying land covered to a considerable depth with water. Rain was much wanted, and the town itself presents a cleaner appearance than for a long time past.

The steamer *Shaftesbury* arrived on the 16th from Suez, with general cargo sent overland from England. She proceeded on to China.

Good Cardiff coal is selling at $14 to $15.

PENANG.

The steamship *Arabia* arrived on the 7th April with troops on her way to Madras. On the voyage between Singapore and this place the chief engineer struck work, and on the arrival of the steamer here was brought before the magistrate, who dealt with the case at once. What the particulars are we do not know, says the *Gazette*, but we are sorry to chronicle a case of insubordination amongst the officers of a rising and prosperous company such as the B. I. S. Navigation Company.

Mr. J. R. Logan is appointed to officiate as Crown Prosecutor at Prince of Wales' Island.

A case has been tried at the police court which excited considerable interest amongst the ship masters and mates in Penang. Mr. Charles Webb, a master mariner, charged a Chinaman, the owner of the brig *Hero*, with having employed Mr. Bushman as master of the said vessel, knowing that he (Mr. Bushman) did not possess a certificate of competency, and at the same time and charging Mr. Bushman with having accepted the employment. There was no doubt whatever as to the facts so stated; Mr. Bushman, whatever his qualifications may be, not holding any "certificate of competency." But on the case being brought on for hearing before the magistrate, it was summarily dismissed on the grounds that the brig *Hero* did not come within the scope of the Indian Merchant Shipping Act of 1859, she being, as a coasting or home trader, under the tonnage which requires not only a certificated master but also a certificated mate or second officer. The *Hero* is employed in the trade between Penang, Rangoon and back, and also as far as Singapore and back. As far as the legality of appointing Mr. Bushman (observes the *Gazette*) these facts are indisputable; but it is quite another affair when an insurance is required, as then the surveyors for the insurance offices will have to ascertain that a master and mate possessing certificates of competency are duly appointed. Owners of vessels under 300 tons, and employed in the "home trade," do not, therefore, require officers with certificates of competency, unless an insurance is desired on the vessel or cargo; and there is no doubt whatever that many persons, though not holding the regular credentials, are quite able to take charge when the voyage is confined to such ports as those to which the *Hero* is destined. We do not think that the English ship masters will improve their position by the means which they have taken—we rather think quite the reverse. We sympathise with those who find their situations slipping from them and taken up by foreigners; but there must be a reason for this beyond taking lower wages, and it would be much better to endeavour to find out the reason or reasons, than to act as they have lately been doing.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BRAND—On the 20th May, at 8, Turle-road, Tollington-park, N., the wife of John Alexander Brand, Esq., of a son.

OZORIO—On the 5th April, at Gough-street, Hong Kong, the wife of C. A. Ozorio, Jr., of a daughter.

SIEMSSEN—On the 13th May, at Hamburg, the wife of G. T. Siemssen, Esq., late of China, of a daughter.

STRINGER—On the 3rd March, at St. Paul's College, Hong Kong, the wife of the Rev Thos. Stringer, of a son.

TATES—On the 12th Feb., at Manila, the wife of W. R. Tates, of a son.

WELLS—On the 15th May, at Chappell House, North Warnborough, Hampshire, Mrs. Hardy Wells, of a son.

MARRIAGES.

ASUNG—SING.—On the 11th April, at St. John's Cathedral, Hong Kong, by the Rev. Thos. Stringer, assisted by the Rev. C. F. Warren, C.M.S., Chung Asung, to Wong Kwei Singh.

GAULD—HORNE.—On the 6th April, at the Union Church, Hong Kong, by the Rev. James Legge, D.D., William Gauld, M.D., Medical Missionary, Swatow, to Annie, youngest daughter of the late James Horne, Aberdeen.

TAYLOR—TAYLOR.—On the 5th April, at Holy Trinity Church, Shanghai, by the Rev. C. H. Butcher, Mr. John Taylor, son of the late John Taylor, Esq., shipowner, of North Shields, to Isabel Grace, youngest daughter of Wm. Taylor, Esq., London.

DEATHS.

CARROLL—On the 10th April, at Hong Kong, on board H.M.S. Melville, Denis Carroll, A.B., H.M.S. Manila.

CLARK—On the 12th May, at his father's residence, May-place, Herbert-road, Plumstead, from the injurious effects of the last two expeditions in China, Deputy Assist.-Superintendent G. C. Clark, Military Store Staff, only surviving son of Captain G. A. Clark, retired, R.A., aged 31.

CLARKE—On the 11th April, at the Civil Hospital, Hong Kong, John Clarke, seaman.

FRANCIS—On the 11th April, at the Garrison Hospital, Hong Kong, Francis, 2nd Private Gun Lascars, aged 36 years, Fev. Inter.

LOW—On the 19th May, at his residence, 47, St. George's-square, Pimlico, David Low, Esq., of 11, Austinfriars, in his 68th year.

RICE—On the 6th April, at the Empire Tavern, Queen's-road, Hong Kong, Henry Rice, late proprietor, aged 45 years.

RUMEBE—On the 26th March, at Yokohama, T. J. Rumebe, aged 39 years.

SHEA—On the 19th May, at his house, 31, Connaught-square, Charles Shea, Esq, late Commander H.C.S., in his 80th year.

SILVA—On the 19th April, at Singapore, Capt. Elcoherio P. da Silva, late commander of the Portuguese barque St. Vincent de Paulo.

SLIE—On the 1st April, at Shanghai, Edward Austin Slie, aged 28, of Birmingham England.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 8d.	4s. 8¼d. to 4s. 9d.
At Shanghai (per Tael.)	6 ditto	6s. 5d.	6s. 5¼d. to 6s. 6¼d.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—The export falls short by a trifle of the amount shipped up to this period last year to Great Britain, but the quantity sent to New York has been greatly in excess. The markets have been swept almost clear of all kinds. The teamen have left for the districts, and large contracts for the coming season are being made both by the dealer and the foreigner. Nothing is heard of unfavourable weather nor of rebels, nor other *contre-temps*, and as the season is now nearly over must have been a most lucrative one to both producer, dealer, and exporter, a large supply for the coming season may naturally be expected.

CANTON.—Since the last report several more musters of Canton Gunpowders and Young Hysons have been offered, but without any transactions in New Tea taking place, as the teamen, although slightly lower in their demands, are still much too high to meet the views of buyers. Some 1,500 boxes Imperial (old Tea) have been settled for the Continent. A considerable purchase was made of Pouchong (Fong-Tai Chop) for America to be delivered within a period extending over four months.

FOOCHOW.—Although some small parcels of Congou have been placed on the market since the last date, and a few settlements have taken place, they have not been sufficiently extensive to influence prices. The teamen have now all left for the country, and it is currently reported that their operations on foreign account will considerably exceed those of last season.

SHANGHAI.—Black Teas: The two chops of Congou remaining at the last date have been shipped on owner's account, and no further supplies having been received the market is quite bare of stocks. Green Teas: A fair amount of business has been done at somewhat irregular prices, but there has been an average advance of one tael per picul on previous rates. Arrivals from Kiukiang have been very small, and advices from that port assert that there are few supplies yet to come this season; holders are therefore firm in their demands, the stock being reduced to 12,700 packages.

KIULIANG.—Black Teas: The small lot of local packed tea mentioned in the last report has been taken at Tls. 18.2.5, leaving a few more chests of similar quality on offer. Green Teas: The season may at length be considered closed, the sole settlement being 207 packages at taels 18.2.5 and only some 120 half-chests remaining on offer. About 1,600 packages had gone forward to Shanghai on native account. The stock last year at the same date was 83,000 half-chests, and the local yield for the season will be some 94,000 packages short of last year's.

YOKOHAMA.—The tea market is without change in tone, and a small amount of business has been done for the American market. The better classes of tea, owing to scarcity and a fair demand, maintain their full value, but the qualities of the late arrivals which are neglected have been very inferior or very much mixed.

RAW SILK.—SHANGHAI.—The smallness of stocks has prevented purchases being made to any extent, and fully 100 bales of China Silk, now included in settlements, were shipped by the last mail, after the statistics were made up. It is impossible to estimate the unsold stock on the market, as it is almost entirely composed of Taysaam sorts, which were originally intended for native consumption, and are now only brought forward and packed for export, it being thought by the dealers that owing to the scarcity of silk, anything would command a high price. Tsatlees, Chops No. 4, tls. 500 to 510 per picul; do. No. 5 and common, 400 to 470 per picul. Taysaams, Chops No. 2, 440 to 480 per picul; do. 3, 420 per picul.

YOKOHAMA.—Settlements for the fortnight amount to 300—and arrivals from the interior to about 600 Japanese bales of 80 catties, and the unsold stock—both in native and foreign hands—may, as near as can be ascertained, be estimated at from 3,000 to 3,300 bales. The quotations of to-day show some reduction in the price of the common and in inferior hank silks, which form the largest item in the composition of the stock. Total export is now 9,178 bales, against 11,704 bales at same date last season. The quotations are:—Ida, best, per picul $830 to $880; medium, $780 to $820; Mybash and Sinchu, best, $890 to $900; medium, $800 $850; inferior $700 to $780.

DRUGS.—CANTON.—Cassia Lignea, of the new crop, 280 piculs have arrived and found buyers at the high figure of $18.75. Cassia buds are in ample supply, and procurable at $40. Gallangal, the stock is offered at $1.75. China galls are again lower, $13.50 only being asked for the nominal stock of 200 piculs. Essential oils: None. Vermilion: $38.50 to 39.

CAMPHOR.—HONG KONG.—The remainder of the stock has been sold to native dealers at $26½ per picul, it is believed for exportation to Singapore. No further supplies have yet come in, but there is known to be a stock of over 3,000 piculs in Formosa, which must find its way to this market. Prices, however, are not expected to rule below $26 per picul, packed.

CHINA GRASS.—SHANGHAI.—A limited business has been done in this article since the last mail left. Present prices are as follows:—White, best, Tls. 15.8.0; No. 2, Tls, 13 to 14; No. 3, Tls. 11 to 12; Green, Tls. 10 per picul.

CHINA IMPORTS.

HONG KONG.—There is no change in the market for cotton yarns. Grey shirtings could have been placed with speculators at the current rates, but importers look for an improvement, and are inclined to hold their stocks. White shirtings are little wanted, and the rates have again delined. Dyed and fancy cottons are neglected. Camlets have declined, owing to the unfavourable advices from Japan. There is nothing doing in nail rod iron. Hoop is in moderate request. Tin plates are wanted.

CANTON.—The quotations for all kinds of Cotton and Woollen goods are again reduced. The few transactions in Lead, Quicksilver and Tin plates show a slight decline. Prices and sales have been as follows:—Lead common and W. B. 1,100 piculs at $7,50 to 7.60. Tin plates, 200 boxes at $6.50 to 6.80 per picul, Quicksilver, 100 flasks at $70 50 to 71.50. Stocks include about 9,000 piculs of Lead and 300 flasks of Quicksilver.

AMOY.—The market for imports has continued excessively dull during the past fortnight. Cotton has further declined, and at the moment there is very little inquiry excepting for Tientsin staple. Grey Shirtings are almost entirely neglected, and clearances of old purchases are made very slowly. A few small sales of Yarn have been made at a decline of $1.50 per picul. Cotton Yarn $19; 16-24 have been sold at $81½. Grey Shirtings: 450 pieces 8½lb. have been sold at $5.10 to 5.16, but prices have since declined 10 cents, and we now quote 8½lbs. $5 to $5.05; 7 lbs. $4.20; stocks, 5,350 pieces. T-Cloths, 6 lbs., $3.20, 7 lbs., $3.70; 7½ lbs., $3.90; no stock. White Brocades, $5.10; Stock, 250 pieces. White Shirtings, 60's, $4.10; 64's, $5 to 5.80; 66's, $5.60; stock, 600 pieces. T. C. Cambrics, $3.80 for best quality; no stock. Chintz, $3.50 to $4.00, no stock. Camlets, scarlets, $25½; assorted, $24½; stock, 120 pieces. Long Ells, H.H., scarlet, $11.50; stock, 260 pieces. Spanish Stripes, $1.20 to 1.30 per yard; stock, 168 pieces. Metals, 500 pigs; Lead sold at $7.80 to 8.00; Tin, $26½; no sales. Nail Rod Iron, $3.50. Quicksilver, $172.

SHANGHAI.—G.E. Grey Shirtings, sales during the fortnight are estimated at 100,000 pieces, about one-half having changed hands on speculation. G.E. White Shirtings, sales from first hands about 15,000 pieces, at an irregular decline of 15 to 30 cents per piece. American Drills, Jeans, Sheetings, no stock. English Drills, no sale. T-Cloths, stocks very light. Sales about 3,000 pieces, best makes realising an advance of 10 cents per piece. Handkerchiefs, Blue Handkerchiefs in good demand, sales 2,000 dozen. Spotted Shirtings, sales about 5,000 pieces, Brocades, Dyed Brocades wanted. Sales 5,000 pieces. Damasks, sales 500 pieces. Chintz, there is still a good enquiry for favourite designs. Sales 3,500 pieces. Turkey Reds, sales 1,500 pieces. Velvet Velveteens, sales are limited to 720 pieces. Velvets, prices steady. Muslins, sales 1,000 pieces. Dimities, sales 500 pieces. Union Spanish Stripes, no enquiry. Spanish Stripes, prices lower. Sales 720 pieces. Medium, Broad and Habit Cloths, season nearly over. Sales 434 pieces. Camlets, very little enquiry here. Sales 800 pieces. Long Ells, sales 300 pieces. Market dull. Lastings, prices easier. Sales 600 pieces. Orleans, figured, good demand for best makes. Sales 1,000 pieces. Orleans, Plain, no sales.

METALS.—Iron, there is very little demand for Bar Iron, but Nail Rods continue in fair request. Lead, the demand continues moderately active. Tin Plates, small sales at quotations. Steel, limited demand. Quicksilver, wanted. Flints, readily saleable. Window Glass, neglected.

YOKOHAMA.—During the fortnight a limited business has been done, and prices have been in favour of buyers, except for Cotton Yarn, which is in demand; several hundred bales have been settled both on the spot and to arrive—the sales of Grey and White Shirtings, Turkey Red Cambrics, Taffachelass and Prints have been small, and no sales have been reported in other goods. In Metals there have been sales of several parcels pig Iron. The demand for lead has subsided. The deliveries of goods during the fortnight have been small.

HANKOW.—In consequence of the retirement of the Nienfei trade has been resumed in the native city. Large supplies of Grey Shirtings have continued to come forward, and considerable anxiety has been shown to press the sales. Grey T-Cloths continue scarce. White Shirtings have been in fair inquiry, with supplies on a reduced scale. Camlets and Lastings in good demand, but deliveries have been on an increased scale for some months past, and the heavy stocks render advanced quotations improbable. Large consignments of Lead have continued to come up the river. The demand has been good, and deliveries large, but purchases have been easily effected at previous rates. Quicksilver has advanced.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Liverpool: Castlehow.

At SHANGHAI.—From Cardiff, April 2: Betty Perlbeck.

REPORTED PER TELEGRAM.—From London: Guinevere.

At HONG KONG AND CANTON.—From Cardiff, April 2: Western Chief; from Sunderland, 11: Deerfoot.

At MANILA.—None.

At SINGAPORE—From Cardiff, April 8: John Watt; from Suez, 16: Shaftesbury (s.s.).

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—For London, April 6: James Wishart; for Liverpool, 3, Locket, Maiden Queen.

From HONG KONG and CANTON.—For London, April 11: Devonvale.

From MACAO.—For Havana, April 8: Dennis.

From MANILA.—For London, March 27: Her Majesty.

From SINGAPORE.—None.

From PENANG.—For London, April 11: Devonvale.

VESSELS LOADING.

At YOKOHAMA.—For London: Chanticleer.

At SHANGHAI.—For London: Vanguard. For New York: Finzel, Fairleader.

At HONG KONG and CANTON.—For London: Belted Will. For Liverpool: Simoom.

At MANILA.—For London: Adolfo.

At SINGAPORE.—For London: Desdemona, Strathmore. For New York: Fanny Kirchner. For Boston: Sophie, Helene, Macassar.

At PENANG.—For London: Prata, Moorhill.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To Great Britain, Cotton and Tea £2. 10s. to £3, Silk, £4 to £4. 10s.

At SHANGHAI.—A good enquiry exists for suitable vessels for coasting purposes, but for home little freight is offering.

At HONG KONG AND CANTON.—The following is from the circular of

Digitized by Google

Geo. Holmes.—Simoom, 470 tons, on the berth for Liverpool at £2. 15s. per ton. Faraway, 422 tons, Manila to United Kingdom £3. 10s. per ton Sugar, £4. 10s. per ton Hemp. Satellite, 476 tons, Manila to United Kingdom, £3. 15s. per ton Sugar, £4. 15s. per ton Hemp. Wm. Cundall, 270 tons, Manila to Channel for either United Kingdom or Continent at £3. 10s. per ton. The estimated number and tonnage of disengaged vessels in harbour is 43 vessels, representing 18,860 tons, reported by telegram. The White Adder has been taken up to convey troops to England.

At MANILA.—The Loch-na-Garr has been fixed for London, with 600 tons clayed sugar, at £3. 2s. 6d. per ton, and will probably fill up with hemp at £3. 15s. per ton.

At SINGAPORE.—Freights to England remain unaltered, viz., £2 dead weight, £2. 10s. light cargo.

At PENANG.—The Prata has a full cargo engaged for London at £2. 15s. for sugar, £3 tin, £2. 12s. 6d. The Moorhill has also commenced loading for the same port at £2. 7s. 6d. for arrowroot, £2. 15s. light freight, £2. 10s. tin.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA &c.—March 29, Maria Martin, Marseilles to Saigon; 31, Alavesa, Liverpool to Manila; Margretha, Hamburg to Hong Kong; April 1, Island Queen, Cardiff to Hong Kong; 2, Fairy, London to Bangkok; Patria, Hamburg to Hong Kong; Bang Bango, Cardiff to Manila; 6, Neptune, Sunderland to Shanghai; Crown, Sunderland to Singapore; 11, Charles, Toulon to Saigon; Queen of May, London to Singapore; Wellington, Shields to Singapore; 12, Daniel Mercy, Newport to Singapore.

From CHINA &c. to ENGLAND and CONTINENT.—April 2, Seawfell, Shanghai to Liverpool; 3, Crest of the Wave, Manila to Cork; 6, Encarnacion, Macao to Havana; 9, Atagoracia, Macao to Havana; 9, Burdoes Havana No. 1, Macao to Havana; Albertine, Singapore to Gibraltar; 11, La Plata, Singapore to Gibraltar.

COMMERCIAL POSTSCRIPT.

At the meeting held to-day of the Asiatic Bank the report presented by the directors was duly adopted and the retiring directors re-elected.

ARRIVALS NOT INCLUDED IN THE TABLES.—May 21, at Cork, from Java, Panama; May 25, off the Saltees, from Manila, Maria y Vicenta; at New York, from Amoy, Marco Polo; 26, at Falmouth, from Java, Rifleman.

DEPARTURES.—May 25, from London, for Shanghai, Lammermuir; May 24, from Liverpool, for Galle, Carin; May 14, from New York, for Hong Kong, Panther.

SPOKEN.—Rifleman, Sourabaya to Falmouth, May 12, 39 N., 29 W.; Sir John Moore, Sourabaya to Rotterdam, May 18, 46 N., 13 W.; Maria y Vicente, Manila to Liverpool, April 22, 12 N., 31 W.; Eastern Belle, for China, May 6, 30 N., 37 W.; Jacoba Helena, Batavia to Amsterdam' May 16, 47 N., 15 W.; Adela, Galle to London, May 24, 50 N., 8 W'

THE WEST COAST OF COREA.

(FROM A CORRESPONDENT AT PEKING.)

The knowledge that Corea is exciting increasing attention in England and amongst the foreign communities in the several ports of China has led me to give a somewhat hasty publicity to these scattered notes of a three months' visit to the Western coast. Whilst at Chefoo, during the spring of last year, I made sundry inquiries regarding the illicit trade in "ginseng" carried on between the Shantung junkmen and the Coreans, a commerce winked at by the bribed Chinese petty officials, but discouraged by their *confrères* in Corea by the instant death of the offender if discovered. The words *terra incognita* sounded specially provoking when used to a country within two days' sail of an open port. My desire to visit Corea was realised in an agreeably unexpected manner. Towards the middle of August a junk captain named Li Chen, who had been engaged twenty years in the ginseng trade, informed me that he had two Corean Roman Catholic Christians on board, who had just arrived from the capital of Corea *via* Manchuria, in order to recover some bad debts. They were both engaged in the ginseng trade. I made their acquaintance forthwith, and easily persuaded them to exchange their small, dirty, sultry cabin for a room on land. The elder one, named Yang-ga, had been a Christian for forty years; the younger one, named Kinga, aged thirty-nine, a native of Wang-king, the capital, was a convert of five years' standing. The latter, the better educated of the two, wrote Chinese with great ease, and had picked up a considerable number of useful phrases in the Shantung colloquial. They had brought with them a small catechism of the chief doctrines of Christianity, in Corean characters, written in the purest colloquial of the capital. With that as a basis, during their three weeks residence with me, I succeeded in compiling vocabularies and dialogues which afterwards proved of great use in oral communications with Coreans, who as a rule can only write Chinese. Very different from the Coreans who come here with the annual tribute, my two friends supplied me, without any hesitation, with straightforward answers to my numerous inquiries.

The Coreans here, in Peking, say their country is very poor, and no European believes them. I was rather staggered when Yang-ga and Kinga told me the same tale. Fancying, I imagine, that my presence would be a safeguard to them from the treachery of their Chinese debtors, they repeatedly urged me to accompany them back to Corea, promising, should their little vessel be waiting, for their return, on the coast, to convey me to the capital. English shirtings form the staple exchange for ginseng, but my simple minded guests thought in coming to Chefoo they should get the value in silver of their ginseng. They reckoned without their host, for their wily Chinese customers would only promise them payment in goods on reaching Corea. It was finally arranged that Kinga should cross in Li-Chen's junk, called the *Ta pai Lii*, or *Great White Ass*—a misnomer, for she was painted as black as a Venice gondola—and that Yang-ga and myself should take passage in the *Li-Pa-Hsing*, a small junk forty feet long and about fifteen broad. Having been detained by bad weather in Chefoo harbour for three days, on the morning of the 5th September the *Li-Pa-Hsing* got under way for the Port of Wei-Hai-Wei, the native place of the crew. Li-Chen was not prepared to start, so we purposed waiting his arrival there. I took with me two Chinese—a servant and a writer. We proceeded slowly, on account of the heavy swell setting in from the eastward. It was night before we accomplished the sixty miles between Chefoo and Wei-Hai-Wei. Our crew of six, including the skipper and pilot, went ashore next day to visit their families. Yang-ga and myself climbed a grass-covered hill, whence we had a magnificent view of the splendid harbour, so land locked as to be protected from every wind. The decaying, empty-looking, walled town of Wei Hai lay at our feet. It is one of the "Wei," or military posts, originally established in the time of the Ming Dynasty, for the purpose of protecting the coast against the periodical descents of the Japanese pirates. We *did* the place in tourist fashion by ascending the same day the picturesque look-out called the Hwan Tsin Len, and visited a temple in which a huge shark's bone does duty as a rafter. So near Chefoo the worthy inhabitants scarcely deigned to notice me. Yang-ga was by far the greater curiosity. Only two or three Coreans had ever visited the Shantung coast, and, not having come into contact with foreigners, were so afraid of the Chinese officials that they only emerged from their cabins at night. Yang-ga had every confidence in the power of my protection, and replied in "pidgin" Chinese when addressed in "pidgin" Corean by a passing sailor. A heavy gale from the east, that lasted four days, did away with all thoughts of a speedy departure. On the 11th and 12th, however, the weather cleared up, a fair westerly wind blew in gusts, but we were waiting for the arrival of the *Great White Ass*, and did not feel particularly anxious to go out till the swell had subsided. The morning of the 13th dawned cloudless and bright; a gentle fair wind, and we could wait no longer. At noon all were on board, the anchor up and off and we went at a fine pace. In fine weather commend me to a small junk. Splendid for a selfish Englishman who likes to be his own master and gets wearied with the exact discipline, or at any rate the stated routine of a steamer or merchant ship. Skipper, pilot, sailors on our junk are all related to each other. One takes the helm, and when the other feels inclined or fancies *it is time*, goes to relieve him. We are fortunate in our crew, good-natured villagers, who make my servant quite idle by their readiness to serve me. How merrily we go down the coast, passing island after island. By nightfall we have done our fifty miles and reached the promontory, whence in a due easterly course we stand off for Corea. The pilot produces an antiquated looking compass, about the size of a large pill-box, placing it gravely in front of himself; also a flint and steel, that he may light his pipe in the first place, and in the second place watch the course. I had turned in, but overhearing the skipper say of the compass, "Never mind that thing, it is not to be depended upon,—look at the Pole star," immediately turned out, and in spite of the skipper's protestations that he was born under the luckiest of constellations, the thought of the two hundred miles before us with such a compass effectually drove away all desire for sleep. The night, too, was so sultry that Yang-ga came up on deck, and we chatted about Corea as satisfactorily as we could, seeing that he only understood about a third of what I asked, and I about a fourth of his answers. We got on better when we talked of places and events recorded in the Bible.

How we welcomed the morning; the same fair wind and cloudless sky! At noon the weather changed, the wind shifted to the north, clouds began to gather. Towards evening we kept anxiously

Digitized by Google

looking out for land. About six o'clock the welcome cry "land!" was heard. The skipper remarked that the circumstance was "ting fei," very lucky, and so indeed it was, for the weather began to look threatening. He told us that the land in sight was the Island of Pantsz, or, according to the Coreans, the Island of Ta T'sing, a little to the south-west of the Island of Pe-ling.

Corea is divided into eight taio, circuits or provinces. Those on the east coast from north to south in a southerly line are *Hsien-ching* (Ham-kyong, in Corean), *Chiang Yuen* (Kang-won), *'sing Shang* (Kyong S'ang). On the west the provinces of *Ping An* (P'yang An), *Hwang Hai* (Hang Hè), *Ching chi* (Kyong-kò), Chung-ching (Ch'ung Ch'êng), Chiven-lo (Ch'o-la). These provinces are divided into right and left departments, with the exception of P'ing An, divided into east and south, and Hsien-ching, divided into north and south. In all there are 332 of these departments. The Chinese junks frequent the numerous islands between the Ya Tung River and the Han River. The capital by some strange blunder, in our maps, is always called "King-ki-tao,"—in fact the name of the province. The Chinese name of the capital is "Wang-ching," in Corean colloquial "S'aul," which is simply a translation of "Ching," court.

The West Coast line is exceedingly irregular. The Province of P'ing An, starting from the mouth of the Ya-lu River, on which stands the emporium of I-chou, extends for the larger half southward, then trending eastward, forms a large estuary, the southern side of which again pushes out some distance westerly. To the south of this promontory is the Ya Tung or Great East River, upon which a hundred miles up in a north easterly direction is situated the Provincial capital, P'ing Jang Yu—one of the most beautiful places in Corea. A "P'an-shu," a civil mandarin of the second rank, resides there. Coreans and Chinese agree in saying that a small steamer could proceed easily to the city. Next comes the province of Hwang Hai, the southern portion of which juts out into a lofty promontory, called by the Chinese Tang-shan, by the Coreans Ch'ang-shan. Fifty miles to the north-east, and twelve miles to the south-west, lie respectively the islands of Chian (*chodo* on the chart) and Pe-ling. The coast now trends inward easterly as far as the Bay of Hai-chou-Fu, passing the little Island of Niu-t'o-tsz. At the westernmost point of this bay, a mile between, lies the island of Mo-li—called by the Chinese *Hoang-Hoa-Ts'ai-t'o-tsz.* The coast then trends gradually in a south-easterly direction with the outlying Islands of Ch'i Ling, Ch'ang Ling and the tiny island called by the Chinese *Hsien-Tsz-Y'o.* The mountain Island of Ten shan (S'unni of the Corean) is next passed. The strait between this island and the mainland is about ten miles long, and has a breadth of about half a mile. It is much frequented by Corean junks, saving a distance of twenty miles at least. The southern coast of Hwang Hai now recedes in an easterly direction past No. 2 Ten shan, and No. 3 Ten shan, promontories of the mainland. Soon the inner Island of K'och'i and Shui-Ta—the two outer Ten-p'ings are passed, and the two imposing Islands of Chian T'ung and Chiang Hwa loom in the distance. They protect the entrance of the river "Im Chin" that leads to Sheng To Fei, the famous district of the *cultivated* ginseng, and the river Han, better known to the Coreans by the name of "Kyang K'ang," which leads to the capital of Corea, Wang-Ching or S'a-ul, which is situated on the northern side of the river about three miles distant from the bank of the Han.

I have found no reason for discrediting a native atlas of Corea, which I obtained from the capital. It contains the positions and names of more than three hundred well known mountains and sierras. There can be no very extensive valleys in the entire country. Corea has no lakes. Many districts were pointed out to me by a Corean contrabandist as containing gold, silver, copper, and lead. Gold is as dear there as it is at home. About three hundred ounces of gold dust, I am told, find their way here annually. The mines are under a strict surveillance, and very imperfectly worked. It would only fatigue the reader were I to mention the names of all the places which are said to produce the precious metals. The great staple of trade between China and Corea is ginseng and paper. Of the former, about 15,000 catties, worth 180,000 taels, are brought here by the annual Embassy. The other day I saw six waggon loads of paper being discharged in, what is called by Europeans, "Corean-street." A member of the Embassy informed me this formed part of the Imperial tribute. A few hundred sables are also brought by the merchants and sold at about one tael and a half a piece. The Coreans receive shirtings and silver in exchange. They made large purchases of copper utensils, Chinese pictures, moral sentences written elegantly on long pieces of coloured gilt paper (tintsz) for hanging on the walls of a room as we do engravings and pictures. Knives, musical boxes, watches, looking-glasses, all kinds of European goods, are readily purchased. Several of the merchants who accompany the Embassy have expressed to me their regret that there are no foreign traders in this city.

Near the northern bank of the Ya-lu river, about fifteen miles from the Chinese town of Feng-Hwa-Ch'eng, is the Pienmen (Ts'engmun) or Corean gate. It is opened for business three times a-year. A trade is carried on on the Chinese side in shirtings, brought from the open port of Ying-tsy (Nen-chwang) exchanged for ginseng, seaweed, bicho le mare (sea-slug), sea-otter, tiger and panther skins, &c., &c. I have been at some pains to collect statistics of this trade, but hesitate giving them to the public till I have further opportunities of verifying them. It may be set down as very insignificant as compared even to the Mongol Chinese trade. A word about the contraband trade on the West Coast. Yearly, in the autumn, about twenty small junks leave Shantung with shirtings, which they barter at 6 to 7 taels the piece, and bring back in the most successful seasons not more than 6,000 catties = 48,000 taels. The average price of ordinary ginseng here is 12 taels, on account of a heavy duty and expenses of transfer; at Chefoo about 8 taels. As I have mentioned, it is largely cultivated at Sheng-to, a small town in the province of Ching-Chi, north-west of the capital. It is grown from seed under long low sheds, constructed of pine bark with an undercovering of matting. The seed takes about five years to grow to the size requisite for exportation. It is gathered and dried in the sun during July, August, and September, and is packed very neatly in catty parcels. The best quality consists of 20 roots to the catty—the next 30, &c. It is extensively used in Corea, the richer classes making an infusion of the root which serves for tea. Father Jartoux, in 1711, whilst on a journey in Eastern Manchuria, thus eulogises it:—"Ce qui est certain c'est qu'elle subtilise le sang, qu'elle le met en mouvement, qu'elle échauffe, qu'elle aide la digestion, et qu'elle fortifie d'une manière sensible." I fancied I derived some benefit from constantly drinking an infusion of it when my tea had run short.

In spring about 200 large and small junks leave Shantung for the herring fisheries on the Corean coast. They do a little smuggling up north off the Tutung river in bicho do mare, and seaweed (Su-chue-ts'ai). Although the Japanese to the number of 300 are permitted to land and live in Corea, they are as jealously watched as were of yore the Dutch at Decima. In the south-east corner of the southernmost of the eastern provinces of Corea, Ts'ing shang, near the mouth of the Naktung river, is situated the walled town of Yung-Lai (the Chausian of our maps); within these walls the Japanese are strictly confined, but are permitted to carry on a small trade. The Coreans say that whilst they have to render tribute to the Chinese Emperor, the Japanese render tribute to the Corean reigning Prince. Consequently whilst no Prince can be enthroned at S'aul without the sanction of the Emperor of China and the presence of his ambassador, the Corean Prince appoints an ambassador to Japan when a new Emperor mounts the throne, so to speak. A Japanese acquaintance told me he had seen Coreans ten years ago at Yedo. They further assert that Japan is bound by an agreement to send there three hundred individuals, who are looked upon as hostages (!) since Taycosama's disastrous retreat.

In the north of the province of Hsiench'ing, when the River Teu-mon is frozen in early winter, the Manchus and Chinese who live on the northern bank trade in furs, horses, &c., with the two Corean towns of Ham-nir and Chung-s'eng. Close to this river has crept a great Power, which is destined to exercise a greater influence on Corea than does the Ya-Ts'ing dynasty. Englishmen are attracted by commerce. Corea is not likely to tempt them. It produces no tea* nor sugar, and but a small quantity of excellent silk. It has the mulberry and oak silkworm. The splendid rice of Chung-Ts'ing, Ts'ing-Shong, and Chu'en Lo, the fine cotton of Ts'ing Shong and Chung-Ts'ing do not appear to be cultivated in such large quantities as to leave much for export. We leave the ginseng to the Chinese. I question if there is as much gold in Corea as in Japan. The

* The Japanese say the tea plant came from Corea.

Digitized by Google

people are idle; in literature, mere echoes of the Chinese. As immoral as the Japanese, without their bright intelligence, they walk, and dress like people did in the Ming dynasty; are centuries behind the Chinese in the arts. Is it worth while to open such a country? Poor, *effete* little country, it is beginning to tremble at the unprecedented success of the Russians on the east of the Teu-mon. The Russians might well have shouted "Eureka, Eureka!" when their ships entered the newly ceded Gulf of Passiet. Whilst other harbours inhospitably opened themselves about half the year, the fine bay of Novgorod is closed only for some six weeks. Before me lies a recent number of the "Siberian Section of the Imperial Russian Geographical Society," which, amongst other interesting papers concerning Mongolia and Manchuria, contains a luminous sketch of the advantages of this gulf and its bay over all other Russian harbours in this part of the world. As it refers significantly to Corea, I present a short analysis of it to the English reader, commending it especially to the consideration of the Russophobist.†

"Passiet, but 20 versts from the Corean frontier, is the southernmost gulf of the Russian shore of the Sea of Japan. In it are found what are known now under the names of Pallas Roads, Expedition Bay, and Novgorod Harbour." Here follows a detailed account of their size, depth of water, natural advantages, &c. After which the writer goes on to prove the political, naval, and commercial importance of the gulf.

"1. It borders immediately on Corea, which is independent of China, and on Manchuria, which is virtually independent too. Establishing ourselves here with a firm hold we practically assert the consolidated possession by Russia of the entire northern shore of the Sea of Japan up to the mouth of the Amoor, ceded already by treaty. Possessing sufficient force we might influence Corea, a weak but up to this time inacessible country, destined in its turn, like other decrepid countries in the East, to yield to Western ideas" Under the second head the writer goes fully into the advantages of this position from a defensive and agressive point of view.

"Commercially, it is the only one of our naval stations bordering on a populous district. On one side 25 versts from Expedition Bay stands the Chinese town of Hung Ch'un, with a population of about 20,000; then there are the valleys of the River Hung Ch'un and its affluents, which are also thickly peopled with Chinese. On the other side, on the banks of the Tumen (Teu-man), are seen many large Corean villages, whose inhabitants occupy themselves with agricultural pursuits. By making use of the water communication afforded by the Tumen commercial influence will spread further and further in that direction, as far as the important inner Manchurian towns of Ningut and Kirin, about 250 versts from Hung Ch'un. We of course shall not delay in developing the navigation of the Tumen."

At the end of the paper the writer sums up in ten statements the best way of developing and furthering the interests of this new settlement. In No. 8 of which he proposes the "construction of powerful small steamers with a draught of two feet, primarily for the use of vessels whilst loading and discharging in Expedition Bay, and in case of necessity for the navigation of the Tumen."

The news reached China last steamer that 70 Corean families had gone over to the Russian territory. I was told in Corea that two merchants of a northern province had been beheaded for transacting a little business with the Russian

(*To be continued.*)

THE JAPAN STEAMSHIP NOT A FAILURE.—LETTER FROM CAPTAIN COMSTOCK.

(From the *New York Herald.*)

The official report of the reception of the gunboat *Fusiyama* at Japan states that the greatest satisfaction was manifested by the Government officers who were deputed to receive her, and in a letter from the United States Minister to Captain Hallett, who carried the vessel out, he says:—"I am requested by the Governor of Foreign Affairs and the Chief of the Navy Department to assure you, in their behalf, that the Japanese Government is very much pleased with the *Fusiyama* and the excellent condition in which you deliver her." The French naval officers and engineers, who tested the ship in behalf of the Japanese Government, expressed the greatest satisfaction at the completeness and perfection of the ship, her engines, armament, and general fitness for the service intended.

The report in the Loudon *Times* of the suicide of the engineer who ordered or purchased her cannot be true, as no such person was known in the transaction. The captain remained in Japan until the moment of the latest dates from there, and heard of no such event by any person, or in fact of any dissatisfaction in regard to the vessel. Thousands of our countrymen visited the *Fusiyama* during her construction and after completion at the port of New York, and she was considered by all who saw her a superior vessel in every respect.

The Navy Department ordered a trial to be made of her speed and the ship to be reported upon as to her fitness for our service, which was so favourable that they offered to take her at her cost; but it was subsequently deemed advisable to send her to Japan in compliance with instructions from that Power.

It is due to the constructors of this vessel, her engines, &c., as well as myself and all concerned, to state the facts above, and I am surprised that, without some official data to go upon, your journal should so disparage the mechanics of our country and defame those who have faithfully discharged a trust of so great importance to us as a people who are competing with the mechanics of England and France for the patronage of those Governments who cannot construct their own ships-of-war.

I gave much personal attention to the building and equipping of the *Fusiyama*, and also called to my aid the best assistance and advice to be obtained, and know that no better vessel of her class was ever constructed in this or any other country, or at less cost for the same character of vessel.

Under this belief I trust you will excuse me from committing hari-kari.—Yours truly, JOSEPH J. COMSTOCK.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, May 24.

Notwithstanding the amendment to the Culture Bill of Mr. van Nierop (Thorbecke) was rejected by 62 to 9 votes, it was clear that a rupture had arisen between the members of the Liberal party. Some of them had joined the ex-Premier, and were ready to support Mr. Thorbecke in his endeavours to force Mr. Fransen van de Putte to resign. One of the ministerialists, Mr. Poortman, however, made an effort to reconcile the malcontents, and proposed an amendment on Clause I. of the Bill, by which it was stipulated that the natives should not as yet become proprietors of the ground, but that the individual and hereditary use of the land should be secured to them. As soon as Mr. Poortman had defended and explained his amendment the leaders of the Conservatives declared at once that they agreed with its tenor, because this stipulation was just what they wished. I need not say that these declarations caused a good deal of confusion, and after the *pro* and *contra* had been debated by several members, the Minister rose and declared that Government could not agree with its tenor, and consequently he wished Mr. Poortman would withdraw the amendment, which, when approved by a majority, would compel the Minister to withdraw the Bill. Mr. Poortman, however, insisted—for what motive is not known—that a d vision should take place, and in consequence thereof 28 Liberals declared themselves against the amendment, while it was approved by 18 malcontents and 25 Conservatives. The vote of the 28 ministerialists was decisive, and could not be explained in any other way than that they considered with the Minister that this amendment was opposed to the economical principles of the Bill. A ministerialist also got Mr. Fransen van de Putte into the worst scrape. The friend had been here the greatest danger, and the Minister could say with the poet—

"But of all ills that gracious Heaven can send,
Save me! oh, save me! from the stupid friend."

Mr. Fransen van de Putte was placed now casually—I may say—in a *guet apens*, a dilemma from which he could not escape safe. The *friendly papers* immediately did what they could to demonstrate that the Minister could agree with the amendment—but he declined; he at once declared that he should stand or fall with this Bill, which must settle the question. But now that he had the conviction that this aim could not be reached in that way, and, ergo, all was done for nothing, he—after an extra Cabinet council was held—declared that he withdrew the Bill by order of the King.

The consternation which prevailed amongst the members of Parliament after this declaration was given is rather inexpressible, because it was clear that the Minister at the same time had tendered his resignation. And so he did, with all the other members of the Cabinet—as he stated in the sitting of to-day, upon an interpellation of Mr. van Foreest. We suddenly are thrown now again into a ministerial crisis, and we are more uncertain than ever about the future. It is not probable that his Majesty will grant the dismission before the result of the new elections—which are to take place on the 13th June—is known. But what then? The Conservatives would willingly take the ministerial seats, but their government is impossible with a minority in the Chamber. Mr. Thorbecke's is also impossible, because the 28 Liberals who voted against the Poortman Amendment detest the ex-Premier now that he has done all that he could to oblige Mr. Fransen van de Putte to withdraw the Culture Bill which he himself approved when he sat in the same Cabinet with Mr. van de Putte.

In one of the last sittings of the Second Chamber it was confirmed by the Minister of War that he ordered our Consul-General in Japan tha when a delay was asked for by the Tycoon for the last instalment for the indemnification of the expedition to Simoneseki, he should grant this demand in agreement with the other Powers, but with the warrant that some relaxations would be accorded to trade by the opening of more harbours.

The Second Chamber has also approved unanimously the Bill by which the Government is authorised to permit shipbuilders who build ships on account of foreign Powers, to send such vessels under the Dutch colours to their place of destination. This measure was taken on behalf of the *Kai-Yoo*, a man-of-war, which was built on account of the Japanese Government, and, as the Minister said, this measure should have led to a revision of our navigation laws had not this Cabinet tendered its resignation.

Some days ago the Prince of Orange made a trip to Paris, but his stay in the French capital was abruptly terminated by a sudden recall. The story afloat there was that an illustrious personage received a telegram from the Hague by which he was requested to despatch the said Prince by the earliest train, as the cheques drawn on the Home Exchequer to the

Digitized by Google

credit of a certain fair and well-known person were rapidly accumulating to a fabulous amount. It is perhaps possible that our Prince wanted money; this is no news—but it is a pure invention, inasmuch as the story tells of his sudden recall. This is proved by his stay in Brussels, upon his *retour* from Paris. In the Belgian capital his arrival was considered as a very important and rejoicing fact, because he was the first member of our Royal House who visited Brussels since 1830. The *Gazette Belge* and other papers did not content themselves with rejoicing exclamations, but also made the conjecture that this visit regarded the political position of both the countries in view of the troubles of Europe, and they came to the conclusion that Belgium henceforth should not stay alone. I need not say these suppositions are very ridiculous, because our Prince has no influence upon our politics. He is no *amateur d'affaires*, and likes more to enjoy himself. Perhaps he would have stayed longer in Brussels, had the presumptive heir of the Danish Crown paid a visit of some days to the Hague and Amsterdam. It is, however, considered probable that King Leopold II. will return in the course of the summer the visit paid to the Belgian Court by the Prince of Orange.

The panic which prevailed in London influenced very seriously the monetary condition of our trade, which is believed to be unsound; several failures took place, and some export houses stopped payment. The crisis was very much increased when it became known that the European Bank (Limited) had suspended payment; but the bad impression was transitory, because advices from London told us that affairs would be arranged in a satisfactory manner. This, however, is certain, that the future of the branch of this bank is lost here. It is the character of the Dutchmen that they only once give their confidence.

His Majesty has dismissed, on his demand, the Secretary-General of the Department of Foreign Affairs, Mr. Uijttenhooven, and appointed temporarily in his place Mr. J. W. van Lansberge, Member of the French Legation at Paris.

The income of the Treasury during the month of April amounted to f.5,625,923.85½c., against f.5,453,284.96c. in 1865.

COMMERCIAL.

COFFEE.—The fear of war and the raising of the discount influenced this article very disadvantageously. Of the quantity of 83,640 b. offered at auction by the Trading Company only 16,368 b. were sold, at about 1¼ under the broker's valuation, so that good ordinary Java was bought at 40c. The rest can be bought up till the June auction in quantities of 1,000 b., but not under auction prices, while in the auction of June no larger quantity will be offered than the usual 80,000 to 90,000 b. The brokers highly approve these measures of the Trading Company, but traders are of opinion that the condition of the article is now very unsound, and that the actual artificial price is much above the real value. So much is certain that when war breaks out the prices must fall; but when exporters are able within a month or two to send their orders to Germany then it will result that the Trading Company was in the right by doing as it did. Of course the market is now dull, and only a very moderate business is done for home consumption.

SUGAR (RAW).—No sales have occurred since our last report; the market is very dubious in waiting for the result of the auction of the Trading Company, in which 64,728 mats are to be offered, and which will be held to-morrow. It is probable that the Trading Company will take the same measures as with the coffee auction, and still decline to sell the whole quantity much under the broker's valuation. Refined without transaction, in consequence of the political circumstances.

TEA.—The market remains firm, but with only moderate demand.

RICE.—Dull, the market is very inactive.

SPICES.—The transactions in mace and other articles are of a very limited amount, but prices remained steady.

TOBACCO (JAVA LEAVES).—A general *mal-aise* prevails in the market by want of confidence as to the solvability of the trade. Many houses are involved in monetary difficulties, and some of them were obliged to stop payment. On the 6th and 8th of June 15,598 b. Java, being nearly the whole stock in the first hand, will be offered in private auctions.

JAVA INDIGO.—The market is very firm, but inactive. No transactions occurred in the first hand.

BANCA TIN.—The advance in discount has tended to unsettle the market and depress prices. The quantities sold were the following:—1,500 slabs at f. 45½, 1,850 slabs at f. 45, 2,000 slabs at f. 44½; perhaps large quantities could now be bought at f. 44.

HIDES.—By inscription were sold this week, 595 ps. Samarang buffalo, ex Philips van Marnig; 577 ps. do., ex Bristolian. Prices did not transpire.

MONEY.—The market is still under the influence of the unsatisfactory state of politics. Money is very dear and scarce, while the greatest instability prevails in our stock market. The market closed, however, somewhat firmer, in view of the success of the Congress. Dutch 2½ per Cents., 57¼; 3 per Cents., 67; 4 per Cents., 87⅞. Netherlands Bank 240 (ex dividend of 18½ per cent.). Trading Company, 136½. Austrian 5 per Cents., 43¼; 2½ per Cents., 22⅝; Nation. do., 46.

'CHANGE.—London, 3 mo., f.11.55; 2 mo., f.11.63; short, f.11.80. Paris, 3 mo., 46f.; 2 mo., f.46.30; short f.47.10. Hambro', 3 mo., f.34.50; 2 mo., f.34.75; short, f.35.37½.

SHIPPING.—DEPARTURES.—May 15, from Brouwershaven for Batavia, Krimpen aan den Lek, Brouwershaven, Madura, Dageraad; 17, from Texel for Batavia, Dyonysia Catharina, Mentor; May 18, from Brouwershaven for Singapore (via Sunderland), Emilie; May 21, from do. for Batavia, Joan.

ARRIVALS.—May 16, at Texel from Banjoewangie, Nederland and Oranje; from Sourabaya, Alvine; May 18, at Brouwershaven from Banjoewangie, Mary and Hillegonde, Triton.

PASSENGERS INWARD.

From JAVA.—Per Gysbert, Karel graaf van Hoogendorp: Messrs. Brunsfeld van Hulten, Gysbers; per Triton: Messrs. C. van Heel and family, Schutze van Houten, Forbes and family, Scharp, Visser, Silz, Mrs. Zimmer and family; Miss Gompert, and Mr. G. von Jaroschka Pohl; per Mary and Hillegonde: Messrs. C. Sinzate, and Broekhuizen, Mrs. Wolfson and family, Marin Gouwe and family.

PASSENGERS OUTWARD.

For JAVA.—Per Nederland: Messrs. Blume, van der Stadt, Zeehandelaar, Misses Bakker, Brullemen, Sibliz, and van Bruggen, Mr. Fauney and family; per Jean: Messrs. J. C. Schuilenburg, Polderman and family; M. Henstedt, and J. Heringa, Mrs. Polderman, Misses Schuilenburg, Miss C. Brandon.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, May 23.

Captain Bendixen, of the Hamburg barque *Amoor*, writes to his owners, Messrs. Warnecke and Berg, of this city, that when 210 miles distant from Hong Kong he succeeded, though with great difficulty, in rescuing the captain and crew of the British barque *Palmerston*, Thompson, from Rangoon to Hong Kong, in a sinking state, and carried them safely to Hong Kong.

Among the most recent arrivals in this city from the Far East are the following gentlemen:—Mr. Albert Droege, from Shanghai; Mr. Arthur Booth, Mr. Franz Schutze, and Mr. Johannes Meyer, from Hong Kong; Mr. L. Frohlich, from Singapore; Mr. Chas. J. Pasedag, from Amoy; and Mr. Emil Oppert and Mr. G. Bade, from Shanghai.

The Hamburg barque *Antilope*, Captain Lund, arrived here in 114 days from Iloilo.

COMMERCIAL.

COFFEE.—Owing to more pacific intelligence, and the chances of the settlement of the political disputes by a European Congress, a slight improvement has taken place in coffee, and 4,000 bags changed hands at firm prices.

SUGAR.—A further decline of 8 sch. bco. has to be recorded for all descriptions of raw, whilst the business done was extremely trifling. Refined has also given way, and is offered at a cheaper rate, but without attracting buyers.

RICE.—Nothing to report; prices nominal.

SPICES.—Cassia Lignea firm. A demand has sprung up for white Pepper, which caused a trifling advance.

SPELTER.—This metal continues its downward tendency, and will probably go much lower still, as no confidence is felt, and buyers decline to operate at any price for the present. The quotations are nominally 13 marks 12 sch. bco., but a bid much lower would probably not be refused.

DISCOUNT lower, and money more plentiful. First-rate paper 8 per cent.

SHIPPING.—ARRIVED.—May 15, Antilope, from Iloilo.

SAILED.—May 16, Alice, to Macassar and Hong Kong; 19, Feiga, to Hong Kong direct; 23, Agathe Johanna, to Singapore.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, AND CHINA.

The eighth annual general meeting was held on the 15th inst. at the offices, in Threadneedle-street; G. G. NICOL Esq., in the chair. The report of the directors has been already published in our columns.

The CHAIRMAN, in moving the customary confirmatory resolution, expressed regret that, according to the deed of settlement, the directors had been unable to meet the shareholders until that day, inasmuch as they would have been glad to have given them, at an earlier period, the assurance that there was no ground whatever for the present depreciated price of their shares, and he was very sorry if any shareholders had been induced to part with their property at a price so much below its real value. There was no reason whatever for alarm, and he trusted that the proprietors would not sell their shares at the depreciated value at which they now stood. (Hear, hear.) The figures in the accounts did not require much explanation. The current and fixed deposits were almost the same as they were in the previous year, which was a favourable feature. The accounts of last year excluded the deposits at the Mauritius branch, which was now closed. Those deposits had been considerable, but they were always comparatively unproductive; but the other branches showed an increase. They had had also to contend with the competition of the various local banks at Bombay, which allowed a higher rate of interest than this bank could afford, consequently there was a falling off in the deposits there. But the result of the whole was, that taking into account these unfavourable circumstances, the deposits were about the same as in the previous year. The coin and bullion and cash at bankers' showed a decrease, while in bills payable there was an increase, and the cause of this was, that last year they were suffering from the effects of the cotton panic, and the losses incurred upon cotton and tea, which occasioned great distress in trade, so that they could not use their resources with advantage. Consequently the cash and bullion showed a larger, and the bills payable a lesser amount. But in October and November a considerable reaction took place in the exchanges, which set in motion all the resources of the bank, the result of which was that the cash and bullion showed a decrease. That which would be most interesting to the shareholders would be the profit and loss account; and as to this he was sorry to have to report so small a net profit as £380,000. There were three causes for this; first, the extracrdinary dulness of all business last year, consequent, as he had said, upon the heavy losses on cotton, tea, and silk, which occasioned such a depression that for nine months they found it almost impossible to make profit, and their resources during that time, therefore, remained almost unproductive, while the expenses unavoidably continued heavy. Next there was the heavy loss at Bombay, into the circumstances of which it was scarcely necessary to enter. It would be remembered that the manager sent out to Bombay by the board was a man who had been very long in the service of the company, who was well acquainted with the trade of India, and whose opinions expressed here were always sound. He had disappointed the expectations formed of him, and by neglecting the strict and peremptory orders he received to decline all local business, had incurred very severe loss at that branch, which he believed he might say with confidence would never occur again. The third cause was the great competition in banking in India and the number of banks in excess of the requirement. That evil was, however, disappearing, the competition was already much lessened, and he had no doubt that the result would be to confine the trade of India and China to a few banks, amongst which theirs would be certain to hold a high position.

Digitized by Google

The future of the bank, he believed, would be improved by the events of the past year—none stood higher in public confidence, and no doubt they would henceforward be able to select and pick their business. The business of the present year promised exceedingly well. The exchanges in India took a favourable turn towards the end of last year—too late to benefit the operations of that year, but was contributing powerfully to assist the operations of the present year. The profits since the 1st of January had been exceedingly large, and in every respect the business of the bank was progressing satisfactorily. During the last year there had been but little movement in the exchanges in China. They had since improved, and taking India and China together the prospect of the exchanges was most favourable. Then he was happy to be able to assure them that there was no prospect up to the present time of any losses. (Hear, hear.) They held a few bills of Overend, Gurney's, and of Barned's, but those of Overend, Gurney, and Co. were fully provided for, and those of Barned were covered by good names, so that no loss was likely to result. Looking to the state of affairs in India he did not anticipate any danger, except, perhaps, at Bombay, where a monetary crisis was probable. But there they had now a manager of great ability and prudence, who was carrying out the orders of the board with great caution and judgment. The local business they had at Bombay was now a mere trifle, and the advances made by that branch were almost exclusively on Government securities, so that any risk incurred there was fully provided for. A telegram received from Bombay, dated the 9th of the month, was, "Several native firms in difficulty; we are clear"—(hear, hear)—and no doubt they would continue to receive unsatisfactory accounts from that place, but he repeated that they "stood to lose nothing" at Bombay. The several branches were now organised in a thoroughly efficient manner. The directors had laid down very strict rules, and had prohibited their managers and officers from trading or speculating in any way. They had now a body of officers of which any bank might be proud, and he was quite sure that such scandalous events as he alluded to last year would never occur again. (Hear, hear.) The returns and estates they received from the several branches now were most complete and satisfactory. They were made up and forwarded every fortnight, and in such detail that there was no transaction, however small the amount, of which was not reported to the head office. (Hear, hear.) It was impossible for any bank to be more thoroughly supervised or its affairs to be more thoroughly audited than theirs. (Hear, hear.) The telegraphic communication with India was working most satisfactorily for this bank, in lessening to a material extent the dangers to which it might otherwise be exposed; and nothing could contribute more to rendering banking in India altogether free from danger than a thoroughly free system of communication by telegraph with India and China. If such a system was organised banking in India and China would be as safe as banking in London. A committee of the House of Commons was now considering the subject, and any influence the proprietors could bring to bear in promoting the object in view would redound to the enhancement of the value of their own property. After explaining the system of audit he observed that the custom had been always to keep six months' dividend in hand, in order that the shareholders might depend upon receiving their dividends regularly, on the 1st July and the 1st January. That had worked well, and although after paying the dividend at the rate of 13½ per cent. for the last year they were unable to carry forward a sufficient amount now, they were very desirous of continuing the practice. (Hear, hear.) He was happy to say that the profits were now looking so well that the directors intended to pay a dividend on the 1st of July, as usual. He hoped that, until they had accumulated a sum sufficient the shareholders would sanction their being as moderate as possible, but he had no doubt that they would be able to pay a dividend in July and January that would be entirely satisfactory to the proprietors. Next year he hoped to meet them in their new premises.

Mr. BINGLEY inquired what was the amount of loss incurred last year from the manager at Bombay having departed from his instructions.

The CHAIRMAN was in the hands of the shareholders; but as the meeting was open to the public, and as those details only concerned the proprietors, the board thought it better to withhold them. At the same time if any proprietor would call upon him or the manager the fullest information would be afforded, (Hear, hear.)

Mr. COWAN considered that the losses should have been stated in the profit and loss account. (No, no.)—A SHAREHOLDER thought it was quite sufficient to know that the losses had all been provided for. (Hear.)

The resolution adopting the report was seconded by Mr. D. LARNACH, and unanimously carried.—Messrs. D. Larnach and Mr. G. May, the directors retiring by rotation, were re-elected; the auditors were also re-elected, and a vote of thanks to the chairman and directors concluded the meeting.

BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).

The annual general meeting of the proprietors of this bank was held on the 24th at the London Tavern; J. N. DANIELL, Esq., in the chair.

The report, which was taken as read, appears in another column.

The CHAIRMAN, in moving the adoption of the report, said that it would have been very agreeable to the directors to have had the power in their report to form a strong contrast with those which had been presented by most of the Indian banks of late. He was, however, sorry to say that they were in the same dilemma, but he hoped to be able to give the meeting a satisfactory explanation of their position. It was true they had lost a considerable sum of money; but they were still in a safe position, and able to continue the business to the advantage of the shareholders. When the managers in the East were appointed they had every instruction from the directors as to the business in which they were to embark; but whether or not they were carried away by that spirit of speculation which was rife he could not say, but there certainly had been the greatest recklessness carried on in China and Bengal which was adverse to the interests of the bank, and which they had no power to counteract, inasmuch as it did not come to their knowledge until it was too late. They stood at the close of the year 1865 with a loss actually ascertained to the amount of £87,000. That was a very serious loss, and one which they most deeply regretted. In addition to this there was a further loss of £70,000, which it was considered would have been covered by securities which were then in process of realisation. But since that time they had found out that further loss, which would raise the total loss to nearly £150,000. That would cover the extreme of everything, for they had taken everything in its worst possible light, and there were many items which had been set down as positive losses which might not turn out so. With regard to the state of the shares in the market, he might call their attention to that unhappy crisis which had affected almost every bank and other commercial concerns, as being the chief cause. They had very good credit in India, and were doing a safe business. It was true that they might have been doing more business, but for some time in China they had been holding back from business which was now being satisfactorily carried forward. The branch at Calcutta had for some time had a considerable portion of their capital locked up. Their manager had been called home to give explanations, with which the board was not satisfied, inasmuch as they saw that it was certain advances which he had made which was locking capital up. They again sent him out with instructions to realise, but they found that he took no steps whatever to do so. That manager had been discharged, and another appointed in his stead who had a thorough knowledge of the affairs of the East. He had been successful in realising a good deal of what the board considered if not lost, certainly so far in the distance as to render it invaluable for banking purposes. Again he had to repeat that the bank was in a sound and safe condition. (Hear, hear). They had capital with which to carry on their business, and there was a better field opening up to them every day. If they held their own, as they ought to do, he hesitated not to say that they would shortly be a most thriving bank. They must all feel that they were the victims of the commercial panic which had prevailed in India, and that if there had been any fault on the part of the board it was in appointing inexperienced managers.—Mr. SPOONER seconded the motion.

Mr. KINTREA referred to transactions which had taken place with the Credit Mobilier, and said that there were four directors connected with the Credit Mobilier on the board, and that large Credit Mobilier element was sufficient to give rise to certain statements which he had heard out of doors.

Mr. MACKRILL SMITH, a director, said that the bank had only had one transaction with the Credit Mobilier. They lent that company £10,000 upon the security of Bank bills to the amount of £15,000. It was only borrowed for one day, and the bank charged three days' interest.

Mr. VANDERBYL, a director, said that when he was elected a short time ago he had looked into the accounts, and he felt sufficiently satisfied to become a director. He knew that the National Bank (of which he was a director) had the greatest confidence in this bank.

Captain INGLEDUE said that he had consulted several shareholders out of doors, and they thought the best course to adopt was to strengthen the board. With that view he had called upon the chairman and directors, and asked for details of the accounts. They had received every information at the hands of the directors consistent with that secrecy which it was necessary to observe. The directors had pledged their word that the statement which they had set forth was perfectly correct, and that the bank was perfectly solvent. Under these circumstances it was not for the proprietors to damage their property by gossipping about its affairs out of doors.

The CHAIRMAN said that in the first instance they had to consider whether or not the report should be adopted. The question of electing directors would follow as a substantive motion. Mr. Hoyes had objected to his continuing to hold the position of chairman on the ground that he had not banking experience. He had since he was eighteen years of age been connected with commercial affairs in the East. He did not, however, wish to hold the position of chairman unless it was the wish of the proprietors that he should do so.

Mr. HOYES moved,—"That the directors be requested to carry into effect such a reconstruction of the board as will be calculated to insure confidence on the part of the public and shareholders, and that they also be requested to have a more effectual system of audit."—Capt. INGLEDUE seconded the motion.

In reply to further questions, the CHAIRMAN said that they had suffered no loss from the London and Mediterranean Bank.—The report was then adopted.

The CHAIRMAN said the board had but one feeling, and that was to promote the interests of the bank. Mr. Wortley, Col. French, and Mr. Cotterell had signified their intention of resigning. (Hear, hear.) If, then, it was the wish of the meeting he should be most happy to retire from the chair. (Hear, hear.)—After some discussion, Mr. P. S. Fletcher and Mr. Sassoon, the retiring directors, were re-elected, Mr. Vanderbyl's appointment was confirmed, and Mr. Alderman Allen was elected to one of the vacancies.—On the motion of the Chairman, it was resolved that the solicitors should not be changed.—Upon the question of the re-election of auditors being brought forward,

Mr. MAYNARD said that he held for himself, or in trust, perhaps as many shares as any other proprietor, and that he thought would be looked upon as a fair guarantee that his conduct was impartial. He could fully endorse all that had been said by the chairman, and he did not see anything to create alarm as to the permanent stability of the bank. At the Bombay branch a large part of the £87,000 loss had been incurred, and it had been written off to that branch. The total losses would amount to about £250,000, against which they had a reserve of £105,600, and profits to the amount of £23,400, making together about £130,000; therefore the capital of the bank might be looked upon as having suffered to the extent of £100,000, but they had now the bank fully established.—Mr. KINTREA moved that Mr. Maynard be re-appointed auditor.—Mr. Maynard was then re-elected.

Mr. BROWN moved that Mr. Spooner be re-elected, but upon the resolution being put to a show of hands it was lost.

In reply to a Proprietor, the CHAIRMAN said that there were thirteen directors at the board, and they received £5,000 a year as their remuneration.

After some discussion, Mr. M'Nair consented to act as inspector of securities, &c.

The meeting was then made extraordinary, and a resolution was passed so altering the articles of association as to enable the company to hold its meetings half-yearly in future instead of annually. The proceedings were then brought to a close with a vote of thanks to the chairman.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST, and reference can be made to the same by personal application at the office or by letter.

The London & China Telegraph.

LONDON, MONDAY, MAY 28, 1866.

THE CHINESE COMMISSION.

IN addition to the presence of a number of the members of the CHINESE COMMISSION, at the China dinner, noticed in another column, we have also to record an interview granted by Lord CLARENDON, on the 23rd inst., to his Excellency PIN-TA-JIN, the Chinese Commissioner, KWANG-YING, FUNGH-YIH, TIH-MING, YEN-HWUY, who were accompanied on the occasion by Major BRINE, R.E., Mr. HART, Secretary BOWRA, and the Interpreter, M. De CHAMPS. The official character of this reception must not be taken to imply, as the daily journals have assumed, that the Commission bears the character of an Embassy, or that his Excellency PIN-TA-JIN comes accredited from the Chinese Government to our own on a diplomatic mission. The Paris journals have fallen into error both in respect to the object and character of the mission. Up to this time the Chinese Government has abstained from sending formal embassies to other than Asiatic Courts. The project of a visit to this country of a Mandarin of high rank may be considered as having originated with Mr. HART, the Inspector General of Customs, who rightly conceived that an occular survey into our attainments of civilization and science by a Mandarin of education and intelligence, having the ear of the Chinese Government, could not fail to act favourably on its foreign policy, rendering it less timorous as to the issues of that more intimate coincidence with mercantile interests which it has been the object of our Ambassadors at the Court of Peking to bring about.

Without exaggerating the effects of this visit, we may regard the assent of the Chinese Government as evidencing the enlightenment of Prince KUNG, and to some extent the success of the representations made by Sir RUTHERFORD ALCOCK. Although little transpired in the above interview beyond the formal exchange of courtesies on the part of the Minister of State and the Chinese Commissioner, the door is now opened and good will result without doubt. The interview will be reported in all its minutiæ to the Chinese Government; and the reception of Commissioner PIN-TA-JIN will be recorded a signal event in the annals of the Empire. A reception was subsequently accorded them by the Under-Secretary of the Foreign-office, Mr. E. HAMMOND, and at a later period of the day the Royal Academy was visited. The Commissioner appeared highly gratified with the inspection, but owing to the backwardness of the art of painting in China, and more especially its defectiveness in perspective, it may be doubted whether the result was more than that calm surprise which for any result it works in the Oriental mind may be set down as a mere negation. The evening was devoted to a visit to Cremorne-gardens.

On the 24th inst. His Excellency and suite visited Messrs. BARCLAY and PERKINS's Brewery. The Thames Tunnel was then surveyed—an enterprise of which the visitors, looking to the entrance and the exit, might well inquire—*cui bono?* a question eventually to be answered by an under-river railroad. Accompanied by Major BRINE and Secretary BOWRA, the International Horticultural Show was next visited, the party being received by the President, Sir WENTWORTH DILKE, Bart., M.P., the architect, Mr. GIBSON, the Secretary, Dr. HOGG, and Mr. FORTUNE. This closed the visits of the day, the party returning to their apartments at the New United Hotel, Charles-street, Haymarket. The Tower of London was the first object visited on the 25th. Here the crown jewels appeared to excite far more admiration than the armoury. The Royal Mint, St. Katherine's Docks, and the Custom House were subsequently inspected. The 26th, being the celebration of the Queen's birthday, was devoted to the review of the troops at Aldershot, which takes place in its honour. We should add that whilst awaiting an appointment for the interview with Lord CLARENDON, the Commissioner and his suite went to the Crystal Palace, the Royal Polytechnic Institution, St. Paul's Cathedral, the South Kensington Museum, a medical studio, Richmond, and other suburban points. The stay of his Excellency in London will be prolonged to the 5th proximo, after which Birmingham, Leeds, Manchester, Liverpool, together with other important towns, will be visited. On the completion of this tour, his Excellency and suite will proceed to Denmark. We are glad to see that Major BRINE, Royal Engineers, has been appointed by Lord CLARENDON to attend on the Commissioner while in England. This gentleman was also appointed to the Japanese Commissioners.

THE CHINA DINNER.

THE second annual China Dinner took place at Willis's Rooms on the 18th inst., and was honoured by a larger attendance than on the previous occasion. The two meetings so far held have been due to the personal efforts of Major BRINE; but it is felt taht it is due to the gallant officer to relieve him to some extent from the labour necessarily involved in his self-appointed task; a committee is therefore proposed to be appointed who, for the purposes of the festival, will put themselves in communication with those gentlemen in England in the month of May who may be eligible for admission. What is especially required is the preservation of their individuality; let their distinctive features be once lost sight of or undervalued, and not only will the immediate results be seriously marred, but impediments thrown in the way of any more important objects than interchange of sentiment and expression of ideas, to which these meetings may ultimately lead. As on the former occasion, the dinner was of the most *recherche* description. The guests evidently enjoyed themselves, a result largely contributed to by the chairman, Sir JOHN DAVIS, who discharged his office with considerable tact and urbanity. The secret of this was chiefly that he thoroughly enjoyed the thing himself, indeed so much so that for a veteran, as he is, he was nervous in the discharge of the toasts assigned to him. We have heard from many persons two complaints in reference to the arrangements, one of these being the lateness of the appointed hour, 8 o'clock, and that the price should be beyond the customary charge of One guinea. The following gentlemen handed in their names with the intention of being present, but several were unavoidably prevented:—

Chairman: Sir John Davis, Bart., K.C.B., F.R.S., late British Plenipotentiary in China and Governor of Hong Kong—Honorary Secretary: Major Frederic Brine, R.E., late Lieutenant-Colonel Commandant Hong Kong Volunteers—Admiral Sir Michael Seymour, G.C.B., late Naval Commander-in-Chief in China—Admiral Sir Francis Scott, K.C.B.—Lord Richard Grosvenor, M.P.—Sir John Bowring, LL.D., F.R.S., late British Superintendent of Trade in China and Governor of Hong Kong—Sir Madconald Stephenson—Lieutenant-General Sir Hope Grant, G.C.B.—Sir James Matheson, Bart., M.P.—Major Hon. A. Anson, M.P., V.C., late A.D.C. to Lieutenant-General Sir Hope Grant, G.C.B.—Vice-Admiral Keppel—Rear-Admiral W. H. Hall, C.B., Director of the P. and O. Company—Mr. Montgomery Martin, late Colonial Treasurer, Hong Kong—Rev. J. Irwrin, D.D., Colonial Chaplain of Hong Kong—Mr. Smale, Chief Justice of Hong Kong—Colonel Caine, late Lieutenant-Governor—Colonel Browne, C.B., 44th Regiment—Captain Roderick Dew, R.N., C.B., H.M.S. *Lord Clyde*—Colonel Sargent, C.B.—Messrs. A. R. Johnston—P. Robertson, M.P.—James White, M.P.—Crum-Ewing, M.P.—Edward Pereira—E. Webb—John Silverlock—John Holliday—C. T. Braine—C. J. F. Stuart and P Campbell (Oriental Bank)—W. Ormiston (Mercantile Bank)—W. Blenkin—R. C. Antrobus—W. Roupell, Q.C.—F. J. Angier—C. Thorne—W. Schmidt—S. B. Rawling—W. Broughall—Arthur Smith—J. Hudson—M. Pestonjee—H. Severs—J. Dunell—H. Willgoss—D. K. Mason Edward How—W. How—Donald Mackenzie—J. Hooper—E. Waller E. Duncanson—A. Potter—E. Potter—S. Mossman—C. Morgan—C. M. Kerr—H. D. Brown—H. Beveridge—T. Dick—G. Anderson—Adam Scott—C. Ryder—Captain Brown (P. and O. Company)—Major Langley, R.E., Brown, 14th Hussars—Lieutenant Colonel Greaves, late commanding Canton Volunteers—Assistant Commissary-General Eichbaum—Reverends P. J. Brine—John Scarth—H. Huleatt—C. J. Armistead, R.N.—Dr. MacSweeney, R.N.—Dr. Snell, 99th Regiment—Captain the Hon. W. J. Ward, R.N.—Mr. Robert Hart, Chief Inspector Chinese Customs—Monsieur de Champs, Interpreter to the Chinese Commission—and Feugh-yih—Teh-Ming—Yen-Hwei, attachés to the Mission, who occupied seats at the table opposite the Chairman. The Commissioner Pin-ta-jin and his son were prevented from attending owing to indisposition.

After the usual loyal toasts of "The Queen," "The Prince and Princess of Wales," "The Emperor of China and the Chinese Visitors," "The Church," &c., the Rev. Dr. IRWIN, Colonial Chaplain of Hong Kong, responded to the latter. He gave very pleasing testimony to the kindness with which the community of Hong Kong had treated him, and, in alluding to the domestic trials which it had pleased GOD to inflict him with, he felt that if there were any cause for regret it was that he had not been able to show more vigour in his ministry. The next toast, viz., "The Army, Navy, and Volunteers," with the names of Admiral Sir MICHAEL SEYMOUR, Colonel BROWN, and Colonel SARGENT, was responded to by the gallant Admiral, who

Digitized by Google

said that of all the commands which he had the honour of holding, China would always stand out with the most pleasing and he might say proud recollections. As was very justly observed by the Chairman, he had been placed in extreme difficulty by the sudden hostilities of the Chinese in setting fire to the foreign factories at Canton, and it was a considerable satisfaction to find that his conduct on that occasion met with the approval of the mercantile community as well as Her MAJESTY'S Government. The substantial testimonial made to him on his departure from China would always be preserved by him with great respect. Colonels BROWNE and SARGENT also spoke very warmly of the hospitality they had found in China.

The next toast was that of the Civil Service and Sir JOHN BOWRING, in proposing which the CHAIRMAN highly eulogised the services of Sir R. ALCOCK and Sir HARRY PARKES. This toast was responded to with Sir JOHN'S usual power of speech. He too could look on China as the most eventful part of his life, and it was gratifying to find that England's servants abroad were sure of protection at home if their conduct could be proved to be indeed *pro bono publico*, and hence his policy in what has been termed the "*Arrow*" war was approved, although the government of Lord PALMERSTON were driven to an appeal to the country.

The next toast was "British trade in China," and Mr. ROBERTSON, M.P., who, in responding, admitted his ignorance of the China of the present day, and intimated it would have been better to have accepted a name of more recent connection, in which we quite agree. The next toast was that of "The Visitors" and Lord RICHARD GROSVENOR, M.P. Lord GROSVENOR in responding said he had never had a more enjoyable trip, and but for the prevalent fevers, &c., one would be apt to like China more than England. "The House of Commons" and Major Hon. A. ANSON, M.P., was responded to by that gentleman. The other toasts on the programme, including "Our Colonies," coupled with the names of Mr. MONTGOMERY MARTIN, Sir MACDONALD STEPHENSON—"The China Volunteers," Major BRINE, Mr. WEBB and Mr. ANTROBUS, late Commandants —"The Press," Mr. ANGIER, of the *London and China Express* and *London and China Telegraph*, were omitted for want of time. We may here suggest to the future Chairman that less time should be expended in proposing the various toasts. We must do Sir JOHN the justice, however, to say that he did not vacate the chair until fairly deserted. We may in conclusion mention a remark generally made, and that is the costume in which our Celestial friends appeared which would have disgraced an ordinary servant in China, we trust that Major BRINE, who has been appointed by Lord CLARENDON to attend on these gentlemen, will see that they do not again appear in such a style. We believe that Mr. HART can be excused of the apparent neglect, owing to an absence which prevented him from seeing them previously. Indeed it was remarked as somewhat strange that he did not sit near them or appear to take any interest in them during the entertainment.

Sir JOHN DAVIS alluded to the desirability of promoting a China Club, which was heartily responded to by all. We trust therefore to see some action taken in the matter of forming a China and Japan Club, which we believe would find ample support.

THE BRINDISI ROUTE TO THE FAR EAST.

A MORE striking illustration of the effects of the exchange of an intolerably bad Government, for a tolerably good one, has scarcely ever been so well shown as in the transfer of the Neapolitan States from the rule of the Bourbons, to the consolidated Government of Italy under VICTOR EMMANUEL. The country so lately priest-ridden and beset with brigands has now become by the energy of the present Government, the high-road for communication to Egypt, India, and China. The statesman who said that the railway and telegraph, would do more to rid society of such relics of a barbarous age as brigandage than any amount of legislation or military rigour, deserved indeed well of the people. That the Italian peninsula presents the shortest practicable route to Egypt, has been a long standing fact, and but for the occupation of the chief port of the territory by the Neapolitans this route would long since have been an accomplished fact. The delay has however not been unproductive, for it has opened the way to public opinion. Even five years ago it was said that the Messageries Imperiales would have no chance against the P. and O. Company, in the conveyance of passengers at least, but such has been the increase of the traffic of late years, that not only are these boats crammed, but another company has found it pay to run a line between Suez and Bombay, quite independent of any subsidy or other special influences. Indeed what the Indian passengers would have done without the Messageries line it is difficult to say, for the P. and O. could not have increased their boats: as it is, they have had a hard time to maintain their contract lines, owing to the number of accidents to their steamers combined with the faulty construction of some of their new boats—or rather the engines. Hence we say that the past few years have very forcibly demonstrated the necessity of increased facilities between England and the Far East. This is apart altogether from the want experienced by those who have been several times over the old line, of a change, "a new route" which would give a zest and rather lighten the tedium of the voyage. The India and China of our day is very different to that of twenty years since. Now a days people run out as it is termed, and indeed are back again before they are hardly missed. The conclusion is therefore that the new line by Brindisi, as well as the old lines by Trieste, Marseilles and Southampton, will all find sufficient support. For this new connecting link with Egypt we are indebted to the Messrs. PALMER BROS. AND CO., of Newcastle, not that the Italian Government were in any way backward in giving the necessary support to a line of steamers, but unfortunately in Italy as in Spain and other countries possessed of a soft and delicious climate, there is more disposition to talk than work—to say nothing of numerous jealousies. The shoulder to the wheel does not follow so speedily as with the Anglo-Saxon race. After many delays and much perseverance the terms of a contract were concluded with the above firm, who formed the SOCIETA ITALIANA ADRIATICO ORIENTALE and the line opened with four screw steamers of about 1,000 tons built by Messrs. PALMER to run weekly in connection with the India and China Mails. The minimum speed was fixed at 10 miles per hour and so regularly has the service been performed that we believe they have never missed either the outward or homeward mail at Alexandria. The interest attaching to this route, which has not been properly described, at least in its details, induced us to undertake its examination and we now proceed to give a description, from which our readers will gather that we can most heartily recommend a trial of the route.

Starting from London, the route by Boulogne or Calais to Paris may be adopted. It is unnecessary to refer to the attractions which the French capital at all times presents. A traveller, however, is never unmindful of the character of the hotel at which he sojourns, and as the very multiplicity of hostelries in Paris creates some embarrassment with visitors new to the city, we may refer to the Grand Hotel as presenting every inducement either for a temporary or protracted sojourn, guests being there altogether free from that indefinable but nevertheless annoying surveillance so frequent elsewhere, and left unrestrictedly to choose their own mode of living whether within or without the house. Freedom in personal movements is a condition of enjoyment in all places in which one sojourns in a foreign country; and it is always felt as a grievance when charges are made for which no equivalent has been received. From Paris the Marseilles route is adopted as far as Macon. The most notable town passed through is Dijon. It is sufficient for our purpose to say that it continues to maintain its long-established and well-earned reputation for excellent breakfasts. At Macon, on the river Soane, a few hours may be pleasantly beguiled should travellers so desire. Our readers must understand that it is entirely a matter of choice whether they proceed by easy stages on the Brindisi route or push right through as the tickets are available for a week. The Hotel de l'Europe is the best at Macon.

From Macon the line runs to Culoz where passengers change for the Victor Emmanuel Railway which conveys hem to the little town of St. Michel at the foot of the Alps. This railway spans in its course the river Rhone which divides the provinces of Ain and Savoy. The scenery throughout is pretty and mountainous, and very charming in the neighbourhood of the Lake du Bourget, on the shores of which is a celebrated mausoleum to a former Duke of Savoy. Of Savoy itself much interesting matter might be written, but we may briefly state that this is the province which so raised the ire of Sir ROBERT PEEL in the House of Commons when its transfer was effected to the French. Sir ROBERT is intimate with the neighbourhood, having resided amongst the people a good deal, and by his testimony it seems the people were against the change. It is in this province also that Chambery lies, so

Digitized by Google

well known to English tourists and more especially those who have passed through that delightful period known as the "honeymoon," Chambery being in high repute as a *sanctum sanctorum*. Churches, steeples, convents and palaces, betokening its former wealth and importance, cluster together. The royal retreat of VICTOR AMADEUS, an ambitious king, a great soldier, and a great politician who figures conspicuously in the annals of Europe, its mingled splendour and melancholy could not alleviate the struggles of a restless mind. The charming and fertile country awakens admiration at each successive stage of the journey, groves of fir, chestnut, and larch alternating with vales and plateaus luxuriant with verdure, whilst glimpses are caught of vast waterfalls, taking their source in the Alps.

Arrived at the terminus of San Michel, we take the Diligence to cross those mighty barriers that so long have interposed a check in the exchange of national industry, and so materially shaped the political and commercial fortunes of the southern European States. In former times it might unquestionably be affirmed that

"——Mountains intervened
Make enemies of nations,"

but now that engineering science is tunnelling these gigantic barriers, and has provided means by which in surface travelling the steepest gradients may be overcome, these Alps will find their chief account simply in marking boundaries, and feeding the streams of the southern plains. The importance of the completion of the railway over Mont Cenis now being actively carried on, and which may possibly be *un fait accompli* in the comparatively short space of fifteen months, cannot be overrated in its relation to Eastern trade and communication *via* the Brindisi route. The delay of ten hours at present incurred in passing over Mont Cenis, though of comparatively little account in the aggregate of time occupied in connecting the Far East with Western Europe, is only tolerable as long as it is unavoidable. The transit across Mont Cenis is now effected by means of the Diligence each with its team of fourteen horses, and guided with unerring skill, an accident being almost unknown. The shouts of the drivers, the efforts of the horses in the ascents, the dexterity displayed in rounding the curves of the steep and precipitous heights, in which success is frequently dependent on the nicest calculations, affords that excitement which is at all times welcome to the traveller as breaking in on the monotony of his journeyings. The average time occupied in crossing Mont Cenis is ten hours in Summer, whilst in Winter and when the journey is effected partly by sledges, it is uncertain, being determined by the amount of snow that has fallen and the general condition of the roads. But as the telegraph is at work on the whole line of road any kind of stoppage is easily known. The plain on the summit is about five miles across. In the middle of it is a large lake, from which the river Dora, which runs to Turin, takes its source.

The feasibility of working a railway across Mont Cenis was first tested on a piece of line laid down on a portion of the route near Lanslebourg situate on the French side of the mountain, and where the railway fence thrown up affords a permanent and most serviceable protection to the Diligence. Our readers will understand by this that the proposed line is being constructed on the common road from St. Michel over Mont Cenis to Susa, affording at the same time ample space for the country traffic. The peculiarity in its construction is a middle rail, the projecting parts of which are bitten or pressed by the horizontal driving wheels of engines constructed for this very purpose. Guide wheels, attached to the trailing end of the engines, also act on the intermediate rail. In addition, the different vehicles to be drawn are furnished with guiding wheels. In the construction of the engines the object has been to develop a maximum of power with a minimum of weight; to unite with firm adhesion to the rails the utmost possible tractive force. The horizontal wheels being worked by the engine in conjunction with the driving wheels the force of the adhesion may be regulated according to the gradient. The engine constructed by Mr. FELL, as a model of those proposed to be applied, was first tried on 800 yards of rail, with gradients at 1 in 12, (laid down experimentally), in the presence of commissioners appointed by the chief European Governments and was pronounced satisfactory. The engines are so constructed as to work snow ploughs when necessary to clear the line of any accumulations, but the covered ways will extend no less than 7½ to 9½ English miles, and will consist of various erections, one extension being to keep off light falling snow, another to avert heavy snow drifts, whilst the various runs of the avalanches are guarded by strong masonry arches. Some contrivance of this sort is of course necessary to keep the road clear.

The works are being actively pushed forward, and though only designed to be used pending the completion of the grand tunnel, appear to admit of greater permanency. The total length of road is 48 miles. The period of the completion of that tunnel is somewhat problematical and may be placed at six or seven years. The tunnel works have latterly been impeded as is well known by several obstacles; but we have reason to believe that the excavation, which is being carried on simultaneously from Modane on the Italian side and Bardonnéche on the French side is proceeding satisfactorily, and that the reports current in the past few months of an adverse character have proceeded for the most part from mere conjecture, or have been originated for sinister purposes. Very great and certainly unnecessary jealousy is displayed in excluding visitors. The estimated cost of the tunnel is £5,376,000, of which the French Government are to pay two-thirds and the Italian Government one-third.

The descent of Mont Cenis on the Italian side is an event to be remembered both for the gorgeous scenery brought to view and the associations that crowd upon the mind. The home of DANTE, MICHAEL ANGELO, and TASSO, the land of paintings, sculpture, sentiment, song, and passion, reclining as it were on a glorious past and yearning for a yet more glorious future—Italy has a charm which enraps the sympathies, and loses none of its power now we have entered by a mountain pass. The railway rapidly conveys us from Susa to Turin which lies most picturesquely at the foot of the Alps. At Turin a day or two can be very pleasantly passed; although dull since the capital was transferred to Florence, it is one of the best constructed cities in Italy, and the Hotel de l'Europe is the best establishment, with moderate charges. The streets all running at right angles are large and clean. The Royal Palace, the galleries, the armoury, and above all the church of the Superga standing on a hill of about 2,400 feet in height are well worth seeing. From this church the view includes the Alpine range from Mont Cenis to the Simplon and Monte Rosa, and also the plains of Marengo, Lombardy, and the rivers Po and Dora. The church itself contains the tombs of most of the Royal houses of Sardinia, including CARLO ALBERTO, the father of the present King VICTOR EMMANUEL the wife of the latter and several of his children. From Turin the rail proceeds by Alessandra (the strongly fortified place which played an important part in the war with Austria in 1859) to Piacenza, thence to Parma, Modena, and Bologna, places all fraught with interest, but the latter is considered a convenient halting place between Turin and Brindisi and the hotels are very fair. From Bologna also the train can be taken to Florence about five hours journey. The route lies through the Apennines and the cuttings and viaducts are most extraordinary. Travellers will do well to allow themselves time to accomplish this; it is of course just so much out of the direct route as Bologna has to be again reached to proceed onwards. In addition to the historical connections of Florence and the magnificent collections of paintings, sculpture, &c., there is now the Court of Italy where the form of Government through its Chambers of Senators and Deputies can be seen. Considering the importance of the place the hotels are very indifferent at Florence, but the Hotel de New York, Hotel de la Paix, Hotel de l'Italie, are perhaps the best. From Bologna the rail runs through a pretty country to Rimini.

At Rimini the line proceeds right along the Adriatic. The route thence to Ancona and Brindisi is truly most charming. Indeed nothing can compare to it for purely railway travelling; and what adds to the enjoyment is the easy manner in which the trains run. The vibration is really nil, the carriages run so smoothly that a day and a night's travel do not cause so much fatigue as a journey from London to Liverpool. The rail on the whole route is very fairly and safely constructed, and when some new bridges &c. now buildings are completed, the speed will be increased from 25 to 35 miles. An undulating country to the right covered with the richest vegetation, vindicates its title as the garden of Italy, backed by the purple range of the Appennines, their heights covered with perpetual snow, whilst to the left is the blue Adriatic sometimes tempestuous but ordinarily lying calm and tranquil as a lake. Many of the stations passed on the way to Ancona, though of no present importance, are famous in Roman history. Of these is Pesaro, mentioned by CICERO, and still surrounded by walls and forts. Its fame was revived in the sixteenth cen-

Digitized by Google

tury, but in another form, having then become celebrated as the residence of literary men, poets and painters, prominent among whom were TASSO and BERNARDO. It was further the birthplace of ROSSINI. It possesses too a certain interest from the fact that Queen CAROLINE when Princess of Wales, took up her residence in the vicinity.

The traveller having time to spare, will stop at another place of importance—Fano, an old walled town, and which as approached by rail exhibits a curious not to say fantastic appearance. In 1514 the first Italian printing press was established here by JULIUS II. Pope CLEMENT VII. was a native of the place. Sinigaglia, by the sea, the birthplace of the present Pope Pius IX., is next reached. It is well worthy of a visit, if only as one of the cities of Pentopolis, connected in its fortunes with many of the great battles of the world, and itself the scene of many bloody conflicts. The traveller will be entertained should he arrive at the period of the annual fair, which is attended by people from all adjacent countries, and is held by virtue of an ancient charter dated in 1200. Continuing on through a flat, even country, planted with olive trees, fig trees, and vines, the city and port of Ancona is presently reached. Placed on a natural promontory jutting into the sea, its appearance in the distance is highly picturesque; but any favourable impression thus excited is unfortunately dispelled on closer contact; the streets are excessively dirty, indeed the only way to describe it is to say at once that the streets are public water-closets. The hotels are wretched. Ancona, as is well known, is the most important point of call for steamers on the Adriatic; the Austrian LLOYD'S Steamers connect it with Trieste, Constantinople, Greece and the Archipelago; BIBBY and MCIVER'S with Liverpool; an Italian line besides connecting it with other points on the Adriatic circuits, the Peninsula and provides regular and direct communication with Naples, Leghorn and Genoa; finally, the line known as PALMER'S, though styled the Italian Adriatic and Oriental, carrying the Italian flag, connects Ancona with Brindisi and Alexandria. Ancona was remarkable in the last Italian war as having been successively occupied by the Austrian and the Papal troops under LAMORICIERE, who in his turn was defeated by VICTOR EMMANUEL'S troops under CIALDINI. Its new masters have added greatly to its fortifications.

Leaving Ancona we next come to Loreto, fifteen miles distant, which has for nearly six hundred years drawn pilgrims from all quarters to its shrines, through the repute attaching to the *Santa Casa* or Holy House of the Virgin—a brick room 30 feet by 13—according to the legend, blown over from Nazareth in 1291. Time does not appear to lessen the potency of the story, and railway facilities have materially augmented the worshippers already so numerous that from £20,000 to £25,000 are here realised annually by the sale of rosaries and votive offerings. Historic attractions are not wanting, the vicinity abounding in memorable sites. Thus at Tolentino, NAPOLEON outraged the dignity of the Papal See in the person of Pope PIUS VI. which terminated in a treaty in 1797. Here too the hastily summoned forces of the brilliant MURAT, King of Naples, were signally defeated. Castel Fidardo, placed on a mountainous eminence and defended by huge natural bastions, is noted for the defeat of the Papal troops under LAMORICIERE, by GARIBALDI in 1860. In fact, the present and the past continually blend in the associations summoned up by buildings and sites in the vicinity. Italy would seem to trust tradition for her inspiration. Continuing to advance through a delightful country in which labour and industry are sufficiently apparent, but in which people seem wanting, a vast number doubtless being asleep in convents, or if awake counting beads, we arrive at Pescara, an important point on the line owing to the postal roads that diverge from it. Ortona will not fail to strike the attention, if only for its romantic appearance in the distance, with dwellings festooned in vines, &c. Termoli, once an important strategic position, and on the hill of which contending armies have met and fought from the time of ALARIC next comes into view, with its ruined castle and massive remains, the walls no longer echoing the sentinel's cry or the clash of arms. From the gigantic mound on which it stands, may be discerned far out to sea, the Tremetti islands, ocean gems set as in silver by the foam that edges them,—the Insulæ Diomedæ, or scene of the metamorphosis of DIOMEDE'S companions into birds, and famous in Italian story as the place of banishment to which JULIA, wife of LEPIDUS and granddaughter of AUGUSTUS was consigned. The route then proceeds to San Severo where the Emperor FREDERICK II. died in the arms of his natural son MANFRED. This southern country is truly the land where may be enjoyed in full perfection the *dolce far niente* of the Italian. Nature in her gayest and most delightful mood seeking to win the beholder into utter forgetfulness of everything but her charms. The line on to Foggia avoids the spur of the Italian boot and takes us for a short time out of sight of the Adriatic, but in its place, together with accustomed features of scenery, glimpses are obtained of mantled towers and ruined aqueducts, whilst afar in the bright light of an Italian sun the Apennines break from time to time upon the gaze "in vastness almost tangible." Manfredonia, it will be remembered, is the scene of BYRON'S famous tragedy of "Manfred," and shares in the glories of GARIBALDI'S last Italian campaign, as one division landed here. Leaving Foggia, the next station reached is Corignola celebrated as the scene of French defeat in 1503 by GONZALO —a defeat which placed Naples and its dependencies under the sovereignty of Spain. The site is clearly definable of that yet mightier contest in which HANNIBAL, confronting the Roman legions, 80,000 strong, left only a few thousands to tell the tale of disaster, a disaster alike for Rome and for the world as turning back the tide of civilisation. To inspect the site, would alone be worth a journey to Southern Italy. Barletta, the next station, is notable for the murder of Protestants at the instigation during the past month of a few fanatical priests. The line now makes for Trani, where the sea is again struck. Everywhere are traces of the restoration effected by the Emperor TRAJAN, and it is easy to discern the importance formerly attaching to its position. Brindisi is reached from Trani by a direct line. Bari, a station on the way, has a fair amount of shipping, which will doubtless be increased through the extending coast trade. The streets are wide and good, and it abounds with historic associations; its past importance may be judged by the fact that the Kings of Naples were formerly crowned here. The enlightening effect of commercial or rather trading intercourse on the spirit and enterprise of the people may be plainly witnessed. Thus, we found Englishmen were engaged in laying down gasworks, a municipal improvement by no means universal in Italy. Bari rejoices in a most excellent hotel called the Risorgimento. The remainder of the route to Brindisi is equally interesting. The locomotive with its long train startles, as it were, the echoes of the old world, and historical propriety seems sadly violated. But everything must bow before the exigencies of commerce or of trade, and the Brindisi route—the highway to the Far East —saving three days of sea passage as compared with the Marseilles route, and shortening our connection with the East by two days, is of far more consequence than all the ancient remains over which it is constructed or the associations it sets aside.

BRINDISI.

On nearing Brindisi which lies in the Straits of Otranto passengers must be prepared to find it in a state of decay and ruin, but the traffic now produced by the opening of the railway has given an activity not known for centuries. Brindisi, or the Brundusium of HORACE was a place of considerable importance. VIRGIL died here on his way from Greece. The Greeks settled here solely on account of the fine natural double harbour and the Romans made it their chief naval station. The outer harbour is protected by the mainland and by an island on which a large fort was erected now converted into a Lazaretto. Except with the wind blowing right in, the water is always smooth; it can be entered at all times of night or day, being provided with two excellent lighthouses and a centre one on the old fort, as a guide for entering the harbour. Both this and the inner harbour are the finest natural basins possible. The entrance into the inner harbour was unfortunately choked up by JULIUS CÆSAR, but in the last century considerable efforts were made to clear the entrance and all the piles were removed, but the sand which had silted up could not be so easily disposed of. This was left to the more modern appliances of steam-dredging machines. Three of these machines are now at work in deepening the channel and have so far succeeded that vessels of even 17 feet draught can now enter by hauling in very carefully with warps, &c. When once safely in there is plenty of room, the harbour runs up two or three miles with a depth of 15 to 30 feet and the shore presents all the most desirable features for docks, wharves and warehouses. There are quays now running along one side of the harbour where vessels discharge, and indeed a new town might surround the harbour bordering on the sea on the one side, should the port be

Digitized by Google

adopted as our packet station for the India and China mail service. The natural advantages of the harbour could not be excelled, and nothing but energy is required to give it all the advantages necessary for an important mail station. Six millions of francs have been voted by the Government for this purpose, but voting money without appointing competent and energetic people to look after its expenditure is of little service, and there is room for improvement in this way, at least according to an Englishman's notion on the subject. The contract for dredging and clearing the entrance is in the hands of a French contractor who appears not to be bound to time in any shape. If the Italian Government could induce a powerful English company to adopt the port and carry out the necessary requirements of a mail packet station, we might find everything done in a year; but as it is, it is quite indefinite. In its present condition it certainly could not be adopted as a mail station. That a saving of two days could be easily effected in the transit of our mails there is no doubt, but until the harbour is rendered fit and the railway over Mont Cenis found to work satisfactorily, we must be content with the longer route by Marseilles as a mail station. We must explain that the present Italian mail steamers have hitherto fallen back on Trieste for docking and general repairs, &c., but now that war is again imminent they will not reach up further than Brindisi, and this may give an impetus to the improvements at that port. The telegraph wires run all the way, and we have found them work well, delivering messages in about three to five hours between London and Brindisi. The telegraph is being extended with the rail to a point further down the peninsula to the little port of Otranto, and a submarine line from this to Alexandria, a distance under 800 miles, could be most advantageously laid, and thus put an end to the present uncertain cables by Malta, Benghazi, &c., which are constantly out of order.

The steamers from Brindisi to Alexandria are well up to the work and kept in good order for the comfort of passengers. We conclude this general description by appending a summary of the route and fares, and with the recommendation that travellers should provide themselves with a Guide book, which will add much to their comfort. MURRAY'S are of course the best, but are divided over three books, while BRADSHAW gives an account in one book.:—

ROUTE.	Miles.	Hours.
London to Paris	250	10½
Stop	—	2
Paris to Macon	275	13
Macon to Culoz	60	
Culoz to St. Michel	50	4
Stop	—	1
St. Michel over Mont Cenis to Susa	50	10
Stop at Susa	—	2
Susa to Turin	33	1½
	718	44
Turin to Ancona *via* Alexandra, Modena, and Boligna	350	14
Ancona to Brindisi	350	16
	1418	74
Brindisi—stop	—	3
Brindisi to Alexandria by steamer	—	80
Or a saving of about 24 to 30 hours.	Total	157

Time could be saved between Paris and Culoz, and also to St. Michel say about four hours, and between Turin and Brindisi about eight hours, which would effect a saving in all of about 48 hours when everything was properly organised. One consideration—and a great one it is in these days—that the trains throughout keep exact time.

The fares stand thus:—

	1st Class.
From Paris to Brindisi, per Railway	fr.225
Brindisi to Alexandria, per steamer	275
	fr.500

We are glad to observe that a Consul has been appointed to represent British interests at Brindisi. When a place becomes of importance to English traffic it is a great assistance to it to have a representative of our Government. The gentleman who now enters on the office is Mr. Henry Grant.

P.S.—Advices from Brindisi announce the arrival of the Italian Company's steamer *Cairo*, from Alexandria on the 22nd inst., in correspondence with the present India and China mail. She steamed into the inner harbour and berthed at the quay. Her letters were in London on Saturday night the 26th. Capt. Tyler, who has been despatched by our Government to report on the line of railway and harbour, is at Brindisi, and, it is said, is satisfied with the capabilities of both.

THE SILK MARKET IN FRANCE.

THE condition of the silk trade at the present moment is most unsatisfactory, and there seems little hope if any of immediate improvement. The quantity of raw silk which is being taken into manufacture at Lyons at present is scarcely equal to half the amount of last year; last week it was 34,450 kilogrammes against 69,949 in 1865, and the week before it was 54,097 against 88,440. The breeding season is not yet far enough advanced for any opinion to be formed respecting the coming crop, and the fears or pretended fears respecting the Japanese eggs or other seed are not sufficient to account for the stagnation which weighs on the whole trade, wholesale and retail, in raw or manufactured material. The condition of affairs is the same at Marseilles as at Lyons; the stagnation is reported to be complete, fine silk being rather scarce but cocoons tolerably abundant. The holders at present exhibit no inclination towards concession. The condition of the trade is attributed by some people entirely to the news received from America. Not long since it was said that large sales were taking place in consequence of the increased temperature of the weather, but that the abundance of silks on the market rendered it difficult to obtain remunerative prices. The last advices tell us that the market of New York is so encumbered with goods that it is scarcely possible to find vent for them except with the aid of the auctioneer, and every one knows what that means with respect to quotations; of course under such circumstances the French merchants are neither easy respecting outstanding accounts nor hopeful as regards the coming season. To add to the uneasiness, letters from the United States talk of the approach of cholera and the probable closing of the port of New York; predictions of this kind are always suspicious; those who have anything but an interested purpose to serve are more cautious about the terms which they use with respect to such a fearful visitation as that of the cholera. There is no doubt that the condition of the American market has a considerable effect on those for raw as well as manufactured silks in France, and the state of the money market in England increases the uneasiness and the difficulties; but the grand cause of the stagnation in this as well as in other industries is the dread of war, and the want of confidence and insight into the intentions and objects of certain rulers. So long as the dread of war hangs over us, trade and commerce must remain in the unsatisfactory state in which they now are, and the silk trade from its very nature is the first and severest sufferer. There is no probability of a large demand for raw silk at present, but considering what has happened respecting Japanese seed here, and taking into account all we know of the condition of the French worms, there is no good reason to suppose that the import of silk from the East will cease; everything goes to prove that the French trade can never again depend on its own raw produce alone.

A NEWLY issued Parliamentary return shows that during the command of Vice-Admiral King in the Chinese seas—between the 24th June, 1865, and 18th February 1866—seventy-one piratical vessels were captured. Thirty of these were burned, and twenty-four given up to the mandarins. No award of prize money has yet been made for any of these captures.

THE TELEGRAPH IN CHINA.—A New York company, says the *New York Times*, has undertaken the work of introducing the electric telegraph into China, and Dr. Macgowan has been appointed to proceed forthwith, as its commissioner and engineer, to connect Pekin with Canton. He will be accompanied by a staff of telegraphers, and will employ a system which he long ago devised by which messages can be transmitted in hieroglyphic characters. A more capable man than Dr. Macgowan for the work to be accomplished could not be found. He has resided many years in China, has published several works in the Chinese language, is familiar with the character of the people, and with the climate and country. The company are fortunate in securing his services.

HOUSE OF COMMONS.

THE MYLOONGEE CASE.

(May 18th.) Colonel SYKES asked the Under Secretary of State for Foreign Affairs whether the Foreign-office had yet received any despatch from Mr. Consul Knox at Bangkok, in reference to a claim of Mr. Burn, and known as the Myloongee case, and for the production of which notice was given on the 12th of April.—Mr. LAYARD said that the papers relating to the case had only been received within the last few days, and they were now under the consideration of the law officers of the Crown.

THE FASTEST STEAMER IN THE WORLD.—The Egyptian paddle-wheel steam yacht *Mahroussa*, Captain Fredrigo Bey, built under the superintendence of the Peninsular and Oriental Company, by Messrs. Samuda Brothers, of London, for the Viceroy of Egypt, arrived at Malta on Saturday, 12th instant, at 6.30 P.M., having performed the voyage from Southampton in the unprecedented short time of 157 hours. When under full steam she consumes seven tons of coal an hour, and is, without exception, the fastest vessel afloat. At the measured mile in Stokes Bay, her average speed was upwards of 18 4-10 knots an hour, which is equal to about 20¼ statute miles. After replenishing fuel she proceeded on the 16th instant for Constantinople, to meet the Viceroy, who, it is reported, intends paying a visit to England in her this summer. This splendid vessel is of 1,800 tons, and is fitted with machinery of 800 horse power. Her interior fittings are of extraordinary magnificence. Her cost is said to have been £166,000.

THE Hildebrandt Exhibition of Chinese and Japanese views, noticed a few months since, is again opened at 48, Pall Mall. We are happy to report that it is well worthy of an inspection.

Monetary and Commercial.

In consequence of the arrangement made with the Bank of London, the Consolidated Bank (Kennard's and Hankey's) has been compelled to suspend payment. This bank had some transactions with the Far East, but did not act specifically for any of our India and China banks.

The report of the Asiatic Bank Corporation, to be presented on the 28th inst., states the estimated losses of the year at £142,000, against £61,494 realised profits, out of which profits a dividend of 5 per cent. was paid for the half-year ended June last. It is, therefore, proposed to write off half of the reserve fund of £175,000 to profit and loss, leaving that fund at £87,500. The losses have been mainly incurred at the Bombay agency, and the most disastrous of them were initiated during the temporary absence of the agent on sick leave. Apart from the losses now written off there is a claim in dispute, against which the bank hold collateral securities, but which the directors are assured cannot result unfavourably, and which, even in the worst case, will be amply provided for by the reserve fund.

At a meeting of the shareholders of the Bank of Hindustan, China, and Japan, the directors' report, published in another column, was adopted after a long discussion with reference to the losses of the bank in India and China. It will be seen by the report that the condition of this institution is not what might be supposed from the price of the shares on the Stock Exchange, owing to the system of running down or "bearing." We have heard that the shareholders themselves have joined in these operations, and thus have given support to the adverse reports and false telegrams from Bombay. How can it be expected that directors can stand such scandalous proceedings. We firmly believe that this bank has suffered more from the acts of its own shareholders than anything else. It was not expected that the report would have been adopted; the example of the Commercial Bank of India was before their eyes, however, and this saved the meeting from an adjournment. With such an institution as the National Bank at their back, in the present crisis, we believe the Hindustan will now go forward with great success. After the reports current during the past few months, the rational part of the shareholders were highly pleased at the report, which certainly compares favourably with all other reports yet issued of similar affairs.

We much regret that, owing to the *suicidal course adopted by the shareholders* in the Commercial Bank of India in refusing to pass the report of the directors, their agents, the London Joint-Stock Bank, deemed it prudent to withdraw their credit, and refused the drafts which were presented by the last mail. The bank was therefore compelled to stop. At the meeting held on the 23rd it was decided to wind up under the Companies' Act of 1862; and Mr. Harding, of the firm of Harding, Pullein, and Co., was appointed official liquidator. The following is an extract of the proceedings of the meeting:—

The CHAIRMAN (J. J. Lowndes, Esq.) stated that since the meeting of the 23rd of April he regretted to say that circumstances had arisen which had compelled them to suspend the operations of the bank. Shortly after the meeting was held they received a communication from the London Joint-Stock Bank, to the effect that, owing to the manner in which the shareholders had received the report of the directors, they felt compelled to withdraw the credit for £200,000 which they had with that bank, and which was a yearly credit expiring on the 20th of June. The directors had several interviews with those of that corporation, and they were for some time in hopes that they would induce them to alter their determination; but shortly afterwards they received telegraphic advices that considerable drafts were coming before them from their foreign agents, which would have exhausted the credit granted by the London Joint-Stock Bank to a considerable extent. Those telegrams were accompanied by advices to the effect that cover would be sent by subsequent mails for the over draft, but, unfortunately, the application which they had in consequence to make to the London Joint-Stock Bank was made at a time when the first squeeze of the very severe credit panic was experienced, and the London Joint Stock Bank felt that unless tangible security was offered it could not render them assistance. The China mail arrived on the 14th instant, and if the London Joint-Stock Bank had accepted the drafts brought by it their credit with that bank would have amounted to £243,000, whereas, the actual indebtedness of this bank to them, they not accepting such drafts, was £140,000. At the time they went to the London Joint-Stock Bank for assistance they had telegraphic advices that drafts would be sent by the Bombay mail for nine lacs, or £90·000, and they were, of course, compelled to acquaint the London Joint-Stock Bank of the fact that between the arrival of the China mail on the 14th, and the expected arrival of the Bombay mail, which arrived last evening (the 22nd) they would not be in a condition in any way to cover their drafts, and under those circumstances the London Joint-Stock Bank felt that they could not prudently accede to their application, consequently they were obliged to suspend operations. The shareholders were aware that the Bombay agency got itself into considerable difficulties last year, which difficulties were fully placed before them in the month of June, and Mr. Cartwright one of their directors, who had gone to Bombay to look into his own affairs, told them that to his great surprise Mr. De Quadros, their agent, had been lending large sums upon securities of very doubtful value, and that he very much questioned whether it would ever be got back. The whole amount he found outstanding was 75 lacs, or £750,000. In consequence of that letter, and communications from the agent himself, showing the difficulties in which he was placed, it was resolved to send out Mr. Angus, the chief manager, who had not long before been at Bombay, to make a thorough investigation, and to realise with all convenient speed, without regard even to the popularity of the bank. The directions framed for Mr. Angus's instruction were extremely stringent, and authorised him to take severe measures in the interest of the bank where such were necessary, and he was to realise at any sacrifice which was not an absolute sacrifice of the assets of the agency. Mr. Angus accordingly proceeded to Bombay, and from time to time informed the directors of the steps he was taking to secure the assets. His communication also contained a report of the state of affairs, for the purpose of the results being stated in the balance-sheet to be submitted to the shareholders at the April meeting, and a careful examination of the accounts showed that the total sum outstanding amounted to £796,000, and of that amount Mr. Angus estimated that £89,000 would be lost. Mr. Angus returned on the 9th of April, after the report was prepared, and before it was submitted to the shareholders, and he informed the board that such was the state of affairs in Bombay that it was impossible to realise anything at present, and that almost the whole of the sum he had mentioned was now outstanding. The sum, therefore, which was locked up in the Bombay agency must be taken at the whole amount of £796,000. It appeared from a report from the Shanghai agency that on the death of Mr. Wiggins, their late manager there, the amount of £681,000 was outstanding, the greater part of it being on good securities, it being advanced to large merchants, and in some cases on land. The amount outstanding on other agencies was in all £1,696,108. The bank having suspended, the question for the shareholders was, what was the best course to pursue under the circumstances, and provided they could get the consent of the creditors.

Mr. ANGUS read a balance-sheet, drawn out by him after investigating all the security, which showed a total estimated loss of £502,769, leaving a capital of £824,649.

Mr. HARRISON stated that it now appeared that £796,000 of the capital had been lent on shares, which was strictly prohibited by the deed of settlement and the charter.

The CHAIRMAN said it was quite true that he had sold down to his qualification on account of the high premium to which the shares went and everybody was at liberty to do what he thought proper with his own property. He saw nothing to justify the shares being at such a high premium, but the public were of a different opinion, and he sold. (Derisive cheers and laughter.) He retorted upon Mr. Wilson that he had himself gone to get information from Mr. Allardice with respect to the position of the shares, and having bought in consequence he had no right, now his expectations were disappointed, to charge that gentleman with taking advantage of the market to sell his shares.

A general meeting of the British India Steam Navigation Company (Limited) will be held on the 30th inst., when a dividend will be declared.

We regret that the arrangements noticed in our last as likely to be effected by Hallett, Ommanney, and Co. with the Joint, Stock Bank were not carried out. The affair will now be wound up under inspection. The liabilities are £238,000, against assets valued at £222,000, but of course of doubtful value in the present times.

The directors of the Messageries Imperiales Company intend to propose in the approaching meeting of shareholders that the dividend for 1865 shall be 50f.

The following circular has been issued by Messrs. Gellatly, Hankey, and Sewell, a firm ostablished to carry on the shipping business of the late Duncan Dunbar:—

"27, Leadenhall-street, May 22, 1866.

"We regret to inform you that in consequence of disappointments in the receipt of moneys upon which we had relied we have found it necessary, in the interest of all parties, to suspend payment. Our books have been placed in the hands of Messrs. Kemp, Cannan, Ford, and Co., the accountants, to prepare a statement of our affairs, and we have no doubt that the report of those gentlemen will confirm our expectation of a considerable surplus. In the meantime arrangements have been made to pre-

Digitized by Google

vent any interruption to our shipping business, in which we hope to meet with continued support.—We remain, your obedient servants,

"GELLATLY, HANKEY, AND SEWELL."

The shipping business of Messrs. Gellatly and Co. will be carried out under the firm of Messrs. Gellatly, Hankey, Sewell, and Co.

The failure has been announced of Messrs. Kynaston, Suhertland, and Co., of Mincing-lane. It is stated that the liabilities are about £90,000 to £100,000, and that the prospects of realisation are favourable.

The amount of bullion by the P. and O. Company's steamer *China*, from Southampton on the 20th inst., was—in gold to Madras, £2,300. In silver, to Shanghai, £9,280. Total—in gold, £2,300; in silver, £9,280.

MANCHESTER MARKETS.

The sellers show more disposition to accept lower rates, but there is a very small business. Grey Shirtings 7 lbs., 11s. to 11s. 3d.; 8¼ lb., 13s. 6d. Cotton Yarn, No. 16-24, 1s. 6d. to 1s. 7d.; Maddapollams, 4s. 9d.; Long Cloths, 12s.; T-Cloths, 7s. 6d.; White Spot Shirtings, 15s.; White Brocade ditto, 15s. 3d.; White Damaks, 29s. nominal.

ARTICLES OF IMPORT.

TEA.—There has been scarcely anything doing in our market. Tea has, however, been better supported than most other articles of produce, the exceptionally favourable position of the supplies giving importers confidence in the future course of the market, when the money pressure shall have subsided. Thus, they have generally refrained from offering their Teas, and the amount of sales has been so small as to leave no room for remark, as usual, under the different heads, but the few sales made have generally been rather in favour of buyers. The small public sale of the 15th instant, comprising 1191 packages, nearly all sold at about ¼d. to ½d. per lb. lower prices. The series which commenced yesterday comprised 23,757 packages, of which 15,798 packages were printed without reserve, and 4098 packages being advertised as unpaid prompts. Of these at the two days' sale 11,943 packages have passed auction, and 7835 packages have been sold, 7191 packages being without reserve. These sales have gone as well as could have been anticipated, the decline in Congous being only trifling, but fancy Teas have sold in many cases at very low prices. The ships afloat are now reduced to 8, with about 4,775,684 lbs. Tea.

SILK.—Business may be reported as *nil*. The accounts of the European crop seem to agree that both France and Italy will again be very short, and the quality even worse than in former years. The large imports of Japan seed have not had the desired effect. The deliveries have been for this month to 24th—China, 1,400, Japan, 198. Quotations nominal at 30s. 6d. to 31s., for No. 1 Tsatlee; 27s. to 27s. 6d. for No. 1 Taysam; and 33s. to 35s. for No. 1 Maibash. Another account says the market is quite inactive, the conflicting events of the moment putting a stop to all business. The accounts of the European crops are hardly so good again, and it is doubtful if the crops will be much better than last season; it is the general opinion that were the continental difficulties to disperse and peace be ensured, the silk market would immediately recover and trade resume. Deliveries are small. No change in quotations, which, however, in the absence of business, are, to a certain extent, nominal.

COTTON.—Since our last the market has been very languid, but holders have been firm, and the decline for the week on current qualities does not exceed ¼d. to ½d. per lb. Business for arrival has been done at about former rates. In the London market this week we note sales of 580 bales Tinnivelly at 8½d. to 9½d. for fully fair to good fair; and to arrive, 50 bales at 7¾d., guaranteed good fair January sailing. At Liverpool, middling Orleans is quoted at 12½d., and fair Dhollerah at 9d. per lb. The present condition of the market for every kind of imported produce, owing to the financial crisis, is such that it is impossible, and would be a mere delusion, to give our usual Price Current. The state of the Market is accurately described as follows in the circular of one of our most extensive colonial brokers:—"In the present exceptional condition of all the markets, we refrain from issuing our usual detailed Market report for the outgoing India and China mails. Commercial transactions have, since our last, been reduced to such an absolute minimum, as to leave scarcely any operations whatever to describe. The almost unprecedented financial embarrassments; the extraordinary dearness and scarcity of money; the dread of Continental wars; and the reduced demand for produce from America, whilst they have not induced holders of goods as a rule to force off and sacrifice them, have caused buyers of all kinds to act with the utmost caution, and only to the extent of the most pressing daily wants; and an almost total suspension of trade for the moment is the result."

SUGAR.—At the public sales yesterday, the 25th, buyers continued very cautious, and at an average decline of 1s. to 1s. 6d. on the value current last week, took only a portion of the quantity offered. By private contract nothing has been done beyond 2,700 bags superior brown clayed Manila at 27s. 3d.

COFFEE.—A general indisposition to purchase is still shown, and the transactions in colonial sorts have been difficult at materially reduced prices. At public sale, 165 casks, 110 barrels and bags plantation Ceylon, were sold on the average at 2s. to 4s. under last transactions, low middling to good middling 73s. to 81s. 6d. 1,700 bags native, meeting only much lower offers, were bought in; but by private treaty 2,500 bags good and fine ordinary have been placed (early in the week) at 63s. 6d. to 65s.

RICE.—Quietness continues to prevail in the market for this article, and holders showing some amount of firmness, little has been done beyond 5,000 bags Nakrenzie at 10s. 1½d. cash. At auction, 680 bags white Bengal, of the new crop, were withdrawn at 16s. 6d. to 17s., as also 287 bags from Zanzibar at 14s. to 16s.

Of other kinds of imports the following goods only have been brought to auction under existing circumstances:—

GALLS.—85 packages China, one-fourth sold at 62s. per cwt. for good. Privately, a little business has been done at 57s. 6d. per cwt., being cheaper.

MOTHER O'PEARL SHELLS.—143 cases Bombay sold at 52s. 6d. to 55s. per cwt. for middling medium and large, and 32s. to 32s. 6d. small, being fomer value.

HEMP.—83 bales Manila and 157 bales Sunn all retired. Market for Manila as heavy as possible, and present quotations quite nominal.

BLACKLEAD.—149 barrels sold at 13s. 6d. to 17s. 6d. per cwt. for middling to good lump, and 9s. 3d. to 10s. dust, being rather lower.

CLOVES.—6 cases Penang retired. 411 bags Zanzibar sold at 3d. to 3¼d. per lb. for ordinary to fair, being about ¼d. lower.

COCOA-NUT-OIL.—4 casks Cochin, 205 casks Ceylon, and 156 casks Sydney all retired. Private operations have been very restricted, at a general decline of £1 per ton.

GAMBOGE.—4 cases retired.

MACE.—2 cases Penang sold at 2s. 11d. to 3s. per lb. for fine reddish, being firm.

NUTMEGS.—14 cases Penang sold at 1s. 3d. to 1s. 11d. per lb. for fair small to fair medium, being 2d. per lb. cheaper.

OIL CINNAMON.—7 cases half sold at 3s. 3d. to 3s. 4d. per oz. for good sweet. Steady.

PEPPER, BLACK.—791 bags Aleppy sold at 4d. to 4¼d. per lb. for half heavy, being cheap. 1819 bags Singapore, a few sold at 3⅞d. to 3½d. per lb. for ordinary, being cheap. 1804 bags Penang retired. Sales to a small extent have been effected privately at rather lower rates, 3½d. for Singapore, and 3d. to 3¼d. Penang. White: 80 bags Singapore and 412 bags Penang half sold at 7½d. to 7¾d. per lb. for middling, being ¼d. dearer, but the recent advance not obtainable at the moment.

RATTANS.—5996 bundles Singapore and 7756 bundles Penang half so at 2s. 3d. to 4s. 9d. per 100 canes, for inferior to middling, and 8s. 6d. to 11s. 3d. for a few lots of superior.

RHUBARB.—60 cases sold at 8s. to 8s. 4d. per lb. for fair flat and round, being considerably dearer.

SAGO.—1,741 packages mostly sold at 18s. 6d. to 19s. per cwt. for fair to good small, and 17s. 6d. to 18s. 6d. for middling to fair large, being 6d. lower. Flour: 830 bags, a few sold at 16s. per cwt., being rather dearer.

TAPIOCA.—287 bags Penang withdrawn, middling and good middling white 3d. to 3¼d.

SAPAN WOOD.—98 tons Siam, a few sold at £16 10s. to £16 15s. per ton, being 30s. lower; 20 tons Ceylon and 16 tons Manilla retired.

STICKLAC.—396 cases all retired.

CUTCH.—2,279 bags all retired. Retail business done privately at 31s. per cwt. for fine Pegue.

GAMBIER.—771 bales, one-fourth sold at 28s. to 28s. 6d. per cwt. for good cubes.

TORTOISESHELL.—12 cases Singapore, two-thirds sold at 11s. 6d. to 14s. 6d. per lb. for inferior to good in sorts.

CAMPHOR has receded to £6 per cwt. for China, and £6 2s. 6d. to £6 5s. for Japan, and is perfectly inactive.

OIL ANNISEED is offering at the reduced price of 9s. per lb., without effect.

OIL CASSIA has sold at 7s. 3d. to 7s. 4d. per lb., being 4d. lower.

TIN has further fallen in value, Straits have been done during the fortnight as low as £72 to £73 per ton for fine quality, short prompt. The nearest value to-day is £75 to £76, short prompt, with a quiet market.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6 15s. to £7; nail rod, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, *single*, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 10s. to £7.

Digitized by Google

STEEL.—Swedish keg, £15 5s. to £15 15s.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7¾d. to 8¾d. per lb.

TIN.—£85 for block; £86 for common bars. Tin plates, best charcoal, I. C., 33s. to 34s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 15s. to £24; sheet, £21 15s.; spelter, £20 15s. to £21 5s.; zinc, English sheet, £29; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—The great disturbance in the Money Market has nearly put a stop to all business in this market. Copper received a slight stimulus by the news of the bombardment of Valparaiso, but we can quote no actual improvement in prices. Tin is without change of importance. Tin Plates are easier. Lead maintains the last quotations.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton from the 1st January by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The unsettled state of affairs on the Continent and the present financial crisis have so completely upset all commercial circles that our quotations below can only be considered as nominal. Up to the present time, however, we have heard of no great change in outward freights.

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £44 to £45. For Galle: £37. For Singapore: £36. For Shanghai: £51 to £52. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 5s. For Manila: £2. to £2 5s. For Galle: £1. 17s. For Singapore, £1 13s. For Shanghai: £2 12s. 6d. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 31 tons naval stores, &c., from the River Thames to Hong Kong.

CASUALTIES.

The Ferozepore, Woolterton, from Manilla, which arrived at St. Helena April 11, was making a quantity of water, but by shifting cargo stopped the principal part from the inside and proceeded on the 14th.

MISCELLANEOUS.

Off ASCENCION.—April 8, from Shanghai for London, Majesty; 11, from Galle, Adela; 14, from Batavia for Rotterdam, Admiral de Ruyter.

THE STEAMER "VALETTA."—The P. and O. Company's paddle-wheel steamer Valetta, 613 tons, Capt. Laing, bound for Zanzibar and Suez, put into Port Elizabeth on the 20th March, for medical assistance. It appears that while at sea, and before reaching the Cape, the medical officer in charge, Dr. Wynne, hurt the forefinger of his right hand. When in Capetown it seemed to be getting better, but after leaving Table Bay it got worse, and the sufferer being apprehensive of tetanus, Capt. Laing kindly put in here for medical advice. Dr. Dunsterville immediately visited the ship, and Dr. Wynne returned with him and spent the evening ashore. The steamer left again on the 21st about noon, Dr. Wynne accompanying her, though by no means in a very satisfactory state.

THE BANK OF HINDUSTAN, CHINA, & JAPAN, LIMITED.

1, BANK BUILDINGS, LOTHBURY, LONDON.

FOURTH ANNUAL REPORT of the DIRECTORS, presented to the SHAREHOLDERS at the GENERAL MEETING, held at the London Tavern, on THURSDAY, the 24th May, 1866 :—

The Directors submit to the Shareholders a General Statement of the affairs of the Bank for the year ending 30th December, 1865, showing the following results :—

The net profits of the year, including £1,147. 7s. 11d. from last account, after defraying current expenses amount to £23,485. 8s. 2d., out of which the Directors would have been pleased to recommend a dividend in the usual course; but under the existing circumstances of the Bank, they consider it more prudent to carry forward the amount.

The Shareholders will not be surprised to learn that, owing to the numerous failures of firms of high standing and repute, and to the prolonged and great depreciation of all descriptions of Indian produce, it has been found necessary to transfer the sum of £87,794. 1s. 2d. from the Reserve Fund of the Bank to meet losses incurred on transactions entered upon by the Branches during the latter part of 1864 and the early part of 1865.

In addition to this sum, the Bank will have to sustain eventually a further loss from the estates of some failed firms, the realisation of whose assets cannot at present be estimated with greater accuracy, but which, in their opinion, will not exceed £70,000.

It is a source of gratification to the Directors that, since the period above specified, the affairs of the Bank have progressed satisfactorily and profitably. With regard to the transactions of the Head Office, they have been of a profitable nature throughout.

Acting in accordance with the powers conferred upon them by the Articles of Association, the Directors have elected Mr. Philip Vanderbyl, of the firm of Messrs. Redfern, Alexander and Co., and a Director of the National Bank, to a seat at the Board, which selection they have no doubt will meet with the approval of the Shareholders.

The Directors have the pleasure to inform the Shareholders that, notwithstanding the monetary pressure which has existed for some months both in London and India, the deposits of the Bank have steadily increased.

In compliance with the wish expressed by the Shareholders at the last General Meeting, the Directors, in the early part of the session, made an application to Parliament for power to reduce the nominal amount of each share from £100 to £20, since which an intimation has been received from the Board of Trade that a public measure will be introduced for the purpose, thus rendering any further prosecution of the bill unnecessary.

In the belief that it will be more satisfactory to the Shareholders, the Directors propose in future to hold half-yearly meetings in the months of May and November.

The Directors who retire by rotation are Philip Shore Fletcher, Esq., Thomas Cotterell, Esq., and Sassoon David Sassoon, Esq., who, being eligible, offer themselves for re-election; and the Auditors who retire, viz., Frederick William Spooner, Esq., and Frederick Maynard, Esq., also being eligible, offer themselves for re-election.

J. N. DANIELL, Chairman.

BALANCE SHEET, 30th DECEMBER, 1865.

Dr.				Cr.		
To capital account, viz. :—				By cash in hand, at bankers, and bullion	£370,560	9 1

			£105,600 0 0
	£105,600 0 0	By balance brought down	*£17,805 18 10

*This amount will be increased by £8,135, being premiums on shares in course of payment.

We have duly examined the Books and Accounts at the Head Office, and the returns transmitted from the branches, and we certify to the correctness of the accompanying statements compiled therefrom, subject to provision being made for losses by bad debts. The Securities at the Head Office have all been examined and found in order.

F. W. SPOONER,
FREDK. MAYNARD, Auditors.

May 10, 1866.

The Advertisement convening the Meeting was taken as read, and the seal of the Company affixed to the Register of Transfers. The Report was taken as read.

It was proposed by Mr. Daniell, seconded by Mr. Spooner, and resolved unanimously—"That the Report and Statement of Accounts of the Directors be received and adopted."

It was resolved unanimously—"That Philip Shore Fletcher, Esq., and Sassoon David Sassoon, Esq., be re-elected Directors; and that the election by the Board of Philip Vanderbyl, Esq., as a Director of the Company be confirmed."

It was proposed by the Chairman, seconded by Mr. Hoyes, and resolved unanimously—"That Mr. Alderman Allen be elected to a seat at the Board."

It was resolved that Frederick Maynard, Esq., be re-elected an Auditor. And that the Board be requested to appoint George Macnair, Esq., and Arthur Cooper, Esq., Auditors of the Company.

It was proposed by Mr. Hoyes, seconded by Captain Engledue, and carried unanimously :—"That the Directors be requested to carry into effect such a reconstruction of the Board as will be calculated to insure confidence on the part of the public and of the Shareholders; and that they be also requested to have a more effectual system of audit."

On the motion of Mr. A. Kintrea, the remuneration of the Auditors was increased from £50 to £100 per annum each.

The meeting was then made special, when it was proposed by Mr. Daniell, seconded by Mr. Spooner, and resolved unanimously—"That Clause 46 of the Articles of Association be repealed, and that in lieu thereof the following be inserted, viz.,—'Subsequent Ordinary Meetings shall be held once every Six Months at such time and place as the Directors may from time to time determine.'"

It was proposed by Mr. Kintrea, and resolved unanimously—"That a vote of thanks be given to the Chairman for his able conduct in the chair."

Signed J. N. DANIELL, Chairman.

CHARTERED
MERCANTILE BANK OF INDIA, LONDON & CHINA

(INCORPORATED BY ROYAL CHARTER).

CAPITAL PAID UP, £750,000. RESERVE FUND, £250,000.

EIGHTH ANNUAL REPORT OF THE COURT OF DIRECTORS TO THE SHAREHOLDERS.

The Directors have the pleasure to present to the Shareholders the Audited Balance Sheet, and Profit and Loss Account of the Bank, for the year ended 31st December last.

After providing for all bad and doubtful debts, and defraying cost of management at all points, the net profit amounts to £38,203. 6s. 11d., to which has to be added a sum of £65,760. 7s. 3d., undivided profit brought forward from the preceding year, making a total of £103,963. 14s. 2d.

Out of this sum £101,250 has been paid in two half-yearly dividends, namely, £63,750, or 8½ per cent. on the 1st July, and £37,500, or 5 per cent. on the 1st January last, making together 13½ per cent. for the year. The unappropriated balance of £2,713. 14s. 2d. is carried forward to the Profit and Loss Account of the current year.

The Shareholders will be prepared to learn that the Bank suffered severely during the past year, owing to the commercial crisis which occurred in the East, as well as from exceptional losses at Bombay. For a time also trade was so paralyzed as to render banking and exchange operations impracticable with safety or profit. From this combination of adverse circumstances the result contrasts unfavourably with that of previous years, but the directors are glad to state that the operations of the current year are thus far very satisfactory and encouraging.

As intimated in the last Report, the Mauritius Agency was closed on the 31st December last.

The Directors retiring on this occasion are Mr. D. Larnach and Mr. G. May, who, being eligible, offer themselves for re-election, and the Court recommend them accordingly.

The Shareholders will have to appoint Auditors for the current year.

52, Threadneedle-street, 30th April, 1866. GEO. G. NICOL, Chairman.

CHARTERED MERCANTILE BANK OF INDIA, LONDON, & CHINA.

D. T. ROBERTSON, Chief Manager.
WM. LOTHIAN, pro Chief Accountant.

GEO. G. NICOL, Chairman.
D. LARNACH, } Directors.
GEORGE MAY, }

London, 30th April, 1866.—We have examined the several Statements transmitted from the Managers of the several Branches, and also the Books in London, upon which the above Accounts have been framed, and hereby certify to their correctness, according to such Books and Statements, to 30th December, 1865. The Profit and Loss Account includes the bonus on the transfer of lease.

(Signed) COLEMAN, TURQUAND, YOUNGS, and CO.,
Public Accountants, 16, Tokenhouse-yard, E.C.

London, 30th April, 1866.—I have examined the Bills of Exchange, Local Bills discounted, and other Securities held by the Bank against Loans, &c., and I am satisfied that they are available, and that sufficient deductions have been made from the Profits of the year ended 30th December, 1865, for all bad and doubtful debts, according to the Statements received from the several Branches in India and China.

(Signed) J. SMITH, Auditor.

(Mr. Mackenzie, the co-auditor, temporarily absent from Europe.)

SOLID MAHOGANY FURNITURE FOR INDIA, CHINA AND THE COLONIES.

HEAL and SON are Manufacturing, ESPECIALLY FOR use in EXTREME CLIMATES BEDROOM FURNITURE, which is entirely Free from Veneer. A general Assortment always in Stock.

IRON AND BRASS BEDSTEADS

Suitable for all Parts of the World. Their Stock consists of 2,500 Bedsteads.

HEAL AND SON'S PATENT HORSEHAIR MATTRESS.

HEAL and SON have Patented an Improvement in the Manufacture of Mattresses, which prevents the material from felting into a mass, as is the case with all Mattresses made in the ordinary way. The Patent Mattresses are made of the very best Horsehair, are rather thicker than usual, and the prices are but a trifle higher than those of other good Mattresses.

HEAL AND SON'S ILLUSTRATED CATALOGUE

For INDIA, CHINA, and the COLONIES, of Bedsteads, Bedding, and Bedroom Furniture, SENT FREE TO EVERY PART OF THE WORLD to which there is Book Post.

THE "LONDON AND CHINA EXPRESS" ON SALE

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 19, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 19, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS.

—Scald Heads, Sore Breasts, Inflamed Nipples.—There is no medical preparation in the world which may be so thoroughly depended on in the treatment of the above ailments as Holloway's invaluable Ointment, and scarcely a day passes in which authentic testimonials to its extraordinary efficacy are not received from all parts of the globe. Nothing can be simpler or more safe than the manner in which they are applied, or its action on the body both locally and constitutionally. The Ointment rubbed on the part affected enters the pores just as salt enters meat, and not only gets rid of the local evil, but penetrates to the source of it, and drives it from the system.

A. SHORTREDE & CO.

Hong Kong, Jan. 1, 1864.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel stores, &c., when requiring to discharge them.

Amoy, March, 1865.

For terms of Freight or Passage apply to MCDIARMID, GREENSHIELDS, and Co., Liverpool.

FOR HONG KONG and WHAMPOA, with quick despatch (to follow the Yaratilda), the well-known iron clipper-ship PORTLAND, A 1 12 years, 872 tons register, JAMES PETERS, Commander; loading in the London Docks. This fine vessel is noted for her rapid passages, and has superior accommodation for chief cabin passengers.

TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.

FOR COLOMBO, CEYLON, Direct, will have very quick despatch, having a considerable portion of her cargo engaged, and shipping, the splendid new clipper ship JANE MARIA, A 1 nine years, 342 tons register, JOHN HUGHES, Commander; loading in the West India Docks. This beautiful vessel offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to F. TALLACK (late W. A. Winkley), 23, Birchin-lane, Cornhill, E.C.

Will have very Good Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship CELESTIAL QUEEN, A 1 thirteen years, 842 tons register, WILLIAM WATT, Commander; lying in the St. Katharine Docks. This magnificent ship, from her size, high class and fast sailing qualities, having made her last passage from Calcutta in 98 days, offers an unusual opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT FOR COLOMBO, the magnificent Aberdeen clipper ship GLADIATOR, A 1, 503 tons register, J. MURRAY, Commander; London Docks. This beautiful vessel, built by Messrs. Walter Hood and Co., Aberdeen, offers a first-rate opportunity to shippers.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT for BOMBAY, the magnificent clipper ship ALBERT VICTOR A 1 twelve years, 1,184 tons register, T. J. CLARKE, Commander; lying in the East India Docks. This splendid high-classed ship, built in 1864, is now quite ready for cargo, and being one of the fastest vessels afloat, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

THE LONDON AND CHINA TELEGRAPH.

THE EIGHTH Volume of this JOURNAL commenced on the 4th of January, 1866. The Subscription for the three numbers per month is 30s. per annum, including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

Subscriptions and Advertisements received abroad by the following Agents:—

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates are down to the morning of the 17th April. The P. and O. mail of 10th Feb. arrived out on the 12th April, and the French mail of 17th on the same day. The following summary of news is from the *Japan Herald* of 16th April:—

The discussion upon the Tariff has been commenced in official quarters, and, we are informed, progresses fairly, that it will not take many days to settle everything, and that it will be very favourable to commerce.

From Osaca we learn that the terms offered to Choshiu by the Tycoon, and approved by the Mikado, are, according to universal report—

1st.—100,000 kokus to be confiscated.

2nd.—Choshiu to go into retirement for a time.

3rd.—His son to go into retirement for life.

Ogosawara Iki-no Kami, a member of the Gorogio, has departed for Firoshemo to notify these conditions to Choshiu. No one can say whether they will be accepted; but if not, war is certain. The secret friends of Choshiu will then declare themselves. It is a matter of public notoriety that Satsuma has sent a contingent of 1,000 or 1,200 men. If war is declared, the return of the Tycoon to Yedo may be indefinitely postponed.

On Friday the 6th the Municipal Council held a meeting at the council rooms—No. 70. It was determined to call a meeting of land-renters to consider the extension of the suffrage and other important matters. The police report to the 31st March was also read, and was of more than ordinary interest from the statistics it contains of the number of Chinese residents, the number and description of the prisoners taken up by the municipal police, and their sentences. With regard to the census of the Chinese, it will be seen that one of the foreign residents declined to give any information, and told the Police Committee, and through them the Municipal Council, to mind its own business, and not to interfere with his servants. This shows the anomalous state of things, and how necessary it is to have legalised "Land Regulations," with recognised power in the hands of the Municipal Council. But such regulations will not be attained unless the suffrage is very widely and liberally extended. We trust, therefore, to see that the land-renters themselves make the most ample propositions to this end at the ensuing meeting.

On Tuesday evening the officers of H.M.'s 2nd 20th gave a ball to the community; and on Friday afternoon the band of the regiment performed on the Bund, in front of the residence of the British Minister, for the first time this season.

On Saturday the 7th the Glee Club of the non-commissioned officers and privates, assisted by the band of H.M.'s 2nd 20th, gave a very interesting concert in the Olympic Theatre. The funds were to be devoted to the widows of two lately deceased soldiers of the regiment, and we learn that a sufficient amount was raised to give them each a very welcome sum on their landing in England.

Two events have occupied attention during the past week, of a more than ordinarily interesting character. The departure of the left wing of the 2nd 20th Regiment, and the detachment of the 11th Regiment, in H.M.S. *Adventure* for Hong Kong; and the decapitation of the man who was the ringleader in the death of the French sailor who was lately killed in Otta matchi.

SILK.—About 300 bales Japan silk have been shipped by this steamer. The quotations have fallen to $720 to $750 for best Ida, and $730 to $770 for medium Maibash.

TEA.—The business transacted in our Tea market since our last report has been very small, owing to the selection being so inferior, and buyers not having much choice are holding off a little in consequence; the amount purchased has been for the American market, and is estimated at about 600 piculs. Quotations are unaltered.

CHINA.

PEKING.

Dates are down to the 10th April, but there is no news of any importance.

NEW-CHWANG.

The following letter from this place, dated April 2, details some further disturbances, in which the Americans are principally implicated :—

I see by one of your papers that you are aware of the state of affairs here. I allude to the rebels, or robbers, now infesting this place. We are now in a state of alarm caused (as near as I can make out) by one of Mr. Knight's coolies or boys having created a disturbance in a Chinese house down the town (of Yingtse), which the Chinese resented in the following audacious manner.

On the night of the 31st ult. a number of horsemen entered the premises of the American Consulate, and carried off from there a coolie or boy in the employ of Mr. P. Knight. The coolie not making his appearance the following morning, Mr. Knight, with three other American citizens, proceeded down the town to look after him; and were but a little distance from the place where the coolie was confined, when they were observed by a mounted horseman, who immediately galloped away and caused the coolie's release. The man met the Knight party on their way down town, and upon being questioned by Mr. Knight as to why he had been forced to accompany the horseman the previous evening, he could not, or would not give any information; but at the same time offered to show them where he had been confined during the night. The foreigners with the coolie then proceeded to the lower end of the town, and when among a lot of low mud houses were surprised by hearing loud yells and shouts from every quarter, the houses being literally covered with men having long gingalls, muskets, pistols, &c., &c.

The Knight party, upon seeing affairs take so strange a turn, endeavoured to retreat; upon which the Chinese commenced firing at them, and wounded Mr. Knight with small iron shot about the back; also a Mr. Eldridge seriously in the groin and about the legs, likewise with small shot. The party at length managed to gain the foreign quarter, when Mr. Knight collected all the Americans, Swedens, and Norwegians in the place, in fact any one who would go with him, all armed with rifles, pistols, swords, &c. The party, to the number of fourteen, commanded by Mr. Knight in person, set off to lay his complaint before the district Mandarin, who it appears requested the foreigners to point out the place at which they were fired on. Mr. Knight agreed to this proposal, and, accompanied by the fourteen Europeans and a Chinese runner from the mandarin, proceeded to search for the house where they had been so warmly received. Arrived at the place, the Chinese had collected a number of armed men, about 100 in all, and upon observing the Knight party, immediately engaged them, the foreigners retreating and firing, and the Chinese following them up and likewise firing and wounding some four others, making six in all. At length the party succeeded in gaining the foreign quarter, and reported the case to Mr. Consul Meadows, who caused every British subject in the place to be supplied with a rifle and cartridges, in the momentary expectation of the Chinese attacking the foreign quarter, their avowed intention being to sack and burn the American Consulate, knowing that there were some 50 chests of opium stored there. This was about 7 o'clock on Saturday evening, and a guard of Europeans patrolled the settlement till the following morning, when, about 11 o'clock, the Chinese authorities placed themselves in communication with the American and English Consuls, at the same time offering apologies to the Consuls for the previous evening's work. These apologies were not accepted.

I have not yet been able to find out what satisfaction Mr. Knight got in exchange for the great insult offered to the American Flag, but I suppose it will end in the foreigners being obliged to accept say $150 to be equally divided among the six wounded (as compensation of course). The American Consul called a meeting of foreigners this morning, but I have not yet heard the result. As soon as I do I will let you know.

SHANGHAI.

Dates by the present opportunity are down to the 20th April. The London mail of 26th February arrived out on the 17th April. The following summary of news is from the *Friend of China* :—

Of matters political in the Far East we have not much to tell. From Japan, as we write, we have no later news than that the ambassadors to Europe had arrived back in safety with machinery for a new mint procured in France, and to be worked by French artists until natives of the country learn sufficiently to manage the works without foreign aid.

Mr. Martin Crofton Morrison, of the British Consular Service, who left, or was to have left, Tientsin for Hankow overland nearly two months ago, had not reached his destination at last advices from that port.

Foreign officers in the Imperial Customs service are still actively engaged at several of the Consular ports in drilling the Chinese to the use of foreign arms—a practice which, in time, we may find calculated to be destructive rather than beneficial to the Manchou Dynasty. The foreign Inspectorate of Chinese Customs is a praiseworthy institution in all but this meddling in soldier "pidgin;" and strict orders should be issued to consuls from the head quarters of Powers having treaties with China, to restrain their nationals from entering on such duty. We have had quite enough of the muddle arising from the pettifogging system initiated by foreign adventurers, on an affectation, if not positive assertion, that Home Governments sanction their affording a certain amount of military assistance to the government of the country.

The Nienfio recently around Hankow have departed for "pastures new"—followed, of course, by the usual reports of having been driven away with frightful slaughter. There present whereabouts is not generally known.

When at Ningpo and Chinhai the other day, the Fontai of Chekiang was waited on by deputations from several of the Guilds, and prayed to order a remission of some of the heavy taxes to which they are subjected. At Chinhai, in particular, the fishermen, boatmen and shopkeepers made formal complaint of the officials taxing them; and asserted that much of the money levied was not devoted to the purposes for which it was avowedly taken. His Excellency received the deputations with courtesy, and promised to make enquiry; and since he left, an abatement, spoken of as one per cent., has been notified; one of the effects of this abatement being a reduction of General Cooke's force, in the dismissal, without compensation, of some fifty drilled men.

The Imperial arsenal at Nanking is almost finished, we are told, and the exodus from Soochow of Dr. Macartney and staff will take place shortly, if indeed it has not already begun.

The following piece of classic puffery from the *Friend of China* is an amusing instance of the style of "doing things" in Shanghai. We think that the editorial that followed gave ample evidence of the resuscitation alluded to by the worthy editor :—

Following a practice in the United States—and a very laudable practice it is—Messrs. Todd and Co. when sending us the advertisement of fresh Saddle Islands Oysters to be found on another page, forwarded also a good bag full of the edible molusca as specimens. These bivalves arrived most opportunely. The editorial frame at that particular moment required recruiting, and no time was lost in operating on the testaceous fish, some delicious Alpha Farm fresh butter, with Evan's bread and some Empire Brewery beer (ten Mex. cents per pound loaf, and fifty tael cents per gallon.) All were excellent, but more especially the oysters—oysters such as we read of in Holland's "Plinie," book 22, chapter 6 :—

The *oisters* (quoth he) [Mutianus] of Cyzicum taken about the streightes of Callipolis, be fairest of all other, and bigger than those which are fed or bred in the lake Lucrinus, sweeter than those of Britaine, more pleasant in the mouth than the Edulian, quicker in taste than those of Leptis, fuller than the Lucensian, drier than those of Coryphants, more tender than the Istrian, and last of all whiter than the *oister* of Circey.

Senhor Diaz de Castilla, the Mexican merchant whose arrest in the British settlement last Thursday, under a warrant by British Consul Winchester on a prayer by the Chinese Customs' authorities, was mentioned in our last number (*Friend of China*), was sent to Ningpo on the *Kiang-tse*, and on landing at that port was promptly marched to the gaol of the British Consulate, there to abide an examination of some sort or another. Mr. White's application for Senhor Castilla's examination here before he was transported under coercion from one province of China to another was not heeded; some such ignorance being uttered we are told as that Habeas Corpus is not known of at the British Consulate. To Englishmen such a privilege might be accorded, to a foreigner not. So far as we are advised, the offence charged is as follows :—A certain Signor Don Estarico having failed in inducing the French Consul General here to authorise him in engaging coolies for shipment on labour bonds to Havannah, thought he would be warranted in making such shipments from Ningpo without foreign intervention—one particular embarkation of eighty-eight souls being on a Chinese junk outside the limits of the port. In this act, if guilty of nothing more, Estarico became amenable to the Customs of that port for evading laws of entry, clearance, &c. —and for this evasion Estarico is now in custody without leave to procure bail. But Estarico is not Castilla—the offence of the last named lying in having acted as banker for the Havannah man. If his offence be really no greater than this, it strikes us that Dr. Winchester's purse will have to discharge some of its contents in Castillian damages.

The following announcements of sales by auction are made in the Shanghai papers :—Under instructions from the trustees of the estate of Messrs. Fletcher and Co., a piece of land situated in the American settlement, next to property belonging to Messrs. Gibb, Livingstone, and Co., possessing frontage to the River Whangpoo, being a suitable site for a wharf and godown. Five shares in the Shanghai Gas Company, and one share in the Shanghai Tug and Lighter Company. Trefancha Farm, Soochow Creek; the house recently built of foreign-made bricks,

Digitized by Google

and the farm buildings, consisting of stabling for four horses, coach-house, six pigstyes, stalls for four cows, fowl-house, store-room, farm-servants' offices, &c., situated close to Alpha Farm, the property of J. Markham, Esq. This property comprises 12mow. 5f., and is surrounded with iron and wood fences.

According to the following letter from Mr. Grant his scheme should now be in working order. As we have not heard of the receipt of any messages we presume arrangements have fallen through :—

Minutes of a meeting of the subscribers to Grant's Mongolian Telegraph, held at the office of W. Jackson, Esq., on Saturday, 31st March, W. Jackson, Esq., in the chair.

The Chairman in opening the proceedings laid a letter which he had received from Mr. Grant before the meeting. The following extracts give the main points noticed in it :—

KALGAN, 15th January, 1866.

William Jackson, Esq., Chairman of the Executive Committee of Grant's Transmongolian Telegrams, &c., &c., &c., Shanghai.

Dear Sir,—I had the pleasure to write to you from Tientsin on the 6th ult., per *Corea*. I now beg to enclose you a copy of an agreement I made with a Chinaman at Tientsin. You will perceive that the amount for which I have concluded the contract is very much higher than I expected to pay, as per my prospectus. The Mandarins interfered with the contractor, and after everything was settled for Tls. 2,000, I had to pay another Tls. 500 so as to have no obstacles thrown in the way by the authorities. I think every dependence can be placed in the due performance of the service. The contractor has a very high reputation for integrity, and he is very wealthy; for these reasons I preferred to give him the contract rather than to an irresponsible person upon whom I could not depend.

The Russian Minister takes a great interest in my project. It has been officially notified to him by Sir Rutherford Alcock, with a view to his affording me any aid that lays in his power.

I have been since officially informed that the Russian Legation will use my line for the transmission of Government despatches.

It appears that the Russian line of couriers is not a Government line, although the Government is aiding it in several ways. It will cease the moment the committee authorise me to take general correspondence The Russian Legation has ceased to use it.

Sir Rutherford Alcock has done me an essential service in causing the Peking Government to inform the authorities on the borders and in Mongolia that I, a British subject, am proceeding to Mongolia, and that all the provisions of the treaty are to be complied with in regard to me.

All the ministers and charges d'affaires approve of my line, and they have requested me to address them officially with any propositions I may have to make as to subscriptions, &c. I did not, however, moot the subject of subscription to General Vangali, the Russian Minister.

The first messages between Kalgan and Kiachta will be sent by contract.

My agents here will be prepared to despatch letters which may leave Shanghai on or after the 8th March prox. I trust you will be able to send a good batch.

I have just received a letter from Stamman & Co., which I enclose to you; I shall feel obliged by your returning it to me, with your remarks upon it. I have been applied to by Gibb, Livingston & Co. Tientsin, and M. Sandri, agent for Bui o net & Co., in a similar tenour I have referred them all to you.

Independently of the 5 per cent. loss on exchange of taels at Tientsin there is another loss of 3 per cent. between Tientsin and Kalgan, making a total of 8 per cent., a rather heavy item, upon which I had not calculated. I start for Kiachta day after to-morrow. There is a good deal of snow in Mongolia, and the thermometer marks 30 degrees below Zero (Reaumur), rather cold!—I am, dear Sir, your obedient servant,

C. MITCHELL GRANT.

He then observed that half the amount of the subscriptions had been handed to Mr. Grant, and the chief business of the meeting would be to authorise the remittance of the balance to him. A copy of the articles of agreement for the conveyance of despatches between Tientsin and Kalgan were laid before the meeting. They stipulated that the distance should be performed in 48 hours. After some discussion it was decided that the balance of Tls. 2,500 should be remitted to Tientsin and placed at Mr. Grant's disposal, to enable him to complete the arrangements. It was also agreed that the public should be allowed to transmit messages at a rate to be published so soon as the scheme was completed. Some discussion took place relative to the appointment of a secretary, but it was finally determined in the present undeveloped state of the project to refrain from so doing; Mr. Jackson consenting to act as hon. Secretary for a further term. After the usual compliment to the Chairman the meeting separated.

HONG KONG.

Dates are to the 26th April. The P. and O. mail of 10th March arrived out on the 19th April.

His Excellency Sir Richard and Lady MacDonnell are on a visit to Macao, having left in the *Coromandel* accompanied by Admiral King. We hear that his Excellency was received in a most cordial manner on his landing at Macao. Governor Amaral and staff, accompanied by the British Consular Agent, received his Excellency on the jetty; a body of Portuguese troops drawn up at the top of the jetty on the Praya presented arms, and the band struck up "God save the Queen," while a salute of 17 guns was also fired. His Excellency, accompanied by Lady MacDonnell and his staff, proceeded by invitation of Governor Amaral to Government-house, whence in a short time they repaired to a residence prepared for their reception.

The screw steamer *Far East* and clipper ship *White Adder* have been chartered to take the 11th Regiment to the Cape, the Royal Engineers to Mauritius, and the 67th to England.

It is probable that Sir Richard MacDonnell will return to Hong Kong to-morrow (Tuesday), but Lady MacDonnell will remain at Macao some few days.

The *Evening Mail* announces:—We learn that a mixed court was held at Canton, consisting of H.B.M. Consul and the Chinese and foreign Custom-house authorities, at which the case of the steamer *Prince Albert* was adjudicated. This vessel, it will be remembered, was seized towards the end of last month in the Port of Shuey-tung, between Macao and Hainan, and taken possession of by the Customs on the grounds that she had infringed the 47th Article of the Treaty of Tien-tsin, which prohibits foreign vessels from resorting to any other than the ports declared open to foreign trade. This view appears to have been upheld by the court assembled at Canton, before which the owner of the vessel, Kwok a Cheong, and his witnesses, were examined, as we hear that a decree of confiscation was pronounced. The *Prince Albert* will doubtless be turned into a revenue-cruiser by the Customs.

The *Opossum*, Lieut. St. John, has returned from a cruise down the West Coast; contrary to her usual luck she could find no pirates, but discovered that the town of Paksui has been fortified more strongly than ever; the Mandarins asked assistance to destroy it as it is the head-quarters of the West Coast pirates. The *Opossum* has returned for orders on the subject. Paksui is the place where the *Opossum* lately destroyed seventeen junks and burnt the town, which is now rebuilt.

Under Japan we have noticed the Silk by the present mail. We find the total quantity on board is :—

SILK.—From Yokohama to London	180	bales.
„ Shanghai to London...	117	„
„ Yokohama to Marseilles	136	„
„ Shanghai to Marseilles	55	„
Total..	488	bales.

Per P. and O. steamer *Aden* for next mail :—

SILK.—For Southampton	198	bales.
„ Marseilles	45	„
„ Bombay	10	„
Total...	253	bales.

MANILA.

The British steamer *Mona*, with dates from Manila to the 24th April, reached Singapore on the night of the 2nd May. Her correspondence was therefore brought on by the Messageries Imperiales steamer, and was delivered in London this morning. The *Mona* is one of the service between Manila and Singapore which, as already noticed in our columns, has been undertaken by the China Steamship and Labuan Coal Company, leaving Manila about the 25th of each month, and returning thither from Singapore about the 2nd of the following month. Overland goods imported into Manila by these vessels are subject to the reduced import duty of 10½ per cent.

SARAWAK.

The following notice appears in the *Straits Times* :—

IN RE THE SARAWAK SUGAR COMPANY (LIMITED).

It is hereby notified that the Sarawak Sugar Company (Limited) having been sued in the Court of Sarawak for the debt due to the Government of Sarawak and for the debt due to Angela Burdett Coutts, and found to be insolvent, its plant, machinery, &c., &c., together with the management of all its property, have now reverted to the assignees appointed by the creditors and sanctioned by the Court of Sarawak. Notice is hereby given to creditors who may be living in Singapore or Europe that in three months from this date they will have to appear or appoint agents to appear in their behalf in the Court of Sarawak to prove their claims on the estate of the Sarawak Sugar Company (Limited), now insolvent; such creditors failing to prove their claims within the said three months to be struck out of the schedule of the aforesaid Sarawak Sugar Company (Limited), and lose all benefits accruing from the realisation of the aforesaid plant, machinery, &c., &c. (Signed) W. WATSON, Magistrate, &c., &c.

Sarawak 1st May, 1866.

SIAM.

The *Bangkok Recorder* reports favourably of the prospects of the line of telegraph from Rangoon through Siam to Singapore, and states also that a project for the construction of a rail-

Digitized by Google

way between Bangkok and Moulmein has been laid before the King. Our contemporary says :—

"While all has been wonderfully silent here, we hope that the Siamese Government has been doing something noble in royal council at Petchaburee since W. H. Read, Esq., from Singapore, had an audience with his Majesty in that city in the beginning of the week. We understand that his chief object in visiting Siam at the present time is to further the interests of the British Telegraph Company in carrying through their line from Moulmein to Singapore, with a branch from Tavoy to this city. From a Government document, of which we give a translation in one of the columns of this issue, our readers will rejoice to perceive that Siam is not going to be behind any neighbouring nation in allowing her territory to be traversed by telegraph lines. Nothing has occurred here for a long time that has given us so much hope for Siam as a nation as this noble determination of her Government to allow herself to be put into lightning communication with Western Asia, the isles of South Eastern Asia, Australia and Europe. Mr. Read, being an old acquaintance of his Majesty's, a man of the most respectable and powerful connections, will, we doubt not, accomplish great good by his present mission. The grand work he has in hand has, we trust, already advanced to a point from which it cannot go backward. Within a year or two at the farthest we may boldly predict messages will be flashing between Bangkok and Moulmein and Singapore daily; and as the Great Western line from Europe is already complete to Moulmein we shall in that time be on the most intimate speaking terms with all Europe. We learn also that Mr. Read will at the present time exert his influence in bringing up for discussion before the Siamese Government the project of having a railroad constructed between this and Moulmein."

His Siamese Majesty's despatch gunboat *Impregnable*, carrying four guns, one forty-pounder Armstrong gun forward, one thirty-two pounder on a pivot aft, and two twenty-four pounder broadside guns, anchored in Singapore harbour on the 2nd May. She left Bangkok on the 26th April, and brought as passenger Mr. W. H. Read. The *Impregnable* saluted the British flag at noon the next day, and would return to Bangkok on the 5th. This man-of-war is about 300 tons, was built in Bangkok, under the superintendence of Mr. Maclean, and is fitted with engines by J. Penn and Sons, of Greenwich, of 60-horse power nominal, and working up to 120. Her average speed is eight and a half knots. The vessel is commanded by Captain E. C. Walrond, and with that exception is manned entirely by Siamese. She is built upon a very superior style, and the completeness of her fittings reflects great credit on his late Majesty the Second King of Siam, who personally superintended the construction of the vessel.

The only departure for London from Bangkok since the 14th March is the British brig *Katinka*, Captain Greig, which sailed on the 23rd of that month with the following cargo :—Benjamin, 10 piculs ; sapanwood, 2,900 piculs ; sticklac, 70 piculs ; sugar, 414 piculs ; paddy, 30 piculs ; gamboge, 6 piculs ; tin, 200 piculs ; and 27 teak planks.

NETHERLANDS INDIA.

BATAVIA.

Dates are to the 1st May. The rice crop, as far as it has been gathered, has everywhere been abundant, and recent plentiful rains had opened the same good prospect for that part of the crop, which, for want of rain, was rather stunted in growth. Great hopes are also entertained for the sugar crop of this year, and not less favourable are the results of the indigo fields. Concerning the coffee crop the informations differ, and a decided opinion about it cannot as yet be given. Result of the coffee sale at Padang on the 30th March— :31,800 piculs first quality, average 43.41f. ; 1,800 piculs second quality, 24.59.5f. Government sale of coffee will amount this year to 250,000 piculs.

The rule for obtaining a pass when leaving Java is abolished, and also that announcing one's departure six weeks before in the *Government Gazette*.

The Dutch ship *Sourabaya Packet*, with a full cargo from Holland, arrived at Sourabaya in flames. Water was let in and the ship run ashore. Hopes were entertained of saving the ship and part of the cargo.

Messrs. Haager and Schuurman, a firm of old standing in Batavia, have suspended payment, and declared their firm to be in liquidation.

The Dutch man-of-war steamer *Stavoren*, Captain H. Schokker, has captured six large pirate boats on the west coast of Celebes. The expedition to Ceram is virtually brought to a termination by the submission of all the native chiefs. News from the west coast of Borneo is far from satisfactory ; reinforcements have been sent from Java. No news as yet from the expedition against the Pasumah countries (Palembang, Sumatra). This expedition was organised on account of repeated invasions of our territory. It is expected that the people of Pasumah, being a warlike race, will defend their country with great energy, especially as the approaches to it are splendidly fortified by nature. It is supposed that annexation will be the beginning of the end. It is rumoured that a revolt has broken out in Siak, where, it is said, some military officers were dangerously wounded. Again heavy shocks of earthquake have been felt at Willem I. and Banjoe-Biroe.

On the 15th March, a ship hove-to was seen from Anjer. The mate came on shore to post letters for the captain, and being asked why the ship did not come nearer to the roads, he answered that the captain was afraid that the Chinese coolies, of whom he had 480 on board, would run away, they having already twice revolted. The ship was the *Jeddo*, Smith commander, from Canton to Demerara with coolies. On the evening of the 16th a great disturbance was made again by the coolies, and when the captain, with a doctor and a passenger, all armed with revolvers, went on deck, they saw that the ship was on fire. The first thing to be done was to make for the shore to strand the ship in order to save human lives, and at about 10 o'clock at night the ship was on shore near the third point. The ship was burned to the water's edge ; the captain, 23 of the crew, and 315 coolies have been saved. In the morning nothing more of the ship was to be seen. It is said that the ship was set on fire by the coolies.

On the 27th April the English steamer *Souchays*, Blick, commander, arrived at Batavia, having made the passage from Brisbane in twenty-one days, touching at Timor Koepang. The steamer will return to Brisbane immediately after the arrival of the European mail of 10th April. The steamer *Koning Willem III.*, belonging to the Netherlands Indian Steam Navigation Company, will make, in May, the voyage to Sydney and Brisbane through Torres Strait.

[The letters from Queensland by the *Souchays* reached Singapore in time to come on to Suez by the Messageries Imperiales steamer, and were delivered in London this morning.—Editor *L. and C. Telegraph.*]

STRAITS OF MALACCA.

SINGAPORE.

Dates are to the 4th May. The London mail of the 26th March arrived out on the 30th April.

Her Majesty's steamer *Leopard*, from Hong Kong with dates to the 25th April, *en route* to England, arrived at Singapore on the 3rd May. The Sarawak steamer *Rainbow*, has been purchased by the Straits Government for the sum of $18,000, and was to leave Singapore for Sarawak on the 5th May on her last trip. The Straits steam gunboat *Mohr* has been sold to a European mercantile firm at Singapore for $6,500.

The following is from the *Government Gazette* :—"Residency Assistant Surgeon A. Fergusson, M.D., assumed charge of the Senior Surgeon's office from Surgeon-Major J. Rose on the 22nd April. His Honour the Governor has been pleased to make the following appointment as a temporary measure, with effect from the 1st May :—Mr. C. G. Baumgarten to be Deputy-Sheriff at Singapore, vice Hewetson, resigned."

The Court for Relief of Insolvent Debtors has appointed the 4th June for hearing the petition of Messrs. Joaquim and Jose d'Almeida, praying to be allowed to withdraw their petitions for relief and discharge, for the purpose of carrying out a composition arrangement with their creditors.

The following notices of sales by auction have been given :—

In the matter of J. M. Purvis, an insolvent, the plot of ground called Glassmount, containing an area of about 4½ acres, together with the two commodious and substantially built dwelling houses erected thereon, at present occupied by A. T. Carmichael, Esq. All that portion of lot part No. 1, of Government lease No. 11, for a term of 999 years, quit rent $5 per annum—which is marked B in the plan, and containing an area of 1,545 square feet, together with the whole of the building now standing on lot part No. 1 of the said lease No. 11—and lately occupied by Messrs. Geok Teat and Co. This property is situated in the best part of the square—being bounded on the one side by Commercial-square and on the other side by Battery Road.

Mr. Henry Hewetson assumed charge of the office of Assessor and Secretary to the Municipal Commissioners on the 1st May, vice Mr. C. R. Rigg, who has retired.

Digitized by Google

The Singapore races came off on the 24th, 26th, and 28th April. On the first day the Governor's Cup was won by Zuleika; the Johore Plate by No Name; and the Opium Plate by Caledon—the rider of Mrs. General Grant, who appeared to be winning, coming to grief through his stirrup-leather breaking. On the second day The Laird won the Singapore Cup; the Roadster's Cup went to Pirate; and the Club Cup, value 150 guineas, to Caledon. We have not received the return of the last day's racing.

The Australian Hippodrome, formerly under Mr. Lewis's management, and now under that of Mr. Cousin's, has arrived once more at Singapore, and is much patronised.

PENANG.

Mr. D. Pasley has been appointed by the Municipal Commissioners as Assessor for the Province *pro tem.* His duty will be to revise the land rates in some of the districts. We think this a very necessary step, as it is impossible that the Secretary can be expected to go minutely into the details of assessing and collecting the rates in the province whilst residing in the island, and his time being occupied with other works. The rates are in some places in the province too low and in other places too high, because the small size of the holdings and the poverty of the holders make it expedient that in the former cases rates should be raised, and in the latter that the assessment be remitted altogether.

The *Gazette* is happy to announce that there is a good prospect of the town being lighted with gas. Mr. Wells, the engineer and secretary to the Singapore Gas Company, has had an interview with the commissioners. The scheme, in great measure, depends upon the support the commissioners can give. As there is little doubt that there will soon be a considerable increase in the municipal fund, it is highly probable the commissioners will guarantee the consumption of a certain quantity of gas for lighting the streets. When the town is well lighted and the commissioners have fully developed their water-works, Penang will have made a good stride towards progress.

THE TUMONGONG OF JOHORE.—Dr. Scott is doing his best to show this illustrious stranger the lions of the metropolis. His Excellency has, we understand, so far enjoyed his visit very much. To-morrow a visit is to be paid to Guildhall, to meet Prince Alfred, and to St. Paul's, to witness the assembly of charity children.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

CHRISTY—On the 28th May, the wife of Thomas Christy, jun., Esq., of a son.

FELLOWES—On the 29th May, at 1, Clarendon-crescent, Edinburgh, the wife of Captain Charles Fellowes, H.M.S. Duke of Wellington, of a son.

JACKSON—On the 26th May, at 74, Marquis-road, Canonbury, London, the wife of J. Jackson, Esq., of a son.

MARRIAGES.

KING—SMITH.—On the 21st April, at St. George's Church, Penang, by the Rev. James Mackay, B.D., John Bishop King, Esq., M.D., Assistant Surgeon H.M.'s Indian Army, to Joanna, second daughter of the late Henry Smith, Esq., of Island Hall, Penang.

PHILLIPS—OAK.—On the 7th April, at King Williamstown, British Kaffraria, by the Ven. the Archdeacon Kitton, Geo. Hutchinson Esten Trefussis Phillips, Esq., D.A.C.G., to Emily Georgina, second daughter of W. C. Oak, Esq., formerly of Blandford, Dorsetshire.

DEATHS.

BOWRING—On the 17th April, at Bangalore, Mary Laura, wife of Lewin B. Bowring, Esq. (son of Sir John Bowring), Commissioner of Mysore and Coorg, and third daughter of the late Admiral the Hon. Sir John Talbot, G.C.B.

BROWNE—On the 30th May, at 52, Lower Belgrave-place, Pimlico, Henry Browne, Commander P. and O. S. N. Co.'s Service, aged 39.

JAMES—On the 14th April, at Hongque, Shanghai, Mr. John James, Master of the Lower Light-ship.

NICHOLSON—On the 30th May, at Aberdeen, after a short illness, John Nicholson, Esq. late Superintending Engineer of the Peninsular and Oriental Company at Sydney and formerly of Bombay, aged 54.

VERNON—On the 31st May, at Sudbury Hall, Derbyshire, George John Warren, Lord Vernon, aged 62.

ARRIVALS.

At YOKOHAMA.—From London: April 4, Eliza Shaw.
At SHANGHAI.—From London: April 19, Guinevere.
At HONG KONG.—None.
At SINGAPORE.—From Sunderland: May 2, Alice Ball. From Newport: Luconia.

DEPARTURES.

From YOKOHAMA.—None.
From SHANGHAI.—For New York: April 18, Finzel.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London, £3 to £3 10s.
At SHANGHAI.—To London, £3.
At HONG KONG.—To London, £3 10s. to £4.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—June 2, off Dungeness, from Batavia, Rifleman, Adriana Petronella; off the Wight, from Java, Panama; off the Start, from Batavia, Johannes Martinus; 5, at Deal, from Akyab, Frederick; 4, at Falmouth, from Banjoewangie, Superb; from Ranjoon, Hohenstauffen; at New York, from Manila, Brazilian, Endeavour.

DEPARTURES, MAY.—From Amsterdam for Batavia, Baltimore; June 2, from Clyde for Singapore, Douglas Castle; May 19, from Hong Kong for New York, Jeanie, Dunham.

CASUALTIES.—The Mary Edey, Gifford, from Colombo to London, arrived off Falmouth June 3rd, with loss of sails.

SPOKEN.—Agincourt, Southampton to Hong Kong, May 7, 24 N., 21 W. Ceylon, Liverpool to Hong Kong, April 4, 36 S., 28 W. Robin Hood, for Hong Kong, May 20, 48 N., 9 W. Grasmere, Shanghai to New York, April 12, off Cape Agulhas.

AT ST. HELENA.—April 25, from Sourabaya, Robertus Hendrikus, Mulder, and sailed 26 for Amsterdam; 27 from Ceylon, Ludwig, Halsloop, and sailed 27 for New York; from Macao, Antoinette, Chabannes, and sailed 28 for Havana; 29, from Banjoewangie, Cornelia Adolphine, de Roever, and sailed 30 for Amsterdam; from Singapore, Elena, de Celaya, and sailed 1st May for Cadiz; from Batavia, Willemina and Clara, Molemaar; from Macao, Guadeloupe, Gardoqui, and sailed 1st May for Havana.

AT MAURITIUS.—April 29, from Singapore, Ziska, Morris; 20, Malta, London, sailed for Singapore; May 5, Humboldt, Proctor, sailed for Batavia.

AT TABLE BAY.—April 18, from Manila, Royal Saxon, Randell; 19, from Padang, Helena, Dil.

PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.—The Peninsular and Oriental Steam Navigation Company held its half-yearly meeting on the 5th inst., Mr. H. Anderson in the chair. The report read by the Secretary stated the measures taken to increase the fleet and to keep it in a more efficient condition. The hull of the *Columbian* had been repaired; three new vessels, the *Avoca*, *Malacca*, and *Sunda*, would be completed in two months. A new steam tug had left for the Aden station, the *China* and *Ceylon* were fit for service, and the *Candia* was being refitted. The loss of the *Jeddo* involved a charge of £60,000 on the underwriting account of the year. The directors had furnished the Select Committee of the House of Commons, now investigating the subject of postal and telegraphic communication, with important information calculated to correct current and erroneous information, and bearing on the company's interests. The report of that committee would recommend changes; and the directors were prepared to take into equitable consideration such terms as might be offered with reference to the interests of the community as well as their own shareholders. The chairman adverted also to the Parliamentary inquiry, and then to his visit to Egypt. The Viceroy was well-disposed to afford further facilities. A convenient coal depot had been secured at Alexandria, near to the railway, and convenient premises granted, while the Pasha had ceded a shorter line to Suez, which would reduce the cost of coal transit by one-half, and reclaiming a landing wharf at Suez. Some discussion took place in reference to the loss of the *Jeddo*, as to the instructions given to the commanders. The chairman remarked that the whole of the company's losses on underwriting account for the past half-year amounted only to 25s. per cent., the company being its own underwriters. After some remarks by Admiral Hall on the Australian Postal Service, the Report was unanimously adopted, a dividend of 3½ per cent. being declared for the half-year ending March 31st last, and payable on the 25th inst. The proceedings concluded with a vote of thanks to the chairman and directors.

THE WEST COAST OF COREA.

(Continued from our last.)

The storm which detained us in Wei-Hai harbour had evidently swept along the West Coast of Corea. Our junkmen picked up several large pieces of wood, amongst which was a "koogoo," a kind of manger. Early on the morning of the 15th, passing a mile to the north of Ta-paw-lsz, we sailed slowly along the N.W. side of Pe-Lingh. This part of the island is singularly barren of trees, but the hills are clad with a bright green grass, so pleasant after the bare hills of Shantung. The N. and N.E. part of the island is beautifully picturesque—quite grand in many places. Perpendicular cliffs in storied, well-defined strata, at least three hundred feet high, fringed gracefully along their summits with fir-trees and much underwood. Gradually, as we sail on, high rocks are seen at the north point, standing out of the sea in all kinds of fantastic forms, some resembling monster statues, others recalling to mind the Isle of Wight Needles, some like strong ancient forts—old castles with many creepers clinging to the ruins. Giving the outermost of these rocks a pretty wide berth (a wide berth for a junk means a few feet), the pretty little harbour of *Tung-men-chew* opens out. Sailing within fifty yards of the shore we cast anchor. I was eager to go ashore Yang-ga-begged me not to betray my nationality. The view from the junk was lovely in the extreme—hills from tip to beach or inland plain covered with firs, small oaks with very large leaves, and many shrubs. As yet our arrival apparently had not been observed. It is the usual policy of the Chinese junks to find anchorage as far as possible from villages and towns. On landing we first met an old Corean woodcutter, Paga, and his two sons; they, like all these islanders, for years accustomed to the arrival of Chinese junks, can command sufficient "Pedgin" to be tolerably understood. Paga begged for a knife. I invited him and his two sons on board. The elder son was a most interesting lad, with hazel eyes, and light-brown hair. I gave the boys a brass button each, having fortunately provided myself with a couple of dollars' worth of these cheap but very acceptable gifts. The sons sculled us in their "coro," small boat. The Coreans know nothing of caulking—small boats and large junks alike leak incessantly. Constant baling is of course necessary. To prevent getting wet feet, a flooring of bamboo rods fits the lower width of the boat, and cut to its shape, forms the sitting place of the passengers. Yang-ga was not be seen; he had given strict orders that his name should not be mentioned. All of a sudden Paga's son said to him with a scared look, "Abadi, kaapsida, chori saram hanna, masso." "Father, let's be off, there is somebody come." Somewhat against their wish I accompanied them ashore, and found squatting on the beach (in Japanese fashion) a shabby-looking member of the coast-guard. The following dialogue took place. I quote it, for it occurred in substance on every island or spot on the mainland visited by me:—

Corean. Je! do buotharyo wannonya?
Foreigner. Amun ildu opta.
C. De s'ongi muosinya?
F. Du galda.
C. Oso lorakanonkosi chot'a,
F. Ani kakelta.
C. Uai ani karyanonya.
F. Hukyang haku kakelta.
Anglice. I say! What have you come for?
Nothing at all.
What is your name?
Mr. Tu.
Oblige me by departing.
I wont.
Why?
When I have had a look round I'll go away.

All this talk means nothing. My Corean speech won the heart of the soldier, and we chatted on the beach quite amicably. I requested him to conduct me to the residence of the small mandarin who, he had just informed me, had but recently arrived from the capital. He replied by significantly drawing his hand across his throat. I laughed, and telling him that I was a "Western Oceaner" insisted on his guiding me. Very loth he proceeded by my side till we reached a broad, shallow, salt pool. He carried me over this and we made our way up the side of one of the hills on the south-east side of the little harbour. My attention was attracted by a magnificent wild rose, as fragrant as those in our English hedges. Ferns abounded on every side. Ignorant of botany, my eyes and ears were open only for the character and language of the Corean people. Half way up the hill we came upon a company of woodcutters, each possessing a very sharp axe. I was quite struck with the respectable and intelligent-looking faces of many of them. They were startled by my sudden appearance, and one or two turned pale when my friend, the coastguardsman, informed them who I was. I spoke to them of the "Lord of Heaven;" one of them seemed to have an inkling of what I meant. The grave circle around me, each one with his long uncut hair done up into a knot and the straggling hairs confined by a white cotton bandage tied around the head, the long whiskers carefully combed, and one or two with the beard plaited into a tail—the uniform unvarying white "polda" (a native cotton fabric) clothes—the long pipes so solemnly smoked, with green tobacco heaped up in their capacious bowls, made me feel I was in another country amongst another people.

Digitized by Google

Suddenly, whilst we were pleasantly chatting, their head man burst upon us in a great passion and was going to beat a boy. I took the stick out of his hand and flung it away. Proceeding up the hill with my companion Kimga, he besought me to give up my intention of seeing the mandarin, as it would certainly be at the price of his head. I replied we might walk to the top of the hill to enjoy the view. And a charming panorama lay spread out before us. Nothing worthy of note in the island —all the villages were hidden by intervening hills, but northwards the promontory of Yang (ch'ang) shan, a lofty magnificent *sierra*—reminding me of the Guadarama in Estremadura—only some 10 miles off, to quote the expression of a Chinese traveller in Corea, "laughingly invited me to ascend its summit." Through my glass I could see a great deal of forest covering the sides. Kimga suggested dinner, and down we went to the bay where we found three Chinese junks had just arrived. On nearly all the islands I visited, I found small oxen and very small ponies. The former belonging to the islanders are exclusively used as beasts of burden, for the ponies belong to the Government. I was told that they were formerly given to the Coreans by the Chinese during the wars between Corea and Japan. Towards evening the news of our arrival had spread to the authorities, and a large boat full of soldiers landed on the beach. I went ashore and invited the small officer in charge to come on board. He said he was a native of Wanking, and had visited Peking with the Embassy. During the night the soldiers lit fires on the beach. Yang-ga was too anxious to sleep. "Pray don't speak Corea to them," said he, "they will report your arrival, and I with three degrees of kindred shall surely die."

On the 16th the same officer came on board and said that he had already heard of my religion in Peking, and would come in the middle of the night to speak more particularly about it. He was afraid to remain on board too long in the day time. All the contraband trade between the Coreans and Chinese is carried on at night. The ginseng trader usually remains at anchor about a mile or two off, in fine weather of course. The Chinese conclude a junk to be a trader if she anchors with no ostensible object at that distance from them.

Our skipper told me that last night he had given some shirtings in exchange for the "bicho do mare" or "sea-slug," a highly prized dish amongst the Chinese. Large quantities are found from the south of the Yang-shan promontory up to the Ta Tung River in the north. In the afternoon a fine breeze sprang up, so I gave up the hope of seeing the friendly officer. The harbour was too narrow to tack out, so we sank a small anchor in the sampan to be cast a few dozen yards ahead, then hauled the junk up to it, and this repeated till we were well out. Then off with the tumultuous tide. The tides on this coast rise to twenty feet and upwards, and rush along with inconceivable impetuosity. A small junk with fair wind and tide can do ten knots. Passing the small island of *Moli t'o* (Talom-som) and islet of *Niu P'o lsy* (Tsing mo) across the entrance of what is called *Hai chia p'a* bay, at dark we reached our destination, *Maye taw*, also called *Hoang-hoa-ts'ai-to'-lsy*, a small island lying about half a mile off the mainland. I was sitting talking to Yang-ga when I heard a sailor sing out, "Up with the helm, we are passing over the reef." Getting on deck I found we had six feet of water. Our junk sails in four comfortably. When the tide is out this reef is visible nearly across the strait; and when a strong north wind blows it breaks the force of the waves. The south-east wind brings a sea in. I will not tire the reader's patience with a minute account of my intercourse with the inhabitants of this small island. The same curiosity, mistrust, and fear. The inhabitants, like those in Peking and all the islands on this coast, subsist on rice, turnips and fish. A few Corean women whom I saw looked dirty and ugly; but they are poor and half-starved. I gained the affections of a troop of boys by doling out to them small quantities of sugar, which is not cultivated in Corea. The well-to-do get supplied from Peking through the north, and the others use excellent honey as a substitute. To-day (17th), in accordance with Yang-ga's wish, we hoisted a flag with a red cross, as a signal to his anxiously expected vessel. A touching symbol at any time, but this quiet Sabbath day peculiarly so. This simple flag can summon junks to bear the brave Catholic missionary to the jealously guarded capital of Corea. No pencil can daunt these devoted agents of the "Gesei." They recognise no "terra incognita." From Delhi to Lhasa, from Peking to Nangking, are they to be found. Neither men nor mountains can daunt them. Corea, guarded on the north by Coreans and astute Chinese, on the south by Coreans and the astuter Japanese, has been conquered by them after the blood of more than one martyr has been spilt. Formerly amidst many miserable privations they made their way in a Manchurian winter over the frozen "Green Drake River," whose southern bank is Corea, where they were met by those whose friendship had been secured in Peking, and well content were they with the rough accommodation of a native hut and native fare. Latterly they cross, as I have done, in a Chinese junk, and hoist a flag with a red cross to be recognised by the native junkmen, who at the peril of their lives conduct them inland. Is it not a glorious record of their perseverance that now eleven missionaries are stationed in the capital and neighbouring provinces, and have so many converts that an intelligent native merchant told me the Government did not cruelly persecute as of yore, because the Christians were *too numerous*. The foreign priest adopts the disguise of mourning for father and mother, and most appropriately does the Roman Catholic enter the country in mourning for his father and mother. Slender chance of seeing them again on earth has he. Any one can wear this disguise, so complete is it. An enormous hat made of bamboo slips (P'angnip), a horsehair net or cincture to keep up the hair (P'o mong), a coarse cap underneath the hat (C'on), a lap or veil over the face (P'osen), &c., &c., form such an admirable disguise that discovery from glances by bystanders is rendered next to impossible.

18th.—A fair wind for our progress southwards, but we must first get through the important task of eating. Our fleet of four set off in company, tacking close into the shore of the island, where I observed a very picturesque natural arch formed by a huge rock, quite as striking as that at Biarritz, made so much of by the Bayonne engravers. Our course was along the mainland. We passed a few miserable huts, then a large yamen—the residence of a military mandarin of the fourth rank. The Coreans call the place S'okong. It began to rain and blow; so getting near Ch'onglin Island, our destination, we ran up into shallow water on the north bank. At low water we had five feet, but the bottom was soft mud, and there could be no sea on, should the squall not shift round from the north to the west. It was very dark, and in finding our position the skipper, who couldn't find the compass, asked me now and then how we were going. On the morning of the 19th we went fishing, or rather poaching, in a Corean fish enclosure (Leaiz-lsy); the two poor fishermen in charge with great good nature gave us a few fish, for which we gave in exchange tobacco and sugar. On entering the splendid harbour of Ch'ong-lin, we found ten Chinese junks at anchor—a beating of gongs quite deafening welcomed our arrival. Much to my delight, the pilot of a neighbouring junk came on board to tell us that Yang-ga's vessel had arrived a month ago at this island. He says that it has a crew of two—an old man named Yuga, and a younger man of the name of Kimga. The old man every evening at night-fall used to come to his junk and sit down to weep with anxious waiting. Now I trusted all would be well, and that I should get to the capital. We spied the little junk with one mast, lying high and dry on the shore. At midnight Yang-ga and myself were on deck anxiously waiting her coming. At last we heard the gentle plashing of the scull, and soon a small junk came alongside. Yang-ga could hardly stand from excitement; he was trembling with hope and fear. He cried out in broken Chinese, "Sheinmo Ch'uen?" (what vessel?). When he heard the voices of his friends, he was reassured. With a rapidity that I could scarcely follow, question succeeded question. "All well?" "All at peace," was the comforting answer. Yang-ga feared his journey to China had been discovered, in which case his relatives would have been severely punished.

We all four went down into my cabin, where I prepared some excellent tea for our guests. They told me that a great inundation had taken place near the capital in the mouth of July—more than a thousand lives lost. After examining my hair and feet, they said I could pass for a Corean almost without the mourning suit, but it would be safer first to go to a retired place in the country and wait till my clothes should be ready. As their junk was very small, we agreed that on the morrow they should proceed to the island of Yeng-p'ing and there await us.

(To be continued.)

LONDON, WEDNESDAY, JUNE 6, 1866.

THE CHINESE VISITORS.

SINCE the publication of our last issue the Chinese Commissioner and suite have been actively engaged in fulfilling the object of their visit to England. It is evident, from the rapidity of their movements, that they were above all things bent on losing no time. On returning from the visit to Aldershot, to witness the review taking place in honour of the QUEEN'S birthday, they complied with the invitation, previously accepted, to attend Mrs. GLADSTONE'S assembly at Carlton-terrace. The occupation of the succeeding days included visits to the General Post Office, the British Museum, Mr. MC'LEAN'S photographic studio in the Haymarket, Mr. NADAL'S fountain manufactory, Pentonville Prison, *The Times* Office, and the Athenæum Club; in addition to which they attended a performance at the Olympic Theatre. Some of the members of the suite visited Greenwich Park. Of distinguished individuals on whom his Excellency and suite have called we may enumerate Earl RUSSELL, Sir JOHN BOWRING, the American, French, Dutch, Danish, Swedish, and Prussian Ministers; also Professor OWEN. On the 31st they visited the House of Commons, opportunely arriving there at the moment when Colonel SYKES was asking the Under Secretary for Foreign Affairs the nature of their visit to this country (reported in our Parliamentary Intelligence). It will be seen that Mr. LAYARD expressed the hope that this visit might prepare the way to the appointment of an Ambassador to the Court of St. James' from the Imperial Court of Peking.

On the 1st June they visited Colonel GORDON and his brother at Woolwich, accompanied by Major BRINE, Mr. DICK, Mr. HUGHES, and Mr. HANNEN. After lunching at the residence of Captain GORDON, Principal Superintendent of Stores, the whole party, with the exception of the Chief Commissioner PIN, proceeded to an inspection of the departments of the Royal Arsenal. Their first visit was to the Royal gun factories, where they were received by Lieutenant-Colonel FREETH, second commandant, and according to War Department instructions they were admitted to a thorough inspection of the manufactory. They witnessed the working of one of the 12-ton steam hammers, and the formation and welding of a huge gun coil, which occupied about three-quarters of an hour.

On their reception at Aldershott a contemporary observes:—

Over and over again illustrious visitors have come down to our show-camp under most depressing conditions, and under circumstances which must have contrasted most unfavourably with the mode of their treatment in less favoured and more courteous lands. There are no people so punctilious and exacting in etiquette as the Chinese. Their good opinion is of more consequence to us than it is to any other nation; and yet their envoys are mostly left to discover our greatness through a thick crust of uncouthness and discourtesy. When the Chinese princes at present in the country went down to Aldershot the other day to visit the camp, there was no intimation of their visit and no measures taken for their reception. An officer of Engineers was in attendance upon them, but there were no vehicles in waiting, and they made their way to see the review in camp on the Queen's birthday as they might, and were indebted to good fortune for a friendly luncheon at the mess of a hospitable corps. Surely a little forethought would give effect to a very small expenditure in such matters, and would tend much to exalt if not to create the national reputation for politeness and courtesy. Whether it be the Foreign, or the Colonial, or the Home Office—whether it be the War-office or the Admiralty which ought to act in the premises, we cannot say. All we know is there are quite departments enough for the discharge of such offices, and for insuring that they are properly performed, and there are certainly clerks enough in each to spare a little time to attend to the extra business. Perhaps it might be made a matter of Court observance in the case of personages of great military eminence. It would not quite crush the gentlemen about St. James's if they were called on to acquaint themselves with the names of such visitors, and take steps for gratifying them in a becoming manner. It is not lack of money or of will which puts the nation to shame.

It is, we understand, the intention of the mission to visit Denmark, Prussia, Holland, and Russia, returning to France and embarking at Marseilles for China in about three months.

PROSPECTS OF TRADE WITH THE COREA.

A GLANCE at the relative position of the Corea and its geographical formation will show how favourably it is situated for oceanic intercourse. The mountain barriers dividing it from Mantchuria, and the configuration of its western coast, near to which may be found not only the capital but the most populous towns, show that although the overland trade with China exceeds in value that carried on by means of junks, whether openly or illicitly, it is by sea and not by land that the resources of the Corea are to be developed. Sufficient is known of these to satisfy us that under reasonable regulations a very considerable direct British trade might spring up. There is no more profitable basis of trade than that provided by silver, gold, and other metals on the one hand, and manufactured goods on the other. Corea, if we may believe native reports, old traditions, and the witness of recent travellers, has abundance of gold, silver, and copper, though apparently as jealously guarded as the Golden Fleece. On our part, wherever we meet with Asiatics we find customers for our cotton and woollen stuffs. The rapidity with which a country possessing the precious metals may be developed needs no illustration; it need not wait long under an enlightened government to possess in abundance the products of Western civilisation.

We have long urged upon the British Government the importance of a politico-commercial mission to the Corea. In an article on the subject in our issue of February 28 of last year, we pointed out that under a formal treaty, in accordance with our requirements, we might very safely encourage mercantile ventures. Those remarks, it would appear, led our correspondent, whose letters appear in the last and present issues, to pay a visit to the country, the particulars of which he very luminously describes. A love of adventure, combined with a desire to add to our knowledge of the present facilities offered in Corea for trade, a quick discernment of character and power to delineate its several shades, combined with presence of mind and ready adaptation to the views with those with whom he is thrown in contact, mark him as well suited for such an enterprise. Our correspondent found confirmation from other Coreans than those at Peking, of the current report that the country is poor; but after all, poverty is only a relative term, and this declaration, which it well suits the policy of the timid and jealous rulers to declare, signifies little. The Corea is not so poor but that it can support millions of population; it is not so poor but that it jealously restricts the Japanese trade, turning the laugh against those rigid exclusionists as they move to and fro within the walled factory in which it has pleased the Coreans they shall abide. If the Corean Peninsula is poor, it is poor in the sense that California was poor before it passed from Mexican to American rule.

The sketches given by our correspondent of the illicit trade carried on upon the coast possess an almost romantic interest. The transactions carried on, and in which by the way, the wily Chinaman with his well-sharpened wits, appears to overreach the simple and easy Corean, appears in the light of an enforced vindication of natural law, which will not permit a nation for ever to shut itself up from the outer world or assign set limits to its own development. The Corean government appear to have very effectively restrained the shore population from trading intercourse with strangers—an intercourse of which the best friends just now are bribery and the darkness of night. The restrictions on Corean trade with China, no less than Japan, originates with the Corean government itself; and sowiththe penal penalty awaiting Coreans who visit China except in the train of the tribute bearers. We are aware that parties at home are waiting for the opportunity to despatch a pioneer venture to the Corea. Our correspondent at Hong Kong also wrote by last mail that two vessels had been despatched to the Corea on Chinese account. We also know that Her MAJESTY'S Government have not neglected this matter, and that Her MAJESTY'S Minister at Peking has instructions on the subject. Mr. MORRISON, H.M.'s Consul at Tangchow, lately paid a visit to the place unofficially.

THE MORTALITY OF TROOPS AT HONG KONG.

THE committee in this case is expected to bring its enquiry to a close in one more sitting. At the last meeting Major Edwards, R.E., who came home by last mail, Captain Burland, 9th Regiment, who came home in the *Gresham* (on board of which vessel great mortality occurred), and Colonel Moody, R.E., were examined.

THE CHINA CONSULAR SERVICE.

MR. ROBERT SWINHOE, who has been for some time Consul at Ta-kow (Formosa), has gone to Amoy to relieve Mr. Pedder, who arrived by last mail on leave of absence. Mr. Alabaster, Vice-Consul at Shanghai, is acting Consul at Ta-kow. Mr. Gregory, the Vice-Consul at Tamsui (Formosa), goes to Swatow to relieve Mr. Caine, who comes home on sick leave. Mr. Carroll, Interpreter at Shanghai, proceeds to Foochow as acting Consul, vice Mr. Hewlett, who has leave for England. Mr. Sinclair, the Consul at Foochow, at present in England, proceeds to his post in September. Mr. Wade, Chinese Secretary at Peking, has been granted leave of absence, but it is uncertain when he will avail of it.

THE STRAITS TRANSFER.

WE are glad to announce that the negotiations on this long vexed question have been at last brought to a termination. The difficulties between the Treasury and the War-office have, we understand, been arranged somewhat on the nature of a compromise. The military force to be maintained, is two batteries of Artillery, and six companies of the Ceylon rifles. The proportion of annual cost to be borne by the Straits is £59,300, including cost of transport and a reduction of £58 for every man less than the complement. The Bill for the transfer is now ready to be introduced into the House of Commons.

THE BANK OF HINDUSTAN, CHINA, AND JAPAN.

AGREEABLY with the wish expressed by the shareholders at the meeting held on the 24th ult., the directors have re-formed the board to the satisfaction of a committee appointed to see this measure carried out. Mr. Joseph Mackrill Smith, who has the best knowledge of Eastern trade, has become the chairman; and Mr. Vanderbyl, a director of the National Bank, is the deputy-chairman. Mr. Alderman Allen has also been added to the board.

THE CHINA DINNER.

WE have been reminded that in the toast proposed by Sir John Davis of "British trade in China," Japan was also included, and that Mr. Willgoss, on the part of the merchants of that country, returned thanks.

NEW SEASON'S TEA.

The following letter appeared in the *Times*:—

Sir,—I left Hong Kong on the 27th of March by the French steamer *Camboge*. While sauntering on the quay at Suez, watching the unlading of her cargo, I noticed a large number of half-chests of tea bearing the following mark and inscription:

"Finest New Season's Teas.
"D. O.
"Season, 1866 to 1867."

In other words, this tea purports to have been gathered in the early part of March, when not a leaflet has appeared on any tea plant in China. I drew my own inferences as to the age of the tea, and determined that, with your assistance, the English public should have an opportunity of drawing theirs.—I am, Sir, your obedient servant, W. G. H.

The individual who wrote this was not quite so knowing as he thought. It is quite true that the Canton new make of Tay-shan tea did come by the French mail of 27th March, and if he chose to assume that it was intended to gull the people of England that it was the New Season's Congou, that was simply a piece of ignorance which will act as a caution in future. Messrs. Deacon, of London, are consignees of some of this tea, and wrote an answer pointing out they were *Canton* New Season's. A further supply of 2,000 boxes came by last P. and O. mail.

COLONIAL STATISTICS.

A ponderous Blue Book has just appeared, bearing the title of "Statistical Tables relatingto the Colonial and other Possessions of the United Kingdom," bringing our information down to no more recent period than 1863. The mass is, in fact, a selection and compilation out of the Blue Books sent home from the colonies in company with the annual Reports of the various Governors. The last-named documents formed a Blue Book of themselves, which was issued towards the close of the summer of last year; and they contained the results of the figures now presented to us more at large a year later. It seems almost doubtful whether any useful purpose can be gained by putting the public to the expense of printing a volume that after all, as it only brings our information down to a period now three years past, can be of little benefit to the merchant and man of business. The papers sent home from the colonies, in almost every case already printed, might be stored where a reference could be made to them by those requiring it. As it is, the purchaser desirous of consulting the four pages relating to Hong Kong must buy the entire collection, and lay out *five shillings and sixpence* for the whole 525 pages. The kind of facts tabulated may be judged of when we state that the pages devoted to the colony just named contain four tables in reference to population and schools; an account of the public revenue and its various branches; the number and tonnage of the vessels entered and cleared, with the various nationalities (six tables); number and description of live stock; average price of various articles; and lastly, the average rate of wages. Under this last head the information is brief enough, being for the year 1863, as follows:—"Domestic, per month, 21s. to 63s.; Predial, (per month) 12s. 6d. and food; Trades 7d. to 2s. 6d. per diem." The abstract of the statistics of Hong Kong, Labuan, and Ceylon for the year 1863 is as follows:—

HONG KONG.—Area, 29 square miles; population, 124,850; revenue, £120,078; expenditure, £122,201; public debt nil. Tonnage of shipping entered and cleared, exclusive of the coasting trade:—From and to United Kingdom, 90,631; from and to other countries, 1,716,250; total, 1,806.181: British, 944,074; foreign, 862,807. Imports and Exports.—Not stated.

LABUAN.—Area, 45 square miles; population, 3,346; revenue, £9,123; expenditure, £7,430; public debt, *nil*. Tonnage of shipping entered and cleared (exclusive of the coasting trade):—From and to the United Kingdom, 1,670; from and to other countries, 12,369; total, 14,039: British; 11,879; foreign, 2,160. Imports (including bullion and specie):—From the United Kingdom, £9,299; from other countries, £62.066; total, £71,365. Exports (including bullion and specie):—To the United Kingdom, *nil*: to other countries £22,232. Bullion and specie:—Imported, £9,263; exported, £2,500.

CEYLON.—Area, 24,700 square miles; population, 2,342,098; revenue, £952,790; expenditure, £738,194; public debt, £350,000. Total tonnage of shipping entered and cleared (exclusive of coasting trade):—From and to United Kingdom, 125,672; from and to other countries, 942,642; total, 1,068,314: British, belonging to United Kingdom, 517,158; to the colonies, &c., 403,039; foreign 148,117. Imports, including bullion and specie:—From the United Kingdom, £1,011,915; from other countries, £4,421,822; total, £5,433,807. Exports, including bullion and specie:—To the United Kingdom £2,407,578; to other countries, £1,179,656; total, £3,587,234. Bullion and specie:—Imported, £1,842,974; exported, £408,050. Total value of coffee exported, £2,126,220; of which to the United Kingdom, £2,018,324.

It must be remarked that no statistics whatever are furnished in this collection referring exclusively and independently to Singapore and the Straits Settlements. They have no separate abstract under "India," where we looked to find them. In fact, so completely is the circumstance ignored that Singapore remains still, unfortunately, a dependency of British India that in the table of places to which vessels have departed from "ports in each Presidency or Province of British India," Penang, Singapore and Malacca stand, linked together, under the heading "Foreign Countries."

THE AGRA AND MASTERMAN'S BANK.

A reward of £100 has been offered by this bank for the detection and conviction of parties who to injure its credit have sent to shareholders and customers fictitious and anonymous letters and telegrams, affecting to warn them that the bank would shortly stop payment, and advising them in their own interest promptly to sell their shares and withdraw their accounts. Mr. David Wilson, one of the shareholders, in a very spirited manner has issued a circular, in which, referring to the set made by speculators for a fall against the bank shares, he suggests, with a view to counteract these operations, the following proposition:—

"That all the shareholders who can be got to do it should deposit the certificates of their shares either at their own banker's, or in the hands of some good bank to be agreed upon, and that they should undertake not to sell them for three months. This will lock up a large number of shares, so that the quantity remaining could be ascertained. Of those a large number are known to be held by trustees and other parties, or by persons abroad who are not likely to sell them, and the small number of shares remaining alone will be available for disposal upon the market, and from which alone therefore can the 'bears' possibly be supplied. The number of the shares sold by the 'bears' is known to be very great, and once the supply for them is less than the number they require, the bears must be 'bitten,' and have to compete with one another for the shares they want to complete their bargains with, and give 'higher' prices, instead of lower, than the price they sold at. The second portion of my plan is this—it is proposed by some bankers and others of strong position to combine together and agree to go into the market, and among them purchase a large number of shares in the bank at the present low prices, and lock them up also for three or six months, and thus further to compete with the bears, and drive up the prices they have to give."

ASIATIC BANKING CORPORATION.

The second ordinary general meeting of shareholders was held at the offices, 4, Lombard-street, on the 28th ult. The chair was occupied by FRANCIS BOYKETT, Esq.

The CHAIRMAN said he occupied the chair that day as a matter of respect to the shareholders, for his medical man had prohibited him from taking any part in the meeting. The business would, therefore, be conducted by the deputy-chairman.

Mr. RUSSELL (deputy-chairman) said: I regret that, owing to the temporary indisposition of the chairman, the duty of addressing you has not devolved upon some one more competent than myself, but I rely upon your kind support and consideration. Meanwhile, we are very happy to have the opportunity of conferring with you, especially in the present unsettled and disjointed state of things which exists in commercial circles.

Mr. F. W. LAWRENCE (acting general manager) then read the notice convening the meeting.—The report and statement of accounts, which will be found in another page, were taken as read.

The DEPUTY-CHAIRMAN said: Gentlemen, the report places you in possession of a knowledge of the affairs of the bank up to the 30th of December last, so far as the most experienced scrutiny can determine; and, in arriving at that result, we have had the co-operation and impartial opinion of gentlemen entirely unconnected with the board (as is stated in the report), who have had the best opportunity of valuing correctly the securities we hold, and the position of our claims; and deeply as we feel and regret the results stated in the report, yet we have endeavoured to set them before you correctly, so far as we could possibly ascertain them. (Hear). With regard to the interim dividend of 2½ per cent., paid to the 30th of June last, equal to 5 per cent. per annum, at the time that interim dividend was paid, we felt that the course of events and the prospects of business fully justified the board in that measure, setting aside the fact of the reserve fund being applicable, by the deed of settlement, to the equalisation of dividend in the event of unusual losses. As regards a present dividend, the directors think it is better to leave the shareholders to determine whether a dividend shall be paid out of the reserve fund; but I may state that the directors themselves are disposed to recommend the proprietors to refrain from any such distribution under the existing position of commercial affairs generally. So much with regard to the past. I deeply regret that we are not able to declare a dividend out of the profits, but it must be borne in mind that this bank, in common with all banks connected with India, has passed through a period of almost unexampled pressure. I come now to a more agreeable matter, and I have to inform you that, notwithstanding the very heavy failures which have lately been announced, up to the present time no loss of any serious importance has, I am glad to say, been sustained by the bank since the close of the year. (Hear, hear.) The bills on Barned's Banking Company, and on Overend, Gurney and Co., are being satisfactorily met by the parties concerned—in fact, I think a large proportion of them have been already taken up; and there is no reason to doubt, at least we must hope, that the liabilities of the Commercial Bank will eventually be paid in full. There is no doubt that the events of the last three or four years have attracted much attention to Bombay, which is our chief field of operation, and which naturally attracts a great deal of attention on the part of those who are shareholders in this bank; but a severe phase of the crisis there has already been passed, and the bank's agent in Bombay has been enabled, during the past three months, to take precautionary measures so as to strengthen some of our important accounts; and, with respect to these accounts, the bank is in a better position than it was some time back. (Hear, hear.) Looking at the unprecedented support the bank has enjoyed in Bombay, the advantages we possess of a valuable consulting committee, and the large and important constituency we have drawn around us there, it is reasonable to anticipate a material increase will take place in the business of the bank as soon as the trade in the East shall have resumed its normal condition, for the trade is at present quite unhinged, as any one may see by going to Mincing-lane, Lombard-street, or Liverpool. We cannot expect to pass through such periods of unexampled pressure as the present without losses, but we confidently expect for the bank a future of renewed prosperity. It must be borne in mind that there is a very great deal of pressure on the cotton trade at the present time. The Western provinces of India can, I believe, produce cotton at 5½d. per lb. If American energy can raise enough cotton to clothe the market and fill up the vacuum in stocks, then India may suffer, but as she can produce cotton at 5d. or 6d. there is undoubtedly ground for believing that for some years to come Surat cotton will return £3 5s. a bale to India, and, as that represents from three millions and a-half to four millions a-year, it is evident a large and promising field is open for all the banking institutions connected with India. Notwithstanding the present pressure, the board is earnestly alive to the necessity of constant supervision and inspection of the branches. That is a subject which occupies their earnest attention, and they have made arrangements which, they believe, will attain that object in a satisfactory manner. In conclusion, I can only say, gentlemen, that it will afford the board much pleasure to confer with any shareholder desiring information, and still more to place before the shareholders, at the next meeting, a more satisfactory report. I have now only to move the adoption of the report, which I hope, unfavourable as it is, will meet your approbation. (Hear, hear.)

The CHAIRMAN seconded the resolution, which was carried unanimously.

Mr. ROBERT HANNAY moved, "That no dividend be declared for the half-year ending the 30th December last." He said he was a large shareholder in the bank, and he quite agreed with what had fallen from the mouth of the deputy-chairman; and he thought it would be much better to have no dividend paid to the shareholders at the present time. He made this recommendation in the confidence that at some future time, perhaps at the next meeting, they would get a larger dividend, in consequence of not having so much to-day. He had great faith in the directors; he knew that they had devoted much attention to the bank. He also had a very high opinion of the manager at Bombay, for a better or a more able man he did not know; and, indeed, the whole staff was a most excellent one. He had great confidence in the bank, both as a large shareholder and depositor, and he looked forward to the time when he should obtain a good dividend on his investment.—Mr. A. C. SCOTT seconded the resolution, which was carried unanimously.

Major H. T. ARBUTHNOT, R.A., moved, "That Francis Boykett, Esq., and Thos. Cardwell, Esq., be, and they are hereby, severally re-elected directors."—Mr. R. D. PEEBLES seconded the resolution, which was carried unanimously.

A SHAREHOLDER inquired whether there was any reason to anticipate any further loss than that mentioned in the report.

The DEPUTY-CHAIRMAN replied that he had already stated that the agent of the bank in Bombay had been enabled to take precautionary measures in strengthening important accounts. It was impossible for him, or any other man connected with the East, to say what the loss might be exactly; but when cotton had gone from 16d. to 9d. per lb., how could they hope to escape loss altogether? He believed there would be loss in some cases, but that would be counterbalanced by the covering of the accounts in other cases.

Mr. B. H. MOWBRAY moved, "That the present auditors, A. G. Milne, Esq., J. E. Coleman, Esq., and H. E. Bird, Esq., be, and they are hereby, re-elected auditors."—Mr. J. CONNON seconded the resolution, which was carried unanimously.

Mr. MARSDEN, who said that he was not now a shareholder (although he was originally), but represented several shareholders who held shares to the amount of several thousand pounds, asked whether it was open to any shareholder to obtain a list of the loans at Bombay, together with the security held against them.

The DEPUTY-CHAIRMAN replied that, as Mr. Marsden was not a shareholder, he (the deputy-chairman) was not bound, if he adhered strictly to the rules of public meetings, to reply. In times like these, however, it was not the duty of the directors to withhold any proper information required by the shareholders. Therefore if any shareholder, properly qualified, would wait upon the manager or the board, there was every disposition on the part of the directors to give them every information which might be conducive to the interests of the bank. (Cheers.)

Mr. MARSDEN inquired whether the amount of loans in Bombay and the securities held against them would be given.

The DEPUTY-CHAIRMAN: It is mentioned in the report that the accounts and loans have been examined, not only by the board, not only by the agent, not only by the auditors, but also by gentlemen wholly unconnected with the board, to whom we referred them. What more could we do to ascertain their value? (Hear, hear.)

Mr. CONNON: You must not disclose private accounts. (Hear, hear.)

The CHAIRMAN again stated that the board were anxious to give the shareholders every proper information; and, after one or two observations from Mr. MARSDEN, the subject dropped.

On the motion of Mr. A. C. SCOTT, seconded by Mr. RINGER, a vote of thanks was accorded to the directors, the general manager, and the branch managers, for the manner in which they had attended to the affairs of the bank.

A vote of thanks was then given to the chairman, on the motion of Mr. RINGER, and the meeting broke up.

ROYAL GEOGRAPHICAL SOCIETY.

The annual meeting of this society was held on the 28th May, at Burlington House, Piccadilly, Sir Roderick I. Murchison, Bart., president of the society, occupied the chair.

The PRESIDENT presented the awards. The founder's gold medal was presented to Dr. Thomas Thomson, M.D., F.R.S., for his exploration of the Western Himalayas and Thibet; the patron's medal was awarded to Mr. William Chandless, M.A., for his recent unaided exploration of the River Purus, from its mouth on the River Amazon nearly to its sources. The sum of £105 was presented to M. P. B. Du Chaillu, to reimburse him for the loss of his instruments in Western Africa. A gold watch was also awarded to Moola Abdul Medjid for the service he had rendered to geographical science by his adventurous journey from Peshawur to Kokand, along the upper valley of the Oxus and across the Pamir Steppes.

The PRESIDENT then proceeded to deliver the annual address. He said that on this the twelfth address which he had had the privilege of delivering to them, he had still the satisfaction of announcing that the society was advancing in prosperity and flourishing with undiminished vigour. He had also once more to congratulate them on what was a new feature last year—the issue of the annual volume of the Journal long before the anniversary. This result was entirely due to the zeal and devotion of their assistant secretary, Mr. H. H. Yates. The President then went on to give the usual record of the lives of the fellows who died during the past year. Amongst them were Lord Palmerston, Dr. Whewell (late Master of Trinity College, Cambridge), Admiral William Henry Smith (the distinguished astronomer and antiquary), Sir William Jackson Hooker (the eminent botanist), Dr. Henry Barth (the great African traveller), Baron Charles Claus von der Decken (the high-spirited Hanoverian nobleman whose melancholy fate whilst endeavouring to reach the interior of Africa by ascending the river Juba in a steamer has been recently brought before the public), John Geo. Forchhammen, Sir John Richardson (the eminent Arctic discoverer), Captain Duperrey, Admiral Don Eduardo Carrasco, the Earl of Donoughmore, Lord Monteagle, Professor Kupffer, Dr. John Lee (the well-known astronomer), Commodore Cracroft, Dr. Thomas Hodgkin (the well-known philanthropist), Mr. George Rennie (the eminent practical civil engineer), Dr. William F. Daniell, and Mr. B. Oliveira. Passing to the question of Admiralty surveys, Sir Roderick gave a *résumé*, as drawn up by the hydrographer, showing the progress which has been made in the various surveys carried on under the direction of the Admiralty during the year.

After touching upon a variety of other topics connected with operations interesting to the society, including the recent eruption near Santorin (the ancient Thera), late researches of Russian geographers, the progress made in the great trigonometrical survey of India and the topographical survey of Buenos Ayres, the North Pole expedition, and the exertions made by Baron von der Decken, and still making by Dr. Livingstone, M. du Chaillu, and other indomitable travellers to explore the interior of Africa and other places, Sir RODERICK concluded as follows:—With brighter hope I turn to the prospects of the sagacious and energetic Livingstone. Cordially received and supported at Bombay, he proceeded to Zanzibar, where

Digitized by Google

he has the assistance of the Sultan, and from whence his expedition has been directed, as I announced last year, to the Rovuma River. After ascending that stream he will first determine the course of the waters between his own Lake Nyassa and the Tanganyika of Burton and Speke. Next, if he can reach the latter, and, after building a boat on it, is able to proceed to its northern end, he will at once settle the agitated question whether this lake be really, as some suggest, the ultimate southern water-basin of the Nile. If it should prove to be so, it follows that the altitude of Tanganyika, as given by Burton and Speke, was very erroneous, for by their measurement it was more than 800 feet below the level of the Albert Nyanza as fixed by Baker. It is a circumstance of the truest gratification to me to know that Dr. Kirk, the tried and valued associate of Livingstone, should recently have been appointed Government medical officer to our Resident at Zanzibar, so that in the absence of the Consul he will have ample opportunity of succouring his old leader, now the Consul to all the chiefs of inner Africa. He has also received authority from the Foreign Office to take every feasible step to obtain the release of the captives—if such there be—consisting of the crew and passengers of the *St. Abbs*, Indiaman, the account of the shipwreck of which vessel on the Soumali coast was recently brought before the society in a very telling manner by Colonel Rigby, formerly Consul at Zanzibar, and who was the zealous supporter of both the great African expeditions which proceeded from that island. I learn with great satisfaction, through a letter from Dr. Livingstone, of the 24th March, to his daughter, that he had reached the mouth of the Rovuma River in an Arab dhow, with his followers, and six camels, three asses, and three buffaloes. As it was found impracticable to ascend the Rovuma with the vessel, or to disembark the animals on its banks, the party was taken on by Lieut. Garforth, R.N., to Mikeridamy, a fine harbour to the north of the Rovuma, where they were about to land when the letter was despatched. As the people of that tract are under the control of the Sultan of Zanzibar, with whose protection Livingstone is fully provided, and as the route is said to be open to the Lake Nayassa, our self-reliant and energetic envoy writes in the full pursuasion that, with time and prudence, he will not only reach the water-shed between Nayassa and Tanganyika, but be able to settle the question as to the elevation and drainage of the latter.

THE DINNER.

The anniversary dinner took place in the evening at Willis's Rooms. The company numbered some 200 gentlemen, including Sir Roderick Murchison, Bart., who presided, Lord Stratford de Redcliffe, Earl of Enniskillen, Lord Blantyre, Earl of Sheffield, Lord Stamford, Lord Dufferin, Lord Houghton, Lord Milton, Sir Francis Grant (president R. A.), Sir Thomas Fremantle, Sir Henry Rawlinson, M.P., Sir Charles Nicholson, Sir Andrew S. Waugh, the Chinese Commissioners, Sir Philip de Grey Egerton, M. de Candolle, M. du Chaillu, Mr. S. W. Baker, Mr. G. Bentham (president of the Linnæn Society), Professor Jukes, Professor Ansted, General Crawfurd, General V. Eyre, General Balfour, Admiral Collinson.

The CHAIRMAN after dinner, gave the usual loyal and patriotic toasts, and they were most cordially responded to. Lieutenant-General Crawfurd responded for the Army, and Admiral Collinson for the Navy. Lord Dufferin returned thanks for the House of Lords, and Sir H. Rawlinson, M.P., for the House of Commons.

Lord STRATFORD DE REDCLIFFE proposed "The representatives of Foreign Governments," coupling the toast with the names of the Chinese Commissioners present.

Mr. ANGIER, in the absence of Mr. Hart and Mr. Bowra, responded on behalf of the Chinese Commissioners. He stated that the Chinese who were then present had been induced to come by Mr. Hart, the Chief Inspector of Customs, in an unofficial manner, and that it would no doubt have a beneficial effect in dispelling much of that ignorance and distrust which had existed. Our relations with China had indeed progressed under the enlightened views of Prince Kung, and unless some sudden change should result, we might look for increased confidence. The conclusions which he had arrived at were derived from a residence in China from 1844 to 1857.

The CHAIRMAN, in giving what he designated the toast of the evening —"The two medallists, Dr. Thomson and Mr. William Chandless"—testified to the great deservings of these gentlemen. The next toast was "The health of the eminent botanical gentlemen who have come to England to assist at the International Botanical Congress," coupled with the name of that great leader of botanical science, M. de Candolle. (Applause.)

M. DE CANDOLLE, on rising to respond, was received with a vast amount of enthusiasm. M. de Candolle, who spoke in French, referred to the great connection which existed between geography and botany, remarked upon the difficulty and danger to life which sometimes accompanied inquiries respecting the former, and modestly declined to take much credit to himself for the part he had taken in furtherance of the interesting science of botany. He pointed to the great field that still lay unexplored for botanists and geographical investigations in Borneo, and referred with equal appropriateness to the botanical relations of Morocco, the Canary Islands, and the European Continent, particularly Spain.

Lord HOUGHTON proposed "The health of the President of the Society, Sir Roderick Murchison."—The PRESIDENT responded, and gave "The Arts and Sciences," which was responded to by Sir FRANCIS GRANT, with whose name the toast was coupled. A number of other toasts followed. Mr. BENTHAM responded for the "Scientific Association of London and the country at large." Mr. SAMUEL WHITE BAKER and M. DU CHAILLU returned thanks for "The Explorers of Africa."

Naval and Military.

Severn. 35, screw, Captain F. B. Montresor, arrived at Plymouth on Sunday afternoon, May 27, from the East Indies. She brigs 90 supernumeraries, time-expired men and invalids, among whom are Assistant-Paymaster Smith, Jaseur; Assistant-Paymaster Cox, Valorous; Messrs. Taylor, Bolt, and Fox, clerks from Ascension; Mr. Capes, naval cadet, Octavia; Mr. Hughes, engineer, Vigilant; and Mr. Blonden, engineer, Tamar. The Severn was commissioned at Plymouth by her present captain in July 1862, and has been in commission nearly four years. On the 22nd of the following September she left Plymouth for Bombay, where she arrived on the 13th of January, 1863. She then visited the Persian Gulf, Aden, Ceylon, the Straits of Malacca, Trincomalee, and Madras. In July, 1864, she was relieved on the East Indies station by Admiral King, and ordered to China and Japan. After visiting Hong Kong and Amoy she proceeded to Yokohama in the November of that year, and arrived in Japanese waters too late to take part in the affair of Simonosaki. She next visited Yeddo, the capital of Japan, where she remained six days. The Severn left Yokohama in April, 1865, arrived at Trincomalee the same year, where she received orders for home. She then proceeded to Bombay, where she was relieved by the Octavia, Commander Hillyer. On the 23rd of January she left for England, touching at the Mauritius, which she left on the 25th of February, Simon's Bay, April 4, and Ascension, April 22. While off the Cape, in a gale of wind, she lost her starboard quarter-boat, her foretopmast, and mainyard, which delayed her three weeks to make good the damages. She was off Scilly eight days before her arrival at Plymouth; but, owing to the prevailing east winds, she could make no headway. She came home from the Cape under sail, with the exception of two days, and while in the Channel did not get up steam till the morning of the day before that on which she arrived at Sheerness. The Severn will be paid out of commission, and placed in the third division of the Steam Reserve.

The case of the second Lieutenant-Colonels of cavalry regiments returning from India has been brought before the public *apropos* to the instance of Colonel Sayer, who served both in the Crimea and in China. This officer, says the *Army and Navy Gazette*, is about to be turned out of his regiment and placed on half-pay, losing a position which it probably cost him some £12,000 to attain. "This dreadful punishment is inflicted upon him simply because of a rule of the service, under which a regiment while serving in India has had two lieutenant-colonels, and a regiment at home but one. The King's Dragoon Guards will land from India in a few days probably. Colonel Sayer is the second lieut.-colonel. He is no longer wanted, and so he is thrown aside upon the half-pay list, and treated no better than a man who had disgraced the uniform of the Queen. This case is but one of many. Every cavalry regiment that comes home adds some one or two, or perhaps three, officers to the list of those who are thus foully used by the country. In Colonel Sayer's own regiment two captains will also go to the wall. Under the existing rules, the authorities have not the power to help them. But in some cases the Horse Guards are able to neutralise the injustice, and, as a rule, they can always provide for the majors who are placed in this position. The departure for India next month of the 11th Hussars will give the authorities an opportunity, which we trust they will not again refuse to profit by, of doing justice to one of those cavalry field officers placed upon half pay by the return of their regiments from India or by reasons not of their own seeking."

Lieutenant-Colonel G. H. L. Milman, Royal Artillery, has been appointed Assistant Military Secretary to Major-General Milman, commanding at the Mauritius.

The remains of Lieutenant and Quartermaster Thomas Miller, of the Ceylon Rifle Regiment, were interred in the cemetery at Plymouth on the 25th May with military honours, by a guard, and the band of the 1st batt. 13th Light Infantry. The deceased officer entered the army in 1825, served in the 98th Regiment in China, was present at the battle of Chinkiang-foo and investment of Nankin. He was promoted to a lieutenancy in the Ceylon Rifle Regiment in 1848, and subsequently appointed Quartermaster. Lieutenant Miller had recently returned to England on leave of absence, after a continuous service in China and Ceylon of 25 years; and though in apparent good health, the effects of the tropical climate had insidiously brought his life to a sudden close. It will be a melancholy satisfaction to the regiment, as it is to his sorrowing widow and family, to know that he was followed to his grave by officers who had previously served with him in the Ceylon Rifles.

NAVAL APPOINTMENTS.—Lieutenant Augustus H. B. Bradshaw, to the Princess Royal. Masters: William John Grandy, recently promoted from the Himalaya to the Petrel, 3, screw sloop; John Solfleet, late of the Conqueror, to the Donegal, screw coast-guard ship at Liverpool.

HOUSE OF COMMONS.

THE CHINESE VISITORS.

(May 31st.) Colonel SYKES inquired whether Pin and his son, Kwang Ying, and their Tartar and Mongol friends from Peking, who have accompanied Mr. Hart, the Imperial Inspector of Customs, and are now in England, are accredited to the British Government in any official capacity, or are merely recommended to its courtesies as travellers from China.—Mr. LAYARD said the visitors referred to had not been officially accredited by the Chinese Government, who had, however, requested the good offices of Her Majesty's Ministers to enable them to become acquainted with English institutions. He need scarcely say that Her Majesty's Government would do all that lay in their power to make the visit agreeable to the gentlemen, and he had every reason to hope that it would lead hereafter to more familiar intercourse and improve the relations between the two countries.

GARDENS IN THE FAR EAST.—Nothing has done more to limit the importation of cuttings from British trees, plants, and shrubs into our eastern settlements and colonies, than the doubts entertained as to whether orders sent out would be fulfilled satisfactorily as respects the condition in which these would be delivered. After waiting months, the bespoken cuttings are too frequently found shrivelled, and the seeds dead; creating a feeling of disappointment far exceeding that of their monetary value. The means of protection cannot be too widely known, for they undoubtedly exist, as shown by a letter now before us from Mr. G. Henderson, the secretary of the Agricultural and Horticultural Society of Lahore. After a long series of disasters in the form we have stated, he had the good fortune to entrust his order for plants to Mr. Christy, who has especially devoted himself to supplying English gardens in the East. So admirable, a respects the Lahore Society, were the plants packed on the system provided by his patented cases, that on arrival the plants were actually "commencing to shoot." At the date of this letter, March 27th, the vine cuttings, thus forwarded, had been planted "and were growing vigorously."

COTTON AND SILK IN THE UNITED STATES.

(NEW YORK HERALD).

The fact that the House of Representatives, in fixing the duty of five cents per pound on cotton, concluded to establish a drawback, in order to allow our manufacturers to compete with foreign looms in the markets of other nations, is received with almost universal satisfaction. This will enable us to again enter the markets of Japan, China and the East Indies, on as favourable terms as Great Britain—more favourable, in fact. The difference of five cents per pound in the cost of American cotton will be an offset to the reduced wages current in Manchester. But it must be borne in mind that very coarse fabrics are shipped to China—and those can be made from the coarser fibre produced in the jungles of India—so that the drawback was a necessity, if we hope ever to re-enter the markets of China, &c., with any prospect of competing favourably with Great Britain. The placing of a tax on cotton is pernicious, and calculated to cripple the energies of the South in its efforts at recuperation, but with the drawback it will not be quite so bad. It is hoped, however, that the protest of the New York Chamber of Commerce against the increase of the cotton tax from two to five cents will prove effectual. Indeed, if we may believe current rumour, it will cause the members of Congress to pause and reflect, and if they will only do this it is believed that the tax will not be increased, the strong pressure in favour of it from certain cliques to the contrary notwithstanding.

It is matter of much interest and importance that considerable attention is now being paid to the manufacture of silk. The newspapers of Illinois, in particular, are devoting no little space to the discussion of this subject. From the last census it appears that there were in the Eastern and Middle States forty-two silk establishments in 1860, employing 2,500 hands, and having a capital of $1,675,900. They produced $3,596,249, principally in thread and twist. Connecticut had 19, New Jersey 6, Pennsylvania 8, Massachusetts 4, New York 3, and New Hampshire 2 establishments, employing 2,579 hands in the aggregate. The importations of raw silk in 1862 were $489,528. There was but one establishment then for making woven silken goods, and that was in Massachusetts. Since then factories have started up in Philadelphia, in Chester and Beaver counties, Pennsylvania, at Patterson, New Jersey, and also in Connecticut, and are constantly on the increase. There is also a good deal of attention paid to the production and manufacture of silk in California, where the Chinese are reputed to be introducing it as a permanent brand of agriculture and manufacture, and with every promise of perfect success. Though silk manufacturing is in its infancy in this country we believe that it is destined to take front rank ere the lapse of many years. There is no reason why this should not be the case, especially now that the high protective duties afford every facility for the building up of this important branch of American industry.

BANK AND MISCELLANEOUS SHARES.

Shares.	Joint-Stock Banks.	Paid.	Closing Prices.	Prices May 26.

THE BOARD OF TRADE RETURNS.

The Board of Trade Returns for April exhibit a continuance of that activity in commercial transactions that characterised the preceding months of 1866. The value of the British and Irish produce exported during the month ended the 30th April was £15,366,414, while the exports for the same month last year amounted to only £12,071,111; which, however were below those of 1864, when the value was £13,225,039. The excess of April in the present year is, therefore, £3,295,303 over 1865, and £2,141,375 over 1864. The value of these exports for the four months ended the 30th April is £62,357,579, against £47,706,818 in the year preceding, and £49,892,420 in 1864. The present year, therefore, has a superiority over 1865 of £14,650,761, and of £12,465,159 over 1864. The Imports also show a corresponding increase. The value of the enumerated articles imported up to the 31st March of the present year is £46,348,927, against £32,299,095 in 1865—an excess of £14,089,832; and against £37,131,825 in 1864—or an excess of £9,217,102. As regards trade with the Far East, the present returns supply us with the information here appended:—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.
Quantity for the Month ended 30th April.			
Cotton yarn	87,800	45,000	427,038 lbs.
Cotton manufactures	5,126,790	13,738,050	12,677,996 yds.
Worsted stuffs	662,384	2,433,988	2,090,769 „
Woollen & Worsted cloths	127,094	159,542	124,089 „
Lead	479	180	1,180 tons.
Quantity for the four Months ended 30th April.			
Cotton yarn	534,972	560,762	1,637,206 lbs.
Cotton manufactures	18,489,122	35,330,951	52,990,171 yds.
Worsted stuffs	3,538,879	5,613,193	6,270,680 „
Woollen and worsted cloths	540,240	511,125	630,037 „
Lead	2,025	863	2,835 tons.
Value for the four Months ended 30th April.			
Cotton yarn	£67,524	£57,675	£178,839
Cotton manufactures	517,664	844,028	1,337,314
Worsted stuffs	241,666	426,105	439,161
Woollen and worsted cloths	88,498	94,155	103,429
Lead	44,101	19,012	62,264

The Cotton Manufactures forwarded from the United Kingdom to other ports and countries in the Far East during the month of April, and their value for the four months of the respective years are represented by the following figures:—

	1864.	1865.	1866.
Quantity for the Month ended 30th April.			
Ceylon	397,598	181,923	1,547,110 yds.
Singapore	3,932,323	2,677,297	7,416,999 „
Java	2,211,958	—	5,300,920 „
Philippine Islands	—	—	2,681,229 „
Value for the four Months ended 30th April.			
Ceylon	£172,516	£80,196	£171,539
Singapore	375,964	373,945	430,483
Java	231,101	149,981	402,876
Philippine Islands	162,159	189,201	164,649

Of Cotton Yarn, the quantity exported to Singapore during April was 144,080 lbs., and during the four months 349,390 lbs., against 618,870 lbs. in the four months of last year, and 438,300 lbs. in 1864. To Ceylon the export in the month of April was 60,330 lbs., and for the four months 116,330 lbs., against 37,192 lbs. last year, and 67,600 lbs. in 1864. The value of the exports to these places for the four months is as follows:—

	1864.	1865.	1866.
Ceylon	£9,137	£3,450	£18,370
Singapore	51,426	61,742	39,642

IMPORTS.

In Raw Cotton the present year continues to keep up its pre-eminence in the quantity imported. China, however, still remains unrepresented in the table as regards 1866. The return of this important raw material is thus exhibited:—

	1864.	1865.	1866.
Quantity for the Month ended 30th April.			
Egypt	51,187	123,330	155,598 cwts.
British India	316,339	230,900	610,930 „
China	104,642	36,672	—
Total from all parts	627,452	592,095	1,663,025 „
Quantity for the four Months ended 30th April.

Of Unrefined Sugar the quantity imported during the month of April from Java and the Philippine Islands consisted of 12,165 cwt., all of the 4th quality; and for the four months the return presents itself thus:—

	1864.	1865.	1866.
Quantity for the four months ended 30th April.			
Of all qualities	30,525	322,024	60,665 cwts.
Value for the three Months ended 31st March.			
Of all qualities	£33,066	£219,853	£44,039

Of Hemp from the Philippine Islands we received only 891 cwts. during April in the present year, and the general return is as follows:—

	1864.	1865.	1866.
Quantity to 30th April (cwts.)	44,735	75,825	16,589
Value to 31st March	£5,264	£95,597	£37,021

Of Coffee, Ceylon delivered to us 7,980,343 lbs. during the month of April, and the general return is:—

	1864.	1865.	1866.
Quantity to 30th April (lbs.)	16,333,659	15,350,315	15,323,641
Value to 31st March	£276,642	£329,913	£237,800

An account of the quantities of certain principal articles of Imported Merchandise remaining in the Bonded Warehouses of the United Kingdom on the 30th April in each year enumerates only the following in which the Far East is concerned:—

	1864.	1865.	1866.
Coffee (lbs.)	25,094,414	23,660,411	29,483,165
Sugar, Unrefined (cwts.)	2,108,385	2,858,779	3,137,660
Tea (lbs.)	106,595,991	119,039,571	98,003,143

FREIGHTS AND CHARTERS.

But little change has taken place in outward freights since the date of our last issue; in consequence, however, of the improved prospects in the money market, rates are somewhat firmer.

Current Rates of Freight for Vessels on the Berth :—To Yokohama: 50s. weight, 40s. to 50s. meast. To Nagasaki: The same. To Shanghai: 40s. weight, 30s. to 35s. meast. To Hong Kong: 40s. weight, 30s. meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 40s. weight, 20s. measurement.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £44 to £45. For Galle: £37. For Singapore: £36. For Shanghai: £51 to £52. From Newport, Cardiff or Swansea, per ton. For Hong Kong: £2. 3s. For Manila: £2. For Galle: £1. 17s. For Singapore, £1 13s. For Shanghai: £2 10s. For Batavia: £1 12s. 6d.

The Admiralty have invited tenders for the conveyance of 26 tons loose shell from the River Thames to Hong Kong.

CASUALTIES.

The Young Mechanic, Grant, from Boston to Hong Kong, was burnt at sea 10th (15th ?) April, in lon. 11, and her crew landed at Pernambuco.

NOTICE TO MARINERS

Trinity-house, London, May 29, 1866.

The following notice having been communicated to this corporation by the Lords Commissioners of the Admiralty, the same is reprinted, by order of this board, for the general information of mariners.

P. H. BERTHON, Secretary.

Eastern Archipelago, East End of Java, Fixed Light at Banjoewangie.

Hydrographic-office, Admiralty, London, May 14, 1866.

The Dutch Government at Batavia has given notice that on and after the 4th day of December, 1865, a light would be exhibited from a light-house recently erected at the port of Banjoewangie, at the east end of the island of Java, Baly Strait.

The light is a fixed white light, at an elevation of forty-one feet above the level of high water, and in clear weather should be seen from a distance of eight miles.

The illuminating apparatus is dioptric, or by lenses. In entering the roadstead of Banjoewangie, steer in with the light bearing west, and it will lead clear of all dangers.

Japan : Seto-Uchi, or Inland Sea.

Beacon light on Isaki Point.

H.M.S. *Perseus* in December, 1865, observed that a light or wood fire in a shed had been placed on Isaki Point, the north-east extreme of Kiusiu Island, and was seen from that vessel at a distance of twelve miles.

By command of their Lordships,

GEO. HARRY RICHARDS, Hydrographer.

This notice affects the following Admiralty charts:—Java Island, No. 2,058, Indian Ocean, Nos. 2,483, 7,486, Baly to Timor, No. 2,073, Seto-Uchi, No. 2,875, Simonosaki Strait, No. 532, west entrance to Seto-Uchi, No. 127, and Kiusiu and Nissen, No. 358.

Official Auditors—J. E. COLEMAN, Esq., and H. E. BIRD, Esq. (Messrs. Coleman, Turquand, Youngs, and Co).
Acting General Manager—F. W. LAWRENCE, Esq. **Sub-Manager**—GEORGE MOUL, Esq.
Bankers—THE BANK OF ENGLAND. THE LONDON AND JOINT STOCK BANK.
Agents in Ireland—THE NATIONAL BANK. **Agents in Scotland**—THE BRITISH LINEN COMPANY.
Brokers—Messrs. FOSTER and BRAITHWAITE. **Solicitors**—Messrs. FRESHFIELDS and NEWMAN.

Agencies and Branches are established at Bombay, Calcutta, Madras, Kandy, Colombo, Penang, Singapore, Hong Kong, Shanghai, and Melbourne.
The Corporation grant Drafts and negotiate Bills of Exchange, payable at the above places, issue Letters of Credit and Circular Notes, and conduct every description of Banking business connected with the East. They effect the purchase and sale of Indian Securities, the receipt of Dividends, &c., and undertake the safe custody of Securities. They also receive Deposits, bearing interest, for fixed periods. Rates of Interest and Exchange may be ascertained at the Head Office.

By order of the Court,
F. W. LAWRENCE, Acting General Manager.

SECOND REPORT OF THE COURT OF DIRECTORS TO THE SHAREHOLDERS.

The Court of Directors, in presenting their Second Annual Report to the Shareholders, extremely regret the unsatisfactory result of the operations of the past year.

The losses are estimated at £142,000, against realised profits amounting to £61,494. 13s. 3d., from which an interim dividend, for the half-year ending 30th June last, at 5 per cent. per annum, has already been declared. The Directors have, accordingly, transferred £87,500 from the Reserve Fund to the credit of Profit and Loss, leaving the Reserve Fund at £87,500, and a balance to credit of Profit and Loss account of £949. 6s.

In the above estimate of losses, a claim of considerable importance (against which collateral securities are held) has not been included, the Directors having received such strong assurances that the Bank will be secured from ultimate loss thereupon, that they do not feel justified in writing off any loss in respect of this claim. Should, however, the reasonable expectations of the Board not be realised, the loss on this account would, in the opinion of the Board, be more than amply provided for by the Reserve Fund.

The debts in Bombay (against which various securities are deposited with, and held by, the Bank) have been estimated with due regard to the position of the debtors, and to the real value of such securities, and in arriving at such values the Directors have conferred with gentlemen unconnected with the Board, who have a thorough knowledge of the debtors, and also of the value of such securities.

Upon closing the accounts for the half-year ending 30th June last, the expected losses were so much below the estimates since formed, and the prospects for the future so encouraging, that the Directors deemed themselves perfectly justified in declaring an interim dividend, at the rate of 5 per cent. per annum, as authorised by the resolution passed at the last general meeting. The Directors have refrained from declaring a further dividend on the present occasion, leaving it to the Shareholders to decide upon the desirability of declaring a dividend, out of Reserve Fund, of 5 per cent. per annum, which would absorb about £15,000.

The losses now shown are mainly to be attributed to the operations of the Bombay agency, and to the disastrous crisis which is generally known to have occurred last year in Bombay. It is due, however, to the Directors themselves, and to the Agent of the Bank in Bombay, to state that the most disastrous of these transactions were initiated during the Agent's temporary absence on sick leave by a gentleman who acted for him, and who had been highly recommended to the Board for extreme caution and sound business views. This gentleman immediately thereafter ceased to be a servant of the Bank.

But for the transactions referred to the position of the Bank would have been in every way satisfactory;—it had passed through a crisis of unprecedented severity with unimpaired credit,—a highly efficient staff of officers had been organised, and the business of the Bank manifested a steady and satisfactory increase.

The Directors have the pleasure to report that Sylvester D. Birch, Esq., and Michael H. Scott, Esq., have joined the Board, in accordance with a resolution passed unanimously at the Extraordinary General Meeting of Shareholders held on the 7th March last.

In accordance with the Deed of Settlement, the following Directors retire by rotation, viz.:—Francis Boykett, Esq., and Thomas Cardwell, Esq., who, being eligible for re-election, offer themselves accordingly.

The Board have pleasure in recommending the re-election of the present Auditors, to whose valuable services they are greatly indebted.

4, Lombard-street, E.C., 11th May, 1866.
F. BOYKETT, Chairman.

MINUTES of the SECOND ORDINARY GENERAL MEETING of the SHAREHOLDERS, held at the Bank's Offices, No. 4, Lombard-street, on MONDAY, the 28th of May, 1866, FRANCIS BOYKETT, Esq., in the Chair.

The Advertisement convening the meeting and above Report of the Directors, with the General Balance Sheet and Statement of the Profit and Loss Account, closed to the 31st December last, having been read, the following resolutions were successively put and carried unanimously, viz.,—

I. Proposed by the DEPUTY-CHAIRMAN, seconded by the CHAIRMAN:—
That the Report and Statement of Accounts now read be adopted—Carried unanimously.

II. Proposed by ROBERT HANNAY, Esq., seconded by A. C. SCOTT, Esq.:—
That no Dividend be declared for the half-year ending 30th December last.—Carried unanimously.

III. Proposed by Major H. T. ARBUTHNOT, R.A., seconded by R. D. PEEBLES, Esq.:—
That Francis Boykett, Esq., and Thomas Cardwell, Esq., be, and they are hereby severally re-elected Directors.

IV. Proposed by B. H. MOWBRAY, Esq., seconded by J. CONNON, Esq.:—
That the present Auditors, A. G. Milne, Esq., J. E. Coleman, Esq., and H. E. Bird, Esq., be and they are hereby severally re-elected Auditors.—Carried unanimously.

V. Proposed by A. C. SCOTT, Esq., seconded by G. RINGER, Esq.:—
That the best thanks of the Shareholders be given to the Chairman, Directors, and Management, for their able administration of the affairs of the Bank during the past year.—Carried unanimously.

Extracted from the Minutes.
4, Lombard-street, E.C., 28th May, 1866.
F. W. LAWRENCE, Acting General Manager.

MERCHANTS AND AGENTS

6, MINCING-LANE, LONDON, E.C.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co.'s Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS.—The Best Friends.—When bad health overtakes mankind what would not be given to be freed from it! Holloway presents to all invalids the means of recovering their health and renewing failing strength for a mere trifle. His Pills invariably produce the most satisfactory results where the digestion, circulation, or nerves are at fault. The Pills purify the blood, balance its circulation, strengthen the stomach and intestines, on which they gently but effectually operate as aperients. Illness of the most alarming character, which has withstood all other treatment, has gradually yielded to a course of Holloway's Pills, which will ever prove the invalid's safest friend.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

From Marseilles, July 12.—To Hong Kong: Mr. J. Russell.

Summary of News from the Far East.

JAPAN.

The present mail has brought no later dates nor any items of interest since our issue of 6th inst.

CHINA.

SHANGHAI.

The dates by the present opportunity are not later than received per French mail. The following summary is from the *Commercial Record*, April 22:—

The annual meeting took place on the 18th, when the report and accounts of the Council were passed, and the Budget for the ensuing year was adopted. The noticeable features in the Budget were the reduction of the tax upon rentals to 5 per cent.; the appropriation of an assessment on rentals at 1 per cent. to the lighting of the settlement and the proposal to levy wharfage dues at the rate of one-tenth per cent. on all imports and exports imported by persons residing in the English and American settlements without reference to the place where the goods are landed. This is practically the application of the town due system under another name. It was decided that the incoming Council have power to take charge of the new cemetery as well as of the old one and that at Pootung; and also that they should be authorised to take over the Bubbling Well and Woosung Roads when freed from debt; as well as the Soochow Bridge.

Mr. Consul Winchester, who occupied the chair, pointed out that there was some question as to the proposed issue of Salt Licences, as this would depend upon the views of the Chinese Authorities; and he also noticed that both the local Post Office and the Savings Bank were matters without the strict province of the Municipal Council. He also expressed much doubt as to whether the proposed new system of levying Wharfage Dues could be adopted upon the present basis of Municipal Government.

A proposition was brought forward to the effect that the Council should be empowered to prevent arrests in the settlement being made by others than the Municipal Police. This was firmly but temperately opposed by Mr. Seward and Mr. Winchester; they pointed out that it was beyond the power of the Land Renters to pass any such resolution; but their remonstrances not prevailing, Mr. Winchester relinquished the chair, and accompanied by Mr. Seward, left the room. Mr. Keswick was then voted to the chair and the resolution being put to the meeting was passed. After this a deputation waited upon Messrs. Seward and Winchester, who with good sense and courtesy returned, Mr. Winchester retaking the chair.

The Chief Judge, to whom the question of the motion's legality was referred, has given his opinion that it was beyond the power of the Land Renter's meeting, and has endorsed a suggestion made in the *Shanghai Recorder* to the effect that the Chinese authorities should be moved to furnish a list of all the taxes and impositions which are legally due from Chinese residents in the settlement, and that such taxes should be collected, less some fraction to defray the cost of collection, by the Municipal Council.

The Chamber of Commerce has addressed a letter to the treaty Consuls on the subject of the prohibition of small steamers proceeding into the interior, urging the advisability of the subject being referred to the Ministers at Peking. This subject we notice more fully in another column. At a meeting of the Recreation Fund shareholders it has been decided that the money lent by the late trustee to the Shanghai Club is to be returned to the shareholders for investment in public objects, to be approved by a future meeting. A judgment of importance has been given by Sir E. Hornby in the case of Siukee *v.* Hogg, in which it is decided that a Chinaman can make no legal claim in respect of land registered in a foreigner's name in trust.

The first meeting, adjourned, of the creditors in the estate of Jarvie, Thorburn, and Co., took place on the 6th, when several additional debts were proved. Mr. Hargreaves put in a claim on

Digitized by Google

behalf of Messrs. Smith, Kennedy, and Co. for bills returned unpaid, the amount for which they had, as endorsers, remitted to the parties who had held them in London. A claim was instituted for the cost of the bills so remitted, together with interest and charges, and a discussion arose as to the admissibility of the claim in that form; some of the creditors being of opinion that they should claim for re-exchange in the same manner as the banks proposed doing. His lordship was, however, of opinion that as a substantive loss could be absolutely shown and proved, the claim would have to be admitted. In reply to a question from Mr. Myburgh as to whether the principle upon which Mr. Hargreaves laid his claim would only be admitted in cases where actual loss could be shown, his lordship stated that the question was having his careful and deliberate attention; but that he had not yet quite made up his mind upon the point. Mr. Myburgh begged to call attention to the fact, which was pointed out to him by Mr. Jackson, of the Mercantile Bank, that if the principle were admitted an immense amount of confusion would arise, as in the case of banks who had bought at a high rate, and then remitted to cover the bill at a low rate, there would be a profit on the transaction. His Lordship, however, stated that no considerations could prevent the proof of an actual loss. Mr. Myburgh said that he believed there was a fixed rate, 25 per cent., allowed in bankruptcy for return exchange. His Lordship, however, stated that though this principle might apply to India, upon which there was a fixed rate of exchange, it was not certain it would apply to Shanghai, on which the evidence showed there was no actual exchange rate from London.

The claim was ultimately passed, subject to the assignees' audit. On the presentation by Mr. Hanssen of a power of attorney, a question arose as to the faculty of Notary Public held in Shanghai by Messrs. Lawrance and Myburgh, and exercised by the former gentleman. Mr. Myburgh stated that the faculty had been granted by Dr. Lushington to both his friend Mr. Lawrance and himself, but he had not used his power, as he thought it dangerous. His lordship left the bench in order to consult with Mr. Winchester, H.B.M. Consul, and upon returning stated that Mr. Winchester had always been informed that Mr. Lawrance had the power to act as notary, and had not thought it necessary to interfere. His lordship, however, stated that nothing but an order in Council, under the Foreign Jurisdiction Act, could confer authority in this place, and that unless Dr. Lushington had received such authority he could not grant the power. In the course of the discussion on this subject, it appeared that documents under Mr. Lawrance's Notarial Seal had been recognised in Hong Kong and also in Sweden. With regard to a claim by Messrs. Dent and Co., Mr. Myburgh pointed out that he understood that they, as agents for an Insurance office, intended to make a set off of shares held by Jarvie, Thorburn, and Co. It was then pointed out to Mr. Hanssen that if he put in his claim he would waive his right, if he had one, to the shares against it; and he therefore abstained from proving.

The rebellion in the north continues to assume a serious complexion. The foreign-drilled Peking troops, about 2,000 in number, together with some 6,000 ordinarily armed Chinese that were sent from Chi-li province, in all about 8,000 men, have been unable to make head against a much smaller rebel army of only some 3,000 to 5,000. The latter, on the contrary, have executed an extremely clever and creditable strategical move. They contrived to lure the Imperial army northwards by assembling and retiring slowly. While, however, one half of their number kept the Imperialists thus in play, and led them on to some eight or ten days' march north of Moukden, about 1,500 well mounted fellows made a bend through a wild forest region, and then re-entering the cultivated portion of the province, they advanced on Moukden, which had been left nearly bare of troops. The foreign-drilled Pekingese are now nearly all back in Moukden again, to which they have been forced by this move on the part of the Rebels; and the new military governor of the province (a man said to have distinguished himself in the suppression of the Taiping rebellion in the south) is now shut up in the city of Kae-Ping, about two days' march north of Moukden, and the Mandarins are in apprehension of his being taken there, notwithstanding that he has 300 of the Peking foreign-drilled troops, besides others with him.

At the meeting of the Royal Asiatic Society on the 16th April, besides the usual routine of business and the reading of the paper for the night, the following interesting communication from Mr. Hart with reference to the Chinese visitors to Europe was read out by the Chairman.

"I go accompanied by some Chinese, the chief of whom is one of the Under-Secretaries in the Chinese Foreign Office. They have been appointed by Imperial Edict to accompany me 'to travel in the west,' and they will visit the capitals of all the Treaty Powers. The chief official was the other day introduced by Prince Kung himself to all the Ministers at Peking, and they have been asked to inform their Governments that the party will, on behalf of the Chinese Foreign Office, pay its respects to the Secretary of State for Foreign Affairs in the country visited. This is a great step in advance, for which I have been working for the last five years, and I am naturally glad to have brought it so far towards completion before leaving China. It is not an embassy, but it is the first voluntary step towards cementing itself in an amicable way with foreign Powers that the Chinese Government have yet made. I anticipate the best results."

The following is from the *Commercial Record* of 22nd April:—

CHINESE LAND OWNERS.

A judgment of importance has been delivered by Sir E. Hornby in the case of Sin-kee versus Hogg, which is doubtless still in the recollection of many of our readers. This case was heard before Mr. Winchester, shortly prior to the establishment of the Supreme Court, and he left the judgment to be given by Sir Edmund Hornby. The point upon which the case turns is the question of whether a Chinaman can make any legal claim in respect to land which has been registered in trust for him in the name of a British subject. The decision of the Court is, as might be expected, in the negative; and it is perhaps to be wondered at, in the face of the fact that it is clearly contrary to law for a Chinese subject to hold land in the Foreign settlements, that the case was ever brought forward. It is well known that the Chinese themselves have never been of any other opinion than that they were not authorized to hold such property; and it is for this precise reason, and no other, that they have resorted to the plan of registering land in the name of foreigners. Upon the merits of the case itself it is not of importance to dwell, as they are of consequence only in so far as they have tended to bring about a decision in court, which will form an easy landmark and guide in all similar matters for the future. The system of registering land in the name of foreigners is but a simple attempt to evade the law, and it is well that it should be shwyn in a practical manner that such proceedings are not without risk. The Chinese who choose to own property registered in the name of foreigners will have to rely simply upon their honour, and cannot make any claim whatever at law. In the event of bankruptcy of the foreigner in whose name property is so registered, we take it, the whole of the land would go to the estate without any question. This fact will doubtless tend to make Chinese more careful in entering into transactions of the kind for the future, as, though they may have hitherto been fully aware of the nature of such arrangements, it has been usual in the case of insolvency to transfer such lots prior to assignment of effects; and this course, as being morally right, has not hitherto been objected to; but in the face of a legal decision that such property belongs to a foreigner it might be construed into a fraudulent transaction, in so far as it would prejudice the legal interests of the creditors.

That the strict enforcement of law in this matter may press hardly upon Chinese in some cases is a circumstance to be regretted; but nevertheless is not one which could with justice or propriety be taken into consideration. That it has been convenient to evade this law, and that such practice has been for a lengthened time generally adopted, is no reason why the clear and distinct meaning of the provision should be set aside; the more especially as that meaning has never been misunderstood by those who have been in the habit of ignoring it. To admit this would be to strike at the very foundation of all order and government. Should it happen that any individuals suffer from acting contrary to the law, which they clearly understand, they can have but themselves to thank for these consequences. Indeed it is perhaps the best security for the laws being acted up to, that it should be known that going contrary to them is, even if sometimes not criminal, at least always dangerous.

HONG KONG.

Dates are down to the morning of the 29th April. The French mail of 17th March arrived out on the 27th April. The following report of the meeting of the Council on 26th April is from the *China Mail*:—

Present—His Excellency the Governor, the Acting Chief-Justice, the Colonial Secretary, the Acting Attorney-General, the Colonial Treasurer, the Auditor-General, the Honourable James Whittall, the Honourable Francis Chomley.

The minutes of the last Council having been read and approved, his Excellency said he would now ask the Council to resume the consideration of the Ordinance for the supplementary expenditure, which had been already read a first time. Of the $264,000 required, $147,000 were required for the Mint; and the apparent excess was simply caused by the different mode of keeping the accounts which had been adopted; so that the real deficit was not so large as might be imagined at first sight.

The Hon. James Whittall asked some questions relative to the amounts of income and expenditure, and said that it appeared that the income was increasing equally with the expenditure.

The Auditor-General said such was the case. The revenue was increasing in equal ratio with the expenditure.

The Governor said the hon. member seemed to have a more favourable idea of the condition of the colonial finances than he had. It appeared to him that the condition of the finances called for retrenchment where practicable, and unless they abandoned all projects of progress and improvement, it would be necessary to adopt some means of increasing the revenue.

The Hon. James Whittall said, it appeared to him that as the funds required for the Mint were an exceptional demand, now that that demand had been satisfied, the deficit would be proportionably decreased, and that then the increasing revenue would for the future further reduce it.

The Auditor-General said that although the building expenses would not appear upon the estimates, still the working expenses, amounting to between $70,000 and $80,000 per annum would remain.

The Hon. James Whittall observed that his principal object was to ascertain whether the revenue was actually increasing.

The Auditor-General said that supposing the working of the Mint did not leave any profit they would be $14,000 to the bad next year, assuming that no other expenditure be undertaken.

The Hon. James Whittall said that his calculations certainly led him to a more hopeful view.

The Governor said he was sorry that he could not agree with the hon. member. The flourishing condition of finances in past years had been mainly caused by the sales of land. The best lots had, however, now been disposed of, and therefore we could not look again to a source which had been in a great measure exhausted. It was a pity to interrupt the agreeable vision of the member, but the

Digitized by Google

fact was, the colony was fast approaching bankruptcy. In the four years, 1859 to 1862, the revenue had been augmented by $670,000 proceeding from the sale of public lands. It might have appeared at that time that the finances were in a very favourable state, but the apparent prosperity really arose from premiums the proceeds of land sales which were expended and could not be annually renewed. The expenditure of the last two years if continued for another two years would lead to bankruptcy, supposing something were not done to alter the existing state of things, and he (the Governor) submitted that they could not content themselves with merely being a government drawing salaries without doing something for the progress of the colony. In sanitary reforms, much remained to be done and means would have to be devised to mature many costly but necessary improvements. His Excellency concluded by saying that he would at an early date call the attention of the council to the financial condition of the colony.

The Auditor-General said that a considerable sum had been obtained last year, from the sale of the old police station and of public lands.

His Excellency said that the ordinance before the Council involved no principle, and he therefore hoped it would be passed with as little delay as possible.

The draft was then read a second time and passed unanimously.

His Excellency then said he had to call attention of the Council to a subject of some interest to the colony. When this Council granted the pension of £300 per annum to Bishop Smith, it was stipulated, that in the event of his obtaining church preferment, his pension should be reduced *pro tanto* relatively to the amount of income he should derive from such other sources. A correspondence had taken place between the Bishop and the Right Honourable Mr. Cardwell, in which the former asks whether a chaplaincy, a lectureship, or any proferment on the Continent would be considered "preferment" by the conditions appended to his pension, and also, whether in the event of his accepting any preferment, his Hong Kong persion would be irrevocably lost, or whether it would revert to him in case he should give up such appointment. The Secretary of the Colonies had, in a despatch dated the 8th March, forwarded this correspondence and had also expressed a desire that the opinion of Council should be taken on the subject. He (the Governor) would say that although he might, at the time when the original proposal for a pension was before the Council, have voted against it, still, as it had been voted, it appeared to him that the Bishop should be treated in reference to his pension as any other civil officer of the Crown, viz.: that it should be withheld if he obtained any other preferment of greater or equal value, and reduced *pro rata* if he obtained any other income of lesser amount. The Bishop had also asked Mr. Cardwell whether the income from other sources would be calculated on the gross or on the net issue of any new preferment sum. He (the Governor) should say that in fairness it ought to be calculated on the net income.

The Acting Chief-Justice was understood to say that he had, at the time the pension was granted, strenuously opposed it, and that he was still of opinion that it ought never to have been granted.

The Governor said that the opponents to the granting of the pensions might have had logic on their side, but as the pension had been granted, it need not deter hon. members from expressing an opinion as to whether in passing the resolution the Council had intended the pension to be entirely lost, in case of the Bishop's accepting other preferment, or to be only in abeyance.

The Acting Chief Justice said as he had not been with the majority he did not know what their intention was.

The Colonial Secretary said that the intention of the majority who voted for the pension was, that the words of the Ordinance meant that the pension should be only in abeyance. and not forfeited.

The Colonial Treasurer said that he had been opposed to the granting of the pension, but seeing that his opposition was not of any avail he had voted with the majority. He thought the resolution should be interpreted in such a way as to place the bishop on the same footing as any other civil servant of the Crown.

The Acting Attorney-General was understood to say that when once the pension was granted it ought never to be wholly forfeited—but remain according to circumstances in temporary abeyance.

The Colonial Secretary said the granting of a pension to Bishop Smith had not been an exceptional measure, Judge Hulme had also received a pension, although it had been stipulated on granting him his salary; that he was not to receive any.

The Governor said that a pension could, in justice, only be charged on a colony for services rendered to the colony, and he understood that Bishop Smith had resided and laboured for a long time out of the colony. That question was, however, not before the Council at present. In reference to the present question it was desirable that the Council should be unanimous, and he would, therefore, embody their views in the following words, which he submitted seemed to be the prevalent opinion. "That it is the desire of the Council that the Bishop's pension should not cease with, but be in abeyance during, his occupancy of any other preferment. And that the interpretation of the word preferment should be left to the Secretary of State for the Colonies." This opinion was then unanimously assented to.

His Excellency then made some remarks relative to a draft ordinance for the incorporation of the Hong Kong and Shanghai Bank, in which he was only understood to say that there were strong technical reasons for not laying it on the table, and he only alluded to the matter lest those who took an interest in it might have overlooked it.

The Acting Attorney General was understood to say that by an oversight the words "and Japan" had been included in the the ordnance, and that the home authorities objected to this Council legislating for any place out of the colony being beyond its jurisdiction—all such legislation being clearly inoperative.

His Excellency then adjourned the Council.

The *China Mail* says:—The principal topic of discussion in the Legislative Council appears to be "ways and means," and the "last straw" which is to break the camel's back, according to our contemporary, is the "Military Contribution," which seems as great a bugbear here as "Irish members" are in the House of Commons at home. On comparing notes, it really appears that although, to follow out comparisons, Mr. Gladstone can afford to chuckle over his estimated three millions of surplus we are obliged to ponder over the heavy deficit which appears on the balance-sheet of the Colonial Treasury. Things have been going on altogether wrong; incidental revenue has apparently been calculated as permanent, and the proceeds of Government land sales which have heretofore formed the principal revenue, now that nearly all the Crown lands are sold, can no longer keep "the mill going," and this being a free port and principally only a depot for goods of all kinds, the elasticity of the Customs' revenue at home can find no parallel here, either now or in any future years.

We hope great things for the Mint, when in full working order; and the success of the undertaking, in a commercial point of view, will we believe be soon apparent. This may stop the gap and make the colony solvent again; in the meantime economy and retrenchment is absolutely necessary, and some steps should be taken to send a petition to the Secretary of State for the Colonies, endorsed by the whole colony, protesting against the levying of the obnoxious contribution to the army estimates; at any rate until the Mint begins to 'make money, in *two* senses of the word. This petition should be laid before the House of Commons, and the 'sense of the House' being taken on the subject, common sense must win the day and demonstrate the injustice and oppression attached to this compulsory payment of £20,000 per annum."

(FROM OUR OWN CORRESPONDENT.)

The last vestiges of the cool season have left us, apparently, and the usual six months of sweltering misery have set in. The military, to whom the heats proved so fatal (under General Mismanagement's command) during the never-to-be-forgotten summer of 1865, are escaping from a second season just in time, as the last detachment of the 9th Regiment sails for Yokohama to-morrow, whilst the remnant of the 11th will also be off toward the Cape in a few days. The 20th, just arrived from Japan, show by their healthy appearance how much reason they have to be thankful for the station they occupied during the last fatal year As yet nothing appears certain as to the troops that are to be stationed here in support of the 20th. A rumour has arrived here from Ceylon to the effect that four companies of the Ceylon Rifles are to be sent here, and, so far as they go, no doubt these troops would prove both hardy and efficient; but there is work here for two strong native regiments, in addition to the European troops, who *must* be kept, and whom it is more than madness to expose to hard work and night guards during the summer months. The local press has actively dwelt upon the irrational idea started by some economising member of Parliament who proposed to employ a Chinese contingent force on duty in Hong Kong. The idea is so obviously absurd as to be scarcely worth dwelling upon, as every person with any acquaintanceship with Chinese matters must be thoroughly aware of the untrustworthiness of the race when exposed to influences such as surround this colony. In India, or in a distant and hostile province of China, Cantonese Sepoys would make efficient troops, though their tendency to secret combination renders them at all times a dangerous arm to depend upon. But here, in a community of 2,000 Europeans living amid 120,000 of the most turbulent and dangerous scoundrels of all China, the experiment of committing the public safety to a force recruited from among the latter class would very soon bring about that result which most of the "cheap" experiments of the day usually arrive at.

His Excellency the Governor has paid a short visit to the Portuguese settlement of Macao, the salubrity of which at this season is a counterpoise to its dulness. Governor Amaral, of Macao, has done wonders in his three years' tenure of office to improve the roads and defences of Macao, but the trade of the place, with the exception of the coolie traffic and the business done by the Chinese contraband dealers, appears to be past praying for. The Portuguese appear to be uneasy as to the ultimate intention of the Chinese Government to assert its rights of sovereignty over the peninsula, and Governor Amaral has laboured strenuously to create a naval force for the defence of the place. A small twin-screw gunboat has been built at Hong Kong, and another has just been finished at Whampoa, where I hear a third is also building. A corvette is further expected from Lisbon. The illicit traffic in coolies for Peru and Havana is too profitable to be abandoned without a struggle. Nearly two thousand wretched victims were shipped away in the week ending the 12th instant. It is satisfactory to add that two of the native crimps employed by the Macao man-sellers to kidnap coolies for them along the coast were recently seized by the local authorities of the district of Tien-pak, and summarily beheaded.

The Canton emigration season has just closed, under the regulations prevailing there. Only one British ship, the *Pride of the Ganges*, has left with emigrants for Demerara (her first voyage, in December, met with the disastrous result I mentioned in January last), but eight or ten French vessels have departed with coolies for Havana. Under the extraordinary convention concluded at Peking in March, it is expected that large numbers of "emigration," houses for Cuba and Peru will be opened at Canton in the ensuing season.

An agent of the Government of the Sandwich Islands, who was formerly employed to obtain coolies for that

Digitized by Google

part of the world, has recently arrived here with a mission to obtain spawn from the Chinese fishponds for breeding purposes. The art of pisiculture is cultivated very extensively and very simply in the silk districts near Canton. The silk mulberry plants requiring a high and well drained site for its growth, the alluvial flats along the many channels of the river are raised by excavating earth from portions of the land and heaping it on the remainder. The cavities thus formed are made use of as ponds in which fish (chiefly carp) are reared for the market at Canton, whither they are carried (a distance of from twenty to fifty miles) in broad, shallow boats, through which a stream of fresh water is kept constantly running by means of a treadmill pump, which the boatmen work with their feet. The cultivation of oysters is also very largely practised on the coast.

The steamer *Prince Albert*, owned in Hong Kong, has been confiscated by the Canton Customs for a breach of the Treaty in resorting to a port not declared open to foreign trade. It appears that a certain amount of traffic has been carried on for some years past by a few small steamers between Hong Kong and the ports between this and Hainan, and the *Prince Albert*, caught in the act, has paid the penalty of her adventurousness. The port of Kiung-chow-fu, in Hainan, is declared open by Treaty, but the amount of legitimate trade there is so insignificant that no steps have ever been taken by Her Majesty's Minister to legalize trade there on the part of foreigners. The port will doubtless some day be exchanged for some other place on the coast which may appear to present greater advantages to foreign commerce.

I hear that the *Fiery Cross* and the *Serica*, the two famous clippers which created so much interest last year by their ocean-race homeward, are both to be *towed* down the China sea to the Straits of Sunda with the "New Season's Tea." The tea season has opened earlier than usual in the South, and large quantities of tea are expected to reach Canton this year, as the native traders are rather shy of Hankow, where numerous defalcations among the compradors of the European firms exposed them to serious losses last year.

CANTON.

The following notice has been issued :—

The undersigned has to notify for the information of the undermentioned claimants for losses incurred through the capture of the steamer *Queen* by the Chinese on the 23rd February, 1857, that he has received instructions from Her Majesty's Minister at Peking to pay the amounts awarded to them by Her Majesty's Government on account thereof, on their presenting a receipt in the form annexed. Particulars of the awards will be given on personal application at Her Majesty's Consular Office at Canton. —D. B. ROBERTSON, Consul. Messrs. P. F. Cama and Co., Ameesoodin Jafferbhoy, Cassumbhoy Nathabhoy Aladinbhoy, Habibhoy, Dhurumsey Poonjabhoy, Yully Mahomed, Kessowjee Sewjee.

The following account of the meeting in reference to the Canton Gardens will be of interest to the late residents at that place :—

A general meeting of renters of land on the Shamien site was held at the British Consulate, Canton, April 21st, 1866, to receive the report of the Trustees of the Garden Fund for the past, and to elect trustees for the ensuing year.

President, D. J. Robertson, Esq., C.B., H.B.M.'s Consul; Chairman, Wm. Fred. Mayers, Esq., H.M.'s Acting Vice-Consul; R. von Carlowitz, Esq., Messrs. Carlowitz and Co., George B. Glover, Esq., J. Cordes and Co., Pustau and Co., E. Deacon, Esq., Deacon and Co.; H. S. Hancock, Esq., Gibb, Livingstone and Co., L. Nendel, Esq., Oxford and Co., John Moul, Esq., Moul and Co.; T. G. Newton, Esq., Jardine, Matheson and Co., Theophilus Sampson, Esq.

The minutes of the last meeting having been read, Mr. Glover read the following report of the Garden Indemnity Fund :—

"At the last annual meeting, held on the 23rd of February, 1865, the following gentlemen were appointed to act as trustees for the ensuing year, namely, Messrs. Moul, Adams, and Glover. Early in the year Mr. Adams left Canton, but there was no appointment made to fill the vacancy caused by his departure. In September Mr. Moul left for England, and Mr. Theo. Sampson was appointed by the trustees to fill his place.

"When the trustees commenced their labours there was a balance of $9,147.22 in hand, since then there has been received from the Chartered Mercantile Bank as interest $776.88, to which is to be added $3.50 premium on a cheque drawn upon the Bank, making a total of $9,927, of which $3,369.65 has been expended in sundry improvements, leaving a balance in hand of $6,557.95; of this balance $6,000 has been placed in the Chartered Mercantile Bank of India, London and China, on special deposit, upon which there will be due on the 23rd instant $158 as interest.

"Most of the work done on Shameen has been executed under the direct supervision of Mr. Moul to whose energy and attention we are indebted for the present flourishing condition of the garden.

"During the year $18 per mensem has been paid to Aling, for which sum he agreed to keep the paths in order. Two gardeners have been constantly employed at $11 per month, their time being entirely devoted to the plants in the central garden, and to the trimming of the trees. The central garden has been put in order, and an iron fence has been placed around it. Seeds received from England were placed in the ground last November, the plants from which are now maturing.

"There have been 427 trees planted this year, which, with 655 planted the year before, make a total of 1,072 trees, the larger portion of which are growing rapidly, and will no doubt in a few years present such an appearance as will make Shameen one of the finest spots in the east."

Mr. von Carlowitz asked whether anything further had been heard from Her Majesty's Government with respect to the sum of $10,000 with interest, to which the trustees looked as a part of indemnity due. If nothing has been heard, he would suggest a further application.

The Chairman replied that he had received no instructions relating to the claim of $10,000. He agreed in a great measure with Mr. von Carlowitz as to the propriety of discussing the subject of permanently investing the funds in hand, but he thought that when, as in the present case, money is placed in the hands of three responsible gentlemen as trustees, it may be better to leave the manner of investing it to their discretion without hampering them too closely by locking up the funds. The trustees would undoubtedly not think of expending any large portion of the funds vested in their hands without resorting in the first place to the authority of a general meeting.

The report and accounts were then adopted.

The following gentlemen were elected trustees for the ensuing year : Geo. B. Glover, Esq., R. von Carlowitz, Esq., E. Pettit, Esq.

After some futher buisiness the meeting dissolved.

JAVA.

BATAVIA.

Our Rotterdam Correspondent writes us in reference to the new steam service to Queensland :—

"The agent and representative of the Netherlands India Steam Shipping Company, residing at Batavia, has protested against a memorial which is presented by Messrs. A. van Hoboken, Reynst and Vinju, to the Secretary-General of Queensland, about the projected steam lines between Australia and Java. The agent asserts that the Company is perfectly able to open and maintain a service from Batavia, *via* Brisbane to Sydney, *via* Torres Straits, that the five steamers—the property of the N.I.S.C.—are sufficient for this purpose, that this company has as much claim upon the subsidies of the Australian and Dutch Governments as the firm named, and that there is not one reason why the Government should quit the system of a public contract. The agent confesses that it is of general interest that this line should be opened, but he is of opinion that not the English but the Dutch colours are to be preferred, and remembers at the same time that his company is a Dutch Company. He has made these communications—he says—in behalf of 'fair play.' I need not say that this protest will cause a new delay which will turn out to be very disadvantageous for both the countries interested in this line."

SIAM.

We hear from Bangkok that Mr. J. Thomson had safely returned from his expedition to Ongcore, in Cambodia, for the ruins of which ancient and almost unknown city he left Bangkok in the end of January last. We believe he has succeeded in obtaining many interesting particulars concerning these remains of a remote and unrecorded antiquity, as well as a series of photographs of the inscriptions, bas reliefs, and sculptures of the great temple of Ongcore, which must be one of the grandest buildings ever reared by man. Even in its ruins the vastness and grandeur of its proportions are most imposing. Some idea of its size may be formed when it is stated that its outer wall measures three-quarters of a mile in length. Of the inscriptions, we understand that Mr. Thomson has succeeded in obtaining translations into Sanscrit from the chief-priest of Cambodia, and he hopes with these and the other materials collected to be the means of throwing some light on the origin and history of this wonderful place, regarding which the writing and traditions of both Siam and Cambodia are silent.

MALACCA STRAITS.

SINGAPORE.

Dates hence are to the 7th May. No London mail had arrived since the 4th May, which was the date of the intelligence published in the *London and China Telegraph* of the 6th inst.

The Government had not felt justified in overlooking the indiscretion of Mr. Robertson, the Deputy Commissioner of Police, as borne out by the evidence in the late conspiracy case; and instructions have issued that he be removed from the office of Deputy Commissioner at Singapore to be Deputy Commissioner at Province Wellesley. He will also be placed last on the list for promotion of Deputy Commissioners for the settlement.

We extract the following from the *Government Gazette* of the 4th of May :—

Mr. R. G. Scott, Junior Sworn Clerk, Prince of Wales's Island Division of the Court of Judicature, has obtained leave of absence for three months, without pay, on private affairs, from the 19th inst. Mr. J. A. H. Caunter has been appointed to officiate as Junior Sworn Clerk during Mr. Scott's absence, or until further orders.

His Honour the Governor is pleased to make the following appointment :—Lieutenant Henry Burn to be lay Trustee for the Chaplaincy of Singapore, vice Vaughan, resigned. Mr. P. B. Maxwell, Senior Sworn Clerk, Prince of Wales's Island Division of the Court of Judicature, resumed charge of the duties of his office on the 28th ult. Mr. P. B. Maxwell has been granted privilege leave of absence for one month, from the 29th ult.

The barque *Statesman*, after having been carefully fitted up under the superintendence of Captain Kirby, was formally inaugurated as a second powder magazine on the 28th April, in the presence of the proprietors and a number of guests, for whom a very excellent tiffin was prepared. The advantages of stowing gunpowder (which is here almost entirely *in transitu*) convenient to the anchorage of the shipping, in place of having it magazined at a point so difficult and dangerous of access as the old Kallang depot, have long been apparent; and the establishment of this new floating magazine will prevent any resort to such a dangerous system. The *Statesman* will be anchored just outside the limits of the harbour and a little more than a mile to westward of the other hulk (which, by the way, was also fitted up under the superin-

Digitized by Google

tendence of Captain Kirby). Together, they will afford storage to a far greater quantity of powder than has ever been here at one time; but with such security and increase of facilities, added to the absence here of all Government restrictions in this trade, it is not unlikely that a great part of the gunpowder previously shipped direct to China will for the future come by way of Singapore, where it will not only have the chance of two markets, but will have safe and economical stowage and be nearly as much within the control of the China merchants as if it lay in their own harbours.

The last day of the races appears to have been the most exciting of the three, Mrs. General Grant winning a race from Caledon, the only competitor she had to fear, and Caledon returning the defeat by carrying off the Winners' Handicap from the lady.

PENANG.

The high prices which have ruled for betelnut of late (observes the *Gazette*), and the likelihood of their continuing, are an inducement for its more extended cultivation. Thirty years ago the highest price paid for 100 nuts was 3 cents, the lowest 2 cents. Now the price varies from 8 to 12 cents per 100. As is well known, the native name for the betelnut is Penang, from which our island takes its name. It is nowhere indigenous on the island, but it will grow anywhere, in the plains or on the hills; in the richest and poorest sails; in heavy loam and on the crags and in fissures of rocks. Large plantations of it have been seldom formed in this settlement, but it is generally planted along hedgerows and roadsides; little attention seems to be paid to its cultivation, but it thrives and grows and produces everywhere. The largest plantation is at Juru, and was formed some years ago by the late Lee Gean; the trees are too thickly planted, seven feet apart, but the plantation bears and pays well. This cultivation if employed extensively will not supersede the nutmeg plantation on the hills, as the produce is too bulky, and the cartage would perhaps take a good deal out of the profits. There is on most of the hills on which nutmeg plantations were formed a fair show of trees. There are a number of varieties of the Penang of commerce as well as a number of ways of preparing the nut for the different markets. The nut for the coast of India is simply prepared by taking off the fibrous husk from the nut, whilst the mode of preparing the "Penang ava," which is sent to Burmah, is a more complex procedure. Most of the betelnut grown in our island is made into Penang ava. The fruit is collected generally in a half ripe state, and the husk is chopped off from the nut with a knife, and by this process part of the nut is sliced off, though most of the husk remains on the nut. When a sufficient quantity of nuts have been prepared they undergo a tanning process, and are then dried on bamboo frameworks, or mats exposed to the sun, until fit for packing in bags for exportation. The Chinese appear to like this mode of preparing the betel, and seem as happy over it as the Malays are over their paddy harvest.

The Penang and Sumatra nuts are much larger than those grown further north, and in the Burmah markets, which import betel from here and places further north, as Mergui, Tavoy, and the Northern coast, the difference is at once perceptible. Like the cocoanut, there are a great many varieties of Penang which are not easily distinguished; the flowers of the Penang wangis have a very fragrant scent which at certain seasons loads the air. Perhaps few are aware that our widely renowned "Penang lawyer" sticks are only a dwarf variety, or a species of betelnut. The native name is Penang *liar*, which has been easily corrupted into lawyer, the word *liar* in Malay meaning "wild," or undomesticated.

The tree is raised from seed, which are generally sown first in nurseries; but we think the best way is to plant the seeds where they are to stand at once. This saves much time and labour afterwards. Few palmites like transplanting. From ten to twelve feet apart is the usual distance allowed between the plants, but distance is quite a matter for the consideration of the planter. We would advocate thick planting, say at three feet apart, and thin afterwards. The trees come into bearing entirely owing to the care bestowed upon them. Few bear before the fifth or sixth year, and most not until the eighth year, when they continue to produce for a long time. Some trees produce more than a hundred nuts at a crop, whilst others will not produce ten or twenty. All depends upon the description of soil the plant is grown in. We hope to see more of the nut planted in Penang, for there is one thing about this cultivation, namely, the rarity of a diseaseor insect attacking it, so very different from the cocoanut tree, coffee, and nutmeg. This port has always been the emporium for most of the betelnut grown on the east coast of Sumatra, but of late years, instead of the nut being brought here, advances are made by the Chittys, and the nut is shipped direct from Sumatra to the Madras coast.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

BAKER—On the 17th April, at Hong Kong, the wife of S. W. Baker, of a son.

MAXWELL—On the 6th June, at 128, Park-street, Grosvenor-square, W., Lady Anna Stirling Maxwell, of a son.

TORREY—On the 17th April, at Hong Kong, the wife of J. W. Torrey, of a daughter.

MARRIAGES.

CAYLEY—WILSON.—On the 17th April, at the Cathedral, Colombo, by the Rev. James Bacon, Richard Cayley, of Lincoln's-inn, barrister-at-law, and Advocate of the Supreme Court of Ceylon, to Sophia Margaret, only daughter of David Wilson, Esq., of Colombo.

FRAZAR—LINDSLEY.—On the 8th May, at Dorchester, Mass., U.S.A., by the Rev. Nath. Hall, Everett Frazar, Esq., of the firm of Frazar and Co., Shanghai, China, eldest son of George Frazar, Esq., of Watertown, Mass., to Annie H. Lindsley, daughter of Joseph C. Lindsley, Esq., of Dorchester, Mass., U.S.A.

DEATHS.

BECK—On the 22nd of April, at the Civil Hospital, Hong Kong, Brayton W. Beck, Chief Mate, unemployed, aged 40 years.

PUTTFARCKEN—On the 19th May, at Hamburgh, Susanna Henrietta Elizabeth, only daughter of Otto, Puttfarcken, Esq., aged 5 years.

SCHMID—On the 17th May, at sea, between Alexandria and Malta, of consumption, Sophia, the beloved wife of Stephen H. Schmid, of the P. and O. Service, aged 28.

WATSON—On the 26th May, at 15, Essex-terrace, Lee, S.E., Alexander Gawler, infant son of J. P. Watson, Esq., aged 14 days.

COMMERCIAL REPORT.

CHINA IMPORTS.

Cotton.—Bombay—No sales. Bengal.—$19 to 23; sales, 590 bales. China.—Shanghai, $23 to 24½; Ningpo, $24½ to 25½; Tien-tsin, $22 to to 23½; sales, 1,600 bales.

Grey Shirtings.—7lb. to 7¾lb., $3.70 to 3.90; 8lb. to 8¼lb., $4.10 to 4.25; 8½lb. to 9lb., $4.65 to 4.95; 9¼lb. to 10lb., $5.10 to 5.60; sales, 11,000 pieces.

T-Cloths.—No sales. 6lb. to 6¾lb., $3.50 to 3.70; 7lb. to 7¾lb., $3.90 to 4.30; 8lb. to 8¾lb., $4.10 to 4.90.

Metals.—Lead—Sales, 400 pigs. Common, $6.40 to 6.60; best, $7 to 7.20. Iron.—Nail rod, $3 to 3.30; sales, 780 piculs; hoop, $3.80 to 4.25; bar, $2.90 to 3.15; sales, 400 piculs small round; wire, $7 to 8.25; sales, 50 piculs.

COALS.—HONG KONG.—Arrivals have consisted entirely of Australian, in four cargoes from Sydney, aggregating 2,500 tons, which have found purchasers at $12 to $12.50. Some large sales of Welsh have taken place at $16½ from godown, and of English arrive at $15.

SHANGHAI.—The market is firm, and the supplies having been small, the business done during the last fortnight has been confined to sales "to arrive," viz., 2,000 tons of English Steam Coals and one cargo of Cardiff, at 72s. sterling per ton, payable in 6 months' sight Bank bills, and one cargo of Sydney at tls. 9.2.5 per ton. Small sales of American Anthracite Coals have been at tls. 13 from godown, and of Sydney Coals at 9.5.0, also from godown. Stocks of all kinds are light. Arrivals have been about 600 tons Cardiff and 1,500 tons Sydney Coals.

CHINA EXPORTS.

TEA.—The markets are all but swept of old Teas. A smart competition has set in for the new season's yield, which there is every reason to expect will be large and early. The advices from Foochow convey the idea that the new Teas will commence to arrive on the 10th proximo. The Mandarins had been squeezing a little too hard in the districts, and had created an *emeute*, which it was thought would be speedily patched up. The advices from Hankow state that the new Teas are looked for as early as the 20th promimo, and the growing districts seem clear of marauders, a brisk and early trade is expected. The last French mail steamer took 2,500 chests Tea; which must have been new Tyshans from Macao.

CANTON.—Musters of Canton Greens and District Congous have continued to arrive during the past fortnight, but as teamen have only lowered their exorbitant demands very slightly, tael prices are even higher than last year, when exchange and freight were much lower than the rates now ruling. Statistics from Home and the results of early shipments last season do not encourage buyers to make any offers at present likely to lead to business. Scented Teas: May be expected in fair quantity in the course of a few days, and already some musters of capers are offering, but the scenting flower is not yet sufficiently forward to enable holders of the leaf to prepare any large parcels. Prices asked for these kinds are also much higher than last year. Some further contracts have been made in Pouchong at about former rates, and which are the only settlements reported during the fortnight.

FOOCHOW.—A favourable change in the weather has taken place since the date of the last report, and the crop will probably be of good quality, although, as then stated, a few days later than last year. The keenness of the competition for fine Teas will, however, probably prevent the production of any first class parcels, but rather tend to increase the quantity of good and fine Teas. Some disturbances have taken place up country in consequence of the exactions of the Mandarins, but they have subsided without interfering with the Tea picking.

SHANGHAI.—Black Teas: There is nothing to report in these descriptions and the stock remaining on the market is merely 650 chests Congou, and 600 chests of Oopack Dust. Green Teas: About 9,000 packages have been settled during the fortnight at rather higher prices. Supplies from the country are exhausted, and the stock is reduced to 5,000 half-chests of common quality. Settlements have been 6,700 half-chests Fychow at Taels 27¼ to 35, and 2,300 half-chests Moyune at Taels 36 to 45. There have been no reshipments, and the stock is estimated at 4,000 half-chests Fychow and 1,000 half-chests Shanghai packed teas.

HANKOW.—Advices are to the 14th instant. The *Eliza Shaw Challenger Min* and the steamer *Erl King* will be on the berth for New Teas. The season is expected to be early and the number of contractors in the country is considerably beyond last year's. Musters will

Digitized by Google

probably be down about the 15th May, and teas in bulk some ten days' ater. No opinion as to the extent of the crop can yet be formed.

YOKOHAMA.—The business transacted in the tea market since the last report has been very small, owing to the selection being so inferior, and buyers not having much choice are holding off a little in consequence; the amount purchased has been for the New York market, and is estimated at about 600 piculs.

SHANGHAI.—Since the departure of the last mail the business in China Silk has been unimportant, only about 140 bales having been settled, and of these more than half go forward on native account. Prices have been very irregular, in some instances lower than last quotations, and in others higher. The season may now be said to have closed, as the remaining stocks are insignificant. The mulberry trees are unusually backward for the time of year, so that the New Silk will be later than last.

EXCHANGES ON LONDON.

[For dates, see first page.]

		Bank.	Private.
At Yokohama	6 months sight.	4s. 8d.	4s. 8½d. to 4s. 9d.
At Shanghai	6 ditto	6s. 5d.	6s. 5½d. to 6s. 6½d.
(per Tael.)			
At Canton, At Hong Kong, At Macao	6 ditto	4s. 7½d. to 4s. 8d.	4s. 8d. to 4s. 9d.
At Singapore	6 ditto		
At Manila	6 ditto	4s. 4d.	4s. 4d. to 4s. 6d.

At Shanghai, Bills on India, Rs. 302 to 304 per 100 taels. At Hong Kong, Rs. 218 to 220 per $100. Bar Silver at Shanghai, 111.25 taels; at Hong Kong, 9½ to 10 per cent. prem. Mexican dollars at Shanghai, taels 73.25 per 100; and Exchange on Hong Kong, 27½ discount. Hong Kong and Shanghai Bank Shares, 4 to 5 per cent. prem.; Gas Company, 35 per cent. prem. Hong Kong and Whampoa Dock, 45 per cent. prem.; Steam Shares, 35 per cent. discount; Union Dock Company, 5 per cent. discount.

The Circular of Messrs. Sharp and Co. has the following:—

GOLD.—There has come to hand a total value of $200,000 since our last circular, and the amounts sent to India, including those per *Behar* last mail, and excluding the shipments per this opportunity, are in all $660,000.

SILVER.—Amount received $110,000, and sent away $240,000. There is none remaining. The first of chipped batches and broken silver, therefore, delivered at the mint, will have a chance of speedy coinage.

DOLLAR CURRENCY.—Total inwards $1,450,000, outwards $1,660,000. Mexican still give as good an out-turn to India as bank bills and shipments continue to go forward. A demand for clean coin has again sprung up on account of an advance in Shanghai. An impression also prevails in some quarters that the favour likely to be shown to the new dollars which will be issued from the Hong Kong Mint next month will cause a progressive depreciation in the value of the old and much mutilated coins.

DISCOUNT AND MORTGAGES.—The same feature exists as referred to last fortnight, viz., the wide market between short and longer loans. Money still continues in demand.

BANK-NOTES.—A concerted action has been taken during the fortnight by some of the older banks of issue with a view to curb the circulation of the Hong Kong and Shanghai Bank. Some of the seniors will be reminded by the circumstance of the solicitude shown towards the London and Westminster Bank by the Bank of England and Lord Althorp, Chancellor of the Exchequer thirty years ago.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—None.

At SHANGHAI.—From London: Cinderella, Archibald, Ailsa Craig.

At HONG KONG and CANTON.—None.

At MANILA.—From Cardiff: April 15, Sailor Prince.

At SINGAPORE.—From London: May 1, Queen of May. From Liverpool: April 29, Patriot Queen. From Sunderland: April 29, Wellington, British Crown. From Newport: May 4, Bencleuch; 5, Daniel Marcy.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—None.

From SHANGHAI.—None.

From FOOCHOW.—For London: Medina.

From HONG KONG and CANTON.—None.

From MANILA.—For Cork: April 13, Congo.

From SINGAPORE.—For London: May, 2 Strathmore. For Bremen: 5, Emilie. For Boston: 2, Sophie and Helene; 6, Macassar.

From PENANG.— For London: April 30, Prata.

VESSELS LOADING.

At YOKOHAMA.—For London: Chanticleer.

At SHANGHAI.—For London: Vanguard (full), Cinderella. For Liverpool: Trebolgan. For New York: Fairleader.

At FOOCHOW.—None.

At HONG KONG and CANTON.—For London: John Milton, Belted Will, Deerfoot. For New York: Ann Lucy.

At MANILA.—For London: Lochnagar, Herbert. For Cork: Far Away. For Falmouth: Madagascar, Satellite.

At SINGAPORE.—For London: Desdemona. For Liverpool: Grenada. The Patriot Queen has been circulated for Liverpool after discharge of present cargo.

At PENANG.—For London: Moorhill.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3., Silk, £4 to £4 10s.

At SHANGHAI.—There is a scarcity of tonnage in harbour, and rates have advanced. Cinderella has been put on the berth for London, at £3 10s. per ton, the Trebolgan, for Liverpool (for Cotton), £2 10s.

At FOOCHOW.—On the berth to load new Teas for London, Chinaman Serica. For Liverpool, Ziba. The Medina is loading at £3 10s. per ton, for new Teas per clipper ships, no rates fixed.

At HONG KONG.—Suitable vessels find no difficulty in obtaining paying rates, £3 5s. to £4 10s. is the rate and Whampoa.

At MANILA.—The Herbert has been fixed for London with 800 tons Sugar, at £3 for Clayed, and £3 2s. 6d. Unclayed, filling up with Hemp at £3 7s. 6d. per ton. The Lochnagar, for same port, has engaged Hemp at £3 15s. to £3 7s. 6d. per ton.

At SINGAPORE.—In homeward freights there is no improvement, and rates continue the same, viz., £2 per ton for dead weight, and £2 10s. light freight.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND and CONTINENT to CHINA, &c.—April 18, Lauderdale, London to Shanghai; 20, Concepcion, Cadiz to Manila; Immaculate Conception, Cardiff to Singapore; 21, Clara, Cardiff to Japan; 27, St. Aubin, Havre to Singapore.

From CHINA, &c., to ENGLAND and CONTINENT.—April 14, Katinka, Hong Kong to London; 15, J. A. V., Macao to Havana; 17, Gatera D'Maria Pia, do.; Burdes, Habana, No. 2, do.; 18, Eva Johanna, Batavia to Rotterdam; 18, Ettrels, Hong Kong to London; Fort Regent, do.; Moneka, Singapore to London; 20, Fortuna, Singapore to Liverpool; 22, Canton, Singapore to Bordeaux; 23, Oceaan, Batavia to Amsterdam; 24, C. Wernard Eduard, Batavia to Rotterdam.

From UNITED STATES to CHINA, &c.—None.

From CHINA, &c., to UNITED STATES.—April 17, Tai-hee, Hong Kong to New York; 15, Resolute, Shanghai to New York; 17, Enoch Train, Manila to New York; 18, Jesso, Japan to New York.

COMMERCIAL POSTSCRIPT.

The National Bank £30 share is quoted £70 to £72. The City Bank £10 at £14 to £16.

On the failure of the Agra the *Economist* has the following:—

We place, therefore, in the front rank of the errors committed the abandonment of the plan of having an independent party in London upon whom the branches could offer bills. We place also in the front rank, the error of attempting to join together two enterprises so totally different as Indian and London banking. The utterly mistaken policy of entering largely into advances on securities of an unusual kind was scarcely less fatal. Every resource the bank possessed was required to sustain and extend its prosperous but difficult and diversified Eastern and Australianbusiness.

ARRIVALS NOT INCLUDED IN THE TABLES.—June 7, at Hamburg from Hong Kong, Iris; at Texel from Macassar, Indus; at Brouwershaven from Java, County of Lanark; Min. F. van de Putte; at New York from Shanghai, Indus (not Julius, as before reported).

DEPARTURES.—May —, from Amsterdam, for Batavia, Maria Veronica; from Hamburg for Hong Kong, Peter Godefroy; June 8, from Shields, for Hong Kong, Tynedale; May 28, from New York for Kanagawa, Elize Ruger (Bremen).

Continental Intelligence.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JUNE 7.

Letters received from Nertchinsk state that the fair at Verchne-Udinsk, which lasts a whole month, had never presented so lively an appearance in any previous year. Cotton manufactured goods were in great demand, and all had been sold. In spite of the large quantity of goods that arrived before the opening of the fair, 20,000 poods more were brought in during the course of it, and 10,000 roubles were alone paid for the carriage of goods from Tchila to Nertchinsk, a distance of 300 wersts, or 200 miles. As the prices of all descriptions of fodder ruled high, the carriage, which was formerly never more than 40 copecks per pood between those two places, had risen to 1 r. 20 cop. Wholesale buyers arrived from all parts of Siberia, among whom, it was remarked, there was an unusual number of Jews. Money was very plentiful, and the country people bought freely, having earned so much by the high prices they obtained for their agricultural produce.

On the 18th of April the news of the attempt to assassinate the Emperor reached Irkutzk, and produced an immense sensation. At noon a *Te Deum* was performed in the cathedral, to which the inhabitants rushed in crowds to relieve their feelings in a burst of religious thanksgivings and praise. On the following day a meeting of the merchants, manufacturers and citizens was held at the club of the nobles, where the draft of an address of congratulation to the Emperor on his miraculous escape was read, approved, and numerously signed. At the same time it was proposed to open a subscription to erect a public monument of their loyal feelings in the shape of a votive chapel to be dedicated to St. Saviour. The proposal was eagerly accepted, and 24,000 roubles were immediately collected. It is proposed to extend the subscriptions to all parts of Siberia The Jews of Irkutsk also resolved to perpetuate the memory of the Emperor's wonderful escape by a special monument, and for that purpose have opened voluntary subscriptions amongst themselves for the building and endowment of an Israelitish school at Irkutsk.

The Russian steam corvette *Bogatyr*, after an absence of nearly five years, during which she was exclusively employed on the China and Japan stations, has safely arrived at Cronstadt from the Far East, touching at Brest to land the young Japanese who proceeded from thence to St. Petersburg by land. On the following day she was officially inspected by the Port Admiral, Admiral Novosilsky, Naval Aide-de-Camp of the Emperor, and the chief of the naval staff, Rear-Admiral Baron Taube.

Advices have been received at Copenhagen that preliminary negotiations have been opened by Mynheer Graeff-van Polsbrock, the Dutch Consul General in Japan, for a treaty of commerce and navigation between the latter country and Denmark.

The Austrian frigate *Novara*, that was so seriously injured by a wilful act of arson at Pola, has been towed by another steam frigate to Trieste, and placed in the dry dock of the Austrian Lloyds for repairs, which have

Digitized by Google

already commenced, and are not expected to last long. Since her return from the scientific expedition to China she has been converted into a steam frigate, and it is satisfactory to be able to report that her steam machinery has not suffered in the least from the machinations of the incendiary.

Captain Werner, of the Prussian Navy, who was to have commanded the now postponed German Arctic exploring expedition, has been appointed to the command of the iron-clad steam frigate *Arminius* on the Baltic station.

Mr. Hastings Hicks has been appointed by the Senate of this city to be Hamburg Consul at Madras.

COMMERCIAL.

COFFEE.—In the present uncertainty as to the question of peace or war all the produce markets are extremely quiet, and great reluctance is felt to make purchases. But on the other hand, as importers of coffee are not anxious to sell, prices remain nearly unaltered. The imports are considerably less than last year at this time, and the present stock is 18,500,000 lbs. against 23,000,000 lbs. in 1865. Sales of the fortnight 6,000 bags.

SUGAR.—Raw continues to fall, and is again 8 sch. bco. lower, with very few transactions. In the refined business is also extremely limited, and values have a downward tendency.

RICE.—Without animation, but prices well supported. Cleaned descriptions command more attention.

SPICES.—All sorts neglected. Prices nominal, with a tendency to a fall.

SPELTER.—Market in a state of stagnation such as has not been known for a long time. The only transactions reported are 2,000 centners for July and August delivery at 13s. 7d. and 2,000 centners favourite marks in loco. at same figure; but since then a further decline has taken place and the article is offered at 13 marks banco, but no buyers at that price.

DISCOUNT.—7½ to 8 per cent. Money more plentiful.

SHIPPING.—ARRIVED.—May 26, Kala Maass, from Sourabaya; June 7, Iris from Hong Kong.

SAILED.—May 26, Agathe Johanna, to Singapore; 27, Magdalena, to Hong Kong; June 1, Johann Christoph, to Shanghai; 2, Peter Godefroy, to Rong Kong.

Naval and Military.

The *Sylvia* 5 gun screw is now fitting out at Woowich for surveying operations in the China and Japan seas. It is specially intended that she should survey the Corea. The captain and officers will be appointed after the arrival of the *Swallow* expected in about a month from China &c.

COURTS-MARTIAL ON THE LIEUTENANT AND MASTER OF H.M.S. PEARL.

A court-martial assembled on Tuesday, June 5th, on board the flag-ship Victory, at Portsmouth, to try Lieutenant Edward Frederick Keppel, of Her Majesty's ship Pearl, fitting out at that port for China, on the following charges:—1st. For that the said Lieutenant Edward Frederick Keppel, being in actual service and full pay in Her Majesty's fleet, and lieutenant of Her Majesty's ship Pearl, was, on or about the 27th of May, drunk on board the said ship. 2nd. That he did, on or about the 27th May, cause a boat to be lowered, and was in the gangway with intent to leave the ship in the said boat, without having obtained permission from Captain Francis Ross. The court comprised Captain Edward Tatham (Bellerophon), president; Captain the Hon. F. Egerton, A.D.C. (Victory), Captain Matthew Connolly (Pallas), Captain John Seccombe (Liverpool), Captain Hire (Orontes), and Captain Herbert (Royal Sovereign). Captain Ross, of the Pearl, prosecuted; and Mr. E. Hoskins sat as officiating judge advocate. Mr. R. W. Ford, solicitor, of Portsmouth, was present as prisoner's friend.

After the evidence of Captain Ross, Mr. Snell, the Master, and others had been heard, the Prisoner's Friend read a lengthy statement in which he expressed his sorrow at being in the position he was after ten years' active service. As regarded the first charge, he was confident of being able to disprove it, and to offer extenuating circumstances respecting the second. On the early part of the day in question he had been on shore, returning again at two o'clock in the afternoon. It was not suggested that he was then other than perfectly sober. From that time until dinner, six o'clock, he had nothing to drink. At dinner he had one glass of beer, but no wine. After dinner he sat for some time writing letters, and from that time until he was placed under arrest he had but two small glasses of brandy and water. On his honour as an officer and a gentleman, he was as sober then as he was at that time. At nine o'clock he reported the rounds to the captain, who admitted that he saw nothing wrong at that time. Mr. Snell brought a message on board, requiring his immediate attendance on shore. He determined to go on shore, and he told Mr. Shell to take charge until Lieutenant O'Keefe came on board, as he believed he might leave the ship with propriety, the ship being in perfect order, and that he was justified in leaving it in charge of an executive officer who was his senior. He had since found that in entertaining this opinion he was quite wrong as to the regulations of the service. The captain's lights were out at that time, or he should have spoken to him had he been about, but he believed he had retired. He confessed to the Court that without detracting at all from the seriousness of the second charge, the first was that about which he was most anxious, for it was that which most affected his character as an officer and a gentleman. As regarded the second charge, he admitted the fact of his intention to go on shore, but he acted in ignorance of the rules of the service. In 1856 he entered on board the Raleigh, commanded by Vice-Admiral Sir Henry Keppel, where he served until she was wrecked near Macao, off the coast of China. He subsequently joined Her Majesty's ship Calcutta, under Rear-Admiral, now Sir Michael Seymour, and was at the taking of Canton in 1857, and also at the taking of the Peiho Forts in 1858, for which he had a medal and two clasps. The Calcutta was paid off in August, 1859, and in November of that year he joined the Topaz, and served on the Pacific Station and off Vancouver's Island. During the four years he was on that station he gained the good opinion of his commanding officers, and, although young, on one occasion he was placed in charge of a boat—one of an expedition which was detached and sent against an Indian tribe—a service of a perilous nature, but attended with the desired success. In 1863 he joined the Bombay, and was one of the last officers to leave that ship when she was burnt; he was obliged to throw himself overboard to escape the flames. He was picked up in a state of insensibility by the admiral's barge, and so was happily saved. He had since served on board Her Majesty's ships Osborne and Edgar until he was promoted and recently appointed to the present ship. On the burning of the Bombay all his certificates and testimonials were lost. He begged in conclusion their favourable consideration. The prisoner then called the witnesses for the defence, who spoke to the circumstances detailed by the captain, but affirmed defendant to be quite sober and his speech coherent.

Having considered the evidence, and what prisoner had to say in defence, the Court adjudged him to be dismissed Her Majesty's service.

The Court then proceeded to try Mr. John Skinner Snell, master of Her Majesty's ship Pearl, on the following charge:—That he, the said John Skinner Snell, being on actual service and full pay in Her Majesty's fleet, and master of Her Majesty's ship Pearl, was, on or about the 27th of May, 1866, drunk on board the said ship. Captain Ross prosecuted.

Prisoner said it was useless to deny the charge, which had in fact been proved against him; therefore he pleaded guilty, and threw himself on the mercy of the Court, respectfully trusting they would deal with him as leniently as possible. He laid before the Court certificates he had received since he entered the service. He obtained full numbers at college, for which the Lords Commissioners of the Admiralty favourably noticed his name. He also produced an extra certificate as pilot from the Board of Trade. The Court, after deliberating an hour, sentenced prisoner—in consideration of the position he obtained at college, and the excellence of his certificates—to be only dismissed his ship, and placed at the bottom of the list of masters.

Lieutenant Edward C. Royse, and Master Samuel W. Browne, have been appointed to the Pearl.

Her Majesty's Secretary of State for War having sanctioned the introduction of Major Palliser's chilled shot, a large quantity is being rapidly manufactured at Woolwich for the 7-inch 100-pounder and the 9-inch 300-pounder guns. The Select Committee have reported that the experiments at Shoeburyness have shown that these shots are quite equal to the most expensive steel for piercing armour-clad ships, and, moreover, that they possess the peculiar property of invariably breaking up into numberless splinters after piercing the targets, and that this property renders them a far more destructive weapon of war than steel. The expense of steel shot is, they state, so enormous as to have hitherto prevented either service from obtaining battering shot of any description. This invention, however, has substituted an article, at the mere cost of the common cast-iron shell, which it is calculated will create an economy and saving to the country to be reckoned at millions sterling. Their value having been thoroughly established, a supply has been ordered to be issued for the use of the Royal Navy and the coast batteries with the least possible delay. The Royal Laboratory Department is accordingly engaged incessantly in the work night and day. The War Department will therefore have in store in a short time a disposable stock of destructive missiles, which the officers of both services at Woolwich declare have hitherto been unequalled.

CUBA AND THE COOLIE TRADE.—From the Havana we learn that the last quotation for Chinese "coolie contracts" was 350 dollars, or about £70 per head. This price, one would think, must leave a very large margin of profit for the importers; and suggests something bearing a very considerable resemblance to the slave trade. Very seldom do the coolies receive thirty dollars on leaving China, and seventy dollars will, as they are taken, more than cover the expense of one passage and of the broken rice and rotten salt fish on which they are fed. Now, in a vessel containing 1,000 coolies, like that which was burned the other day, this would leave a profit, supposing they all reached their destination, of £50,000, to be pocketed by the brokers, minus any expense they may be put to, or rather not be put to, in returning the coolies to China after eight or ten years' labour in Cuba. We question much whether the slave trade, with all its losses by death and capture, was ever so lucrative as the coolie traffic seems to be; and it is evident from the known state of China and of the Spaniards and Portuguese there, that if such sums can be made by the traffic, coolies will have to engage in it whether they will or no—if willingly all the better; but if not, then otherwise. British subjects resident in Cuba, or visitors to that island, might be invited to let the world know what is the actual fate of the many thousand Chinese sent there to slavery limited—whether they are wasted to death or not before their engagement ends.

THE EUROPEAN AND AUSTRALIAN ROYAL MAIL COMPANY *v.* THE PENINSULAR AND ORIENTAL STEAM NAVIGATION COMPANY.—This was a special case to determine the title to a coal hulk, the *Larkins*. It appeared that in the year 1853 the defendants purchased the *Larkins*, which was then used as a sailing ship. They sent her out to King George's Sound in Western Australia, where her masts and rigging were taken out and warehoused and from that time she was used as a coaling-hulk and workshop. In 1857 the *Larkins* was sold by the defendants to the plaintiffs as "the coal hulk *Larkins*" for £6,000; but the price was, in fact, never paid. At the time when the defendants purchased the *Larkins* she was registered as a British ship, and she continued on the register at the time of the sale to the plaintiffs. No bill of sale was ever executed upon this sale to the plaintiffs. In 1859 the defendants regained possession of the hulk. The plaintiffs having become insolvent, the question was now raised between their general body of creditors and the defendants which was entitled to the *Larkins*; and this depended upon whether the *Larkins* was a ship within the meaning of the Merchant Shipping Acts, so as to render a bill of sale necessary to pass the property to the plaintiffs. A further question was also raised whether the plaintiffs had not parted with their rights by an agreement which they had entered into with the Royal Mail Company. The Court held that upon the facts of the case no bill of sale was necessary to transfer the *Larkins* to the plaintiffs. They therefore gave judgment for the plaintiffs.

SIR FREDERICK BRUCE was umpire in the case of a claim by the United States against Colombia for 1,500,000 dollars. Sir Frederick awarded less than 100,000 dollars.

MR. HILDEBRANDT'S EXHIBITION.—This exhibition of Chinese pictures, 48, Pall-mall, is now supplemented by views of San Francisco and Panama, and on the whole forms a most interesting collection.

FRANCE AND THE FAR EAST.

CHINA, Japan, and Cochin-China are gradually becoming standing topics here; a few years since, and with the exception of perhaps a hundred *savants* and a few, very few, travellers, the whole region of the Far East occupied much the same place in the ordinary French mind as Africa or Kamschatka. The silk interest has been the principal lever for opening the closed chest; the wants of trade, the adventurous spirit of commerce, restlessness of speculation, have done more towards bringing France into connection with the Far East than all the efforts of linguists, naturalists, and other *savants* put together; and such has been the case all over the world during the later ages. Eastern subjects are being discussed now in all quarters, and are occupying the attention of all classes of minds. The learned *Sinologues*, who have so long worked almost without a public, are naturally coming prominently forward, and their labours promise now to bear practical fruit. M. STANISLAS JULIEN has, it is well known, been long at work on a great work, to be entitled *Tresor de la Langue Chinoise;* typographical difficulties alone are said to have retarded the execution of this onerous enterprise. The same gentleman is now preparing an abridgment of his great lexicon, under the title of *Vocabulaire Chinois-Francais*, and the Imperial printing establishment has recently made arrangements with engravers in Peking for a new series of dies for the production of founts of small form but great distinctness, with the view of facilitating the production of works in Chinese lexicography. M. DE ROSNY has just contributed to the publication of the French Asiatic Society a study of the language of the Corea, and is now at work on the ethnography and bibliography of the Tchao-sien. A well known geographer is preparing an elaborate work on the Corea, its climate, mountains, towns, hydrography and inhabitants. M. GUSTAVE DELONDRE is preparing a *Vocabulaire Japonais Francais* by collation with native dictionaries. M. JULES SARRAZIN is at work on a *Glossaire Zoologique Japonais-Latin-Francais*, composed from the books of the Niphon naturalists. M. LEON DE ROSNY has just completed the translation of a Japanese manuscript on the cultivation of the mulberry tree and the rearing of silkworms. M. DE CHARENCY announces a forthcoming *Vocabulaire Francais-Aino*, and a *Glossaire Zoologique de Yeso*. Lastly, a dictionary of the Annamite language is now in course of preparation.

In the *Revue Orientale* appears a funeral oration delivered by General NGUYEN-PHUŒC, of Cochin-China, at an anniversary fête held in remembrance of the soldiers killed in an expedition which he directed in person, with the view to the pacification of the country between Saigon and Kambodja. The oration is translated into French, almost word for word, as we are told, from the Annamite, by a native named PETRUS TRU-ONG VIUH-K'Y. The French Society of Acclimatization sent M. PAUL CHAMPION, a distinguished chemist, on a mission to China and Japan some time since; that gentleman has just returned with an important collection of pheasants and other birds for the gardens of the society. It is said that in addition to the notes that he has made for the society he has brought home valuable information respecting Chinese and Japanese industries, and that he succeeded in obtaining admission to the famous porcelain factories of Keu-ti-Chin. M. CHAMPION has also brought home a large collection of photographs of some of the most remarkable buildings and views both in China and Japan. As a last instance, for the present, of the increased attention to Chinese subjects, it may be mentioned that no exhibition is now complete without one or two pictures of Chinese subjects. M. THEODORE DELAMARRE is an eminent Chinese scholar as well as painter, and in the annual exhibition now open in the Champs Elysees he has a picture of a Chinese dealer counting his money which deserves considerable attention. The painter has made the freest possible use of the most glaring contrasts and gradations of colours, and yet has succeeded in producing a very harmonious work.

THE CHINESE VISITORS.

After visits to the Under Secretary of State for Foreign Affairs, Mr. LAYARD, M.P., and Mr. HAMMOND, our Chinese visitors complied with an invitation to the Countess of WALDEGRAVE'S assembly. The Crystal Palace was surveyed the succeeding day. The Commissioner and party next left for Windsor and Eton. Royal carriages were in waiting to convey our Chinese visitors to Eton on the occasion of the celebration of the birthday of his Majesty GEORGE III., which has ever since that event been kept up with great festivity. The object no less than the mode of the celebration could not have failed to strike the Commissioner and his party, for the paying of honours to the dead, whether in the way of grief or mirth rank among the cardinal precepts of CONFUCIUS, and there is no doubt that the playing of the bands of the Royal Horse Guards and the boat race were regarded as equally proper acts with the choral service of the chapel. The hilarity of the scholars of this ancient school was well calculated to disturb that impassive gravity on which Chinamen pride themselves. The crowning event in the visit of the Chinese visitors to England—one which on every account is cause for congratulation—is the private reception accorded them by Her Gracious Majesty the QUEEN in the Organ Room of Buckingham Palace, previous to the grand State Ball of the 5th inst. The reception though formal was cordial. The Commissioner, adopting the European mode of address in presence of sovereignty, paid a tribute of homage to the Empress of INDIA, which was none the less sincere for the flowery language in which it was couched. Her MAJESTY gracefully acknowledged the compliment paid, and expressed friendly sentiments for the Imperial family. The Celestial party, who were attended by Major FREDERIC BRINE, and Messrs. BOWRA and DE CHAMPS, interpreters, attended the State Ball in the costume, and were necessarily very conspicuous among full 1,700 present. They have since left London for Birmingham, Liverpool, &c., and we understand they will in a day or two depart for Germany, Denmark, and Russia, returning to Marseilles *en route* to China. The following letter has appeared in the *Pall Mall Gazette*:—

SIR,—It is to be feared that in a very proper desire to show courtesy to the Chinese Mission, and to give them every opportunity of seeing things in this country, we are falling into an error which may be productive of serious evil consequences. When it comes to their being received in private audience by Her Majesty, and when it is announced from Birmingham that "the reception which the mission received was enthusiastic," it becomes high time to recall attention to the semi-official character of that mission, and to the grades of the members who compose it. Any persons are much deceived who suppose that in this mission they are coming in contact with mandarins of a high rank, or with princes of the royal blood. Pin, the head of it, may be exactly described as of a status beneath that of an Under-Secretary for State in this country, but above that of the chief clerk of the Foreign or Colonial Office. His position in his own country is certainly beneath that of Mr. Layard, though he is over sixty years old, and no new dignity is conferred upon him by his mission here. His son is of still lower rank, being only a Peih-tsih-she in one of the Boards at Peking; and the other youths are from the French and English schools connected with the Chinese Foreign Office.

Now, it should be remembered that this mission as thus constituted cannot be considered of importance by the Chinese, and that any excessive respect paid to it will be subject to misinterpretation in China, and lamentably certain to foster the old barbarian ideas of absolute celestial superiority. The effect may be to confirm the nation in the idea that we are ready to take up an inferior position in our anxiety to cultivate acquaintance with the Chinese. In particular, it is difficult to see why the members of the mission should have had a private audience with the Queen. At a public reception they might have been presented very properly, but their rank was scarcely such as to entitle them to anything more. They had no audience of the French Emperor, and the manner in which the Chinese have resisted all attempts at an audience of foreigners with their own "Son of Heaven" may give this interview an altogether undue importance. Their visit to Lord Clarendon was quite enough in the way of that kind of recognition, and no more was expected when they came. There is no objection to their being made one of the adjuncts to the present brilliant London season, but the thing has now gone a little too far. Having been sent only "to see and report," they

Digitized by Google

have no proper official standing, and, as I have pointed out, their position in their own country is by no means a high one. If a reception of this kind be conferred upon them, what can we do more when a high Mandarin of the Chinese Empire—a Governor, or Governor-General, or a President of one of the Six Boards—is sent here? Why, the Chinese will expect us all to kow-tow him! X.

PROPOSED RAILWAYS IN CHINA.

Sir Macdonald Stephenson, it will be seen by the subjoined letter, is steadily pursuing the subject of railways for China. We are at a loss to understand why the section between Woosing and Shanghai is not first recommended. The one proposed to Hangchow-foo is certainly a well advised scheme, but too long as a commencement:—

Shanghai General Chamber of Commerce.
SHANGHAI, March 29th, 1866.

R. S. Walker, Esq., Hon. Secretary to Committee of China Railway Company (Limited), Hong Kong.

Sir,—The reply to your letter of 12th January was postponed until the committee had been enabled to form some opinion as to the probable attitude of the Chinese Government with regard to the introduction of railroads. From inquiries they have made it would appear probable that the Imperial authority, whilst refraining from taking the initiative, would not oppose any scheme which had the support of the inhabitants of the locality to which it referred.

In this case the line most serviceable as an experiment would be one which, whilst displaying the advantages of the system and rendering it familiar to the minds of the people, would interfere little with vested interests, and not require the unanimous concurrence of numbers of small proprietors, before the consent of the authorities could be obtained.

The Committee believe that such a line could best be constructed by following the course of the Haitan or old sea wall, which extends from the mouth of the river Wangpoo, round the Pootung peninsula, along the shores of Hangchow Bay, to the city of Hangchow Foo.

A reference to the map lately constructed by Colonel Gordon will show the course the line would take; commencing from Shanghai the first portion might be either laid down on the embankment which already exists along the river bank to Woosung, or direct to the city of Chuen-Sha-ting, from that point along the sea wall past the cities of Nau Huei, Fung Hien, Kinshan, to Chapoo, which is within easy distance by boat of the important silk district of Kia-Hing-Fu. Here it would make a detour of five or six miles round the base of a range of low hills, then again joining the Haitan, and continued past Hayen, to the neighbourhood of Kinfu, where the embankment would have to be constructed for a few miles, again meeting the sea wall and passing into the silk districts of Haining and Hang-chow. The total length of this route is about one hundred and fifty miles.

With the exception of the two points named above, and for short distances where the Haitan is out of repair, no preliminary would be required to prepare the ground for the reception of the rails, the Haitan being a continuous level embankment, in part constructed of, or faced with stone, but throughout its length covered with a well settled body of earth, in all parts amply wide enough for the purposes of a railway.

There being no creeks communicating with the bay, bridges would not be requisite, and the whole being Government property, the outlay and possible opposition in purchasing ground is avoided.

That the Chinese Government would more readily grant the necessary authority for the construction of this line than any other there is little doubt, on the projectors agreeing to maintain the embankment in repair; it is a work looked upon by the Chinese as most important to preserve the low lands from inundations of salt water, and of late years the presence of the rebels and a want of funds have prevented adequate supervision; in consequence of this breaches have in some places been made.

In the case of no other line could so powerful an inducement be held out to the authorities to assist, and the committee believe that its advantages are sufficient to recommend it to the first notice of the China Railway Company.—I am, Sir, Your obedient servant,

(Signed) WALTER PEARSON, Secretary.

CEYLON TROOPS FOR HONG KONG.

From the *Ceylon Times* we find that the troops announced in a previous issue have gone forward by the steam transport *Feroze*. The following list furnishes the details of the detachment:—

Brevet Lieut.-Colonel Macdonald; Captains J. Meaden, J. C. Fielding, T. Gash; Lieuts. B. S. Du Jarden, J. M. Kerr, H. K. Fenwick; Ensigns R. Calvert, D. R. Falkiner, J. E. Collins, J. F. Forster; Assistant Surgeon J. F. Thompson. 8 native officers; 15 serjeants; 8 buglers; 16 corporals; 314 privates; 6 officers' wives; 7 do. children; 2 female servants; 150 soldiers' wives; 228 do. children.—Total 776.

THE TUMONGONG OF JOHORE.—This distinguished visitor, under the leadership of Dr. Scott, continues to pay visits to different objects of interest in the metropolis. The Coporation of London, which omitted to invite the Prince of Denmark (brother of the Princess of Wales) to Guildhall on the occasion of the banquet in honour of her marriage, did not forget to invite the Tumongong to witness the gift of the presentation of the Freedom of the City to Prince Alfred. The Tumongong was amazed at the magnificence of the reception hall, and little dreamt of the aid he lent to the picturesque costumes of those present. He was further presented at the State Ball at Buckingham Palace, so that he has every reason to be satisfied with the honour done to him. He is coming into great request for evening aristocratic assemblies.

THE WEST COAST OF COREA.

(*Continued from our last.*)

Sept. 20th.—The Corean junk left at three o'clock this morning for the island of Yeng-p'ing, taking the short cut through the channel formed by the mainland and the island of Yenshan. We pass with a fair wind an hour or so afterwards on the outside close under the cliffs and romantic-looking caverns. Our pilot steers through the rocks with the steady cool carelessness of familiarity. The swift tide rushing over the rocky bottom at first alarmed me. One moment we were sailing through a confused, jumbling, fretful sea, though the wind was gentle and fair, then passed through violent eddies caused by some large mass of rock broken off long since from its parent cliff. The coast of the mainland down to Yeng-p'ing, and thence as far as the eye can reach, consists of ranges of mountains, ridged, scarred, and wrinkled by torrents, the seams of which are everywhere visible. We caught the Corean junk, enchanged salutations, but were afraid to go on board on account of three Corean vessels coming westward. Arriving near Yeng-p'ing with the breeze falling and the tide turning, we made for the small island of K'o-ch'i, three miles to the north. A charming little island, covered to the summit with thick brushwood, and inhabited only by two old crows and innumerable gaudy draggon-flies. Yang-ga and myself scaled the peak, about 400 feet high. We could see our little boat struggling, with the aid of a scull, to make for Yeng-p'ing island. The tide was now getting low, and the numerous rocks and sandbanks which rapidly uncovered themselves would make an ugly impression on a British seaman. With the next tide we crossed over to Yeng-p'ing and joined the other Chinese junks which had followed us from Ch'ang-lin. The Corean vessel lay snugly at anchor in shore. The wind is rising—our anchorage a wild one, so we move around to the east side. Five junks proceed in line. The phosphorescence is remarkably brilliant. I had packed up my bedding and lain down on the mats, expecting Yang-ga's vessel to come alongside at midnight. Suddenly I heard a rushing through the water. It was without doubt a trader. I swung myself on deck in time to see her drop her mat-like sails, which are set by means of hauling in grass ropes which run through pulleys fixed in the top of the crooked slanting masts. The arrival was a two-master; the fore-mast (more appropriately fore-stick) taller than the main-mast (main-stick). She dropped her long wooden anchor, and, carried by the tide, floated down near us. Almost simultaneously all the sampons of our fleet made for her at a superb pace—for sampons! Our skipper returned soon with the news that she had brought 200 catties of last year's ginseng, which would find no buyers. Awaking early out of uneasy slumbers I missed Yang-ga. One of the crew told me he had sculled him an hour ago over to his junk. I immediately went after him and brought him back. He had already doffed his Chinese dress and tail, and rigged himself out as a Corean. So timid was he, that the moment we returned to our junk he began once more to plait his hair into a tail. The sea is too rough for us to go on board the small junk, and three or four curious islanders are watching us from the hill. Yang-ga says they have seen me.

There is nothing remarkable in the appearance of the large or small Yenp'ing islands. We can spy the common small oxen, carrying grass over the hills, and a few idle-looking ponies, which, being "Government horses," are not interfered with. The inhabitants of this island are very hostile towards the Chinese junks, trying by all manner of means to limit their stay to two or at most three days. They repeatedly argue, "We are so near the capital, if you are not off at once the war junks will come down upon you." It sometimes happens that when two or three Chinese junks only anchor too long off the island, boat after boat pushes off laden with Coreans who haul up the anchor, set sail, and drive them without violence away. To-day a boat-load of these vicious, starved, ill-natured looking islanders came off to beg (in their miserable sly manner) tobacco and wine. After having thoroughly enjoyed these luxuries they bade us begone at once. When about to leave they found to their dismay that their boat had gone adrift, and was swiftly floating ashore. We turned the laugh against them, ordering them to be off immediately. They looked very sheepish, and begged our sampon No. We got up anchor, spread sail, and pretended to be running away with them. Fortunately a native boat returning from fishing took them on shore. Instead of getting water on Yenp'ing we, in company with three junks, proceed to an uninhabited island to the N.E., about six miles off. The weather begins to look ominous. We lay in a supply of excellent water,

Digitized by Google

but are soon compelled to shift our anchorage. In the midst of the night I was awoke by the pitching of the junk. The sailor on deck cried out that we were dragging our anchors. At daybreak we tried to run back to Yenp'ing, failing in that, with a roaring breeze and a rushing tide, we returned to Ch'wang-lin Island. I wish I hadn't spoken to our skipper about the autumnal equinox. He fully believes we shall have a storm this evening. Nothing particular took place the last two days. No sign of our junk following us. My time partly passed in study and talks about religion with the good-tempered islanders They would sell me nothing, but I managed to exchange a knife for two plump fowls and forty fresh eggs. My stores were exhausted. Occasionally I indulged in the luxury of a dandelion leaf pudding. Our crew dined on these leaves, boiled in a thin covering of paste, about three times a week. On the 25th back again to Yenp'ing. A most charming evening. The green swathe of the Great Yenp'ing and lofty peak of the smaller island, the numerous islets clad with trees of dark green—one or two only telling us that Autumn was fully come. The sun is setting over the island, illumining in a most glorious manner a large, square dense mass of cloud, which trying in vain to shut out from us the glory, is itself irradiated into a dark velvety screen very glorious to behold.

Sept. 26. This morning the skipper and myself went on board a large Corean junk lying near us. It was a huge vessel of four hundred tons burthen. Being in ballast only, we had some difficulty in climbing up the sides. Twenty strong sailor-like individuals composed the crew. They invited us down into their large common cabin. Sitting down on a panther skin in Corean fashion, we felt quite at home after smoking the calumet of peace, drinking a little nasty acid rice wine and partaking of a piece of putrified parsnip. In honour of so large a vessel I had, in strange contrast to my otherwise Chinese costume, donned a pair of riding boots, which were duly appreciated. They complimented me on my Corean looks and speech, and amidst great laughter proceeded to dress me up in their fashion. The horsehair band kept up my tail and straggling locks. A white over garment tied with strings (the Coreans have no buttons), white trousers, socks, and straw sandals completing my attire. They assured me that I could fearlessly walk through the capital dressed in this manner. When it came to leave-taking I tried to buy my suit; but no, not for double their value would they part with them. The skipper had brought a piece of shirtings to exchange for rice. They promised to send us rice at night. These watchful islanders prevent any trade in broad day.

Towards evening we were startled by the discharge of a small cannon—a sign for us to depart. We fired a horse-pistol twice as an acknowledgment; the third discharge we took no notice of. The next day (27th) four native boats came off, and ordered us to leave at once. I replied that not only would we not go, but that I would accompany them back, to make complaint to the head man of the village. I jumped into one of their boats, and sculled myself ashore before they had time to recover from their astonishment. The three remaining boats followed me, crying out to people scattered about on the hill, "Iri onora, iri onora" (Come here, come here).

Before I had reached the village a crowd of ill-looking wretches met me, begging me to sit under shelter of an overhanging cliff. Soon followed the village head, a fine, tall British looking individual. We chatted a long time, and he promised to leave us in peace if we departed within three days. Whilst I sat on the beach waiting for our boat I was joined by a very intelligent-looking young man. We amused ourselves by tracing Chinese characters in the sand. He said he had at the capital heard of the "Lord of Heaven." In Corea, a country with a small trade, abounding with jealous gossip of idleness, Christianity will not long remain a hidden treasure. The words of a Roman Catholic missionary residing there in 1853 seem well founded:—"Ils sont nombreux, ceux qui sont deja convertis dans le cœur, mais la crainte de la persecution retient encore la verité captive. Ils nous aiment, ils nous favorisent; mais pour pratiquer notré sainte religion, ils attendent le grand jour de la liberté. Dans plusieurs endroits l'opinion est tellement prononcée en notre faveur que plusieur pensent et affirment que le Christianisme prendre necessairement possession de la Corée."*

Sept. 28.—Back to Ch'onglin, driven from Yenp'ing by bad weather. I will not fatigue the reader's patience by recounting all the little adventures that befell us; very little business has been done as yet, owing to the fact that two Corean contrabandists were beheaded last year; the "thousand catty merchants," as the Chinese term them, have not made their appearance. No junks bring more than 300 catties of ginseng at a time, and this, according to custom, is divided amongst all the junks which happen to be together when the trader comes. Plenty of cheating goes on nevertheless. For example, a Corean merchant comes on board our junk and tells our skipper he has perhaps 280 catties. He is told to give out that he has only brought 180, and the skipper throws in as a cumshaw a bit of pongee, &c.

Sept. 30.—A terrific gale; had a very narrow escape from shipwreck; 8 Corean junks driven ashore.

Oct. 4.—To-day, the fifteenth of the Chinese and Corean month, is a great day in this country. Yang-ga says eight out of ten get drunk. We sail in quest of our small junk. Passing the second Yen Shan, we saw on the top of a hill a native gesticulating in a most furious manner with his white ch'oksam. We sent our sampon on shore and brought him on board. He was very drunk, vociferating in the loudest manner that the inhabitants of the large village on the mainland were his partners in trade, and that he was on most intimate terms with all the local authorities. He said he had vast quantities of the sea weed (Lu-chui-ts'ai) and ox hides at home, and that towards night he would meet us in the western bay, and signal his arrival by lighting a fire on the beach. We amused ourselves through the afternoon by catching shell-fish for dinner, Towards evening, passing into the bay, we ran on a hidden sharp rock and broke the socket of our helm. We were greatly terrified, but the junk has not been injured. The helm is deeper in the water than the bottom of the junk. We were proceeding quietly in the bay when we saw a young Corean running down the hill. Could it be Kimga, one of the crew of Yang-ga's vessel? It was he, and brought us the sad tale that during the gale on the 30th the little junk had been dashed to pieces. He promised to come on board that night. About nine o'clock a fire was seen in two several places. We first got Kimga on board. He said that the only plan was for him and Yuga to return by land to the capital on foot and hire a vessel. In that case we should have to wait a fortnight. I gave him a letter for the missionaries there, telling them that I, a Protestant missionary, intended visiting them. I sealed my doom.

Oct. 5.—To-day we returned to Ch'ang Lin, and found that the other Corean Christian, Kim-Ch'ang-Ken, had got a passage to the capital in a rice junk.

8th.—In the middle of the night a trader came alongside of us bringing ginseng, and left a "partner," a young man originally from the town of Ichen, on the banks of the Ta lu Chiang, on board one of the Chinese junks—the usual assurance that the junk will come again. The days pass rather dull. Rambles on shore, practising conversation, distributing a few books; on board slender fare. We wait impatiently the arrival of our junk.

12th.—Off Yen Shan No. 1. This afternoon we anchored in a very retired position; soon a little vessel bore down boldly for us. A neighbouring junk, which seemed to recognise a passenger on board, sent out a sampon to bring off the merchant. Towards evening, though there was a heavy swell from the east, and the new arrival, Li Fang, was very sea-sick, he came to pay me a visit. I was agreeably surprised when he saluted me in pure Pekingese. He told me that eight years ago he had frequently visited Peking along with the Embassy. The duties, however, on all kinds of goods were so heavy and the profits so small (so he said), that he found it more advantageous to trade on the "high seas." He is an intelligent man of about 45 years of age. There can be no doubt of his having visited Peking, for I couldn't mention the name of a "hu t'ung" (lane) that he was not familiar with. He says that he has come to announce the speedy arrival at Yenp'ing of Pak-san-daneol, of the richer classes of contrabandists. The Chinese traders call him "the thousand-catty P'ak who wears silks and satins!"

13th.—Off once more to Yenp'ing with a fair breeze, tide, and sky. A most enjoyable sail. Arriving at nightfall, Li Fang, who was on our junk, was looking out for Pak-san-dal's vessel. The small boat (coro) soon came alongside, and our skipper with Li Fang went on board the large Corean junk. They soon returned with Pak-san-dal, who wished to see me. Thinking that I was a Roman Catholic priest he prostrated himself before me. I immediately undeceived him. He told me that he had become a Christian a year ago. His appearance leads me now to think that he is some kind of Government official who cannot resist the dangerous pastime of smuggling. His style and dress resemble those of the smaller officials who come here (Peking) with tribute.

* Annals de la Propagation de la Foi.—Tome 26, p. 396.

Digitized by Google

14th.—Just before daylight the vessels of Li Fang and Pak-san-dal moved out a respectable distance towards the main land with the intention of resuming trade to-night. It was well they did, for on the top of the hill under whose shelter we are anchored several of these suspicious islanders are seen peering at the vessels in the harbour. They have lighted a beacon, perhaps only to warm themselves. It is rather cold of a morning. Again to-night the traders came off and hastily disposed of their ginseng. Pak-san-dal sent me some Corean clothes, 200 catties of rice, and a bag of chestnuts for some scientific and religious books I had given him.

18th.—Visited the small island of Ta-shiu-Ya, 25 miles to the N.E. Our visit produced a great stir. All the small officials put on their large bamboo-slip hats and long white cotton dresses and came off to visit us; after being presented with sugar and tobacco, as usual, begged us to leave their shores. At night the islanders lighted five beacons, which were repeated on the island of Tian-shiu-Ya, and thence on the mainland near the provincial capital of the Kwang-Ha province—Hai-chouga. No war junks appeared, as some of our timid Chinese skippers anticipated. The weather very threatening.

26th.—A succession of dull days. To-day a gale from the east. We anchored on the west side of Yenp'ing, in deep water but good holding ground.

Towards evening our skipper cries out to the junks lying near, asking them whether they intend trying to get round to the eastern side! I didn't understand the wisdom of his remark till midnight. At 12 P.M. the wind shifted to the N.E. N., blowing with unabated fury. We hastily got up our anchors, and profiting by a momentary lull in the storm, without sail, attempted to run around the southern side of the island. Narrowly escaping more than one rock—it was nearly pitch dark—we reached a port sheltered from the N. and N.E., let go our anchors on a rocky bottom. Suddenly the wind shifted to the W., and blew a furious sea in upon us. The small anchor went, and in imminent risk of being dashed to pieces, we got up our large anchor and trusting to Providence allowed ourselves to be blown out towards one of the N.E. islands. We couldn't get round to the eastern side on account of numerous reefs. Not a rag of sail, we were whirled furiously before the wind. The junk compass was of no use. I announced the course every five minutes from my pocket compass. Again the wind went back to N.N.E., and drove us where we had never been before. Daylight came, and no chance of finding shelter—the waves threatening every moment to engulf us. Three men at the helm. The spray dashing over the junk and pouring into my cabin. Yang-ga earnestly praying, and not showing the slightest fear. Our merchant passenger blubbering; our skipper drunk. Far away in the distance we could see what we supposed to be the mainland. We did not attempt to steer any course—merely went before the wind. A wonderful course. Our best sailor stood with a bamboo rod taking the depth when we passed over a shoal. A shudder went through us as it gave in one place only seven feet. The tide was going out. Not far before us stretched a long line of foam—two miles long; we were borne for it, and, thank God, through it, into calmer water, rapidly towards an island, or rather a cluster of islands. At 2 P.M. we anchored in a harbour sheltered from every wind. On one side the mainland of the province of Ching-Chi, on the other side about 20 small scattered islands.

27th.—Went ashore, and learned the island under which we had found shelter was called Yung Tsung. Very few inhabitants who were very hostile and seemed miserably poor. Yang-ga knew the place and said we were by a short country road only 25 miles from the capital. I was very much inclined to land and proceed there. Yang-ga very sensibly said, "you had better not—the officials in the capital will assuredly not harm you, but the people might kill you; besides, unless our little boat has been lost, it will surely soon come. I could go ashore and home without danger, but as I have pledged myself to conduct you to the capital I will wait with you."

28th.—We are retracing our way to Yenp'ing. Tedious work; no wind, and we can only row with the tide. We see all the dangers we so marvellously escaped.

30th.—Passed outside of the two important islands of Chian T'ung (Chodung) and Chiang Hwa (K'ang Hwa), the latter, a large island, with its imposing looking three-peaked mountain is interesting from its historic associations. It was to this *is, and that, in the first month of the reign of the Manchu (Liau Tung) Emperor Tai Tsung (1626) the Corean King, Li Tsung, fled with his family.

The *then* warlike Manchus had entered Corea by way of Ichen, and having taken with ease all the towns in their southern march, were already threatening the capital, at this time fixed at P'ing Jang Fu.

We were going along merrily, when suddenly our helm struck; we found three and a-half feet of water, and we were a mile from the nearest land. The rising tide soon floated us off, and well for us, for the wind was rising. Our pilot remarked that the "heaven was going to let fall a dragon," and the dragon came surely enough in the shape of a very rough squall, that we were nearly upset. After battling with the wind for a considerable time we at last made Yenp'ing. In the evening several skippers came on board, and we talked till late of the dangers we had so wonderfully escaped.

Nov. 1st.—Stormy weather. Woe betide our little vessel if she is out in it. We are lying between the island and a sand-bank that is uncovered at low water.

2nd.—Last night the wind blew with such violence as to drive four junks, including ours, on the middle of the sand bank. It was next to impossible to stand, so strong were the gusts. About midnight the wind abated somewhat, and the tide being low, I went for a run along the sand bank in the now bright moonlight. With the returning tide all the junks were floated back into the channel.

3rd.—This morning half-a-dozen junkmen went ashore to catch shell fish, on which three of them were cruelly beaten about the legs by a score of cowardly islanders. Our little fleet of nine junks was in a state of high indignation. We could send fifty men to fight. In their own fashion they immediately loaded their rusty matchlocks and and small guns with powder only! and taking to their sampons, flying their respective flags, amidst great beating of gongs, made for the village. All the islanders were congregated like a flock of white sheep on the top of the hill. Two or three of the the fiercer ones were going through all kinds of warlike manœuvres on a near cliff.

Steadily our flotilla advanced, firing volley after volley of powder—the more prudent ones fired about five hundred yards from the village. Two of the most daring boats advanced towards the shore, where, by this time, many of those from the hill had collected themselves and were engaged very vigorously in pelting stones; nothing daunted, these two boats seized a small junk lying off the beach, in a trice they had lifted the anchor, and amidst great acclamations brought away their prize. It is a small tub and will be given up to-morrow.

4th.—Yesterday, stormy. To-day two islanders fixed a small stick in the ground at low water with a piece of paper attached to it. I sent my writer for it; the following is a free translation:—"This for you all to see. You are engaged in a contraband trade, a trade severely punished by our respective countries. Your vessels that come here are too much given to disturbances. You have been here already ten days. You have dared to cut wood on a sacred islet with a temple on it, rendering us liable to tempests. Your guilt is very great indeed. As we have none who look after the wood, you have taken it in a thievish manner. You are all a set of thieves. You indeed are a desperate set. One of our military officials will come with a thousand men, who will do battle with you and slay you. But now we are willing to make it up and not report it. You must believe this document. The other day you snatched away a vessel; you must return it, and then we will not entertain hostile feelings toward you. Be quick, be quick."

6th.—Li Tang with P'ak san dal returned to-day. The former brought me a supply of beef, honey, rice, and pears, a very timely supply, for I had during the past three weeks lived exclusively on rice, water, and shell-fish. Li Tang offered to take me to the capital if I would stay till his return, with a small boat hired for the purpose. I declined, for it was too late in the season, and sorrowfully told Yang-ga to return with P'ak san dal, which he did. At the moment of going Li said, with tears in his eyes, "I am so sorry my spiritual father has not been able to see the capital; return in peace to China, and come next year."

11th.—As our junk wished to wait for P'ak san dal's last trip out, I took my boxes on board the junk called the "Great White Ass," a larger vessel than ours, but with rotten hull, rotten sails, rotten cables, and rotten anchors.

Monetary and Commercial.

We very much regret to announce the stoppage of the Agra and Masterman's Bank; full details of this event, and also of the Consolidated Bank, will be found in another column. Our readers will remember that great opposition and some acrimony was shown to the admittance of the Agra to the privilege of "clearing," and the directors, finding that this was indispensable to their business, had recourse to amalgamation, at that time so much in vogue. The hostility of the London bankers we believe did not cease, but has simply been dormant, and doubtless this had much to do with the failure. Without for a moment suggesting that their banking opponents aided or joined in the nefarious operations of the "Bears," there is no doubt that the hostile feeling alluded to assisted them very materially. Still they found the directors and officers of the Agra and Masterman proof to all their assaults, and they had given up the matter when the disastrous news arrived from India, which was alone the cause of the stoppage. Although it was known that the directors and managers had engaged somewhat with the new order of things termed "financing," we never believed that men of such eminent ability as Mr. Mackintosh Balfour and Mr. William Shipman had gone beyond the range of safe banking limits. We expect to see a striking contrast between this bank's affairs and that of the Bank of London. It will give great satisfaction to a large constituency to see the Agra return to its *status quo ante*, and resume business with India, China, and Australia, without London business, leaving that to its old ally, the London and Westminster, who would no doubt take up again their old position. The failure of the Agra is especially to be regretted as calculated to destroy the confidence of the natives in India and China, who have taken bank-notes as readily as Government obligations, owing to the notification that such notes would be received as a legal tender. The local government of Hong Kong is in the habit of making a monthly inspection of the vaults of all the note-issuing banks, to ascertain if there be sufficient to cover the circulation of notes. It is to be hoped that measures will be adopted by which all the holders of bank-notes will be paid at once. Considering the public importance of the measure, no creditor of the bank's should offer any obstruction to it. If this step is not adopted the run upon the Oriental and Mercantile may prove most disastrous, and lead to the disruption of all business in the colony. Indeed the Oriental and Mercantile will be acting in their own interest if they advance any amount which the Agra may require to redeem its note circulation. Should they at the moment be short, let them apply to the other banks or to merchants for temporary assistance, and the appeal—as on a former occasion when Keying house was applied to—will not be made in vain.

The suspension has been announced of Messrs. H. J. Enthoven and Sons, general merchants. They have offices in Moorgate-street, and an establishment at the lead works, Upper Ordnance Wharf, Rotherhithe-street. The house has been long established, and has occupied a respectable position. The liabilities are expected to range from £250,000 to £270,000. The estate it is anticipated will show a surplus, notwithstanding losses through Messrs. Pinto, Perez, and Co., and a connection with Barned's Banking Company.

The biddings for £325,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta, £168,300; to Madras, £7,500; and to Bombay £52,000. The *minimum* price was fixed at 1s. 11d. on Calcutta and Madras, and 1s. 11¼d. on Bombay. Tenders at and above the *minimum* will receive in full. These terms show no alteration since the date of the last allotment.

By the last mail from China we perceive that messages were to have been transmitted to London early in April through Mr. Grant's courier service *via* Kiachta, thence by telegraph to St. Petersburg. We presume the arrangements have fallen through as we have not heard of any messages arriving.

H.M.S. *Pearl* takes out to Hong Kong a quantity of bronze coins, cents and mils, to the value of $30,000, not $500,000, as stated in some papers.

The annual meeting of the Ceylon Company (Limited) will be held on the 19th inst., when a half-yearly dividend will be declared. A call of £1 10s. on the 25,000 original shares of this company is to be paid by the 3rd July.

Complaints have been made of the long delay in distributing a dividend on the estates of Scott, Bell, and Co., Fletcher and Co., and Buchanan, Hamilton and Co.

Among other absurd propositions for the French colony in Cochin China it is now proposed to establish a bank. If it be one supplied with money by the French Government to be lent out, no doubt customers will not be wanting; but that it will answer the usual intentions of a bank we doubt very much.

The British India Steam Company had their annual meeting on the 30th May. The directors' report was duly passed. The Government of India has sanctioned the fortnightly service to the Persian Gulf, and the other lines of the company are working satisfactorily. Two of their steamers have been sold in Egypt, and two more, of 1,200 to 1,400 tons, are now being built.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 4th inst., was :—In gold to Galle, £500; to Madras, £2,629. In silver to Singapore, £1,200; to Hong Kong, £520; to Shanghai, £1,160. Total in gold, £3,129; in silver, £2,880.

MANCHESTER MARKETS.

Mr. Mendel's Circular states :—

The improvement reported on Tuesday last has gained strength in a material degree by an almost daily advance. Spinners and manufacturers are again placed heavily under contract, the increased prices now demanded are very firmly maintained, but the buoyancy of the market is in some measure checked to-day by the more warlike reports from Germany. Grey Shirtings 7 lbs., 11s. to 11s. 9d.; 8¼ lb., 15s. Cotton Yarn, No. 16-24, 1s. 7d. to 1s. 8d.; Maddapollams, 5s.; Long Cloths, 13s.; T-Cloths, 8s.; White Spot Shirtings, 15s.; White Brocade ditto, 15s. 3d.; White Damasks, 29s. nominal.

ARTICLES OF IMPORT.

TEA.—The trade in the present position of financial affairs still confine their purchases to immediate wants, which have been in a great measure supplied by sales made for cash, or at the public sales. Prices have again ruled rather lower, but importers as before are generally keeping back their teas in view of the favourable position of supplies. Our stock during the month has been reduced by 5,000,000 lbs., whilst the quantity of tea afloat is under 6,000,000 lbs., of which only a small proportion is Congou, whilst we may reckon the deliveries for the next four months at about 44,000,000 lbs., so that we shall see a gradual and steady decline in stock, which must ere long relieve our market, and induce greater confidence on the part of buyers. Low and dusty kinds of Congou have been sold at public sale at a decline of ½d. per lb., good common at 1s. to 1s. 0½d. per lb. Fair flavory kinds also sold at ½d. to 1d. per lb. lower, the better kinds, from 1s. 6d. to 1s. 10d., have met with a partial demand, but at a decline of about 1d. per lb. In fine to finest some very cheap sales have been made for cash, but this is scarcely any criterion as to value on regular terms. Common to fair blackish leaf kinds have been sold at from 11d. to 1s. 0½d. per lb. for cash, but on regular terms from 11½d. to 1s. 1½d. per lb. has been the price, showing a decline of fully ½d. per lb. Medium kinds have been neglected. In fine to finest the transactions have been very small at a decline of 1d. to 1½d. per lb. In new-make Canton kinds there has not been much done, but prices have given way. Amoy kinds have been sold from 11d. to 1s. 2d. per lb. for common to good. Oolongs, at public sale without reserve, have sold at very low prices, showing a de-

Digitized by Google

cline of 2d. to 3d. per lb. In Souchongs there has been but little done. Flowery Pekoes show no change. Common to fair Scented Capers have sold ½d. to 1d. per lb. lower; good to fine remain difficult of sale. Common to fair orange Pekoes, both Canton and Foo-Chow-make, have sold 1d. to 1½d. per lb. lower; good to fine are still without much inquiry. Uncoloured Japans have been without much inquiry, but there have been no fresh supplies on the markets. In Green Teas there has been latterly some demand for fine Moyune, Young Hysons, and Imperials, at full prices, but Gunpowders have sold rather lower, whilst Hysons still continue almost unsaleable; the commoner kinds of Green Tea are generally difficult to move, and prices are very irregular. Some arrivals of Canton Gunpower have come to hand, but as yet we hear of no sales. In old kinds the common to fair have sold rather lower. The stock in the United Kingdom on the 31st ultimo was estimed at 102,500,000 lbs. against 114,000,000 lbs. last year, and the quantity afloat at 5,906,217 lbs., against 8,793,000 lbs.—The following is from Messrs. Sillar and Bateman's Circular:—By a recent enactment in France, the duty upon teas imported into that country from tea producing countries in French vessels will henceforth be 40 francs per 100 kilogrammes, or about 2d. per lb., while those imported in foreign vessels and from other countries will be liable to a duty of about 4½d. per lb. Hitherto the duty has been 2s. 2d. per lb. upon all teas imported in other than French vessels, and in French vessels 6¾d. per lb. was charged if the teas came from India, 11d. from the Black Sea and a few other places, with the approval of the French Consul, and as much as 1s. 9d. 2-5ths if from any other country. It is too early to form any decided opinion as to the probable effect of this alteration; but it will doubtless largely increase the consumption, and, consequently, the export from this country. It is greatly to be feared that the suspension of the Agra and Masterman's Bank and the Commercial Bank Corporation of India and the East, whose branches extend to every port in China, will bring about such a disastrous state of things as entirely to suspend mercantile operatons at the shipping ports. We find that the whole shipments of tea from China for last season will fall short of our requirements by some 25,000,000 lbs., and that the stock in the United Kingdom will run down to equal barely four months' deliveries. Should the present disastrous collapse in the financial world have the effect of diminishing the shipments of teas for the forthcoming season, we shall find ourselves gradually but surely drifting into a tea famine, which no rise in prices will be able to allay; and it will, in all probability, be some years before the supply becomes large enough to admit of prices again descending to their present range. Supply and Demand.—The following table gives the figures up to the 30th September:—

February ships, due 30th June .. .. lbs.	1,146,401
March ships, due 7th August	1,410,465
April ships, due 15th September	1,391,334
Advised by telegram from Hong Kong, 12th May, due 30th September	1,000,000
Total supply .. .. lbs.	4,948,200
Three weeks' deliveries .. .. lbs.	9,000,000
One-and-a-quarter months' deliveries	15,600,000
One-and-a-quarter months' deliveries	15,600,000
Two weeks' deliveries	6,000,000
Total demand .. .. lbs.	46,200,000

SILK.—Messrs. Durant and Co.'s Circular states:—After many months of a more or less quiet market in silk we have at last reached a state of "no market." Week follows week and we have scarcely a transaction. The repressing influences are many—political, monetary, and perhaps the most important, the question of the result and cost of the coming crop of Europe. The quantity seems to be still debatable—recent favourable change of weather has helped matters materially, so that the quantity of cocoons will show a large increase upon last year, but the ultimate quantity of silk is still an open question. Upon this point the general idea seems to be about one-fourth more than last year—some are sanguine as to a third or possibly one-half more—and that the cost will in all probability show very decidedly in favour of the present year. The deliveries are of the smallest—so small that, notwithstanding the extremely scanty arrivals, the total stock shows only a slight diminution. We make some changes in our quotations, but all prices are more or less nominal. The following is from Kilburn, Kershaw and Co.'s Circular:—The past month has been one of the most inactive periods the Silk trade has ever known: the combining influences of financial panic, fear of war in Europe (now unfortunately almost a certainty), and the uncertainty and anxiety respecting the result of the European crops have all tended to cause a temporary stoppage of business; still, holders have been indisposed to give way in prices, and the trade equally indisposed to buy beyond their momentary wants; and such is still the state of the market, but there is little doubt that the great preventive to a resumption of business is the warlike condition of the continent. Stocks of silk in all hands, particularly of good silk, are small manufacturers never having been so light of silk, and the accounts of the Italian and French crops are certainly not good; the yield will, taking the aggregate of the European crops, be no doubt larger than that of last year, but to a small extent only, while, from reliable accounts, the quality will be decidedly inferior, and the silk of high cost. In this belief rests the desire among holders to remain firm. Silk Piece Goods.—Since the public sales on 2nd May the market has been without any notable feature. The small stocks of goods in importers' hands are not such as the trade are just now wanting, and the unsettled state of finance and foreign politics combine in adding to the previous quiet in all the branches of this trade. Of Bengal goods the delivery of Corahs, small as it was in May, was nevertheless an improvement upon that of May, 1865; the stock is chiefly in printers' hands, and very few goods are on the way—about 6,000 pieces. Of China Piece Goods there is only to note a general absence of imports. The next Silk piece goods sales are fixed for the 4th July.

COTTON.—There was a good demand in the beginning of the week, but in consequence of the imminence of war on the Continent, and further bank failures, the business has been greatly reduced, and the advance which was obtained has been lost, the market closing heavily at the quotations of the 1st inst. 880 bales Tinnivelly were sold in the London market this week at 9d. to 10½d. fully fair to fully good fair; and 100 bales to arrive at 9½d. guaranteed good fair, March sailing. Among the arrivals in London this week are, from Tuticorin—Coringa, 3,050 bales, Menden, 3,498; Braunstone, 4,250; Snaresbrook, 2,000. From Yokohama: Cleveland, with 110 bales. From Hong Kong: Lyard, 86 bales. At Liverpool the quotations are:—Middling Orleans, 13½d.; fair Dhollerah, 9d. per lb.

SUGAR.—Prices have remained without noticeable change during the week. The business reported on the spot by private contract has again been of limited extent, viz., 5,000 bags clayed Manila at 26s. 6d. to 27s.

RUM.—There has been a sale of 240 puncheons Penang at 1s. 4½d. per proof gallon.

COFFEE.—The parcels of Plantation Ceylon, at public sale, amounting to 1,300 casks 1,720 barrels and bags, have mostly been disposed of, prices ruling rather in favour of the buyer, viz., fine fine ordinary to low middling 70s. to 76s., middling to good middling colory 77s. to 82s. 1,511 bags Native were also chiefly sold, real good ordinary 59s., fine ordinary 61s. to 63s. 6d.; by private treaty, 1,600 bags have been realized, the bulk early in the week, common good ordinary to real good ordinary 58s. 6d. to 60s., fine ordinary 61s. to 62s. 6d.

RICE.—There has been an improved demand for soft grain, of which about 15,000 bags have been sold on the spot at stiffer prices; Nakrenzie at 9s. 10½d.; to 10s. 4½d.; Bassein, common to good, 9s. 6d. to 10s. 1½d.; and a floating cargo of 570 tons Rangoon, for the Continent, at 10s. 4½d. Of Bengal, only small parcels have been taken at about the former value.

CAMPHOR.—This market quite participates in the general heaviness; and we do not know of any transactions in the drug. Japan is very scarce.

CASSIA LIGNEA AND BUDS.—Nothing of consequence doing in either of these spices.

CINNAMON (CEYLON).—We quote 1st sort 1s. 11d. to 3s. per lb.; 2nd 1s. 8d. to 2s. 8d.; 3rd 1s. 7d. to 2s. 4d.; and 4th and Jungle 1s. 3d. to 1s. 9d. Market very quiet.

COCOA-NUT OIL.—This market has been very quiet, with most retail business, at about the former value. Auctions too unimportant for reference.

DRUGS.—Cubebs: Remain very flat; 140 bags at auction, all retired. Galangal Root: Much cheaper; 242 bags sold at auction at 9s. 6d. to 10s. per cwt. for fair. Rhubarb: Again dearer, supply being inadequate to requirements; and of 37 cases at auction, half sold, at 8s. 6d. to 12s. 6d. per lb. for fair to good, and 3s. 9d. to 6s. inferior to ordinary.

GUMS.—Benjamin: Quiet; of 39 cases Sumatra at auction a few only sold at £5. 10s. per cwt. for middling third quality. Damer: Nothing doing; 50 cases at auction retired. Gamboge: A single case sold at auction at £22. 5s. per cwt. for very good pipe.

GUTTA PERCHA.—Limited business in reboiled at low prices; 7½d. per b. for good.

HEMP (MANILA).—Quotations, although materially reduced, are still very nominal; 107 bales at auction nearly all retired; market very dull; about 100 bales are reported sold at £40 per ton for good roping.

HIDES.—Batavia: The sales last month comprised 2,948 Hides, at about late prices, Batavia Hides selling at 6¼d. to 6¾d. per lb.; Java 5¾d. per lb. Singapore, &c.: Buffalo Hides have sold freely at full prices. The sales have been 1,642 Penang Cow Hides and 2,774 Penang and Rangoon Buffalo. Cow Hides Light 6¾d. to 7¼d. per lb.; Heavy 4¾d. to 5¼d. per lb.; Thirds 4¾d. per lb.; Buffalo Best 6d. to 6¼d. per lb.; Seconds 5¼d. to 5¾d. per lb.; Light 4¾d. to 5¼d. per lb.

HORNS.—Buffalo: Dearer; 3¼ tons Siam, and 3¼ tons Manila at auction sold at 44s. to 52s. 6d. per cwt. for 2¾ to 3 lbs. average. Nothing doing in Deer.

INDIA-RUBBER.—Nothing whatever doing; only 12 bags Assam at auction retired.

JAPAN WAX.—Quiet: 64 boxes at auction all retired.

OILS.—Anniseed: Has improved 3d. per lb., but with limited business only. Cassia: Sales have been reported since our last at as low a price as 7s. per lb., but subsequently 7s. 3d. has been realised. Citronelle: Rather lower; and of 50 cases at auction, half sold at 3¾dt per oz. Lemon grass: Cheaper; and of 4 cases at auction, half sold a 1s. to 1s. 2d. per oz.

PEPPER.—Black: Not any auctions have been held; privately the market has been very flat, and limited business only has been done as low as 3½d. per lb. cash for Sumatra. White: Not any business of consequence doing.

SPICES.—Cloves: Nothing of interest doing. Mace: Quiet; 5 cases Penang at auction retired. Nutmegs: Quiet; only 2 cases Penang at auction, retired.

SAGO.—Nothing doing either in Sago or Flour.

TERRA JAPONICA.—Cutch Pegue: Very quiet; 324 bags at auction retired. Gambier: Steady, with limited business upon former terms.

TIN.—This market has been tolerably steady, but with only limited business, chiefly in Straits for cash, or with short prompt at £75 to £76 10s. per ton for flat, and £74 to £75 round bottoms.

TOBACCO.—Manila Cheroots and Segars: All the stock on sale consisting of heavy weights, sales are trifling. Manila Tobacco: Without change; few limited sales made at full rates. Japan: Is still much sough for, no stock on hand. Java: Although our assortment consists only of common to medium sorts, the trade have purchased to a fair extent. Fine

Digitized by Google

descriptions much wanted. Quotations: Java, 5½d. to 13d.; Manila, 6d. to 3s.; Japan, 4½d. to 8½d.; Manila Cheroots, 6s. 6d. to 7s. 6d.

MISCELLANEOUS.—Blacklead: Cheaper, and with very little demand; of 289 barrels at auction, one-fourth sold at 18s. 6d. to 19s. per cwt. for fine lump; and 9s. 6d. dust. Galls: All Galls of the Bussorah character remain very flat, and without business; China also dull and without demand, at previous value; but Japan scarce, and wanted. 158 chests China at auction retired. Musk: 1s., 2s., to 3s. per oz. lower, and 27 caddies at auction chiefly sold at 29s. per oz. for good Tonquin, and 20s. 6d. to 21s. ordinary; of 2 tins grain, one sold at 53s. for fine. Rattans: Only 7,965 bundles Penang at auction, mostly sold at 3s. 7d. to 3s. 9d. per 100. Sapanwood: Only 2½ tons Ceylon at auction retired. Shells, Mother o'Pearl: Firm; and of 150 cases Manila at auction, two-thirds sold at £7. 10s. to £7. 17s. 6d. per cwt. Star Anniseeds: Flat, and offering at lower prices; 185 cases at auction, retired. Siam: Sticklac: Very dull, and nothing of interest doing; 85 boxes at auction, retired. Vermillion: Scarce and much wanted; 5 boxes at auction sold at 4s.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £7 10s. to £8; nail road, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 10s. to £6 15s.

STEEL.—Swedish keg, £15 15s.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7½d. per lb.

TIN.—£85 for block; £86 for common bars. Tin plates, best charcoal, I.C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 10s. to £22 15s.; shot, patent, £23 10s. to £24; sheet, £21 10s.; spelter, £20 to £20 15s.; zinc, English sheet, £28 to £29; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—

The monetary panic which has prevailed since our last monthly circular of course has had the effect of stopping business in the Metal Market to a great extent, both buyers and sellers being very cautious in their operations. Iron.—Scotch Pig Iron has fallen to 52s., which is the quotation to-day, being a fall of about 30s. per ton in six weeks. As was expected, nearly all the operators concerned in the extraordinary speculation for a rise, which has been carried on now for many months, have made very heavy losses, more, indeed, than the unfortunate "bear" party. Shipping Iron is not so flat, and may be quoted 3s. to 7s. per ton dearer than Warrants, according to brands. Welsh and Staffordshire are dull, and excepting for favourite brands there are few transactions. Copper.—A large amount of business in this metal has taken place, owing to the probability that, for the present, no large supplies can come from Chili. But the continued high rate of interest, and the very large stocks actually on hand, will, we expect, effectually prevent any advance of importance for some time to come. The last few days the market has become heavy, and buyers few. The present quotations are: English Tough, £85 to £86. Burra, £87. Kapunda, £89. Chili Slab, £82 to £83. Tin; the Smelters reduced their quotations on 8th ult. 6s. per cwt., making the nominal price, Block 85s., Bars 86s.; but purchases can be made below these rates. We have had a good demand for Straits for immediate delivery, especially for Fine Square, which is scarce, and for which 75s. 6d. to 76s. has been paid. Ordinary Square and Round has been sold at 74s. to 75s. So much of the stock in London is altogether off the market, that, but for the quantity of Banca offered from Holland, the price would no doubt improve. These importations may prevent any great advance for some time. The quantity of Straits Tin afloat for Europe is about 1,152 tons, against 1,413 in 1865, and 1,183 tons in 1864. Tin Plates: There is a great falling off in the demand for Tin Plates, and prices consequently are easier. The low prices, however, spoken of—21s. for Coke at Liverpool—are of second-hand parcels, and are not offered by makers direct, who have only slightly reduced their prices. The exports last month were 80,000, against 115,000 boxes in May, 1865 Lead: There have been but few transactions the past month, and these but for small quantities. Some Foreign has been offered at low rates. The best makers of English, however, maintain their quotations. Spelter: Is dull, and has fallen considerably during the month. Zinc: Is £1 per ton cheaper. The stock on the 31st ultimo was 5,787 tons, against 6,874 tons at the same period last year. In Quicksilver no alteration.

EXPORT OF BULLION TO CHINA, &c.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s. 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS are decidedly the best remedy for all disorders of the stomach and bowels, the liver and kidneys. They act with so decided an effect, and yet so gently, that people of the most delicate constitutions may take them with the most perfect confidence. They do not contain a single grain of mercury or other noxious substance, being composed exclusively of rare balsams. They are therefore equally safe and efficacious, and, as a family medicine, nothing yet invented or discovered can be compared with them for a moment. With these inestimable pills at hand, together with the printed directions affixed to each box, no other medical advice or assistance can be needed in any ordinary case of sickness.

SOLID MAHOGANY FURNITURE FOR INDIA, CHINA AND THE COLONIES.

HEAL and SON are Manufacturing, ESPECIALLY FOR use in EXTREME CLIMATES BEDROOM FURNITURE, which is entirely Free from Veneer. A general Assortment always in Stock.

IRON AND BRASS BEDSTEADS

Suitable for all Parts of the World. Their Stock consists of 2,500 Bedsteads.

HEAL AND SON'S PATENT HORSEHAIR MATTRESS.

HEAL and SON have Patented an Improvement in the Manufacture of Mattresses, which prevents the material from felting into a mass, as is the case with all Mattresses made in the ordinary way. The Patent Mattresses are made of the very best Horsehair, are rather thicker than usual, and the prices are but a trifle higher than those of other good Mattresses.

HEAL AND SON'S ILLUSTRATED CATALOGUE

For INDIA, CHINA, and the COLONIES, of Bedsteads, Bedding, and Bedroom Furniture, SENT FREE TO EVERY PART OF THE WORLD to which there is Book Post.

HEAL and SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and, he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

Prospectuses, with through rate to a thousand places free on application.

G. W. WHEATLEY and Co. (late Wagnorn), 150, Leadenhall-street, E.C.; CHAPLIN'S, Regent-circus, W., and 23, Regent-street, S.W.

INDIA AND CHINA.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations:—

Destination.	Ships.	Docks.	To Sail.
Shanghai	Dilkhoosh ...	E.I.D.	With des.
Shanghai	Jas. Shepherd	W.I.D.	With des.
Kanagawa and Yokohama	Heroes of Alma ...	W.I.D.	With des.
Penang	Algernon ...	L.D.	With des.
Hong Kong & Whampoa	Red Riding Hood ...	W.I.D.	With des.
Nagasaki, Japan ...	Lady Alice...	W.I.D.	With des.
Singapore	Petchelee ...	W.I.D.	With des.

For Freight and Passage apply at 5, Newman's-court, Cornhill, London; or York Chambers, 55, King-street, Manchester.

INDIA, CHINA, AND AUSTRALIA.

SHAW, LOWTHER, & MAXTON will despatch the following high-classed VESSELS to their respective destinations:—

Ships.	Destination.	Docks.	Date of sailing.
Winchester .	Calcutta	S.I.D.	June 15
James Rus .	Hong Kong and Whampoa. ...	S.K.D.	Imm.

For Freigh or Passage apply to SHAW, LOWTHER, and MAXTON, 2, oyal Exchange-buildings, E.C.

THE BRINDISI ROUTE TO THE FAR EAST

THREE DAYS' SEA PASSAGE FROM ITALY TO EGYPT.

THE SOCIETA ANONIMA ITALIANA, DI NAVIGAZIONE ADRIATICO ORIENTALE,

Under Contract to carry the direct Mails, Despatch their first-class English built Steamers "Cairo," "Brindisi," "Principe di Carignano," or "Principe Tomaso,"

BETWEEN

BRINDISI AND ALEXANDRIA,

ONCE A WEEK.

This Route affords facilities which no other does either in going or returning from Egypt.

In GOING to EGYPT passengers can leave LONDON or PARIS after the Departure of the Indian Mail from either place, and arrive at ALEXANDRIA before its arrival.

In RETURNING from EGYPT, a Special Train is arranged to leave BRINDISI, so that a SAVING of possibly 36 HOURS may be effected. The passage from Brindisi to Alexandria is performed in 72 to 82 hours. The time of departure is as follows:—

From BRINDISI for ALEXANDRIA, on the 7th, 14th, 22nd, and 30th of each Month at 3 P.M.

From ALEXANDRIA for BRINDISI, a few hours after the arrival of the Indian mails, usually about the 5th, 12th, 20th, and 28th of each Month.

FARES:—

	1st Class.	2nd Class.	3rd Class.
BRINDISI TO ALEXANDRIA (AND *VICE VERSA*) ...	275 fr.	200 fr.	90 fr.

For further particulars apply to, at FLORENCE, VIA MONTEBELLO, 42; PARIS, RUE DE L'UNIVERSITE, 10.

LONDON: Messrs. PALMER, 44, Eastcheap, City, E.C.

CHINA, JAPAN, and SINGAPORE.—The following splendid first-class SHIPS will be despatched as under:—

Port.	Ship.	Class.	Dock.	Last Ship. Day.
Shanghai ...	Albuera ...	A1 13 yr.	E.I.D.	June 13.
Hong Kong & Whampoa ...	Lobelia ...	A1 13 yr.	E.I.D.	June 14.
Kanagawa (Yokohama ...	Mountain Ash ...	A1 10 yr.	E.I.D.	With des.
Singapore ...	Falcon ...	A1 13 yr.	W.I.D	With des.

For Freight or Passage apply to KILLICK, MARTIN and Co., 28, Nicholas-lane, Lombard-street, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destination.	Ships.	Class.	Tons.	Dock.
Hong Kong & Whampoa .	Sea Belle ...	A 1 10 yrs.	650	E.I.D.

Colombo ...	Celestial Queen.	A 1 13 yrs	842	S.K.D.

No. 22, Great St. Helen's, E.C.

FROM LIVERPOOL.

Destination.	Ships.	Tons	Class.	To Sail.
Shanghai ...	Kate Carnie...	549	A 1 13 yrs.	Imm.
Batavia & Singapore ...	Geffrard ...	334	A 1 12 yrs.	"
Batavia & Sourabaya ...	Astrea ...	312	—	"
Calcutta ...	William Fairbairn ...	1293	—	"
Calcutta ...	Bebington ...	889	AA 1	"
Bombay ...	Tiverton ...	1174	AA 1	"
Bombay ...	City of Agra .	1073	AA 1	"

For terms of Freight or Passage apply to MCDIARMID, GREENSHIELDS, and Co., Liverpool.

Regular Line of Packet Ships.

FOR HONG KONG and WHAMPOA, the Clyde-built clipper JAMES RUSSELL, A 1 13 years, 768 tons register, JOHN GRIFFITHS, Commander; lying in the St. Katharine Docks. This ship has a full poop, with excellent accommodation for passengers.

For Freight or Passage, apply to SHAW, LOWTHER, and MAXTON, 2, Royal Exchange-buildings, London, E.C.

With very quick Despatch.

FOR HONG KONG and WHAMPOA, the beautiful clipper ship SEA BELLE, A 1 ten years, 650 tons burthen, J. HIBBARD, Commander, East India Docks. This splendid vessel is well-known in the India and China Trades, and offers a first-rate opportunity to shippers of fine goods.

For Freight or Passage apply to LIVINGSTON, HOLDING and BRIGGS, 31, Great St. Helen's, Bishopsgate-street; or to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.

FOR COLOMBO, CEYLON, Direct, will have very quick despatch, having a considerable portion of her cargo engaged, and shipping, the splendid new clipper ship JANE MARIA, A 1 nine years, 342 tons register, JOHN HUGHES, Commander; loading in the West India Docks. This beautiful vessel offers the best opportunity to shippers of fine goods.

For Freight or Passage apply to F. TALLACK (late W. A. Winkley), 23, Birchin-lane, Cornhill, E.C.

Will have very Good Despatch.

DIRECT for COLOMBO, the splendid British-built clipper ship CELESTIAL QUEEN, A 1 thirteen years, 842 tons register, WILLIAM WATT, Commander; lying in the St. Katharine Docks. This magnificent ship, from her size, high class and fast sailing qualities, having made her last passage from Calcutta in 98 days, offers an unusual opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

With immediate Despatch.

DIRECT for BOMBAY, the magnificent clipper ship ALBERT VICTOR, A 1 twelve years, 1,184 tons register, T. J. CLARKE, Commander; lying in the East India Docks. This splendid high classed ship, built in 1864, is now quite ready for cargo, and being one of the fastest vessels afloat, offers a most desirable opportunity to shippers of fine goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

THE BANK OF HINDUSTAN, CHINA, and JAPAN (Limited)

Notice is hereby given, that an EXTRAORDINARY GENERAL MEETING of the Company will be held at the Banking-house of the Company, 1, Bank-buildings, Lothbury, in the City of London, on Monday, the 25th day of June next, at One o'clock P.M., and the business to be transacted will be to confirm a resolution passed by the Company at an Extraordinary General Meeting, held on Thursday, the 24th of May last, of which the following is a copy:—

Resolved,—That Clause 46 of the Articles of Association be repealed, and that in lieu thereof the following be inserted, viz.:—Subsequent Ordinary Meetings shall be held once every six months at such time and place as the Directors may from time to time determine.

Dated this 4th Day of June, 1866.

By order, R. SWIRE TOMLIN Secretary.

No. 1, Bank-buildings, Lothbury, London.

TO IMPORTERS.

The undersigned beg to remind Importer of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

ASSORTED SAMPLE CASES FORWARDED ON RECEIPT OF REMITTANCE OR ORDER ON LONDON AGENT.

E. MOSES AND SON,

CORNER OF MINORIES AND ALDGATE, LONDON

COWASJEE DINSHAW,

Close to the Landing Place. Depot of EUROPEAN, CHINA, AND INDIAN WORK.

WINE, BEER, CHAMPAGNE, and SPIRITS of the best quality. Bombay-made Soda Water and Lemonade. Perfumery, Confectionery, Oilman's Stores, and Stationery of every description. Sola Topees and Canvas Shoes, &c., &c., &c.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

List of Passengers.

PASSENGERS OUTWARD.

Per P. and O. steamer Pera, from Southampton, June 20.—To Hong Kong: Mr. Weeks Mr. S. Deacon, Mr. J. D. M. Thomson, and four 2nd class passengers. To Singapore: Mr. G. Henderson, and two second class passengers. To Ceylon: Mr. R. B. Carson, Mr. and Mrs. J. Affleck, and five 2nd class passengers. To Calcutta: Mr. Parker, Mrs. Parker, Mrs. T. Maynard, Capt. Walpole, Vety. Surg. Barr, Mr. Bromley, Rev. F. W. and Mrs. Homer, Mrs. Obbard, and fourteen 2nd class passengers. To Madras: Capt. A. A. Gordon, Mr. W. W. Sanderson, and eight 2nd class passengers. To Suez: Commander H. M. Dyer, and two 2nd class passengers. To Alexandria: Mr. and Mrs. Lubbock and female servant, Masters Soden, Pinsent, and Babot, and one 2nd class passenger.

From Marseilles, June 28.—To Penang: Mr. W. and Mrs. Brooke, Lieut. J. and Mrs. Lowndes, and Captain Grove. To Shanghai: Mr. H. M. Twomby. To Hong Kong: Mr. H. H. Levers, Mr. Matsmoto and four friends. To Ceylon: Col. H. C. Byrde, Mr. R. B. Tytler, and two 2nd class passengers. To Calcutta: Mr. Behrends, Mr. J. H. Mudie, Mr. P. J. Elliott, Mr. Carr Stephen, Mrs. Progose, Captain and Mrs. G. J. Reeves, Mr. A. Weekes. To Madras: Mr. and Mrs. D. White, Mr. J. R. Arbuthnot.

Per P. and O. steamer, from Southampton, July 4.—To Penang: Mr. and Mrs. Walter Scott and six children, Miss Dickson, Miss Waller. To Singapore: Mr. J. W. Campbell. To Ceylon: Capt. and Mrs. Hawthorn, R.E. To Yokohama: Mr. C. T. Bland.

From Marseilles, July 12.—To Hong Kong: Mr. J. Russell.

Per P. and O. steamer, from Southampton, Aug. 4.—To Ceylon: Mrs. Grinlinton.

Per P. and O. steamer, from Marseilles, August 28.—To Singapore: Captain A. C. Bing.

Per P. and O. steamer, from Marseilles, Sept. 12.—To Hong Kong: Mr. and Mrs. Sinclair, Mr. and Mrs. Smale, Miss Smale, Mr. Smale, jun., Mr. H. Beveridge. To Shanghai: Mrs. Forrest.

Per P. and O. steamer, from Southampton, Sept. 20.—To Hong Kong: Mr. John Brown. To Ceylon: Mr. L. Carey.

From Marseilles, Sept. 28.—To Singapore: H.H. the Tumongong of Johore and two friends.

DETENTION OF THE INCOMING MAILS.

UP to yesterday no tidings had been received of the homeward mail bringing dates from Hong Kong to the 13th ult., which is due this day. Yesterday, however, a telegram was received by the P. and O. Company announcing its arrival at Suez on the 25th inst., and stating that the detention of the *Nemesis* had been caused by foul winds. Her mails cannot, therefore, be expected in London until the 4th prox., or about the due date of the French mail; and, as usual in such cases, we go to press without waiting for them in order that the regularity of our issue may not be interfered with. Telegrams have also been received from Galle, announcing that the incoming French mail had passed there in due course; a private one received by Messrs. Sillar and Bateman states that she has 4,000 packages new teas on board.

Telegrams have also come to hand in advance of the mail of the 30th May from Hong Kong, which briefly announce the capture of Newchwang by the rebels.

THE WEST COAST OF COREA.

(*Continued from our last.*)

Nov. 12th.—We tried to tack out; owing to her rotten tackle we got on the sand bank and broke the rotten socket of our rotten helm. We stuffed pieces of wood in, and binding them round with rope managed with the helm a thumping and a creaking to move out.

13th.—Nearly got on the rocks last night, owing to our helm being so stiff, whilst passing Yen-Shan No. 1. Cold; a snow-storm; ice on deck.

14th.—Arrived at Hoang Hua Ts'ai T'o Tsy (Molito); bought rice, small pigs, eggs, &c. Our skipper has an admirable way of getting the suspicious Coreans to sell their things. Something like this:—

Skipper. I want some rice.

Corean. Havn't got any.

S. How much can you let me have?

C. Didn't I tell you I havn't got any?

S. Ha, ha, ha!

C. Oh, oh, oh!

S. Look here! Let me have 200 catties.

C. There is not that much in the island.

S. Well, bring what you can. Here! take some wine.

C. I'll let you have a little to-night.

15th.—A regular winter north-eastern gale—snow—bitterly cold.

16th and 17th.—Ditto.

18th.—Move up into Hai Chen Bay, and purchase about 160 catties of rice and 60 of beef. Waiting for a wind to be off. The junks had left the place on the 14th for Chefoo. It is to be feared they will never reach it. The gale has been too strong to allow them to "fang lautsz," *i.e.*, when driven before the wind to cast out an anchor with a plank attached to make it float, and the tugging this behind retards speed.

22nd.—Started for Peling; at midnight got on a sand bank.

23rd.—Floated off, gave the Orphan Rock (covered at high water) a wide berth, and steered for Chian Tau (Chodo) of the charts, for we were afraid, the weather looking threatening, to proceed direct to Manchuria. Half way between Peling and Chodo our helm got out of order, but as the weather looked brighter we resolved to steer boldly for Hai-Yang, an island off the coast of Manchuria, a splendid wind and fair tide.

24th.—Last night we passed an anxious night. In the open sea a cloudy sky. "When will it be light?" was the incessant question put to me by the crew.

25th.—Hai Yong visible through a slight fog. We have missed it by 10 miles, but as there are plenty of islands here we run for Chang Fy. How welcome the Chinese houses and Chinese islanders, who came off and pointed out the best an-

Digitized by Google

chorage. The island is not so favoured as many in Corea, but the industrious inhabitants make the best of it.

26th.—I can count twenty islands from the top of a hill here. This island has been very unfortunate. In June last some of the numerous bands that have been ravaging Manchuria for the last few years came over here in a stolen junk and frightened the four score unarmed islanders into paying them a ransom of $500. The villains stole everything they could lay hands on. In 1863 they had visited them in a similar manner.

A small shopkeeper produced, to my surprise, the following documents, which he appeared to treasure carefully :—

"No. 1. Her Majesty's ships *Blonde* and *Pylades* visited this island in search of water and provisions, and have been kindly and hospitably received. They beg to recommend its inhabitants to any of their countrymen or other European nations who may arrive.—Given on board the *Blonde*, 23rd day of September, 1840.

"THOMAS BOURCHIER, Commanding Officer."

No. 2 speaks of the visit of H.M.S. *Dove* in 1860.

28th.—Stormy weather since we arrived, but it is easy to land, as we all are well protected. Proceed to Kwang Li, and thence, on December 1st, to P'i-Tsy-Wo, a pretty harbour in Manchuria. At low water the bay looks one vast field of mud, but of such soft consistency that a boat can fly over or through it with great ease in a breeze. Many reports of robber bands about.

Proceeded in a cart to Newchwang (Yingtsze), and learned that two days after leaving P'i-Tsy-Wo the rebels had made a descent on it. I shall not readily forget the hospitable reception given me by the foreign community at Newchwang. H.B.M.'s Consul, T. T. Meadows, Esq., was indefatigable in preconcerting measures for the defence of the foreign settlement in case of a rebel attack. Leaving Newchwang I proceeded over the frozen river on horseback towards the Great Wall. About sixty miles from Newchwang I met a small Mandarin, who three years ago had accompanied an embassy from the Court of Peking to the capital of Corea, for the purpose of sacrificing in honour of the deceased wife of the reigning prince.

Daily rumours were rife that all parts were teeming with rebels. We were supposed to have passed within five miles of one of their camps. I met with no adventures. Aid from Peking was momentarily looked for.

Passing through the Great Wall at Shan-Hai-Kwan we met the first detachment of soldiers on their march to Shan-Yang (Moukden), and, as I had divested myself partly of my Chinese disguise, I was addressed in "pidgin" Russian, "Drashti" (How do you do), for the avant garde was composed of Solon cavalry from the banks of the Amoor. I had not proceeded many miles further when I met the "Disciplined," who chorussed at me "Fire! Halt!" Number One, in pidgin English and with a comical pinch asked me if I had seen their guns. It was biting cold, and the sheepskin coat allowed to each one of them was shoddy and comfortless-looking.

They marched in fair order. Wen Hsiang I passed early one morning. He was travelling in an ordinary Chinese cart.

Jan. 5.—I arrived here. From Pitzwo to Newchwang is about 120 miles; from Newchwang to Peking about 150.

THE NEW SEASON'S TEA CLIPPERS.

OUR very smart contemporary the *Pall Mall Gazette*, is really very serviceable in stirring up matters which the older daily papers never trouble themselves about, but pursue the humdrum style of fifty years ago. But in the following notice of the China clippers it will be seen that they have rather got out of their depth, and like many other landsmen when they touch on nautical matters become rather ridiculous. Fancy the innocence of the Editor in believing that two ships could "run side by side" from China to England! The 89 days' passage might be done, but on the occasion alluded to it was 108. The £1 per ton subscribed by the London merchants is equally verdant. The names of the ships are wrong; it was the *Serica* and not *Taeping*, which raced with the *Fiery Cross*. The following is the paragraph alluded to :—

The great ocean race of the tea ships is now being run from China to England. The following, we learn from Hong Kong, is a list of the competitors: —*Fiery Cross, Serica, Ariel, Taitsing*, which were to start first; and *Sir Lancelot, Taeping, Chinaman, Ziba, Black Prince*, and *Young Lochinvar*, which were to sail a few days after the others. The betting at Hong Kong runs very high. *Ariel*, a new ship, is the favourite; *Taeping* has also sanguine supporters, and not a few that *Fiery Cross* will be again the winner. Last year *Fiery Cross* and *Taeping* raced side by side the whole way, till they entered the Channel abreast, when the wind failed, and the *Fiery Cross*, obtaining the aid of a tug, won by a few hours, the entire voyage having been accomplished in 89 days. The *Serica* won in 1864. A prize of about £1,000 is given to the clipper which brings the first new tea to England, £1 a ton being subscribed by the London tea merchants for the purpose.

THE STRAITS TRANSFER.

In confirmation of the statement made in our last, we now have to announce that the Bill was read a first time on the 13th inst. We give the following extract from a Treasury letter, dated 2nd June :—"In order to avoid further delay, my lords consider it best that the fixed contribution of £59,300 a year should be adopted for the first five years; and, on this understanding, they assent to the introduction of the Bill into Parliament for the transfer of these Settlements. As regards that portion of your letter which refers to barrack accommodation for any troops stationed in the Settlements for Imperial purposes, my lords agree that no charge on this account ought to fall upon the Settlements. The only condition they have to make upon the subject is, that after sufficient barrack and hospital accommodation has been provided at the expense of the Settlements for the troops stationed there for local purposes, any existing barracks or hospitals which may be in excess of such accommodation, and which may be required by the War Department, shall be handed over to that department free of any charge, to be maintained at the Imperial expense during their occupation thereof. As regards the public debt of the Settlements, my lords conclude that the arrangement with the Indian Government, as explained in the Colonial Office letter of the 24th March, 1865, is to be carried out; that, as regards the convict expenditure, the whole of it from the date of transfer will be repaid by the Indian Government and that the notice for the removal of the penal establishment within three years of the date of such notice will be given not later than the date of transfer, which should take place, as recommended in the 65th paragraph of Sir Hercules Robinson's Report upon the Settlements, at the close of the colonial financial year, viz., 31st December 1866 or 1867, according as the necessary arrangements can be completed. As regards the civil establishment to be sanctioned for the Settlements, my lords will be prepared to approve of an establishment on the basis of that suggested by Sir H. Robinson, in Enclosure No. 9 of his report, subject to such modifications as experience may have since dictated, or which any change as regards the municipalities of the Settlements may hereafter render necessary."

ETHNOGRAPHY AND THE EAST.

The Ethnographical Society of Paris and the directors of the *Revue Orientale* has just issued the specimen number of a small journal entitled *La Civilization*, which is intended to embrace a very extensive and important list of subjects, namely, all those questions which affect the moral, intellectual, and physical progress of nations and individuals; geography, agriculture, rural economy, acclimatisation, industry, and commerce. One of the direct objects aimed at is to constitute an organ of communication between the various societies scattered over the world which occupy themselves with ethnographical subjects, and the editor invites contributions from all quarters. The new journal is intended to be published weekly, and its extremely low price putting all idea of profit out of the question, we have great pleasure in noting its appearance, and congratulating the French ethnographers upon the zeal which they exhibit in the pursuit of their favourite study. In the pages of this modest little first number is the announcement of an *Annuaire des Orientalistes*, to appear next year, and which will contain regal, Ministerial, and diplomatic information concerning Eastern nations; lists of Oriental decorations and their possessors; Oriental institutions and societies in France and other countries; bibliography; the press; necrology; and other matters interesting to those connected with or studying Eastern nations. Communications are invited from all who desire their names to appear in the *Annuaire*, or who have any matter of interest to supply.

THE MESSAGERIES IMPERIALES.

The Report of the Messageries Imperiales Company on the operations of 1865, presented at the recent meeting of shareholders, has been printed.

The number of vessels possessed by the company, afloat or on the stocks, was 63, of 18,640 horse-power, and of the estimated value of 83,683,581 francs. The reserve fund amounted to 2,293,445 francs. The distance traversed by the vessels of the company in 1865 was 472,215 marine leagues, and the average speed attained equalled 9.5 knots. The number of passengers carried was 153,273, and of cargo tons 169,857; the former being 10 per cent. less than in 1864, and the latter 7 per cent. more. The total receipts were 44,046,708 francs, the expenses 37,370,165 francs, and the interest on bonds absorbed 844,491 francs. The net profits were consequently 5,832,051 francs. After setting apart 291,602 francs to the reserve fund, there remained 5,400,000 francs for the shareholders, sufficient (as stated in a previous issue) for a dividend of 50 francs, and a balance of 40,448f. 97c. to be carried forward.

The report replies at great length to the attacks that were made upon it a few weeks back by the Corps Legislatif. It demonstrated the necessity of subventions to great steam navigation enterprises, and showed that the company has fairly that accorded to it, by fulfilling all the conditions of its contract; that it has rendered great service to commerce, and that in particular it has given great extension to the silk trade with China. The meeting approved of the report, and, on the proposition of the directors, sanctioned the raising of 10,000,000 francs on debentures, to be employed in establishing lines of steamers to ply on the coasts of Algeria.

M. STANISLAS JULIEN'S WORKS.

M. STANISLAS JULIEN, the eminent Chinese scholar, has addressed a letter to us, in which, referring to an article headed FRANCE AND THE FAR EAST, that appeared in our last issue, the writer says :—

It is not true that I have been a long time at work on a great work to

Digitized by Google

be entitled *Tresor de la langue Chinoise.* I should like nothing better than to make a more complete Chinese-French dictionary than exists at present, but I have neither the time nor the means. In the first place, it would be necessary that the Imprimerie Impèriale should possess a complete font of the 42,000 characters of the dictionary of the Emperor Khang-Hi, and afterwards, if the dictionary were compiled, expend in printing it a sum of from 80,000 to 100,000 francs, which it would be impossible to obtain from the Government. It is not exact that the Imprimerie has made arrangements with Peking engravers for the supply of a set of dies for a font of small Chinese characters; but a private individual has ordered from Peking, at his own cost a set of small Chinese characters cut on blocks, and according to the last letter received by him from China, the blocks are promised early in the spring. The work seems to have been finished, but the engraver asks another month to recut some that were wrong."

The information thus shown to be incorrect was taken from a publication edited by a gentleman who is a colleague of M. Stanislas Julien in the school of Oriental living languages, and to whose pages several other gentlemen holding similar positions are frequent contributors. We regret having given currency to erroneous information, but can hardly be considered to have laid ourselves open to any charge of carelessness in taking the announcement of an oriental work from the pages of a recognised oriental organ.

FRANCE AND THE FAR EAST.

(To the Editor of the *London and China Telegraph.*)

SIR,—A constant reader of the *London and China Telegraph* from its foundation, I could easily have pointed out from time to time, while reading it, articles that surprised, and even wounded me as a Frenchman. But I never should have thought of finding in it an article like that headed "France and the Far East" in your last number. The chance publicity it had received in France through a publication which is not looked on *au serieux* by any one (not even by those concerned in bringing it out) was bad enough, without seeing it reproduced in your columns where one is not accustomed to find such stuff. You will wait a long time (take that for certain) for the publication of the works you have thus announced.—Your very humble servant, PHILO-SINENSIS.

Paris, June 19, 1866.

THE CHINA STEAMSHIP AND LABUAN COAL COMPANY (LIMITED).

The directors have issued the following circular:—

The directors, in handing you herewith notice of a call of £2 per share, which they have found it necessary to make in completing the works they have in hand for the due development of the company's property, would wish to observe that they have desired to avoid calling upon the shareholders during a time of monetary pressure, and though compelled to do so, they have made the call as limited in amount, and extended the payment over as long a period as the effective conduct of the company's operations would admit of their doing. They are of opinion, however, that the progress and prospects of the company are such as to justify them in believing that they have approached the turning point in the affairs of the company, and that the next half-year will show results, accruing alike from the capital and labour which has been invested in the undertaking, such as to afford the prospect of a satisfactory dividend.

Since the directors last met the shareholders in general meeting, they continue to receive encouraging intelligence from the East; the steamship *Mona* is now running with the mails and passengers between Manila and Singapore (calling at Labuan), in pursuance of the agreement entered into with the Government of Manila to perform a monthly service in connection with the Messageries Imperiales overland route. As explained at the meeting, the board have looked upon the establishment of the line in question as developing, practically and advantageously, both the mining and shipping interests of the company. The board are, moreover, assured that an important step is herein taken towards what may be termed the colonisation of the island. In confirmation of their views in this respect, the following extract from the letter of their marine superintendent, dated Singapore, April 9th, is satisfactory, and shows evidence of a rising trade with Labuan, far exceeding what the directors could have looked for at so early a period:—

"I am arranging with the native merchants in Labuan to have their cargo ready for shipment the moment of the vessel's arrival, so that there will be no detention. To carry out this I am constructing a temporary wooden pier, with attap godown, so that the cargo awaiting shipment by the *Mona* will be always ready. By this arrangement the vessel will be filled up at Labuan each trip, and I have already received an application from the Chinese merchants to keep a space of 300 tons clear for them. I cannot, however, enter into any arrangement to this effect until I find what will be the space actually required by the Manila trade."

Mr. Pitman also reports, under date Singapore, 9th April, in respect to the *Labuan*, a small steamer the board purchased some time back at Singapore from H.M.'s Government:—

"The *Labuan* leaves to-day in tow of the *Mona* for Labuan. I have had her placed on the slip and thoroughly examined, and have every reason to be satisfied with her. Her boilers have been removed and thoroughly repaired, and are now as good as new, so that no further repairs or expense will be necessary for the next four years. The entire cost of her thorough repair will not be more than the amount I first estimated to get her ready for sea, and now the company are possessed of a steamer in every way suited for the requirements of Labuan and the coast of Borneo. I am confident before long of showing some profitable results, and I only ask three months to be able to liquidate the expense in fitting her out."

The board hope that the next mail will bring the announcement of Mr. Sinclair's arrival in Labuan, and the commencement of a large daily increase in the yield of coal. At the date of the last advices, the steamers *Fusi-yama* and *Japan*, and H.M.S. *Rattler* were coaling at the island, and a ship belonging to the Netherlands India Company was loading 700 tons coal.

Samples of the oil from the petroleum springs, and other oils have arrived, and can be seen at the company's offices. The board look for Mr. Sinclair's full report upon these springs with much interest.

The price of coal has been raised from 5 to 7½ dols. to vessels calling at the island. At Hong Kong the company's agents announce the conclusion of a contract with an old established steam line on the coast of China for the supply of coal at Labuan at 7¼ dols. per ton. A sailing vessel had just been chartered by these parties to proceed to Labuan for a cargo.

The agents also write from Hong Kong, April 14th:—"We have had further enquiries for coal, not only for steamers, but the Mint has applied for a quantity to test its excellence for smelting."—By order of the board of directors, J. D. H. ELPHINSTONE, Chairman.

HOUSE OF COMMONS.

PIRACY IN THE CHINA SEAS.

(June 12th.) Col. SYKES gave notice that on the 29th he would call attention to the parliamentary paper, No. 262, relating to the surrender to the Mandarin authorities by Her Majesty's naval officers in the China seas of alleged pirates, and ask the Secretary to the Admiralty by what Act of Parliament, Order in Council, or other instruction, naval officers serving on the coast of China held direct communication with the Chinese authorities, and surrendered crews and junks alleged to be pirates without the intervention of the consular authority, the only legal communication with the Chinese Government.

THE DISTURBANCE AT NEWCHWANG.

(12th.) Colonel SYKES inquired what amount of truth there was in statements made in letters addressed to Shanghai and Hong Kong newspapers, received that morning from China, that the American consul and his marshal, and four other Europeans, had been wounded in a conflict with an armed body at Newchwang, and that Mr. Consul Meadows had caused all British subjects to be supplied with a rifle and ammunition for their personal safety.—Mr. LAYARD stated that the Government had no official information of the nature mentioned in the question. From the various questions of this nature which had been asked by his hon. and gallant friend he was afraid that many of the statements sent to him were greatly exaggerated. There was in the papers that day a statement of the *North China Herald* that the United States consul had been engaged in some fracas at Newchwang, but that account did not agree with the statement in the hon. and gallant gentleman's statement. It appeared that during last winter, when the port of Newchwang was blocked up with ice, the British consul organised a body of volunteers, but he was not aware that anything had been done by them. When the last accounts left a number of vessels had arrived, and a flourishing trade was being carried on in the port.

Naval and Military.

The Admiralty received tenders on the 14th inst. for the conveyance of 350 tons light, 1,400 hogsheads of porter, from Mortlake Brewery, to be ready for shipment in July; 315 tons navy provisions, &c.; 35 tons naval timber, 12 to 45 feet long by 1½ to 4 inches thick to Hong Kong.

Pearl, 17, screw-corvette, Captain J. F. Ross, left Spithead on Saturday the 16th inst. for China.

Petrel, 3, screw-sloop, Commander W. E. Gordon. The crew of this vessel, in Plymouth Sound, were inspected on the 19th inst., by Captain Ewart, of Her Majesty's ship Cambridge. The Petrel is understood to be intended for the Cape of Good Hope station.

By the last accounts from Canada we have learnt that a powerful squadron, under Sir James Hope, had assembled in the St. Lawrence. Among the ships which were ready to take action against the unfortunate Fenians, the more conspicuous were the Duncan, of 81 guns, and a crew of 900; the Wolverene, of 21 guns, and a crew of 275; and the Pylades, of 21 guns, and a crew also of 275, officers and men.

Commander A. R. Owen, R.N., died in the Royal Naval Hospital at Bighi on the 8th inst. He was appointed to the command of the sloop Falcon, and was proceeding to join her on the Australian station, but on reaching Malta he had to be landed dying. His remains were interred on the 9th inst., with the usual Naval honours.

The Austrian Government has refused permission to the Hon. Colonel Foley, C.B., the Military Attache to the British Embassy at Vienna, to accompany the Imperial army in the field. General George Cadogan, C.B., is to act as Military Commissioner in Italy. The Prussian Government has given permission to Colonel Walker, C.B., Military Attache to the British Embassy at Berlin, to accompany the Prussian army in the field, and has also given him (understands the *Army and Navy Gazette*) a special position with temporary rank. Colonel Foley has been relieved at his own request, and Colonel Crealock is appointed to succeed him, and has already left for his destination.

A return on Officers' Commissions, issued on Thursday, shows that in the years 1864 and 1865, 127 officers died while on full pay, the amount of the sums which they had paid for their commissions being £110,010; that the amount of £69,524 10s. was paid, under the Royal Warrant of October 23, 1865, to the families of officers, the said officers having paid £69,915 for their commissions; and that two officers applied during the years 1863, 1864, and 1865 for leave to retire by sale of their commissions, and were not permitted to do so. These officers were Lieutenant Grimble, of the 10th Regiment, who had paid nothing for his commission, and whose application for leave to sell was refused in consequence of his recent exchange from the 102nd Regiment; and Ensign Coskinas, for whose commission £450 had been paid by the public, and who was consequently not allowed to realise by sale of his commission.

The Coast-guard ships stationed in the English and Scotch ports are under orders to embark a large portion of the men doing duty on shore, but entered on the books, on the 30th inst., and to proceed to sea, on Monday, the 2nd of July, for a cruise of a month or six weeks. The ships on the coast of Ireland are not included in the order, and they will, therefore, remain at their several stations.

Digitized by Google

11TH REGIMENT.—The officers of the 2nd battalion intend to erect a tablet in Exeter Cathedral to the memory of those of the battalion whose bones rest in the "Happy Valley" at Hong Kong.

20TH REGIMENT.—Ensign Moore, 1st battalion, has sick leave to Europe. Ensign George Gordon Ferguson, 1st battalion, died at Fort William, Calcutta, in May. The deceased entered the service as ensign, by purchase, April 1, 1862.

On the 15th April, a small craft, the Amoor, 247 tons burthen, L. Gyllenpalen, captain, arrived at Simon's Bay from St. Petersburg, bound to the Russian settlements up the Amoor River, after being out 163 days, without touching at any port. She is victualled for three years, carries Government stores, and a solitary man in the shape of a "bill of lading." It appears to be a custom with the Russian Government, when chartering ships for some purposes, instead of giving the captain, according to the English custom, a bill or bills of lading, to put one of their own—perhaps as in this instance, a military—officer on board the vessel, who goes as the "bill of lading." The Amoor being a Swedish ship she carries a Swedish crew; but the "bill of lading" not knowing their language, nor they his, is like a human being with a lost tongue, or one who has lost his power of speech. He is a suave, gentlemanly man, thoroughly cut off from conversation with those around him. The little vessel, after leaving Copenhagen on the 3rd November, had the misfortune to be caught in one of the devastating gales which sent so many noble ships to the bottom of the English Channel and on to the coast, between the Christmas and the middle of January last. The captain was ordered on leaving his port to go to some English port in the channel; but, seeing so many ships falling victims to the gales, and that he would very seriously jeopardise his ship and cargo, which is believed to be one of very great value, he thought it right and wise to save both; and though the ship was damaged, to try to avoid the wildest part of the storms if possible. To do that he had to make for the North Atlantic, although without proper charts, and so he got away round the Shetland Isles, where he must have seen old winter, cold, dark, boisterous, and dreary. She now lies comfortably enough in Simon's Bay, and will leave again shortly.

Continental Intelligence.

HOLLAND.

(FROM OUR CORRESPONDENT.)

ROTTERDAM, JUNE 24.

The great conflict between the German States creates here the highest interest. Whatever the result of this war may be, so much seems certain, that the Treaties of 1815 will be entirely swept away from European international law, which of course is of the greatest importance for us in relation to our connection with the German Confederation. The fear that we should be involved in this war has departed. Our Government will remain neutral, and being of opinion that the German Confederation has been broken up, the representative of Luxemburg at the Federal Diet was ordered to present a declaration stating that the Netherlands declined to take part in any course of action which should imply a recognition of the continuance of the federal pact. As to Austria, it seems that State sympathises with our neutrality, for it has desired that our ministers at Berlin and Florence should be charged with the interests of the Austrian subjects in Prussia and Italy. The statement that our Minister for Foreign Affairs, Count van Zuylen, had asked a credit for the mobilisation of the Limburg contingent, which was put forward in the French papers, is not agreeable to truth.

The stirring incidents abroad of the past days have somewhat drawn public attention from what has been passing here at home. The principal topics undergoing discussion in the papers are the new Cabinet and its opinions, and the law concerning the lower class instruction, notwithstanding that nothing new can be said about either. When the new Chamber meets in September it will be seen immediately that the Cabinet was called to office by his Majesty, because the Liberal Government had palpably lost the confidence of the Second Chamber, and could not retain office with any prospect of dignity or utility. How this mixed Cabinet will be able to go on is still for me an enigma, now that three-fourths of the seats in the House are filled by members of the Opposition. I think they will soon be obliged to come to a dissolution and to make an appeal to the country, or that the Cabinet will keep itself alive by paying a heavy price in concessions to the spirit of the age, as Tories are obliged now to do.

The report of the sections of the Second Chamber about the Indian Budget for 1867 has been issued. Many are the remarks and explanations embodied in it. The reorganisation of the Inland Government and the abolition of the culture percentage are justly defended by the majority, but not so as to the proposed increase in the salaries of the inland chiefs. Some of the members insisted that the Indian pensions should be regulated by law. The high sums for unforeseen expenses and the extraordinary high figures for the military and marine forces were severely attacked. The general opinion was that the budget showed no principle of frugality, but on the contrary increasing administrative prodigality, which would become onerous for the Indian finances as well as those of the mother country.

In several parts of our kingdom appeals are made to the citizens to constitute volunteer corps. You will remember that in a former letter I told you that the Utrecht students were the first who formed such a corps. The present Minister of the War Department highly approves this movement.

On Thursday last the General Exhibition of Dutch Industry and Art was inaugurated in the Crystal Palace at Amsterdam, in the presence of Prince Frederick, some of the Ministers, and other high authorities. The exhibition is said to be most successful. Mr. Sarphati—so well known in the East and West Indies—who projected the building of the palace, was not present, owing to severe illness, and, indeed, died the day after the opening took place.

On the 19th inst. the annual meeting of the Dutch-Indian Commercial Bank was held at Amsterdam. The profits made during 1865 showed a sum of f.165,762. 53c., out of which a dividend of f.6.74c. per share of 125f. was proposed and adopted. According to the report the business in India, especially at Sourabaya, promises to be very lucrative.

The cholera epidemic spreads itself more and more. Since it broke out in the provinces of South Holland and Utrecht 4,008 cases have occurred, of which 2,410 have proved fatal. Our beautiful bathing place, Scheveningen, suffers much by this epidemic, because it prevails very heavily in the immediate neighbourhood of the Hague.

In consequence of the German war, by which many of the post and telegraphic lines are stopped, the Minister of the Home Department has announced that the mail line *via* Trieste to India is closed.

Since the cholera made its appearance about 600 persons were attacked here; at Leyden, 622; at the Hague, 184; at Delft, 363; at Gouda, 96; at Utrecht, 263; of which 50 to 60 per cent. proved to be fatal.

The Prince of Schleswig-Holstein arrived some days ago at the Hague. It is widely rumoured that a marriage with Princess Marie was the aim of his visit. This, however, has not been confirmed, notwithstanding that the Prince has already taken his departure. Our Royal family has left the Hague for their seat "het Loo," where the members, including the Prince of Orange, will remain till the 30th inst.

The Amsterdam Canal Company has held its first annual meeting of shareholders. The report about the business done and the financial state is said to be satisfactory. The Prince of Orange was chairman, *honoris causa*. This was the first time that the heir to the throne has shown any interest in public affairs. Some time ago I wrote you about the plan for turning into dry land the greater part of the Zuyder Zee. This plan seems now to be on a good way for being realised. By this work 200,000 hectares of good ground will be won. When the monetary crisis has passed the plans will be made public. The capital wanted is 40,000,000f.

His Majesty has granted his dismissal to Mr. J. des Amorie van der Hoeven as Consul of the Netherlands in China, and a pension of 4,000f. to Mr. N. Olivier, formerly Minister of Justice.

COMMERCIAL.

Trade in general is very dull, and only a very trifling business is done, so that it nearly can be said that transactions have stopped. Of course this must be attributed to the monetary condition of the market and the war in Germany.

SUGAR.—In the last week 3,000 mats Java were sold at 2f. under May value. Holders decline now to operate at these prices; the market closes, however, dull.

COFFEE.—The market is artificially kept up firm.

TOBACCO.—In Amsterdam 1,821 b. Java, DMVO, were sold at 30 cs.

VANILA (Bourbon).—220 kilo. were sold in auction at 3f. to 7¾f. On the 26th 750 kilo. Java, ex Copernicus, from Samarang, will be offered in auction.

BANCA TIN.—800 slabs were sold at 45½f., and 1,700 slabs at 45f.

TEA firm, with much attention for ordinary Congou. On the 11th of July 2,200 chests Congou, ex Yeavering Bell and Hydra, will be offered in public sale.

MONEY.—There has been but very little doing in the Funds during the last week. The dulness of the weather, the financial difficulties, and the want of information from Germany, owing to most of the telegraphic communications having been destroyed, had a tendency to limit business. The next accounts are fully expected to announce that a collision has taken place between the Austrian and Prussian troops; thus commencing a war the duration of which is impossible to foresee. Dutch Two-and-a-Half per Cents., 54; Three per Cents., 63⅜; Four per Cents.,82; Netherlands Bank, 233; Central Railway (shares), 68; Rotterdam Bank, 90; Austrian Metalliques, 40; do. Amts., 57¼; Nation., 42⅛; Trading Company, 132 (the dividend announced is 94f. per share of 1,000f.). The demand for discount is quiet. The Bank rate unaltered.

SHIPPING.—ARRIVALS.—May 28, at Texel, from Samarang, Andrew Jackson; June 3, at Brouwershaven, from Batavia, Minister Thorbecke; 4, at Brouwershaven, from Batavia, Adriana Petronella; from Cheribon, Affghan; from Banjoewangie, John Moore; at Texel, from Padang, Uneas; 5, at Texel, from Pasaroeang, Ruby, Rifleman; from Panaroekan, Tjielingsie; from Tjilatjap, Zes Gezusters; from Banjoewangie, Telanak, Jacoba Helena; 5, at Brouwershaven from Batavia, Johannes Martinus; from Panaroekan, Bezoekie; from Pasaroeang, Panama; 7, at Brouwershaven, from Banjoewangie, County of Lanark; from Pasaroeang, Minister Fransen van de Putte; from Java, Maria Elizabeth; at Texel, from Sourabaya, General Wyndham; from Macassar, Indus; 8, at Texel, from Batavia, Admiraal de Ruyter; 13, at Texel, from Batavia, Advance; from Banjoewangie, Thusnelda; 14, at Brouwershaven, from Pasaroeang, Bilderdyk; June 14, at Brouwershaven, from Pasaroeang, Bilderdyk; at Texel, from Banjoewangie, Robertus Henrikus.

DEPARTURES.—May 24, from Brouwershaven, for Batavia, Jason; from Zierikzie, for Batavia, Burgemeester Hoffman; 26, from Hellevoet, for Hong Kong (via Cardiff), Patriarch Samhiri; 27, from Texel, for Batavia, Gerard Pieter Servatius; 29, from Hellevoet, for Hong Kong (via Newcastle), Jacobus; 30, from Brouwershaven, for Batavia, Hendrik Ido Ambacht; 31, from Texel, for Sourabaya, Baltimore; for Macassar (via Sunderland), President van Ryckevorsel; June 1, from Texel, for Batavia, Maria Veronica; 9, from Texel, for Sourabaya, Constantia Estafette; June 21, from Hellevoet, for Singapore (via Newcastle), Batavia; for Batavia (via Newcastle), Louis Meyer; from Texel, for Singapore via Newcastle, Delft, Grootmeester Nationaal. June 24, from Brouwershaven, for Batavia, Cornelis Anthonie; for Sourabaya, Rotterdam. June 23, from Texel, for Padang, Almelo.

READY TO SAIL.—For Singapore, Ellina; for Batavia, Anna Sophia; for Java, H.M.'s steamer Willem.

PASSENGERS INWARD.

From Java, per Minister Thorbecke, Messrs. J. Gudde and H. Kip, Mrs. van Hees and family; per Telanak, Mr. Grouw and family, Mr. Roelands and family, Messrs. G. T. Waterschout, J. Scheerhout, J. Sens, and Mousset.

PASSENGERS OUTWARD.

For Java, per Hendrik Ido Ambacht, Mr. G. A. Malga; per Maria Veronica, Mr. A. W. van Ravenswaay; per Estafette, Mr. H. Verhelft and family, Messrs. V. E. Schouzer and L. F. Bufle.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, JUNE 19.

Business is totally at a standstill, and it is quite impossible to communicate anything under the heading of "Commercial" as usual. Money is very scarce, and discount has risen to 9 per cent. for first-rate paper. Though several houses are more or less in difficulties, owing to the stagnation of all mercantile affairs, there have been as yet no failures of importance.

Railway communication is broken in various places and the regular postal service is interrupted. The Hamburg Post-office has given notice that for the present all mail matter for England, France, Spain, and Holland will be forwarded by the merchant steamers from this port to London and Hull; but as they are not all swift or regular, it is impossible to guess when this letter will reach you.

From St. Petersburg we learn that the Emperor, accompanied by the Grand Duke heir apparent, the other Grand Dukes, and Admiral Grabbe, Naval Minister, and attended by a numerous suite, embarked last week in the Imperial steam yacht *Alexandra* for Cronstadt, and paid a visit to the screw corvette *Bogatyr*, lately returned from the Far East. After minutely inspecting the ship, the crew were put through their great gun exercise and other manœuvres, such as lowering boats, getting down top-gallant-masts, &c., and acquitted themselves so much to the Emperor's satisfaction that on steaming away the *Alexandra* signalled to the corvette, "The Emperor is so pleased with the condition of the *Bogatyr* and discipline of her crew that he has given orders to distribute a sum of money among them at the rate of a silver rouble per head." All the officers of the vessel have been promoted to higher rank in the navy respectively.

At the last sitting of the Imperial Academy of Sciences the academician Baer read letters from M. Schmidt containing intelligence about the scientific expedition sent to examine the Mammoth recently discovered in the north of Siberia, which letters are to be printed for the information of the public. M. Brandt exhibited a fragment of the skin of the same animal, sent by M. Schmidt to the Zoological Museum.

SHIPPING.—ARRIVED.—June 15, Superb, from Batavia and Sourabaya.

SAILED.—June 18, Alsen, to Hong Kong.

Literature.

Ti-Ping Tien-kwoh; the History of the Ti-Ping Revolution, including a Narrative of the Author's Personal Adventures. By LIN-LE. 2 Vols. 8vo. London: Day and Son.

In China there have been at all times since foreign traffic to its shores began, a number of adventurers of doubtful antecedents, who try to push their fortunes among the inhabitants in a clandestine manner. They are of no particular nationality, but generally they are seafaring men, who leave the dull occupation of life on board ship for the more exciting and venturous life on shore. Upon the opening of the treaty ports this class of men increased considerably, and they became a source of trouble to the foreign consuls by their violation of the treaties. This was especially the case during the latter part of the Taiping rebellion, when the rebels held Nanking and devastated the country between that city and Shanghai. These "rowdies," as they are termed by respectable foreigners in China, carried on a contraband trade in arms and munitions of war between the two places, and many of them enlisted in the rebel ranks for the sake of plunder and profit. Of this class is the author of the work before us, according to his own statement, where he glories in his questionable acts with foolish vanity. And notwithstanding the very pretentious appearance of these two gilded volumes, illustrated in the gaudiest possible manner, it is true to its colour a "rowdy" book. It is a pity that so much elegance of "get up" should have been expended on such literary rubbish. The outside of the book might grace the drawing-room, while the language and subject-matter inside would disgrace the kitchen. The author claims to be an Englishman, under the Chinese sobriquet of "LIN-LE," which is simply the way they pronounce the common name of Lindley. It would appear as if he were ashamed of being known by his English name. And well might he be so; for of all the tirades of abuse against English policy, institutions, and Englishmen in China, this is the foulest that has appeared.

In the first chapter we are treated to a namby-pamby love adventure, in which the author tries to make himself a hero in kidnapping a half-caste girl from the Portuguese colony of Macao. This is about the most sickly piece of sentimentalism it has been our misfortune to peruse; and as it crops out every now and then in the subsequent chapters, forming an episode to his lumbering compilation and narrative, it becomes disgusting. Not only is a large portion of the letter-press taken up with maudlin expressions of passion and feeling towards his *cher-ami*, but he furnishes what purports to be a portrait of her. We are very doubtful about the truthfulness of that, and the majority of the illustrations, which evidently have been "cooked up" in England from the inflated descriptions of the author. In like manner we doubt the author's "hair-breadth 'scapes," in pursuit of this girl, where he describes himself taking her out of a Portuguese lorcha, after having shot one or two men, and conveying her in safety to Nanking. This part of the narrative is got up in the true "sensational" style, and might be tolerated in the flimsy novels of the day, but not in a book which professes to give us an insight into one of the bloodiest and greatest religious impostures of the age. The only genuine portions of the book are where the writer assumes his real character as an adventurer among his companions of the same stamp. There he is witty and amusing, only the language is vulgar and the ideas smack of the forecastle. So also are his views on religion, with which a portion of the work is taken up. Here pitch and piety seem to go together in his admiration of the *quasi*-Christianity professed by the Taipings. In his opinion Hung-seu-tsouen and his fellow impostors were the purest Christians on the face of the earth; and he has the impudence to compare their dupes and followers in this respect favourably with his own countrymen and women. Such comparisons and inuendoes are only to be treated with silent contempt.

Had the author confined himself to his foolish love adventure, and some account of the inner life of the Taipings, he might have furnished a small volume of a harmless character, which we might have reviewed as suitable for romantic readers. But when he has the impertinence to befoul the characters of such men as Admiral Sir James Hope, Sir Frederick Bruce, Sir Harry Parkes, Colonel Gordon, and other British military, naval, and civil officers during their service in China, he deserves the severest castigation at the hands of the critic. Here is a vulgar sailor, a *mauvais sujet*, attaching himself to a horde of Chinese blasphemers and rebels, who use him as their tool in smuggling arms and ammunition, while he joins them in fighting against the constituted authorities; and he, forsooth, puts himself forward as an authority on the principles of British policy and the acts of British representatives in China. To judge of his position among the foreign community at Shanghai, or any of the treaty ports where a British consul resides, we must consider that had he been taken prisoner by the Imperialists and claimed protection as a British subject, the consul would have refused it and handed him over to the Chinese authorities as an outlaw—a renegade without a legitimate claim on his country. Yet this individual has the

Digitized by Google

effrontery to come to England and publish the following foul aspersions against the reputation of Colonel Gordon, who commanded the disciplined Chinese army, through whose prowess the Taiping Rebellion was suppressed :—

"Unfortunately for the reputation of Major Gordon, since his elevation to the position of General of Futai Le's Anglo mercenaries, he had been too much accustomed to intrigue and encouragement of treachery to have felt a proper indignation at the Soo-chow affair; and it is possible he might have had some knowledge of the planned perfidy before it was up into execution, and so was not sufficiently horrified to throw up his 1,200 taels (£400) per month. Gordon's behaviour in the treachery of the Burgevine-Ti-Ping legion is one specimen, and a very strong one, too, of the conduct referred to. He induced the Europeans who went over to him to desert the Ti-Ping cause by his promises of office, bribes, and safe conduct to Shanghai for such as were tired of fighting. Some mistaken individuals have ascribed this proceeding to the humane disposition of the man who condoned the ruthless massacre of his paroled prisoners, who assisted as the principal agent in the vast destruction of life and desolation of country during the unjustifiable British hostilites against the Ti-Pings, and who never put himself to the trouble of saving the lives of those he assisted to vanquish."

Those who may not be conversant with the history of the circumstances to which these false accusations allude, might conclude that this person who calls himself "Lin-le" stood in the same position among the Taipings as Colonel Gordon did in the service of the Emperor of China, and that he was cognizant of the alleged facts. As already shown, the one was a bandit, prowling among the loyal Chinese for the sake of plunder and contraband traffic, afraid to show himself among the foreign community in the light of day; while the other was a British officer of great military skill, who conducted the operations of a disciplined army, through a hundred engagements, with unexampled generalship and success in the Far East. For these acts, and the noble manner in which he maintained the honour of the British name, he has been rewarded by promotion in the corps of Royal Engineers, to which he belongs, and Her Majesty has conferred upon him the honourable title of Companion of the Bath. These are sufficient guarantee for his reputation, which cannot be sullied by the literary dirt thrown by an anonymous writer; who, by his own showing, lived an obscure life of lawlessness among a horde of banditti and blasphemers of the Christian religion.

However, we can readily understand his virulence and animosity against Colonel Gordon, and those gallant soldiers who succeeded in crushing the Hydra-headed monster of Taipingism. Now that the last remnant of the imposture has been scattered to the winds, and the strongholds wrested from the Taipings, the occupation of "Lin-le" is gone. No longer can he smuggle from Shanghai to Nanking foreign muskets imported as umbrellas, and percussion caps as religious tracts, to sell at exorbitant profits, receiving in payment the dollars and sycee which his customers had stolen from the industrious inhabitants. With his ill-gotten gains he returns to England, apparently hires some needy artist, and in all probability an amanuensis to dish up his ideas in the most rabid, and sensational style. Never have we been so disappointed in perusing a book on China, which is calculated to throw discredit upon the British community resident in that country among the public at home, who are apt to conclude that the writer of this work is a sample of our countrymen there. In taking up this work we contemplated reading a faithful account of the suppression of the Taiping Rebellion, but in this we have been disappointed. Though there are a dozen books on the Rise and Progress of that extraordinary movement its Decline and Fall has yet to be written. It would be a most interesting sequel to the story, and is worth the attention of some competent author and enterprising publisher to bring out.

Mr. Henry Rutter, already most favourably known as the author of "Exchange Tables and Arbitrations of Exchanges between England, India, and China," has just published, through the agency of Mr. Effingham Wilson of the Royal Exchange, a very curious and useful book under the title of *The Metric System of Weights and Measures Compared with British Standard Weights and Measures.* The author is evidently a zealot in favour of the metric system, in respect to which, however, opinion is not so universally in favour as he would have us believe. Though facilitating calculations in the closet, there are doubts whether it would so readily accommodate itself to the counter. M. Michel Chevalier, the well-known political economist, has pointed out as one defect in the system that neither the third nor the fourth of the *ten* can be given in one figure; and yet those are proportions into which quantities and purchases are continually resolving themselves. However, for all persons having business with countries where the metric system has been adopted these Tables are invaluable, including, as they do, comparative tables of measures of length and surface, of cubic measures, measures of capacity, weights, and comparative prices. To perfect its completeness as a reference for all connected with the Far East, Mr. Rutter, whose past labours fitted him for the task, has added to his book tables adapting the metric system to Chinese weights and money and to British Indian weights. Another merit of the work—and a very great one to all who have to consult such things—is that the figures are so excellently and distinctly arranged that the eye would never weary while looking at them. The author deserves the thanks of the whole mercantile community for the pains and skill he has bestowed for their ease and economy of time.

THE UNITED STATES MINISTERS TO CHINA AND JAPAN.—By late advices from San Francisco we notice that on the 4th instant Mr. ANSON BURLINGHAME, the U. S. Minister at Peking, sailed for Shanghai, his on return to his post. By the same vesse General R. B. VAN VALKENBURGH departed for Japan, to which country he is accredited as U. S. Minister.

THE RUSSIAN-AMERICAN TELEGRAPH.—We hear from San Francisco of the arrival at that port of 1,300 tons of telegraph wire, in three vessels, for the Russian-American line of telegraph.

As the military arrangements for Hong Kong are mixed up with Singapore, we forward copies of the official correspondence to our agents at Singapore, Penang, and Hong Kong for the information of subscribers who may be desirous of perusing them.

THE correspondence on the subject of the Japanese Exchange question has not yet been published, and from the manner in which our inquiries are answered we very much doubt if it is the intention of Government to produce the same.

THE steam transport *Ardeche*, under orders for Cochin China, has been countermanded, her services being required in conveying mules from Algiers to France, in preparation for coming events.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

CUSHNY—On the 12th June, at Invery House, Kincardineshire, the wife of A. Cushny, of a son.

LORING—On the 11th June, at 4, Anglesey-crescent, Stokes Bay, near Gosport, the wife of Rear-Admiral Loring, C.B., of a daughter.

REINHARD—On the 23rd June, at No. 13, Albion-square, Dalston, the wife of Hugo Reinhard, Esq., late of China, of a son.

RONEY—On the 14th June, at 10, Gloucester-crescent, Regent's-park, the wife of Richard Cusack Roney, Esq., of a son.

SOUTHERN—On the 16th June, at 2, Cranworth Villas, Dingwall-road, Croydon, the wife of R. L. Southern, Esq., of a son.

THYNNE—On the 22nd June, at Paris, Lady Edward Thynne, of a daughter.

WRIGHT—On the 14th June, at Wentworth-terrace, Aldeburgh, Suffolk, the wife of W. Algernon Wright, Esq., of Shanghai, of a daughter.

MARRIAGES.

AINSLIE—MENDEL.—On the 12th June, at St. Margaret's Church, Whalley Range, Manchester, by the Rev. H. W. Cookson, D.D., Master of St. Peter's College, Cambridge, assisted by the Rev. H. Cottam, M.A., curate of the parish, Gilbert, elder son of the Rev. Gilbert Ainslie, D.D., of Hall Garth, near Lancaster, and Master of Pembroke College, Cambridge, to Eliza, eldest daughter of Sam Mendel Esq., of Manley Hall, near Manchester.

BOWMAN—HULCOOP.—On the 9th June, at the parish church, Walton-on-Thames, by the Rev. J. McCowan, James Bowman to Emma Heard, second daughter of William Hulcoop, farmer, Alton, Hants. No cards.

CORBET—CROFT.—On the 14th June, at All Saints' Church, Ennismore-place, by the Rev. Rowland Corbet, M.A., brother of the bridegroom, the Rev. Athelstan Corbet, M.A., rector of Adderley, Shropshire, third son of Richard Corbet, Esq., of Adderley, to Julia Helen, only daughter of the late Sir Archer Denman Croft, Bart.

DORMER—TENISON.—On the 14th June, at St. George's, Hanover-square, by the Hon. and Rev. Adalbert Anson, Captain the Hon. John B. Dormer, eldest son of Lord Dormer, to Louisa, eldest daughter of Colonel and Lady Louisa Tenison.

GEORGE—FARLAM.—On the 14th June, at St. James's Church, Piccadilly, by the Rev. Robt. Holme, A.M., and the Rev. John Oakley, A.M., Major-General Frederick Darley George, C.B., to Mary Ann, youngest daughter of the late John Farlam, Esq., late of Blackheath. Cards not sent.

HAMILTON—WADDELL.—On the 9th June, at the parish church, Edgbaston, by the Rev. George Lea, M.A., incumbent of St. George's, assisted by the Rev. B. P. Clarke, B.A., chaplain of St. Jude's, Isle of Man, the Rev. George Hamilton, B.A., T.C.D., British Consular Chaplain, Foo-chow-Foo, China, to Lucy, youngest daughter of the late Thomas Waddell, of Edgbaston. No cards.

HEYGATE—MOUNSEY.—On the 14th June, at the parish church of St. Mary, Rockliffe, Cumberland, by the Rev. John Heysham, M.A., vicar of Lazonby uncle of the bride and the Rev. George Topping, incumbent of the parish, Robert Henry John, youngest son of the late Sir William Heygate, Bart., of Roecliffe, Leicestershire, to Isabella Dorothea, only daughter of George Gill Mounsey, Esq., of Castletown, Cumberland.

HOOD—BLACKETT.—On the 14th June, at Thorpe Church, by the Rev. Leigh Bennett, vicar of the parish, assisted by the Rev. J. Drury, William C. Hood, Esq., Lieut. 2nd Regt. (Queen's Royals), eldest son of W. Coombes H. Hood, Esq., of 57, Westbourne-terrace, Hyde-park, to Mary Patience, eldest daughter of John C. Blackett, Esq., of Thorpe Lee, Surrey, granddaughter of the late Sir William and niece of the present Sir Edward Blackett, Bart., of Matfen Hall, Northumberland. No cards.

MATTHEWS—TRIGGS.—On the 14th June, at Kensington Church, Thomas Matthews, Esq., of Old Quebec-street, Hyde-park, to Flora Elizabeth, youngest daughter of the late Captain Triggs, of China. No cards.

PARSONS—SPRYE.—On the 20th June, at Kensington Church, by the Ven. Archdeacon Sinclair, assisted by the Rev. George James, Minor Canon of Gloucester Cathedral, Charles Parsons, Esq., M.D., of Dover, to Venetia Digby Spry, youngest daughter of Captain Richard and Henrietta Digby Sprye, of Kensington. No cards.

DEATHS.

FAWCETT—On his passage from Macao to London, on board the ship Queen of the Age, Capt. John F. Fawcett, late of Hong Kong.

GRAHAM—On the 15th June, at 131, Park-street, Sir Bellingham Reginald Graham, Bart., in his 77th year.

GORE—On the 19th June, at Horsham Park, in the 95th year of her age, of bronchitis, Lady Grace Gore, widow of Sir Ralph Gore, Bart., and daughter of Barry, Earl of Farnham.

HANCOCK—On the 12th June, at 12, Devonshire-road, Holloway, N., Charles Hancock, Esq., aged 65, for 44 years the highly esteemed and valued friend of Messrs. Kilburn, Kershaw, and Co., of St. Mary-axe, E.C.

MACNEE—On the 5th March, at sea, on board the ship County of Ayr, on her passage home from Singapore, James, third son of Daniel Macnee, F.S.A., Glasgow; and at Kurrachee, on the 2nd May, Robert, Lieutenant 95th Regiment, eldest son of the above.

MAR AND KELLIE—On the 19th June, at Alloa Park, N.B., the Right Hon. John Francis Erskine, Earl of Mar and Kellie, &c.

NICOLSON—On the 30th May, at Aberdeen, after a short illness, John Nicolson, Esq., late Superintending Engineer of the P. and O. Company at Sydney, and formerly of Bombay, aged 54.

ORD—On the 6th May last, on board the ship Durham, off the Island of Ascension Belissa Jane, the beloved wife of Captain Ord, 80th Regt., aged 35.

POTTINGER—On the 2nd June, at Rome, at the residence of her father, the Rev. E. H. Shipperdson, Mary Adeline, wife of Sir Henry Pottinger, Bart., aged 24.

ROSSLYN—On the 16th June, at 12, Lower Belgrave-street, General the Earl of Rosslyn, Colonel 7th Hussars, aged 64.

SANDILANDS—On the 16th June, at his mother's residence, 56, Belsize-park, Walter James Sandilands, Esq., of 155, Fenchurch-street, in his 23rd year.

SWINHOE—On the 18th June, at Eslington house, Cheltenham, General S. Swinhoe, Royal Bengal Army, aged 79.

URE—On the 13th June, at his residence, 18, Upper Seymour-street, Portman-square, Alexander Ure, Esq., F.R.C.S., one of the Senior Surgeons of St. Mary's Hospital, eldest son of the late Dr. Andrew Ure, F.R.S.

COMMERCIAL POSTSCRIPT.

ARRIVAL NOT INCLUDED IN THE TABLES.—June 9, at New York from Manila, Santee.

DEPARTURE.—June 25, from London for Hong Kong and Canton, Sea Belle.

SPOKEN.—Joseph Gilchrist, Cardiff to Manila, May 17, 1 N., 27 W.

CLEARED.—New York, June 5, Gamecock, Sherborne, for Hong Kong.

ACTION AGAINST THE CHARTERED MERCANTILE BANK.—The case of Fry *v.* the Chartered Mercantile Bank was brought to try the right of the plaintiff, as owner of a ship, *Her Majesty*, chartered with goods from Shanghai to Liverpool, to a general lien for freight on a parcel of 185 packages of tea and 42 bales of cotton shipped, of which a bill of lading had been given, and transferred for advances to the defendants. The goods had been delivered and sold, and the defendants had tendered the freight according to the bill of lading at £3 10s. per ton, but the plaintiff demanded to have lien on the goods for the whole balance of freight of the ship's cargo, amounting to £1,760, under the words in the bill of lading, "freight payable for said goods in Liverpool, as per charter party." These words, the plaintiff contended, incorporated the right to a general lien of this particular parcel of goods for the whole amount of the freight, the defendants contending that they only referred to the time, manner, and amount of payment to be made per ton mentioned in the charter party. Mr. Watkin Williams (with whom was Mr. M'Leod) argued for the plaintiff, and Mr. Quain (with whom was Mr. Field, Q.C.) for the defendants. The Court thought that judgment should be for the defendants, and that the true construction of the words relied upon was to refer to the charter party for the rate of freight, which was found to be £3 10s. per ton, and that amount the defendants were willing to pay.—Judgment for the defendants.

SMITH, FLEMING, AND CO., *v.* THE COMMERCIAL BANK CORPORATION OF INDIA AND THE EAST.—This company, which is being wound up, were the holders of bills of exchange accepted by Messrs. Smith, Fleming, and Co., who were creditors of the company. Some days ago, after the winding-up order, but before the appointment of the official liquidator, an injunction was obtained exparte to restrain the negotiation of these bills. The official liquidator on being appointed applied in chambers for leave to negotiate them, and his application stood over till this motion, to discharge the exparte order should have been disposed of. The Master of the Rolls had deferred judgment, he said, as the case was one which must be of frequent occurrence, and in which it was very desirable to lay down a general rule as to the course proper to be adopted. His lordship added that the official liquidator, or rather the court conducting the whole matter, being in the nature of a trustee for all parties, it was not justifiable to take any proceedings which should give advantage to one set of *cestuis que trustent* over another, and that this was a fundamental principle of equity in all winding-up cases. It was not for the court to interfere and say that one class of creditors was preferable to another; its duty simply was to adjudicate upon the rights of the parties on the principles of law and equity administered in all such cases. In the case before his lordship it was certain that Messrs. Smith, Fleming, and Co. were creditors of the bank when they gave the acceptances in question, and that if the bills had remained in the hands of the bank until they had become due, the right of set-off would have been obviously clear. The application was for leave to allow the official liquidator to discount these bills, and so to enable a third party, a stranger, to do that which the bank clearly could not do. His lordship thought such a course could not be adopted, and as he had said on various occasions, as the tree fell so it must lie. The rights of het parties must be determined as they stood, whether they were worked out or became matured by an effluxion of time, it being the duty of the court not to give one set of persons advantage over another. The usual course was that bills in the hands of the official liquidator were retained by him until maturity, when they were presented, there being generally a loss when they were good bills, and the same if they were not, in discounting them. His lordship then expressed his opinion as to the course that should be adopted in these matters. He doubted whether the proper course of proceeding was what had been adopted here. It was quite clear that the applicant might have filed a bill; but the proper form of proceeding in future would be as follows. The official liquidator was not to be at liberty to negotiate any bills without the leave of the judge in chambers, and where anybody was either a creditor or shareholder—that is to say, one of the persons for whom the liquidator was in the position of what might be called a quasi trustee—notice should be given to such person to show cause why the court should not give leave to the official liquidator to negotiate the bills. If such person did not choose to come in that was his own affair; if he came in then the court could determine the question between the parties at chambers, or adjourn it into court. His lordship said that questions were likely to arise in these winding-up cases which had not yet been dealt with by the court, and the mode suggested seemed the best way of dealing with such as that now before it. He wished to express that opinion publicly, thinking it the cheapest and most proper course with regard to the practice of the court. Upon the present occasion his lordship said no order would be made other than to direct the official liquidator not to negotiate the bills.

BANK OF HINDUSTAN, CHINA, AND JAPAN (LIMITED).—An extraordinary general meeting of the shareholders in this bank was held on the 25th at the company's offices, Mr. J. Mackrill Smith in the chair, to confirm a resolution passed on the 24th of May last, viz., "That clause 46 of the articles of association be repealed, and that in lieu thereof the following be inserted, viz. Subsequent ordinary meetings shall be held once every six months, at such time and place as the directors may from time to time determine." A resolution confirming the foregoing resolution was agreed to.

APPOINTMENTS.—The Queen has appointed the Honourable Charles Augustus Murray, C.B., now Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Saxony, to be Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Denmark, and Sir Augustus Berkeley Paget, K.C.B., now Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Denmark, to be Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Portugal. The Queen has appointed Victor de Magnus, Esq., to be Her Majesty's Consul-General at Berlin. The Queen has appointed John Savile Lumley, Esq., now Secretary to Her Majesty's Embassy at St. Petersburg, to be Her Majesty's Envoy Extraordinary and Minister Plenipotentiary to the King of Saxony. The Queen has approved Mr. J. W. May, jun., as Consul-General in London for His Majesty the King of the Netherlands.

THE BISHOP OF MORAY AT ST. PETERSBURG.—A correspondent writes:—"I may close this with a few words on the Bishop of Moray, Ross and Caithness, who is here on a mission from the Bishop of London to confirm such of the English residents in this country as have not yet formally renewed the vows made by their sponsors. On Sunday last his lordship confirmed about forty ladies and about fifteen young men in the handsome chapel of the British factory in this city. The address on this interesting and solemn occasion was admirable in its tone and in the manner in which it was delivered. Visitations of such a kind are productive of much good; they renovate the national as well as the religious feeling of the British exile. The number of English residents in Russia is very considerable, there being no fewer than 3,000 in St. Petersburg and its immediate vicinity. The old mercantile families have to a great extent died out, or returned to their own country, and the bulk of the English population in this neighbourhood is composed of cotton spinners and mechanics who are mostly in receipt of excellent wages. Nevertheless few of them remain to die in the country. The facilities for going home are so much greater than they were that few stay here through the later stage of life. Nor is there any very great amalgamation between the British and Russian races, owing also to the facilities for going home to be married, and to a great extent no doubt to the plentiful supply of comely English damsels brought up in the country. The English and French retain their national characteristics very strongly, while the Germans, on the contrary, merge easily into ultra-Russians. The Bishop has left to visit the lesser flock at Moscow, where, it appears, he has a difficult task to perform. The community are at the present moment divided—one party is for low church practices, the other for high church performances. The latter taunt the former with dissent and methodism, and these retaliate by pointing to the Pope of Rome. The dispute has arisen since the appointment of a young and zealous clergyman who, the disaffected allege, 'will not perform Divine service as it has been performed in the chapel at Moscow since its foundation in 1825.' It is believed here that the Bishop is anxious to promote the union of the Anglican and Russian churches, for the practical purposes of intercommunion. The question is one very willingly entertained by the Russian clergy until it comes to the disputed point of apostolical succession of our bishops. On this head they cannot agree, and whether the Bishop of Moray and Ross will be able to make out his case to the metropolitan Philaretes your correspondent will probably not be able to discover."

THE AMERICAN NAVY.—The American naval squadrons are at present distributed as follows:—European squadron, Rear-Admiral Golds, borough, eight vessels, 107 guns; Asiatic squadron, Rear-Admiral Bell-four vessels, 47 guns, South Pacific squadron, Rear-Admiral Pearson, eight vessels, 93 guns; North Pacific squadron, Commodore Rodgers, nine vessels, 107 guns; South Atlantic squadron, Rear-Admiral Gordon, ten vessels, 103 guns; North Atlantic squadron, Rear-Admiral Palmer, nine vessels, 87 guns; Atlantic Coast squadron, Commodore Lanman, seven vessels, 61 guns; Gulf squadron, Commodore Winslow, seven vessels, 86 guns; Naval Academy practice squadron, seven vessels, 58 guns; Home squadron, five vessels, 58 guns; receiving ships, seven vessels, 123 guns.

ACCIDENT TO ADMIRAL DE LA GRAVIERE.—An accident which might have been attended with very serious consequences lately occurred to Admiral Jurien de la Gravière, his wife and daughter. During a drive in an open carriage, which they were taking in the neighbourhood of their chateau at Juvisy, the carriage was upset, and all three occupants thrown violently out. The Admiral's thigh was fractured, and Madame de la Gravière sustained several contusions; their daughter fortunately escaped without further injury than a severe shock.

THE CHINESE IN CALIFORNIA.—A San Francisco paper informs us that news has been received there of an attack by Indians on fifty Chinamen near Owzhee river, killing forty-nine of them and stealing several trains of horses and mules and sixty head of cattle right in sight of the fort.

THE MANILA CONSULATE.—The departure of Mr. Rainals is doubtful and probably another gentleman will be nominated.

FOREIGN OFFICE, JUNE 14.—The Queen has been pleased to approve of M. J. Menke as Consul at Hong Kong for his Royal Highness the Grand Duke of Oldenburg.

LONDON, WEDNESDAY, JUNE 27, 1866.

THE FINANCIAL CONDITION OF HONG KONG.

IT is always unsatisfactory, whether to an individual, a municipality or a Government, to find a long-standing source of revenue suddenly exhausted, more especially when it has flown on to the last with its accustomed fullness, and is not supplemented by increased supplies in another direction. The sums drawn by the colony of Hong Kong by sales of Crown lands have proved of unquestioned service in the past by making good, deficits, and now with no additional lands at disposal, the colony is called upon to meet increased charges. We have the authority of the Auditor-General that the revenue is increasing in the same ratio as the expenditure; but even allowing this, the failure of further receipts from Crown lands leaves a given sum to be annually overtaken, provided the current outlay is not proportionately reduced. But how is this to be done? The GOVERNOR, whilst favouring the principle of retrenchment, is very properly opposed to that false economy which is calculated to interfere with projects sanitary and otherwise, the execution of which is essential to the well-being and progress of Hong Kong. If contemplated expenditure is to be arrested, that most vital of all improvements connected with the executive administration, the better organisation and equipment of the police ashore and afloat, must be suspended. To the maturing of arrangements to this end Sir R. MACDONNELL gave much time and attention during his stay in London, previous to his departure; and aware, as he is, of the advantages that would attend the realisation of the project, we cannot conceive that he would readily forego it. Indeed, we find him adverting, in a discussion on the subject of the colonial finances by the members of the Council, to the duty of a Government maintained at the cost of the colonists doing something for the progress of the colony. Certain of the schemes in view are calculated to yield eventually, directly or indirectly, satisfactory returns, and where this is the case we do not see why the colony should not proceed to meet the pressing necessities engendered by colonial requirements, by discounting to some extent future gains by the adoption of credit forms. The improvements that have been mapped out cannot be long delayed consistently with the comfort of the inhabitants and the demands of trade. Sanitary reforms are necessarily costly, but they are also imperious. It is easy to admit the hardship of the tax made on Hong Kong for £20,000 per annum in the shape of a military contribution, but when the *China Mail* advises that a petition against the impost be presented to the House of Commons from the indignant and protesting colonists, we would remind it that Mr. GLADSTONE is the financial autocrat in the House; most obstinate in defending any position once taken, and too intimately identified with the details of the scheme for compelling the colonies to contribute on local as well as on Imperial account to allow us to anticipate anything but failure. The argument of the petition would not be answered; at the same time it would be refused.

We should, looking at the matter in a practical point of view—at what can be done, rather than what should be done if justice held the scales, and especially guided by the experience of Ceylon—advise that an application be forwarded to the Treasury, praying that the Government will postpone the exaction of the contribution, meanwhile debiting the colony with the amount, and supplying the deficit from the surplus of the successive Budget, charging interest for the same only in the event of the instalment of the debt not being paid at stated and given periods. Thus the colony would be sensibly relieved for the present, and opportunity allowed for improvements in hand or in contemplation to be carried out, and on a scale that would render them more remunerative than would otherwise be the case. It is not a pleasant position for the new GOVERNOR, and very much increases his difficulties; but we are disposed to look more hopefully than certain of the members of the Council on the proceeds of the seignorage to be charged by the Hong Kong Mint, or, in other words, the extent of its business when it comes into operation. Our belief is that the Mint profits will after a given time materially exceed working expenses. The position of the Hong Kong Mint, indeed, is necessarily exceptional, and no analogy can be drawn from the experience of like institutions at Sydney, Victoria, and India. Our Hong Kong friends, now that they have paid the last instalment of building expenses, must not forget the arguments they formerly pleaded in favour of the Mint. The new coinage will serve to enlarge local transactions and stimulate increased trade, not only with other Chinese ports, Japan, and British India, but with the vast outlying Archipelago. What is more, the general acceptance of such a coinage will do much to concentrate trade more it European, and less proportionately in Chinese hands. Amongst other deliberations of the Council the pension to the late Bishop SMITH, of Victoria—which was described by *Punch* at the time as "Economical Munificence"—came under discussion in consequence of the Bishop writing to Mr. CARDWELL, the Secretary of State for the Colonies, inquiring if the Colonial Legislature would consider it against the spirit of the grant for him to accept a chaplaincy or lectureship on the Continent, and if so, if the revocation of the pension would be final or be resumed on such appointment being lost or given up through ill-health or other causes. We think there was no necessity for this application, and considering that there were strong opponents to the pension it was unwise to have the affair again brought before the Council. However, we are glad to see that the GOVERNOR put a construction on the matter which was consistent with the original vote, and Bishop SMITH now has his doubts settled by the following resolution:—

"That it is the desire of the Council that the Bishop's pen-
"sion should not cease with, but be in abeyance, during his
"occupancy of any other preferment. And that the interpreta-
"tion of the word preferment should be left to the SECRETARY
"of STATE for the COLONIES."

TREATY PORTS IN CHINA.

THE news which lately reached this country of the confiscation of the steamer *Prince Albert*, for trading to the at present unrecognised port of Kiung-chow, has been followed by a notification from the Committee of the Privy Council for Trade, intimating that such Chinese ports as have not hitherto been opened to British trade are not to be considered open without a formal declaration to that effect. The notification also sets forth that the harbour-master at Hong Kong will in future be instructed to issue no clearances for Kiung-chow until a British Consul shall have been duly installed at that port, and its opening has been publicly notified; an event which will in all probability never happen, as the trade is at present so insignificant and shows such little promise of improvement that it will most likely be either dropped altogether or exchanged for some other port better situated for foreign trade.

Like most things of the sort, this notification is over late in making its appearance. If any doubt existed in the minds of the authorities as to the expediency of appointing a Consul at Kiung-chow, some step should at all events have been taken to prevent any misconception regarding the true position of the port. Being declared open by treaty, and the trade having been allowed to be carried on for some time, the owners of the *Prince Albert* might easily fall into the belief that they were justified in sending her there, and it appears to us that they have been somewhat too hardly dealt with by the confiscation of the vessel.

THE CHINESE VISITORS.

HIS Excellency the Chinese Commissioner and suite left our shores on Sunday the 24th inst. for Holland, after a some-

Digitized by Google

what short but very actively employed sojourn. On the 16th inst. his Excellency, attended by Major Brine, R.E., Mr. E. Bowra, and M. E. de Champs, proceeded to Strood for the purpose of visiting the *Great Eastern*. On arriving at the station his Excellency was received by Mr. Pender, who had kindly placed his yacht at the service of the party, and by the Earl of Wilton, Lord De Grey and Wilton, Mr. Tollemache, and Captain Forbes R.M. His Excellency the Commissioner was deterred from visiting the *Great Eastern* by the threatening appearance of the weather, and returned to town, but deputed some of his suite to pay the visit on his behalf. On returning the mainmast of Mr. Pender's yacht was carried away by an accident, but fortunately no damage was done to life or limb. On the following day (Sunday) the mission visited the Zoological Gardens, Regent's Park, and on Saturday, the day preceding their departure the afternoon was devoted to a visit to the Crystal Palace where the principal "rose show" of the season took place on that day. The Commissioner made the circuit of the rose tables in a Bath chair, and was attended in his progress by Mr. Bowley, the manager, and a sufficient escort of police. The company were, as usual, very curious, and the anxiety to shake hands with Oriental diplomacy was universal, but the Commissioner kept his head pertinaciously turned towards the counters, and thus avoided a good deal of well-meant but rather obstreperous greeting. After a lengthened inspection of the flowers, with which he expressed himself delighted, the Commissioner was conducted by Mr. Bowley to the Queen's box overlooking the garden, where he had a fine sight of the fountains, which suddenly began to dance and sparkle just as he had taken his seat. Their novelty struck him very much—fireworks, not waterworks, being the great speciality of the Chinese. Whilst thus admiring the fountains, and the prospect, which his excellency pronounced to be the most beautiful sight he had ever witnessed, some one suggested that his countryman, Chang, and family, were exhibiting in another part of the building, whereupon the commissioner at once expressed the greatest anxiety to see the greatest of the Chinese. Chang was accordingly sent for; but, very much to the surprise of both the commissioner and the palace authorities, he stoutly refused to budge, intimating that he was at that moment receiving a large and distinguished party in the Egyptian court, whither the commissioner might come if he liked, but that under any circumstances he, Chang, would not go to the Commissioner!

Thus ends the first Chinese mission to this country. Much disappointment has been expressed at its entirely unofficial character; but we have, nevertheless, good reason to regard it with satisfaction, as the probable prelude to a duly accredited embassy.

COOLIE EMIGRATION TO THE WEST INDIES.

EACH incoming mail seems now to bring, as an ordinary item of intelligence, news of a massacre, or at least of a mutiny, on board some unfortunate coolie-ship. And of the last half-dozen cases, all but one—the *Napoleon Canevaro*, bound for Callao—occurred to vessels bound for the West Indies. We have no intention of recapitulating here all the arguments so frequently brought forward against this iniquitous traffic, for our readers must by this time be as heartily tired of its sickening horrors as ourselves. But at the present time anything which tends to throw a new light on the question is more than usually interesting, and for this reason we insert the following letter, written by a correspondent of the *Pall Mall Gazette*, who has recently visited the scenes of coolie labour in the West Indies. In Canton, we are told, the emigration is now carefully watched over, and kidnapping and other abuses are no longer practised in Macao. We are informed that the Governor is using strenuous exertions to place the traffic on a legitimate footing; and it certainly does appear that on that side the evils attending it have of late been in some degree mitigated. But how about the other side? Let "A Visitor to Cuba" reply:—

SIR,—Reference having been made in your journal to the subject of coolie labour in Cuba, I beg to send you the following facts which I learned during a recent visit to the island. On arrival in Cuba the coolies, probably much reduced in number during the voyage, are readily disposed of. Labour is scarce, sugar is profitable, and the planter can well afford the £350 (the price at which you say coolies are quoted) for seven years' labour, and that sum will handsomely pay the importer. Seven years is the term fixed by Government for coolies to work out the expenses of their passage, and for that period they are apprenticed with no pay whatever, and are as much in the power of their masters as regards hours of labour and punishments as are the slaves. Their lodging, food, and clothing are the same as that of the negroes, and their condition during the term of apprenticeship only differs in that, while the planter is interested in the health and life of his slave, his only object as regards the coolie is to reward himself for the money he has paid for his services, and it is a matter of indifference to him whether he lives after his service is over or not. Indeed, it is usual to work the coolie to save the slave. When the seven years' term has expired, the coolie is permitted to change his master, but he is bound in law to re-engage himself for another seven years under penalty of being sent to the chain-gang. In that well-ordered country no idle coolies are allowed, and unless he has money, which it has been impossible for him to earn, to take him out of the country, he is obliged to re-engage himself, and if he fails to do so is made to work on the roads and public works, and is treated as a criminal convict. During the second term the coolie is at liberty to make the best bargain he can with the planter, under the unfavourable circumstances that he must at once engage himself. But as regards the second seven years, we need not now consider—few live to the end of the first seven.

Exposed to a heat their constitutions are scarcely fitted to encounter, compelled to do work their physical strength is unequal to—work under which the strong and acclimatised negro often sinks—disheartened, demoralised by cruel wrong and oppression, is it wonderful these unfortunate Chinamen should die like rotten sheep? Is it wonderful that, as I was told by a Cuban planter as an objection to coolies, "they *will* commit suicide in spite of the strictest supervision, and the ingenuity they display in the different modes of putting an end to themselves is inconceivable?'

Let me add but one more piece of information: the hours of work of the slaves on many sugar estates in Cuba and the coolies work at least as hard. In crop time, which lasts at least six months in the year, and of all labour perhaps sugar-making is the most severe, the gang works from sunrise to sunset, allowing two hours' rest for meals, and every day in the week, including Sunday; the gang is divided into two parties for night-work, so that each man works sixteen hours out of the twenty-four. Out of crop every alternate Sunday is allowed as a day of rest, and there is little or no nightwork.

The above facts I can vouch for: they have been communicated to me in a great measure by planters themselves, and I feel confident that any disinterested man who knows Cuba will corroborate my statements—I am, Sir, your obedient servant, A VISITOR TO CUBA.

Monetary and Commercial.

The Bank of England has not yet reduced its rate of discount. It remains still at 10 per cent. One cause of its long continuance is, that when it is reduced the authority granted by Government to exceed the limits of the Bank Act will cease and determine.

The feeling against the present custom in India and China of drawing at six months' sight is increasing, and no doubt the present is a favourable opportunity for abolishing what has long been felt to be a door for overtrading, and in a very great measure caused the over shipments of that reckless year 1864 which injured so much the *morale* of the China trade. The following on the subject is from the *Economist*:—

The objections to six months' acceptances are so grave and manifold that in the course of a short time there must be great difficulty in inducing any London bank of the first rank to put its name to such an obligation. For not only is the term itself most objectionable even for single bills, but it becomes doubly objectionable and doubly dangerous, in consequence of large masses of these bills having to be accepted, and, therefore, to be made payable on some single day, from the circumstance that the Indian mails arrive at particular periods and bring masses of bills, all of which are of course presented for acceptance within an hour or two after the delivery of the letters. On the 9th inst., for example, it is said that the amount of acceptances by the Agra Bank due on that particular day was not less than half a million sterling. The bank had closed two days before, and the bills were not met; but it is quite supposable that the certainty of having to meet a large amount of acceptances on the 9th had a good deal to do with the resolution of the directors to close their doors on the 7th.

In order to hasten and fortify the adoption of a change pointing in so sound a direction, it would be no undue exercise of the discretion of the Bank of England directors if they were to intimate that six months' sight bills drawn from India would after some specified date be regarded as beyond the Bank's rules of admissibility. It will be a reflection on the practical sagacity of the country if we permit so conspicuous and costly an opportunity as the present to pass away without the accomplishment of some real reforms in our system of credit.

Our merchants must, therefore, prepare for the reduction from six months to three months as a step which will inevitably be carried out.

The China Steamship and Labuan Coal Company have made a call of £2 per share, £1 of which is payable on the 1st of July, and the other moiety on the 1st September.

Creditors of the Commercial Bank Corporation of India and the East are required to send the particulars of their claims by the 10th November to Mr. W. H. Holyland, the official liquidator, the Master of the Rolls having appointed the 3rd of December for adjudicating upon them.

The Chartered Mercantile Bank of India, London, and China have declared a dividend of 5 per cent., free of income-tax, for the half-year ending the 30th inst. It will be payable on the 2nd of July.

Digitized by Google

The fourth annual meeting of the Ceylon Company (Limited) was held on the 19th inst. The report stated that the net profit, including £3,905 11s. 8d. brought forward from last year's account, amounted to £34,812 11s. 6d., of which the directors transferred £5,000 to the reserve fund, and proposed a dividend at the rate of 10 per cent. per annum. This, with the interim dividend paid in December, absorbed £28,125, leaving a balance of £6,687 11s. 6d. to be carried forward to next account. The report was adopted.

The liquidator of the Commercial Navigation Company of India (Limited) has made a fourth call of £6 (making £26 paid) on the A shares, payable by the 25th July.

The biddings for bills on India took place at the Bank of England. The proportions allotted were: to Calcutta, 365,000 Rs.; to Madras, 30,000 Rs.; and to Bombay, 110,000 Rs. The *minimum* price was fixed at 1s. 10⅛d. on Calcutta and Madras, and 1s. 10⅜d. on Bombay. Tenders at and above these prices will receive in full. These results show how great a check has been given to remittances of specie to India. Although Government have abated their terms ⅛d. per rupee, or equal to about 2 per cent., they have only succeeded in selling bills to the amount of £50,500 out of a total of £350,000 offered, but it is known that some further sales were concluded the day after.

The following communication has been addressed to Messrs. Thomson, Bonar, and Co., the consignees of the Peruvian Government for guano to Great Britain :—

"Foreign Office, June 19.

"Gentlemen,—I am directed by the Earl of Clarendon to inform you, with reference to your letter of the 22nd of January last, that Her Majesty's Minister at Madrid has reported to his lordship that in a conversation which he had held with the Spanish Minister for Foreign Affairs his Excellency informed Sir John Crampton that the Spanish squadron had been ordered home from the Pacific, and that, consequently, the projected occupation of the Chincha Islands would not now take place.—I am, Gentlemen, your most obedient humble servant, "E. HAMMOND.

"Messrs. J. Thomson, T. Bonar, and Co."

At a general meeting of shareholders and creditors of the Consolidated Bank it was decided to re-open on the 2nd July. The business will be conducted on the premises purchased from the Bank of London in Threadneedle-street, and the old premises in Fenchurch-street will be sold.

The Stock Exchange Committee has decided again that it is not expedient to make any alterations in the mode of dealing in shares. A Bill has been framed by some non-mercantile M.P.s for the purpose of restraining the present system, but it has no chance of being even seriously considered.

An application has been made to the Court to wind up a concern called the Oriental Commercial Bank, and the *Solicitors' Journal*, by a blunder on the part of their reporter or printers omitted the word "Commercial." On the following day the subjoined communication appeared. It is surprising that when this undertaking was established the Oriental Bank did not apply for an injunction to restrain the company from adopting a title so closely resembling their own, and so very far inferior in standing. The past few months, however, have demonstrated that not even the strongest institutions are proof against rumours.

The editor of the *Solicitors' Journal* presents his compliments to the editor of the *Daily News*, and will feel much obliged if he may be permitted to correct in that journal an error of which he has inadvertently been guilty. It is stated in the *Solicitors' Journal* of the 16th inst. that the above-named corporation is about to be wound up. This is entirely erroneous. The company which was intended to be named is the Oriental Commercial Bank—a totally different company. So far as the editor of the *Solicitors' Journal* knows, or believes, there is no ground whatever for supposing that the Oriental Bank Corporation is in any way than a most prosperous condition, and he is desirous of publicly expressing his regret that the similarity of name in the companies should have led to so unfortunate a mistake; and as the *Solicitors' Journal* will not appear again for a week, and he is very desirous that the error should not remain uncorrected a moment longer than he can avoid, he will feel much obliged if a place can be found for this letter in the columns of the *Daily News*.

A very significant confirmation of the hardness of the times is to be found in a notification posted at the Jerusalem, that the consignees and freight are required for—W P 1227 and F. P. (in diamond) 1254 packages tea, per *Earl Dalhousie*, from Singapore, which vessel arrived on the 5th April.

The suspension has been announced of Messrs. William Rattray and Co., in the West India trade.

At the meeting of the Agra and Masterman's Bank held on the 22nd the utmost consideration and forbearance were shown by all present, and the statements and estimates submitted were on the whole as satisfactory as could have been hoped. Colonel Holland, one of the directors, took the chair, and mentioned that, whatever might have been the errors of management, the Board had always had perfect faith in the soundness of the bank, as was evidenced by the fact that with their immediate connections they held one-sixth of the entire capital. A resolution in favour of a voluntary winding up was then moved, and the following statement was read by Mr. Cannan, of the firm of Kemp, Ford, Cannan, and Co., showing the total of direct liabilities to be £7,906,893, while the assets are estimated at £9,057,497, leaving a probable surplus of £1,150,604 toward meeting the paid-up capital of £1,500,000. As the estimated loss of paid-up capital is thus £350,000, and the reserve of £500,000 is absorbed, together with accrued profits of £150,000, the actual total loss will represent a million. After the presentation of this statement the Chairman called on Sir Fitzroy Kelly, who has a large interest in the bank, both for himself and as trustee, who explained to the shareholders the probable effect of the modes of liquidation, and pointed out the enormous advantage, not only for themselves but for the creditors, of a voluntary as compared with a forced winding up. He expressed at the same time a strong belief that the comtemplated effort to re-establish the institution would prove successful, and promised his support and advice in all questions that might arise. On the motion of Colonel Dalzell, Mr. Cannan was then appointed liquidator. The meeting occupied less than an hour.

AGRA AND MASTERMAN'S BANK (LIMITED).—APPROXIMATE STATEMENT OF AFFAIRS, JUNE 6, 1866.

	London.		London.	
Amount of liability upon which dividend will be payable	..	£5,356,032	Estimated amount of assets after deducting £664,000 losses .. (Deficiency, £128,480)	£5,227,552

A meeting of the Assam Company took place on the 19th. The net profit for the year amounted to £32,324, and a dividend was declared at the rate of 20 per cent. This will amount to £37,432, of which one-half was paid in December last, and the remainder will be distributed on the 25th inst.

There has also been an active demand for Bar Silver for the Continent, and the price is very firm, at 5s. 2 d., but the supply in the market is very limited. There is, as yet, no revival in the demand for India. The *Pera* on the 20th took £9,500 in silver, nearly the whole of which consisted of Mexican dollars for Shanghai. For this latter coin the demand for China is very limited, and the price remains unchanged at 5s. 0⅜d. per oz., which is the price at which they were last taken for refining.

The following appeared in *The Times* with regard to the unexpected interruption of telegraphic communication with India :—

"London, June 20.

"Sir,—In confirmation of what was stated in your money article of this morning with reference to telegrams to India, I beg to inform you that to-day my firm has received from Alexandria the following—viz.:

"'Your 4.883 to Calcutta in depôt to Cairo, Turkish Government refusing Indian messages.'

"Subjoined to the above is the following from the Submarine Telegraph Company :—

"'The above service refers to your message of the 18th June, No. 4.883. The message is at Cairo, and cannot be sent further, as Turkish Government refuse to receive Indian messages.'

"I may mention the telegram was a purely commercial one, for the transmission of which £13 6s. was paid, and that the detention may prove serious.

"Surely either the Turkish Government, or the India-office, or both, are bound to give the public some explanation.—I am, Sir, your obedient servant, "A CITY MERCHANT."

As usual in such cases, the "explanation" so very reasonably asked for is not forthcoming. Homeward telegrams from the Far East appear, however, to come without interruption at present.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton June 20, was in gold to Gibraltar £1,000; to Galle, £600; in silver to Hong Kong, £1,542; to Shanghai, 8,050. Total in gold £1,600; in silver £9,592.

MANCHESTER MARKETS.

Under the influence of the actual declaration of war on the Continent, and the continued financial stringency, the steadiness observable here in the early part of last week, has entirely disappeared and a marked depression has ensued. This has been intensified by an increased apprehension of commercial disaster in Eastern markets. Quotations are:—Grey Shirtings 7 lbs., 11s. 6d. to 11s. 9d.; 8 lbs. 4 oz., 14s. Yarn, No. 16-24, 1s. 5d. to 1s. 6d.; 28-32, 1s. 7d. to 1s. 8d.

PRODUCE MARKETS.

TEA.—The public sales have gone with great steadiness considering the quantity offered without reserve was 25,000 packages. The only alterations quoted were in new-make Canton Congous (of which about 8,000 packages were offered) and in Hysons; the former declined 1d. to 1½d. per lb., and the latter 2d. to 3d. per lb. Low and dusty kinds of Congou show no alteration. Good common are still quoted 1s. to 1s. 0½d. per lb. In fair to good flavoury kinds there has been but little alteration, the sales being limited. Fine to finest Kaisows show no change. Common blackish-leaf kinds have been saleable to a fair extent for export at 11¼d. to 1s. per lb. Fair to good kinds remain much as before, with only a moderate inquiry. Fine have sold to a small extent at the decline last quoted. In finest business has been very trifling. In new-made Canton kinds prices have given way 1d. to 1½d. per lb. In Amoy kinds there is no change to report. Oolongs remain much as before. Medium Souchongs have sold rather lower at public sale. Flowery Pekoes are only saleable at low prices. Common to fair Scented Capers have sold at former prices. In other qualities there is no material change. Common to fair Orange Pekoes have been in fair demand at the decline last quoted, but good and fine remain difficult of sale. In uncoloured Japans there is nothing new to report. Green teas have been, with the exception of Hysons fairly supported. The demand for export for Moyune Young Hysons, and Imperials continues, but the supply on offer is limited. Common to fair qualities are only saleable at comparatively low prices. Gunpowders show but little alteration. Hysons have sold 2d. to 3d. per lb. lower. Sales of Canton Gunpowder have been made from 9d. to 1s. 8d. per lb. for common to good quality.

SILK.—The state of the silk trade is thus referred to in the circular of Messrs. Durant and Co.:—"The periodical public sales are concluded. The quantity offered was about 1,000 bales Bengal, 2,500 bales China, 800 bales Japan, and 900 bales Canton. The whole was allowed to pass rapidly without any biddings, a result that had been fully anticipated. All the repressing influences of the last few weeks or months still exist more or less in their fullness so that we have no 'market.' When we shall recommence business is still uncertain, whether in a week or a month no one can foretell. This state of things is almost without precedent, but the actual position of all consumers as to stocks is positively without precedent—very few hold a month's consumption—many barely sufficient for a week.

COTTON.—The market was in a very depressed state during the week just past, and holders having met the demand freely quotations were called ¼d. to ⅜d. per lb. lower. On Saturday, the 23rd, some of this fall was recovered, and in the Liverpool market there was a general advance of ¼d. to ⅜d. per lb. In the London market 110 bales Japan went at 10d. for fully fair. The *Aerolite* has arrived at Liverpool from Shanghai with 2,828 bales, and the *Engel* from Hong Kong with 1,121 bales. The Liverpool quotations at the end of the week were:—New Orleans, 13½d.; Mobile and Uplands, 12½d.; Fair Bengal, 6d.; Western Madras, 9¼d.; China, 9½d.; Fair Egyptian, 18¼d.

SUGAR.—The market continues to exhibit a dull appearance; the business done has been to a fair extent, but easier prices have had to be submitted to. We have no sales of this article from the Far East to record.

COFFEE.—1,176 casks, 370 barrels and bags Plantation Ceylon, brought to public sale, meeting materially lower bids, were mostly withdrawn, and a reduction of 5s. to 7s. per cwt. has been submitted to, at which the bulk has since been placed; fine fine ordinary to low middling 65s. to 70s., middling to good middling colory 71s. to 80s. 26 casks, 2,220 bags Native were held for about previous rates, and principally bought in, but part has since been taken at a decline of 2s. per cwt., viz., good ordinary 57s., fine ordinary 61s. 6d. to 62s. 6d. On Friday, the 22nd, the market had a firmer tone, and the public sales, comprising 620 casks, 240 barrels and bags Plantation Ceylon, went off with some competition at an advance of 6d. to 1s. per cwt. on the reduced rates above quoted.

RICE.—The market has continued very inactive, and only a moderate business has been done, viz., about 10,000 bags, including a landed cargo of Ballam and red Rice at 12s. 3d., fair Bassein at 10s., fair to good Ballam 12s. 4½d. to 12s. 9d., and white Bengal at 14s. 3d. to 15s.

CAMPHOR.—Nothing whatever doing.

CASSIA LIGNEA.—Limited business privately in Cassia Lignea upon former terms, but nothing doing in Buds.

CINNAMON (CEYLON).—We quote 1st sort 1s. 11d. to 3s. per lb.; 2nd, 1s. 8d. to 2s. 8d.; 3rd, 1s. 7d. to 2s. 4d.; and 4th, and Jungle 1s. 3d. to 1s. 9d. Small sales made at moderate prices.

COCOA-NUT OIL.—This market has again been most quiet, with very limited business at barely the former value; 7 casks Cochin, 98 casks Ceylon, and 130 casks Sydney at auction.

DRUGS.—Cubebs: Remain very flat; no business. Dragon's Blood: Flat; 8 cases at auction retired. Rhubarb: Again rather dearer, supply continuing inadequate to requirements; and 94 cases at auction mostly sold at 9s. to 11s. 5d. per lb. for middling to very fair flat and round, and 2s. 9d. to 5s. 7d. low and ordinary.

GUMS.—Benjamin: Very quiet; of 60 cases Siam at auction, a single one only sold at £30 15s. per cwt. for good drop, showing a large reduction; of 53 cases Sumatra, very few sold at £11 for fair 2nd quality being about the former value. Damer: Nothing doing. Gamboge: A single case at auction retired.

HEMP (MANILA).—Owing to present scarcity, holders have been able to establish an advance of £3 per ton; and 700 to 800 bales good roping have been placed at £39 to £42, with a few bales up to £43.

HORNS.—Buffalo: Have sold irregularly; the larger and the smaller sizes generally 2s. to 4s. per cwt. lower, and the medium 2s. to 3s. higher. Auctions have comprised 35 tons Calcutta, 28 tons Madras, and 6 tons Singapore, nearly all sold at 47s. 6d. to 49s. per cwt. for 3 to 3¼ oz. average; 37s. 6d. to 43s. for 1¾ to 2; and 24s. to 27s. for 1¼ to 1½. 5 tons Calcutta tips sold at 33s. to 33s. 6d., being 2s. cheaper. Deer: Firm; and 12 tons Madras, 6 tons Singapore, and 2 tons Ceylon at auction, sold at 55s. to 61s. per cwt. for 1¾ to 1¼ lbs., and 46s. 6d. to 61s. 6d. for 2¼ to 2 lbs.

INDIA RUBBER.—Nothing doing privately; 78 cases Assam at auction sold at 1s. 3½d. to 1s. 4d. per lb. for slab, and 1s. 1¾d. ball, being the former value.

JAPAN WAX.—Quiet; 169 boxes at auction, all retired.

OILS.—Anniseed: For retail quantities 9s. 6d. per lb. has been obtained, but there are sellers rather than buyers of quantity at 9s. 3d. Cassia: Nothing of importance doing. Citronelle: Steady; and of 34 cases at auction, one-fourth sold at 3¾d. per oz. Lemon-grass: Quiet; 4 cases at auction retired.

PEPPER.—Black: This market is remarkably flat; and of 594 bags Singapore and 440 bags Penang at auction, a few of the latter only sold at 3d. per lb. Private transactions equally insignificant. White: Not any business of consequence doing.

SPICES.—Cloves: A single case good Penang sold at auction at 1s. 2½d. per lb.; 3 casks Amboyna and 50 bags Zanzibar retired. Mace: Steady; 9 cases Penang at auction sold at 1s. 10d. to 2s. 9d. per lb. for middling red to good bright reddish. Nutmegs: Steady; 24 cases Penang at auction mostly sold at 1s. 10d. per lb. for medium.

SAGO.—Is fully 6d. per cwt. lower; and of 1,225 bags at auction, a small portion only sold at 19s. for good small, and 17s. middling large. Flour: Firm, but quiet: 823 bags at auction all retired at high prices.

TERRA JAPONICA.—Cutch, Pegue: Some little demand, but at rather lower prices; 30s. per cwt. offered for fine. Gambier: Demand has recently been rather more active, and moderate business done at 21s. to 21s. 6d. per cwt.; 1,282 bales at auction retired.

TIN.—This market has been tolerably active, with rather large transactions within our quotations of £78 to £80 for Banca, and £75 to £78 for Straits, especially in the latter.

MISCELLANEOUS.—Blacklead: Has not experienced any further decline; 526 barrels at auction, mostly sold at 10f. 3d. to 16s. 6d. per cwt. for middling to good lump, and 8s. 6d. to 9s. 6d. dust. Ebony Wood: Nothing doing, 49 tons at auction retired. Galls: All Galls of the Bussorah character remain very flat, and good Turkey blue cheaper, sales having been made at £5 per cwt. China and Japan both also dull and lower; of 140 chests. China at auction, one-third sold at 57s. 6d. per cwt. for smooth; and 405 boxes Japan all retired, 230 small boxes of which since sold at 60s. Musk: Flat; and of 20 caddies at auction two only sold at 20s. to 20s. 5d. per oz. for ordinary; 3 tins Grain retired. Rattans: Demand still very restricted; but 53,956 bundles Penang at auction all sold at 1s. 10d. to 6s. per 100. Sapanwood: Very flat, and nothing doing. Mother o'Pearl

Digitized by Google

Shells: Sales of Manila made privately at £7 17s. 6d. per cwt., showing undiminished firmness. Star Anniseeds: Flat; some inquiry, but at lower prices. Sticklac (Siam): Remains very dull, with nothing of interest doing. Vermilion: Scarce, and much wanted; 5 boxes at auction retired; 4s. realised privately in retail.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars. £7 10s. to £8; nail rod, £8 10s. to £8 15s.; hoops, £9 12s. 6d. to £10; sheets, single, £10 10s. to £10 15s.; Staffordshire bars, £8 10s. to £8 15s.; rails, £6 10s. to £6 15s.

STEEL.—Swedish keg, £15 15s.

COPPER.—Sheet and Sheathing, £91 per ton; yellow metal, 7½d. per lb.

TIN.—£83 to £85 for block; £84 to £86 for common bars. Tin plates, best charcoal, I.C., 32s. to 33s.

LEAD, &c.—English pig, W.B., £22 10s.: shot, patent, £23 10s. to £24; sheet, £21 10s.; spelter, £25; zinc, English sheet, £29 to £30; quicksilver, £7.

The following is from the Circular of Messrs. French and Smith:—All business in this market continues dull. Iron: Is quiet. Copper: Very flat, and cheap second-hand parcels offered on all sides. Tin: English selling much under official quotations. For foreign there is some demand, and prices are rather higher, owing not so much to large orders as to the small quantity offering. Tin Plates: Quite neglected. Lead: Prices unchanged, but more inquiry. Spelter: Flat.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

R. L. SOUTHERN AND Co.

MERCHANTS AND AGENTS

6, MINCING-LANE, LONDON, E.C.

CAUTION.

THE GROSS FRAUDS which continue to be practised by obscure manufacturers, more particularly in Germany, by imitating the Labels attached to JOHN GOSNELL and Co.'s PERFUMERY, render it imperative upon the Proprietors to Caution the public against such nefarious proceedings, and to request their friends and patrons to purchase only of respectable dealers, who import direct from JOHN GOSNELL and Co., and invite special attention to the address, 12, THREE KING-COURT, LOMBARD-STREET, LONDON, E.C.

JOHN GOSNELL and Co.'s SELECT PERFUMES.—Ess Bouquet, Royal Yacht Club Bouquet, Jockey Club Perfume, Essence of Wood Violet, Victoria Bouquet, Garibaldi Bouquet, Frangipanni, Military Bouquet, The Bride's Bouquet, Tea Rose, Russian Leather Perfume.

JOHN GOSNELL and Co.'s Toilet Vinegar, Inexhaustible Salts, Aromatic Vinegar, Aromatic Eau de Cologne.

JOHN GOSNELL and Co.'s Prince of Wales Perfumes

JOHN GOSNELL and Co.'s Princess Alexandra Perfume.

JOHN GOSNELL and Co.'s La Noblesse Perfume.

JOHN GOSNELL and Co.'s La Noblesse Pomade.

JOHN GOSNELL and Co.'s La Noblesse Soap.

JOHN GOSNELL and Co.'s Real Old Brown Windsor Soap.

JOHN GOSNELL and Co.'s Golden Oil—Moelline—Macassar Oil, Bear's Grease, &c., for the Hair.

JOHN GOSNELL and Co.'s Extra Highly Scented Toilet and Nursery Powder.

JOHN GOSNELL and Co.'s Stereodesmic or Dentists Tooth Brushes and Trichosaron Hair Brushes, warranted to purchasers.

JOHN GOSNELL and Co.'s Instantaneous Hair Dye.

JOHN GOSNELL and Co's Cherry Tooth Paste is greatly superior to any tooth powder, gives the teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

NOTHING IMPOSSIBLE.—The Greatest and most Useful Invention of the day, AGUA AMARELLA.—Messrs. JOHN GOSNELL and CO., 12, Three King-court, Lombard-street, London, Perfumers to Her Majesty, respectfully offer to the public this truly marvellous fluid, which gradually restores the human hair to its pristine hue—no matter at what age. The Agua Amarella has none of the properties of dyes; it on the contrary, is beneficial to the system, and when the hair is once restored one application per month will keep it in perfect colour. Price One Guinea per bottle; half bottles, 10s 6d.

JOHN GOSNELL and Co., Perfumers to Her Majesty and by Special Appointment to H.R.H. the Princess of Wales, London.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS for the Cure of Biliousness, Liver and Stomach Complaints, and General Debility.—This medicine is so well known in every part of the world, and the cures effected by it are so wonderful, that it now stands in no need of public eulogy. Its pre-eminence as a remedy for bilious and liver complaints, and disorders of the stomach and chest, is no longer a matter of dispute or doubt. In these cases the beneficial effects of these invaluable Pills are so permanent and extensive that the whole system is renovated, the organs of digestion strengthened, a free and easy respiration promoted, and both physical and moral energy are increased. Plain directions for the use of this admirable medicine, at once so mild and efficacious, are affixed to each. Holloway's Pills are always safe and act as gentle aperients.

ELASTIC  BOOTS.

W. SPARKES HALL & CO. beg to call attention to their PANNUS CORIUM BOOTS, which are peculiarly adapted for India or any warm climate. They have the appearance of leather, and are cleaned with ordinary Blacking, but the material is much softer than any leather ever introduced. Pannus Corium Boots are now coming into general use in India, and will be found a great luxury to Ladies and Gentlemen in any climate with tender feet.

A Printed Circular, with fu l particulars of Prices, forwarded free to any part of the world.

N.B.—SELF-MEASUREMENT.—Stand on a sheet of paper and mark round the outline of the foot. Take the size of the foot in the places marked in the above drawing.

The Greatest Luxury in a Hot Climate!

PEARS'S TRANSPARENT SOAP

HAS enjoyed the highest reputation amongst the aristocracy for the past half century on account of its absolute PURITY and MILD and SOOTHING Properties. It renders the skin beautifully SOFT, WHITE, and CLEAR, and for its delightful perfume stands unrivalled. For Nursery use, and in all cases of delicate skin, it is strongly recommended by the Medical Profession.

PEARS'S TRANSPARENT SOAP is sold for WASHING, in Tablet Balls and Square Cakes at 1s., 1s. 6d. and 2s. 6d. each. The 2s. 6d. size Tablet and Square Perfumed with Otto of Rose.

For SHAVING, in Round Cakes or in Sticks (in neat cases), at 1s., 1s. 6d., and 2s. 6d. each.

PEACOCK & BUCHAN'S COMPOSITION FOR IRON SHIPS.

THIS is now established as the best and cheapest Composition known for keeping the Bottoms of Iron Ships CLEAN and free from Corrosion or GALVANIC ACTION. Apply to the Manufacturers direct, at SOUTHAMPTON, or to their accredited Agents at all the principal sea ports of the world.

From Captain John Ralph Engledue, Managing Director of the Thames Iron Works Ship Building Engineering, and Dry Dock Company, Orchard-yard, Blackwall:—

"The Thames Iron Works, Ship Building, Engineering, and Dry Dock Company (Limited),
"Orchard-yard, Blackwall, E., September, 26th, 1865.

"Messrs. Peacock and Buchan.

"Gentlemen,—I shall at all times have much pleasure in bearing testimony as to the value and superiority of your Compositions for Ships' bottoms.

"I have used the No. 2 extensively for the last fifteen years, more particularly on the bottoms of the iron ships belonging to the Peninsular and Oriental Steam Navigation Company, and in every instance successfully. It is easily applied, economical, keeps the bottom CLEAN, and also has the property of preserving the iron.

"I visited, in dock, an iron SAILING vessel, called the 'Chile,' a few weeks since, and found her bottom perfectly clean, which had been coated with your Composition for upwards of twelve months, having made a voyage to New Zealand and back, and in salt water the whole time.

"I have also used your No. 1 Composition for the bottoms of wooden ships, coppered, and found it most advantageous, making the copper last double the usual time, and then only taken off to recaulk.

"I have at various times tried preparations of copper on iron ships, and in every case found the iron and rivets damaged.—I am, Gentlemen, yours faithfully,

"(Signed) J. R. ENGLEDUE."

"Egyptian Navigation Company, Azeeziah Mussriah, 61, Mark-lane, 7th July, 1865.

"Messrs. Peacock and Buchan, 39, Upper East Smithfield.

"Dear Sirs,—I have received orders to send to Egypt three tons of your patent Composition for ships' bottoms, same as supplied me in July, 1864. I now wish to know the soonest time you could have this packed and ready for shipment, as there is one of the Company's steamers leaving London about the end of next week. Please reply by return, and state price.—I remain, yours obediently,

(Signed) D. ABDUL HAMID BEY,
"I. FRICKEN."

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C.

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

Telegrams through Reuter's agency of Shanghai June 7 state that Min-Hoang is in danger of capture by rebels. Total export of silk 54,500 bales. The next mail, due on 13th, arrived at Suez on the 6th, and will probably be delivered on the 16th.

List of Passengers.

PASSENGERS INWARD.

Per French mail, arrived at Marseilles on the 6th.—From Hong Kong for Suez: Mr. Von Brandt. For Marseilles: Rev. Mr. Fessard, Messrs. P. H. Penny, Winch, T. Hogg, M. Milo, Fayard, Rohler, De Blanca, F. G. Pereira, De Court, Gallet, G. Clark, H. D. Kelsh, Cousin, Rouston, Jaffain, Toque, Rocher, Kestrcet, Lefevre, Cortichiato, and Miss A. Meyer.

By last mail, per P. and O. Company's steamer Ripon, arrived at Marseilles July 2.—From Shanghai: Mr. Saurin. From Hong Kong: Messrs. G. A. Archer, Hewlett, and G. W. Caine. From Singapore: Mr. J. A. Prathyn, Mr. and Mrs. Cruikshank, and Mr. W. H. Dickman. From Penang: Mr. P. H. Adlard.

To Southampton, per Syria, expected to arrive July 9.—From Ceylon: Mr. Ferguson and child, Mr. and Mrs. Thompson and three children, Mrs. Parsons, Messrs. Plumptre, Culpepper, and Steele, Mrs. Pickford and three children, Messrs. Vandort, Gawin, Pater, and Davis. From Penang: Mr. W. Hardie. From Singapore: Mr. and Mrs. Kenchennies and child, Mr. Johnson, Mrs. Sutcliffe and infant, Captain and Mrs. Hewatt and two children, Mr. W. Hewatt. From Hong Kong: W. Orr, Mrs. Hofferegan, Mrs. Balmicott's infant, Mrs. Fisher and infant, Dr. Browning, Captain O'Sullivan, and J. Hamilton. From Shanghai: Dr. Bell.

PASSENGERS OUTWARD.

Per P. and O. steamer, from Southampton, July 4.—To Penang: Mr. and Mrs. Walter Scott and six children, Miss Dickson, Miss Waller. To Singapore: Mr. J. W. Campbell. To Ceylon: Capt. and Mrs. Hawthorn, R.E. To Yokohama: Mr. C. T. Bland.

To Calcutta: Mr. W. McCulloch, Captain McAdam, Mr. G. H. Holley, Mr. C. H. Barnes, Mr. Seale, Mrs. Templer. To Madras: Major F. M. Davis, Mr. R. Brunton, Mr. G. Outram.

From Marseilles, July 12.—To Hong Kong: Mr. J. Russell. To Calcutta: Lt.Col. J. Eliot. To Madras: Mrs. Silver, Mr. J. Ratcliff, Major and Mrs. E. H. Power, Major McHutchins.

Per P. and O. steamer from Southampton, July 20.—To Hong Kong: Mr. W. Laidlaw. To Singapore: Captain and Mrs. Playfair. From Marseilles, July 28.—To Shanghai: Mr. J. Wilson.

Per P. and O. steamer, from Southampton, Aug. 4.—To Ceylon: Mrs. Grinlinton.

Per P. and O. steamer, from Marseilles, August 28.—To Singapore: Captain A. C. Bing.

Per P. and O. steamer, from Southampton, Sept. 4.—To Hong Kong: Mr. H. Beveridge.

From Marseilles, Sept. 12.—To Hong Kong: Mr. and Mrs. Sinclair, Mr. and Mrs. Smale, Miss Smale, Mr. Smale, jun. To Shanghai: Mrs. Forrest.

Per P. and O. steamer, from Southampton, Sept. 20.—To Hong Kong: Mr. John Brown. To Ceylon: Mr. L. Carey.

From Marseilles, Sept. 28.—To Singapore: H.H. the Tumongong of Johore and two friends.

Per P. and O. steamer, from Southampton, Oct. 4.—To Shanghai: Miss J. T. Blackwell.

Per P. and O. steamer, from Southampton, Nov. 20.—To Singapore: Mrs. Meldrum.

Summary of News from the Far East.

JAPAN.

The *Overland Times* of the 11th May says:—

"We have but little of importance to record. Business remains in the same dull and unsatisfactory state, and a garrison Race Meeting has really been the most noteworthy incident of the time. The English and French mail steamers arrived on the 1st and 7th instant respectively, and we are in possession of news from Europe to the 19th of March, with telegraphic advices up to the 5th April. The letters brought by the latter steamer have had a depressing effect on the market for our principal staple, and the market has been for the last few days very bare of buyers.

"The Chamber of Commerce has sustained a severe loss in the abdication of Messrs. Frank Hall (of the house of Walsh, Hall and Co.,) and Mr. A. J. Macpherson (of the well-known firm of Macpherson and Marshall) from the chairs of President and Vice-President. Both these gentlemen are on the point of leaving the settlement.

"A ballot took place yesterday, resulting in the election, by very considerable majorities, of Mr. R. Lindau, (Lindau and Co.) as chairman and Mr. L. A. Joseph (David Sassoon, Sons and Co.) vice-chairman.

YOKOHAMA.

We deeply regret having to announce the untimely death of Mr. John Macdonald, the Senior Assistant in Her Majesty's Legation in Japan, which melancholy event occurred on the 20th of April at Yokohama. The *Japan Herald* says:—"For some past he (Mr. Macdonald) had not been well, as was evident to the other members of Legation, rather by occasional incoherence and a non-disposition to speak except in monosyllables, which was quite foreign to his ordinary habit. On Wednesday, the 18th April, he was at a pic-nic, and nothing at all remarkable was observable; but on Thursday morning Dr. Willis, who had watched his changed manner for several days, told him that he had been expecting that he would consult him, but as he did not, he thought it his duty to speak to him and urge that he should seek some change of air and scene. In this Mr. Macdonald seemed to acquiesce, and probably would have either taken a trip home, or paid a visit to his old chief, Sir Rutherford Alcock, at Peking. He intended to go to Yeddo that morning, but felt so tired from the preceding day's pic-nic that he postponed his journey. About a quarter-past five on the same afternoon he was walking with two friends near the store of Messrs. McKechnie and Co., when he was seized with paralysis, and having been first taken into McKechnie's he was immediately after removed to the Commercial Hotel. Dr. Willis and Dr. Jenkins were speedily with him, and did everything that could be done for him; but from the first it was evident there was very little hope of recovery. His right side was completely paralysed—and to all enquiries there was but one reply—that the worst fears might be entertained. Sir Harry Parkes and Mr. Myburgh and several gentlemen of the Legation were with him very quickly, and remained for a considerable time. The Rev. Mr. Bailey also arrived on the instant he heard of the

Digitized by Google

seizure, but found Mr. Macdonald quite unconscious. He remained throughout the night, that he might be of service either in his vocation or otherwise assist Dr. Willis and other watchers. The sufferer rallied slightly about 6 A.M. on Friday, the 20th, but never fully regained consciousness, and soon relapsed into his former hopeless condition. He died at 4.20 P.M. on that day. He was 28 years of age, and was a native of Inverness, although principally brought up in London. He was much esteemed not only for his abilities and business-like habits, but for his gentlemanlike demeanour and thorough amiability of character. The funeral was attended by all the Foreign Ministers and Consuls, by the Commandant of the garrison and most of the military officers off duty, by several naval officers, officers of the Marine Imperiale, and by the majority of the foreign residents of all nationalities."

Mr. Macdonald will be well remembered by many persons in this country as having accompanied the first Japanese mission to England, in the year 1862, on which occasion his services were found of great value.

An incident is recorded as having occurred at Lagami, near Miako, which shows how strongly the rivalry and ill-feeling existing between the Tycoon and Choshio is reflected in the minds of the populace. Some farmers' sons, to the number of nearly a hundred, had assembled for play, and it was proposed by one of them that they should form themselves into two bands, one to represent the Tycoon's army and the other that of Choshio. What commenced in play ended in earnest, for some of the lads became so excited that it was well they had not all deadly weapons in their hands. One boy unhappily had a knife upon him, and drawing it, rushed upon the chief of the Choshio party and stabbed and cut him in such a manner that he died upon the spot. Of course, the poor boy, whose excitement had carried him so far, when his blood cooled was extremely sorry for the death of his playfellow. He was taken in charge by the officials and remains in custody, but as yet it has not been decided what shall be done with him.

Robberies are again becoming rife. A godown belonging to Messrs. A. Marks and Co. was recently entered at night and goods to a very large amount were taken. We have not heard of the capture of the thieves.

The cordiality that has been for a long time existent between foreigners and Japanese occasionally experiences a wrench, when such a fracas as the unhappy one in Kosaki-matchi, which led to the death of a French sailor and the decapitation of a Japanese, takes place. Another trial of its solidity has lately occurred. Two British officers were riding on the New-road when they met three Japanese soldiers—green-coated men. One of the Samourai was drunk and drew his sword, and was only prevented attacking the officers by the two comrades, who rushed upon him and held him back. The promptness of the Japanese authorities on this occasion has been most commendable. Upon the requisition of Her Majesty's Minister the man was arrested within twenty-four hours, and found to be one of the soldiers of the Japanese garrison. The authorities on the spot being satisfied of his guilt, the Japanese Government ordered his general to deal with him, who sentenced him to twelve months' imprisonment. A parade of the whole garrison was held, and his sentence was read out to him before all the troops, and the conduct of the two men who had kept him back was highly applauded. In consideration of the excellent feeling hitherto entertained between the Japanese soldiers and the foreign troops, which has been in a marked manner promoted on all occasions by General Kubota Sentaro, Colonel Brown has asked Her Majesty's Minister to apply for a mitigation of the penalty—and there is every reason to believe that the Japanese authorities will entertain the request.

Dr. Lindau who has hitherto held the office of Swiss Consul in Japan, has sent to the Federal Government his resignation of the office. For some time this has been his intention, as his increasing commercial duties demand it, and the appointment of an able Swiss Consul-General well acquainted with Japan gives him the opportunity of doing so without detriment to the service. Dr. Lindau has been most highly complimented by the Government of the Confederation, and thanked for the manner in which he has carried out the responsibilities that devolved upon him. Mr. C. Brennwald has received the appointment of Consul-General for Switzerland. Report speaks favourably of this gentleman, who in 1863 accompanied the original Swiss Embassy as its secretary. On the Tycoon agreeing to the Treaty, and the Embassy's arrival at home, he received the congratulations of his Government, and when it was deemed necessary to have a Consul-general in Japan of Helvetian birth, his services were remembered, and he was placed in his present position.

A disturbance took place on the night of the 18th April between two sailors belonging to the American whaling barque *Stephania*. Both were under the influence of drink; for some trivial reason they quarrelled, and one of them took out his pocket knife, with which he stabbed his shipmate in the back, making a large angular wound close to the lungs. The wounded man is at present in the hospital in a very precarious state.

A proposition had been made to raise a subscription for the widow of Kamekitchi, the coolie lately executed for the murder of a French sailor. This, however, proved to be unnecessary, as his Excellency the French Minister sent to the Governor a sum of money to be applied for her benefit far more than sufficient to provide handsomely for one in her station of life.

NAGASAKI.

We are glad to hear that steps are being taken to supply a want which has always existed at this port, namely, that of a resident consular chaplain. From the first opening of the port divine service has been regularly performed by the Rev. C. M. Williams, of the American Episcopal Mission. Until 1863 it was carried on at the British Consulate, but in that year a church was erected and an effort made to procure the services of a chaplain. Owing, however, to the smallness of the community and the (at that time) very precarious nature of the trade, the requisite funds could not be raised, and Mr. Williams has continued up to the present time to discharge all the duties of a chaplain gratuitously, being with great difficulty prevailed upon to accept even a very modest testimonial of the appreciation of the community. The departure of Mr. Williams for America has now rendered it necessary to take immediate measures to supply his place, and we understand that the sum required for that purpose has nearly all been subscribed.

CHINA.

SHANGHAI.

The London mail of March 26 arrived out on May 13. Dates are down to the 18th by the present opportunity.

The returns of trade at several of the ports during the past year have been published, and show as a rule a satisfactory increase. Tientsin, especially, among the northern ports, gives proof of steady progress, though complaints are loud that a large proportion of business lies in the hands of Chinese, instead of foreign merchants. Still, an increase in the value of imports from 6,617,000 taels in 1863-4 to 11,852,000 taels in 1865-6 must be beneficial to foreign trade, as implying a larger consumption of foreign goods; and, in effect, on analyzing the return, shirtings stand forth prominently as having risen from 122,608 pieces imported in 1863-4 to 684,583 pieces in 1865-6, Cotton, the most important export, has slightly fallen off, only 63,758 piculs having passed out last year, against 67,282 in 1864-5. Even these figures, however, are sufficiently satisfactory as compared with the 2,366 bales which represented the total export of the staple in 1863-4. If China cotton continue to yield a profit, this trade is capable of further development; and if the Chinese can be induced to forego the exactions which they levy directly or indirectly on all foreign imports, the market for piece goods should also continue to improve steadily.

The following items are from the *North China Daily News*:—

We are glad to learn that a letter was received at Chefoo on the 12th inst., from Consul Morrison, who is travelling from Peking overland to Hankow, and about whose safety grave doubts have for some time past been entertained. As Mr. Morrison may be expected here very shortly, we shall doubtless learn what has so long delayed him on his journey, the details of which will, we trust, be communicated to the Asiatic Society, to whom they would form a most valuable and interesting communication. We hear that several letters were addressed by different members of the community to the Chamber of Commerce complaining of the constant departure of the mail on Monday morning; and asking them to exert their influence to obtain a change in the system. The rule supposed to exist in the P. & O. Service, that when the appointed day for the mail to leave fell upon a Monday the departure was to be on the Sunday morning previous, was pointed out; but upon investigation it appears that the publishers of the mail card generally in use here were under an error in stating such to be the case, as no rule of the kind exists.

The magnificent steamship *Erl King* leaves this port shortly for Foochow, *en route* to London. She will take the first of the new season's teas, and is expected to make the passage in 70 days. All the most modern improvements have been applied for the comfort of passengers, and we hear that a number have engaged their passages. The ladies' saloon has been very tastefully decorated with white and gold, and fitted with plush velvet lounges, and the state rooms are well ventilated and airy, with bath rooms attached. Her saloon and her whole appearance have a high degree of comfort and luxury. As a specimen of marine architecture she is certainly the finest vessel that has ever appeared in these waters. Her machinery is of 200-horse power nominal, but capable of working up to 275. The ship is barque rigged. She is commanded by Captain Pinnel, who formerly commanded the *Sea King*, and from his great experience in the China waters there is no doubt he will be able to make a rapid as well as pleasant passage home.

By private letters from the North we learn that as the foreign residents in Peking were returning home after the races, they were rather extensively stoned by the mob. The matter is doubtless a trivial one, but affords an indication of the future results of that precious piece of political folly, the evacuation of the Taku forts. But one year ago the foreigner was held in considerable respect both at the Capital and Tientsin, a state of feeling which, as might be expected, is fast evaporating now that all power to make a demonstration of force has ceased.

Intelligence has been received of the capture of Newchwang by the rebels. Accounts bearing date 29th April from the port of Newchwang, states that the native city, thirty miles from the foreign settlement, has been taken by rebels. The Tartar General Yuh, made off at the second shot; and this official, noted for his anti-foreign propensities, has been replaced by Sun-le-Fang. Chung-Lin, well known to foreigners at Peking as one of the head clerks of the Foreign Office, and who during 1865 was Superintendent of Customs, has been appointed Civil Commissioner. This important and alarming intelligence forms another of the many instances which we have had of the utter insecurity of foreigners in China. The city of Newchwang is barely thirty miles from the foreign settlement at Yingtsze; and when it is borne in mind that there is no protection to it in the walls or other defence, and that the country is quite open and the roads at this time so good that four to five hours' ride might bring a band down upon it, some idea might be formed of the danger which threatens. The policy which has been adopted by the British Government in affording aid to the imperialists has tended in a great measure to exasperate the rebels, and there can be no doubt that very little mercy will be shown to any foreigners who may be unfortunate enough to fall into their hands. The sense of insecurity expressed repeatedly by Mr. Meadows, which has often been represented as groundless, now appears to have only been too well founded; and it is a subject of congratulation that the American corvette *Wachusetts* will be at the scene of danger in time, we hope, to afford the necessary protection to the foreign residents in the settlement.

HONG KONG.

The London mail of April 10 arrived on the 20th May. The P. and O. extra steamer *Niphon* arrived on the 24th with telegraphic dates of April 30. Telegrams of May 11 have also arrived out with the news of failure of Overend, Gurney, and Co.

The screw steamer *Far East*, engaged to bring troops to England, had been subject to some delay owing to a case of small-pox occurring amongst the crew, but it was expected she would leave about the 30th May. The *Whitcadder* was to leave on the 20th with troops for England, landing a portion at Algoa Bay, and taking on board a detachment of the 67th Regiment at Table Bay.

The steamer *Shaftesbury* has arrived from Suez, Galle, and Singapore, bringing a general cargo sent to her from England through Egypt.

The present French mail takes about 8,000 packages of new season's Foochow tea.

His Excellency the Governor, from all accounts, is interesting himself among other important matters connected with the public works in the colony, more particularly with the construction of new roads both east and west of Victoria. A partial survey has, we hear, been made from the head of the Wong-nei-chong valley in a southerly direction, with a view of testing the practicability of forming a road to Deep Water Bar, on the south west side of the island. The result has not transpired, but we believe that the road can be constructed without any very great engineering obstacles having to be overcome, at a gradiant of one foot in twenty; this for any long distance would be too heavy a drag for carriages, though for saddle horses it is not by any means severe.

We hear that the officers of the Volunteer force have sent in their resignations to his Excellency the Governor, who has accepted them. The reasons assigned for this rather sudden step in the letter forwarding the resignations are, we believe, as follows:—First, the want of moral and substantial support which the corps received from the leading firms in the colony; and, secondly, the utter impossibility of getting young men to join, and of making up a respectable muster on drill days, many members never attending at all. This breaking up of the corps has been long anticipated, but it is not the less to be deplored.

The U.S. steamer *Wyoming* reports that her engines having broken down she was taken in tow by the American steamer *Suwonada* and towed into port, the *Suwonada* leaving again immediately. The U.S. steamer *Hartford*, which had left a few hours previous, returned in company.

John Dent, Esq., is gazetted a member of the Legislative Council, *vice* the Hon. Francis Chomley resigned. Hugh Bold Gibb, Esq., is appointed to the Legislative Council during Mr. Sutherland's leave of absence.

By a notice in the *Gazette* the period of one month during which dollars are to be coined free of seignorage at the mint is extended to the 7th of August.

The *Opossum* has returned to harbour from an expedition down the West Coast. She has, it seems, been again to Pak-sui, the scene, it will be remembered, of one of her former exploits. Here she took nine large snake boats with a great quantity of arms, and liberated three men who had been taken prisoners by the pirates. They had been confined in one of the houses for two months, and one of them bore evident marks of torture. For this victim the pirates had demanded a ransom of $300. Lieutenant St. John was at first going to content himself with destroying the house in which the men had been imprisoned, but finding that two guns had again been mounted in the battery he determined to do the work more effectually, and demolished the whole settlement.

The new Seamen's Hospital was inaugurated yesterday and shown to a small party of residents, invited by the trustees. H. E. the Governor was present, and the visitors went through the building, inspecting the admirable sanitary arrangements which have been made, the large and airy wards, the roomy verandahs, and the appliances for the health and comfort of the patients that have been supplied with so liberal a hand. The hospital consists of four wings, but the plan has been so arranged that every ward is completely encircled by the breeze. Each wing is a complete building in itself and the verandahs only connect them. The central space is open to the air, and even this is not an enclosed quadrangle, but is open at the corners, where the verandahs cross the intervals between the angles of the building. It follows from this that the inner court is fresh and breezy, and that the windows which look inward upon it gain as much air as those which look outwards. The building is composed of two stories, and the eastern and southern wings contain simply one room each, on each floor. In this manner there are four large wards, each of which is at present furnished with twelve beds, though capable, of course, of containing more if they were ranged more closely. The other wings are divided into smaller wards, some containing two beds, some only one, for the accommodation of patients who can afford to pay more than the poorer seamen. In all, the building is at present arranged to receive sixty-eight patients, the furniture is in its place, all the necessary paraphernalia is, we believe, provided, and in point of fact the institution is ready for the service of the class in whose interest it has been constructed.

And by what means has this splendid and costly building, been produced? We believe there are few people in the colony who are not aware that its existence is to all intents and purposes owing to the princely liberality of Jardine, Matheson and Co.

(FROM OUR CORRESPONDENT.)

The Hong Kong Royal Mint was opened on the 17th May with some ceremony, and the first dollar was publicly struck from a "dump" placed in the coining press by the hands of the Governor's lady. Some two millions of dollars' worth of

Digitized by Google

bullion had been sent in for coinage previously to the opening day, and the presses are now hard at work producing our future currency. The appearance of the new coin has, however, elicited a feeling of general disappointment. Paltry is the only word that is applicable to both design and execution. The obverse has a fancy portrait of Her Majesty, floating in the midst of a flat waste of metal, the border being only occupied by a thin tracery in the style known as the "Greek Key," in the midst of which are the words "Victoria Queen." The reverse is uglier even than this bald design. It consists in some unsymmetrical curves and angles, supposed to represent "Chinese tracery," enclosing four Chinese characters signifying one dollar, Hong Kong, accompanied by a similar inscription in English, and the "Greek Key" border as before. The whole design is deplorably wanting in attractiveness, and, although the head of Her Majesty is well executed in outline, the impression of the whole coin is so weak and thin that a month's hard usage at the hands of the Chinese shroffs will surely obliterate almost every line and feature. The new bronze pence and halfpence in England are wiry and mean-looking enough, in all conscience, but they are quite outdone in this respect by the dollar which is to carry the idea of British dominion over all the regions of the East. The most serious defect in this coin is, however, the milling, if the feeble scratches on the edge may be described by that term. They have precisely the appearance of having been done by hand, with a blunt penknife, and offer obviously every facility to the counterfeiters. The opinion of one of the most respectable Chinese traders, to whom I have just shown a specimen of the coin, is worth having. After inspecting it narrowly he delivered his verdict by saying:—"Ya! So fashion no can do! Chinaman too muchee easy makee allo same! My can secure two moon more have got plenty copper dollar this side!" The native critic went on to say that nothing but lettering on the edge would secure a coin against the successful attempts of the counterfeiters. I greatly fear that the unfavourable opinion of this individual will be shared by his countrymen to an extent which will make them very shy of the new dollar.

If the experiment of raising the Hong Kong Mint into a lucrative source of revenue should fail, the colony will find itself in serious difficulties, owing to the heavy expense to which it has been put in the erection and maintenance of the works. Sir Richard Macdonnell rather startled the community the other day by telling the Legislative Council in a very outspoken manner that bankruptcy was staring them in the face, and his Excellency has promised a speedy and exhaustive examination into the state of the finances. Under such circumstances it will of course be doubly unfortunate if the circulation of the new dollar should be impeded by faults of workmanship such as I have pointed out, and before which mere inelegance of design sinks into insignificance. It seems strange, however, that England, so proud of her engineering and mechanical pre-eminence, should produce such a coin as this, as far behind the five-franc pieces turned out at Paris at the present day as a groat of Queen Elizabeth's time is inferior to a modern sixpence.

There have been some reports of rebel disturbances in Fukien, in or near the tea districts, but I hear from Foochow that the outbreak is a mere case of local brigandage. The accounts from the North of China are more favourable, as an important success over the mounted banditti in the province in which Newchwang is situated. Otherwise, there is absolutely no news of consequence.

STRAITS OF MALACCA.

SINGAPORE.

The P. and O. mail of 26th April arrived out on the 28th May, and the French mail of April 17th on the 19th May. Dates are now down to the 2nd June.

The delay of the transfer (says the *Straits Times*) continues to exercise a very baneful influence on the progress of the place, which cannot but be much retarded by the unsettled condition in which its future government is allowed to remain. As has been constantly pointed out, the extended commerce of this place now rests on a very precarious foundation, calling for the utmost solicitude. "The prosperity and progress of no country ever lay so completely at the mercy of its Government," and with no Government at all—or at least with no legislation, as at present—it is unnecessary to exaggerate the danger of our situation. There is at present some talk of another public meeting to memorialise the Secretary of State or the Colonies once more on the subject; but such a strong conviction, backed as it is by private advices from friends of the Settlement in London, still prevails in the measure yet passing the present session, that it is probable the meeting will be delayed till this is definitely known.

The past fortnight had witnessed a very successful effort, put forth chiefly by the ladies of the Settlement, to provide funds for the improvement and maintenance of the Botanical Gardens here, which are perhaps unsurpassed in beauty by those of any other place in India. The effort took the form of a fancy fête, held in the large mess-room of the long untenanted barracks opposite the Gardens, and a general holiday was proclaimed on account of it. The result will be a large addition to the Garden funds, further supplemented by a concert given by the amateurs in the Town-hall the following evening.

The mercantile community here already begin to complain of the mystifications attending a continuous stream of doubtful telegrams. Hardly three days now pass without the arrival of some steamer from India or Galle, bringing a budget of telegraphic news so disjointed and contradictory as to be extremely perplexing. The order of transmission is said to be sadly confounded, the same telegram often coming under three different dates, a state of affairs far from satisfactory, and likely to exercise a very prejudicial effect upon trade.

The *Straits Times* has the following remarks on the introduction of the new Hong Kong coinage into Singapore as a local currency:—"When the Hong Kong ten cent pieces were first imported, we directed attention to the very great advantages which their adoption into currency here would be likely to secure. Not the least of these we pointed out would possibly be a very marked reduction in the minor items of daily expenditure. Copper cents are too cumbersome, too troublesome to count, to be desirable tenants either of the pocket or the cash box; they are seldom kept at command, and when they are, are naturally dispensed with a very indifferent hand. The silver pieces, on the contrary, are both portable and convenient, and would enable ready-money payment to be adopted for the settlement of small amounts, instead of necessitating a resort to 'chits.' This custom of giving chits lies at the bottom of a good deal of the little extravagances of the place; it is not a method of payment which can be properly felt. The mere signing of pieces of paper cannot impress the mind with the same sense of diminishing resources as the actually taking out of the coin from one's pocket or cash box, and hence an unwitting prodigality ill-suited to the times. It is true there comes a periodical adjustment when the consequences of the system are brought to our notice,—that is, when these chits are summed up at the month's end—and a disagreeable enough summing up it is, in which the total always exceeds expectation by a long way; but though such adjustments are startling enough, yet the mischief they disclose has been done, and it is swallowed as a bitter pill and forgotten for another month. If the system of chits was abandoned by the young men of this place altogether, and cash payments rigidly adhered to, we warrant there would be a strong tide set in in favour of prudence and retrenchment."

It is a somewhat remarkable fact that the arrival and departure of the mails from Singapore, in about seven cases in ten, necessitates working on Sunday. Commenting upon this the *Straits Times* says:—"We would again urge the advisableness of setting apart one day as a general holiday after the departure of each mail which may necessitate working on a Sunday. It is almost superfluous to repeat the many arguments that exist in favour of this course, the greatest will always be found in the aching head and general worn-out powers of the man who tries to brave the mandate of nature and of God—'Six days shalt thou labour and do all that thou hast to do.' Putting aside all religious feeling and those higher aspirations and nobler duties of man, which the thirst for gain and the necessity of keeping up with the universal pace seems to doom to the sacrifice, there should still be sufficient of the motive of self-preservation to induce us to husband our forces, and by yielding to the universal law of nature, to preserve to ourselves in their full vigour those powers bestowed upon us, the use and not the abuse of which can alone keep us hale and healthy, and enable us to bear the effects of a climate sufficiently debilitating in itself, without calling in the aid of overwork, to diminish the chances of ever being able to enjoy that wealth. It is true that holidays have of late been rather more frequent than formerly, and it is most undoubtedly a step in the right direction;

Digitized by Google

but we think that in all cases in which the Sunday is set apart for work, owing to the arrival or departure of a mail, some other convenient day, as soon thereafter as possible, should be set apart, by unanimous consent, for rest and recreation, so that the dwellers in this island should not be compelled to labour more than the six days set aside for that purpose by an Authority whose wisdom not even the most unscrupulous will venture to call into question.

Her Majesty's steamer *Salamis* is daily expected from England to relieve H.M.'s steamer *Coquette*, which is at present stationed here. On the arrival of the *Salamis* the *Coquette* will, we hear, proceed to England to be paid off.

The receipts of the Stamp Office at Singapore from the 1st May, 1865, to 30th April, 1866, amounted to Rs. 195,269-13.

His Italian Majesty's steam frigate *Magenta*, Captain Arminjon, from Batavia, *en route* to Yokohama, anchored in the harbour.

The trustees for the estate of John Gemmill, Esq., have announced for sale the following property :—

That substantially built block of godowns known as "Gemmill's Buildings," between Boat Quay and Commercial-square, fully tenanted. "Mount Erskine" estate, comprising house, tenanted, and seven acres of ground. "Lessudden House," tenanted, with twelve acres of ground.

H.M.'s steamer *Basilisk*, which left Singapore on the 10th April, anchored in the Roads of Saigon on the 14th May, and left the following day to join the British squadron at Hong Kong.

We find that the *Jeddo*, reported in a previous issue as having been burnt in the Straits of Sunda, with a number of coolies on board, was from Amoy, bound to Demerara.

H.M. steamer *Feroze*, Captain Barnes, from Colombo and Galle, with dates from the latter port to the 15th May, having on board four companies of the Ceylon Rifles for Hong Kong, arrived here on the 23rd, and after coaling proceeded on her voyage. She brings the following late telegrams :—

LONDON, May 8.—Bank rate 8 per cent. Produce failing. Tea very flat. Manchester very depressed.—London, May 10.—Bank rate 9 per cent. Panic unparalleled. (And here follow the names of some eminent London houses said to have failed.)

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

SOAMES—On the 25th June, at 6, Priory-road, Kilburn, the wife of Captain W. Soames, P. and O. Company, of a daughter.

THOMSON—On the 1st June, at Killeney Road, Singapore, Mrs. Wm. Thomson, of a daughter.

MARRIAGES.

BOWMAN—HULCOOP.—On the 9th June, at the parish church, Walton-on-Thames, by the Rev. J. McCowan, James Bowman to Emma Heard, second daughter of William Hulcoop, farmer, Alton, Hants. No cards.

D'SOUZA—BLANKANHEYM.—On the 22nd May, at St. Joseph's Church, Singapore, Mr. M. T. D'Souza to Miss Johanna Blankanheym.

SMALE—NEWTON.—On the 27th June, at St. Luke's, Upper Holloway, by the Rev. Albert Rogers, Frederick William Smale, Esq., of Ormond House, Blackheath, to Sarah, widow of the late M. Newton, Esq., of Kilburn Priory. No cards.

DEATHS.

BLAKESLEY—On the 4th May, at Hong Kong, John Blakesley, clerk to Lane, Crawford and Co.

BANCROFT—On the 8th May, at Hong Kong, Andrew Bancroft, aged 45 years.

COUSINS—On the 22nd May, at Sourabaya, of cholera, Mr. Reuben John Cousins, proprietor of the Australian Hippodrome, aged 35 years.

CORNELL—On the 27th June, at his residence, Ilford, James Cornell Esq., of No. 6, Fowkes-buildings, Great Tower-street, late of Mark-lane, aged 56.

DUFFIELD—On the 1st May, on board H.M.S. Princess Royal, Arthur Augustus Duffield, aged 20 years.

FRICKER—At the Government Civil Hospital, Hong Kong, E. S. Fricker, late barman at the British Hotel.

FOLSOM—On the 2nd May, at Canton, Arthur Ellis, infant son of the Rev. Arthur and Mary Thomas Folsom, aged 11 months and 4 days.

MURRAY—On the 15th May, John Arthur Murray, clerk to Messrs. Lane, Crawford and Co.

MORRISON—On the 1st July, at No. 8, Buckingham-place, Brighton, Hannah Eliza Morrison, youngest daughter of the late Rev. Dr. Morrison, of China. Friends are requested to accept this notice.

SOAMES—On the 2nd July, the infant daughter of Capt. William Soames, P. and O. Company, aged seven days.

SHAW—On the 26th June, at Blackheath-park, William Alexander, youngest son of William W. Shaw, Esq., late of Singapore, aged 7½ years.

VARCO—On the 2nd July, at Denmark-hill, after a long illness, William Brown Varco, late of Canton, China, aged 41.

YZELMAN—On the 18th May, at Singapore, Jacobus Yzelman, Esq., aged 66 years.

EXCHANGES ON LONDON.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Telegraphic intelligence has been received of the opening of the market at Foo-Chow for the new season's tea at rates which will lay down here at 2s. 10d. The *Taeping*, *Ariel* and *Falcon* have sailed, and about 8,000 packages come forward by the French mail steamer, which has now arrived at Marseilles.

RAW SILK.—The quantity of raw silk taken by the *Rangoon* is as follows:—427 bales and 11 cases for Southampton, and 110 bales and 2 cases for Marseilles; total, 537 bales and 13 cases.

SHANGHAI.—There are no transactions to report in China silk, and the unsold stock on this market is exhausted. The weather is everything that could be wished, and if all continues well, a fair crop may be expected next season.

YOKOHAMA.—Since the last report there has been but little change in the Silk market. The arrival of the London mail of the 26th of February confirming the unfavourable news previously received, has doubtless had a further depressing effect upon the market, but the total settlements for the fortnight amount to 500 bales, some portion of which, it is understood, is being shipped as remittances by the foreign houses. The quotations given below show a further average reduction of $35 to 50 per picul upon those of last mail, and the total absence of the finer descriptions of silk has become still more apparent; the unsold stock now on offer, estimated at about 1,200 piculs of all sorts, being composed entirely of medium and and inferior grades. The total export from the 1st of July to date is now 9,889 bales, against 13,365 bales at the same period last season. The quotations are:—

	Per Picul.
Ida medium	... $680 to 730
„ inferior	.. 620 to 665
Mybash and Sinchu, best	.. None.
„ „ medium	.. 720 to 780
„ „ inferior	.. 640 to 700

CHINA GRASS.—SHANGHAI.—Owing to the paucity of stocks, but little business has been done. A few transactions for export to England are reported at 13.7.5 to 14.1.0 tls. for fair white quality. Of No. 1 white there are but few bundles on the market, held at 15.2.5 tls. per picul. Stocks of both white and green are very small; the latter quality is held at 9.0.0 to 10.0.0 tls. per picul. No further supplies have come forward from Kiukiang and Hankow, both markets being bare of stocks. The new crop may be expected within 2½ months.

COTTON.—Engagements have been made to load the *Western Chief* and *Luzon*; at Hong Kong and Tien-tsin several vessels are to load. The cost of the article, fair quality, is for Tien-tsin quality, $20. About 8,000 bales of the two sorts changed hands, and as some inquiry ensued, the quotations rose half a dollar to a dollar. The report, however, of the continued dulness and depression in the London cotton market, which was received by last mail again quieted the market here, and sales since have been trifling. Bombay cotton is neglected. Bengal and Tien-tsin are inquired for at the low prices mentioned above, the quotations being, Bengal, $17.50 to 22; Tien-tsin, $20.50 to 21.50; Bombay, $18 to 20.50, nominal. Imports from Calcutta amount to 6,000 bales.

CHINA IMPORTS.

During the fortnight there has been no inquiry for piece goods by Chinese buyers, and a few thousand pieces only of 8.4 lbs. Grey Shirtings have been taken by foreign speculators at $4.25 to 4.30. Cotton Yarn has been wanted, and some of recent arrivals has sold above our last quotations.

RAW COTTON.—The low prices ruling have attracted some native buyers, and holders have been glad of the opportunity to reduce their stocks in the face of the heavy supplies which continue to arrive. Foreigners are now quite out of the market, as the telegraphic news from England will prevent further shipments homewards.

In WOOLLENS and METALS there is no change to note.

COALS.—With supplies of all descriptions continuing on a very moderate scale, our prices are well maintained, Australian having been placed at $12 to 12½ from ship's side, English and Welsh from godown at $16 and 16½ respectively. Another cargo of English has been sold for arrival at $15.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From Liverpool, March 27, Castlehow.

At SHANGHAI.—From Newcastle: April 27, Ecliptic.

At HONG KONG.—From London: May 8, Northfleet.—(Reported by Telegram.) From London: Devana.

At BANGKOK.—(Reported by Telegram.)—From London: May 10, Fairy.

At MANILA.—From Cardiff: May 4, Lady Blessington.

At SINGAPORE.—From Cardiff: May 7, Conception; from Havre, 12 Saint Aubin.

At PENANG.—None.

At BATAVIA.—None.

At SHANGHAI.—From London, May 11, Fire Queen.

At HONG KONG.—From England, May 17, Amberwitch; from Sunderland, 22, Maitland; 17, Zingra; from Cardiff, 19, Island Queen; from Liverpool, 25, Everest; from Hamburg, 15, Margaretha; 18, Patria: from New York, 17, N. B. Palmer; 23, Benefactor.

At SINGAPORE.—From Cardiff: May 29, Brederode; 22, Aurelie: from Liverpool, Falcon. From London: Christian Rankin; 25, Oribe; from Glasgow: 23, Huntley Castle; 25, River Eden; from Bordeaux: 25, Helene.

DEPARTURES.

From YOKOHAMA.—for London; May 10, Chanticleer.—(Reported by Telegram) Challenger.

From SHANGHAI.—For London: May 3, Vanguard. For New York: May 2, Fairleader.

From FOOCHOW.—(Reported by Telegram.)—For London: Ariel, and Falcon.

From HONG KONG,—For London, (via Algoa Bay), May 20, White Adder.

From HONG KONG, CANTON, and MACAO.—For Lisbon: April 29, Martinho de Mello. For New York (*via* Macao): May 9, Kungmow.

From MANILA.—For Cork: May 3, Far Away. For Havana: Adolfo. —(Reported by Telegram.)—For London: Lyola. For Liverpool: Alavesa.

From SINGAPORE.—For London: May 10, Nancy; 11, Desdemona. For Rotterdam: 16, Altona. For Boston (*via* Padang): Macassar.

From SINGAPORE.—For New York: May 25, Industry.

From PENANG.—For London: April 30, Prata; May 17, Moorhill.

VESSELS LOADING.

At YOKOHAMA.—For London: Chanticleer. For New York: Castlehow.

At HANKOW.—For London: Expected to load new teas, Erl King (st.) Eliza Shaw, Flying Spur, Challenger.

At SHANGHAI.—For London: Cinderella.

At FOOCHOW.—For London: For new teas, Fiery Cross, Serica, Taitsing, Taeping, Black Prince (all engaged full). For Liverpool: Ziba (engaged full). The following vessels will also be laid on the berth; Sir Lancelot, Yangtze, Ada, Young Lochinvar, City of Aberdeen, Chinaman, Min, Sir Wm. Wallace.

At HONG KONG and CANTON.—For London: Belted Will, Deerfoot, John Milton. For New York: Ann Lucy.

At MANILA.—For London: Herbert, Ironside, Lochnagar. For Falmouth: Madagascar, Satellite, William Cundale. For Cork: Turandot. For New York: Hadassah, Sailor Prince.

At SINGAPORE.—For London: Bastiaan Pot, Winona. For Liverpool: Grenada, Patriot Queen. For Bristol: Alfred Ray. For Bremen: Frederick VII. For New York (*via* Padang): Industry.

At PENANG.—For London: Queensberry.

CASUALTIES.

FOOCHOW.—(Reported by Telegram.)—The Minerva, from Foochow to Shanghai, struck on leaving the river, is badly damaged, and has put back to discharge.

BATAVIA.—(Reported by Telegram.)—The Fi-wan, London to Shanghai, stranded in Princess Strait, near Anjer; crew saved. The wreck, and cargo has been sold at Batavia for 4,000 guilders.

Captain Walker, of the British ship Oribe, arrived at Singapore 25th May and reports having passed the British ship Dunmail, from London to Hong Kong, on shore in Gaspar Straits. He signalled the stranded vessel, but received no reply. He saw people on the poop, and they had a hawser out astern.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3; Silk, £4 to £4 10s.

At SHANGHAI.—The rate to London is £3 10s., and to Liverpool £2 10s. for Cotton.

At FOOCHOW.—Rates for New Teas not yet fixed.

At HONG KONG.—The only charter to the United Kingdom is the Maria Wilhelmina, 270, from Manila to United Kingdom or Continent at £3 and £3 5s. for Sugar, if Iloilo or Zebu, 2s. 6d. extra; the Castleton, Manila to New York or Boston, $12 per ton of Hemp, 4 bales; to Bangkok and back, 30c. to 40c. per picul.

At MANILA.—The Ironside has been fixed for London, at £3 for 500 tons Clayed Sugar, and £3 10s. for Hemp; the Sailor Prince loads for New York with a ballasting of Clayed Sugar at £2 15s., and Hemp at £5 12s. 6d. per 20 cwt. The Hadassah has also been fixed for the same port with a cargo of Hemp at £6 per 20 cwt.

At SINGAPORE.—Tonnage is but little inquired for; nothing doing for the Birmah ports; ships on the berth for London are loading at £2 dead weight and £2 10s. light cargo.

SHIPS OF WAR ON THE CHINA STATION.

At Hong Kong.—The British steamers Coromandel, Hesper, Leopard, Leven, Rifleman, Serpent; the gunboats Bouncer, Clown, Dove, Firm, Flamer, Haughty, Opossum, Staunch, Watchful, Woodcock; the Spanish steamers A. Escano, Circe, and Malespina; the American steamer Hartford, and the storeship Relief.

At Macao.—The Portuguese gunboat Camoens, and the lorcha Amazona.

At Canton.—The British gunboat Janus.

At Swatow.—The British gunboat Drake.

At Amoy.—The British gunboats Grasshopper and Snap, and the steamers Perseus and Princess Royal.

At Foochow.—The British gunboat Havock.

At Shanghai.—The British steamers Barrosa and Manilla; the gunboats Hardy, Starling, and Weasel; the French steamers Deronlede and Hong Kong; the American steamer Wyoming; and the Russian steamer America.

At Yang-tze-kiang.—The British steamers Algerine and Slaney; the gunboat Cockchafer, and the French gunboat Tardif.

At Japan.—The British steamers Adventure, Argus, Osprey, Pelorus, and Scylla; the gunboat Bustard; the French steamers Kienchang and Primauguet; and the Russian steamers Variag and Isumrude.

THE NEW SEASON'S TEA.—By the French mail, which arrived at Marseilles on the 6th 8,000 packages of the new Season's Congou arrived from Foochow. Intelligence has been received of the sailing of the *Taeping* and the *Falcon*, which may be expected here early in September. The cost this Season laid down in London is higher, it being 2s. 8d. to 2s. 10d. per lb.

MORTALITY OF TROOPS AT HONG KONG.

(To the Editor of the *London and China Telegraph.*)

SIR,—Having read in the columns of the *London and China Telegraph* some statistical details given by Colonel North with reference to the recent sickness and mortality amongst the troops at Hong Kong, I am inclined to think that data therein exist for showing that the mortality to which the attention of the public has been chiefly drawn—namely, that in the 11th Regiment—is traceable to causes that were beyond the control of either the military or the medical authorities, and that the impression which appears to be generally held, that it would have been averted had due attention been paid to the accommodation of the regiment on arrival, is an erroneous one. The following are Colonel North's statistics, arranged in a tabular form, and which show the mortality and invaliding in the 9th and 11th Regiments from the dates of their landing in China up to the 15th October, 1865.

Corps.	Date of Landing at Hong Kong.	Officers.			Non-Commissioned Officers and Men.			Women.			Children.		
		Strength.	Died.	Invalided.	Strength.	Died.	Invalided.	Strength.	Died.	Invalided.	Strength.	Died.	Invalided.
2nd Batt. 9th Regt. ...	Feb. 7, 1865	34	1	1	809	36	78	47	5	20	79	23	28
2nd Batt. 11th Regt. ...	May 28, 1865	25	2	3	784	49	124	54	3	16	92	18	14

It is clear from this return that the 9th Regiment, which we are warranted in assuming to have been as well provided in respect to barrack accommodation as any corps has yet been in China, suffered a considerable loss during the period over which these statistics extend, though it does not appear to be locally identified with a special cause, as that in the 11th Regiment has, in my opinion, somewhat hastily been.

From statistical records and collateral evidence, it has been established beyond doubt that last hot season in Hong Kong was a very unhealthy one—a result opposed, on the whole, to the experience of the three or four previous years, the place having latterly commenced to acquire a a character for comparative salubrity—so much so, that in 1862 and 1863 it was used as a sanitarium for the troops in the north of China, and with satisfactory results. The 9th Regiment, therefore, was unfortunate in commencing its service in China by encountering a sickly season, the results of which are sufficiently apparent in the return, and still more so by some figures since given in the *Pall Mall Gazette*, bringing the sickness and mortality in this corps up to a later date than Colonel North's statistics do—the total mortality amongst the men of the 9th Regiment being given as 48, and the number invalided at 139; being 10 deaths and 61 invalidings in excess of those up to the 15th October, 1865. The same statistics bring the mortality and invaliding in the 11th Regiment up to 58 and 189 respectively.

It may be taken for granted, therefore, that mode of location had nothing to do with the sickness and mortality in the 9th Regiment, seeing that "sanitary science"—as it is the fashion of the day to designate a few common-sense principles in the management of bodies of men—has been at work since 1860 endeavouring to perfect the accommodation for one European regiment at Hong Kong—namely, the head-quarters on the island itself, and a wing on the recently annexed portion of the mainland of China, known as Kowloon. If, therefore, the 9th Regiment has suffered from the effects of a Hong Kong sickly season, it is manifestly unfair and inconsistent to say that there are any grounds for supposing that the 11th Regiment would have enjoyed immunity from its effects, however well they might have been domiciled on arrival.

As any one possessing the least knowledge of China could have foretold, the 11th Regiment not only suffered, but did so more severely than the 9th Regiment. This excess of sickness and mortality in the 11th Regiment appears to be attributed entirely to the defective manner in which it is alleged to have been accommodated. Individually, I am inclined to think that it is much more probably attributable to the fact that while the 9th Regiment had the advantage of being acclimatised, as it were, during the months of February, March, and April, when the weather is moderately cool, the 11th Regiment landed in the end of May, just as the intense moist heat of summer was fairly established; and, as a natural consequence, the men were by no means so favourably situated for bearing up against the sickly season as the soldiers of the 9th Regiment were.

Much stress has been laid and vituperative comment expended on the fact that the 11th Regiment was sent over to Kowloon, but it must be remembered that this place was specially selected by the sanitary authorities of the expeditionary army in China in 1860, as the spot best adapted for building new barracks on, and that the intention at that period was, that our entire military establishments, hospital included, were to be removed to it from Hong Kong. That Kowloon was not likely to prove a success I formed the opinion a very short time after it was taken into occupation, and though the opinion was viewed locally at the time as a very paradoxical one, I nevertheless placed it on record in the annual report of the 31st Regiment for the year 1860, which I had to draw up, having been placed in medical charge of that corps about six weeks prior to the termination of the year. The grounds on which I founded my opinion, and the details I entered into respecting Kowloon, are much too lengthy for insertion, and I will confine myself to quoting the concluding remarks I made on the subject:—"I have gone thus far into detail, and touched on what probably may be viewed as matter somewhat irrelevant to the true object of this report, but in so doing, my object has been to draw attention as much as possible to Kowloon; believing that a costly experiment in pursuit of hygiene is about to be undertaken, the results of which will, in all probability, be unsatisfactory, unless the movement is based on a true appreciation of all the causes which have rendered Hong Kong hitherto so fatal to the health of soldiers. That any material difference exists between the climates of Kowloon and Hong Kong I do not believe, unless, possibly, from the vast number of graves which are scattered over it, the former may be the most unhealthy of the two, and to hope for any general sanitary improvement on the health of future garrisons in China, attention to several points (hitherto overlooked) beyond the mere erection of barracks on sites exposed to the south-west monsoon, will have to receive special attention, and which relate principally to the selection of proper men, their transmission to China by modes of transport calculated to prevent their constitutional powers becoming lowered during the voyage, the provision on landing of sufficient cubic space and proper ventilation in their dormitories, combined with attention to their diet and habits generally of life. That these indications are ever likely to be satisfactorily fulfilled on the present system of garrisoning Hong Kong I think improbable; but I incline to the belief that they might be ultimately attained by the establishment of a regiment raised specially for China on principles similar to those on which the one serving at St. Helena is recruited; certain inducements, I believe, being held out to good soldiers to volunteer. The formation of such a corps, to be composed of men only whose habits, health, and general character had been subjected to some years' test, would be attended with much practical good, and be productive of very considerable pecuniary saving to the Government." Whether the observations, of which the foregoing extract was the conclusion, exercised any influence or not I have no means of knowing; all I can say is that the construction of permanent barracks and hospitals, which was recommended strongly by the sanitary authorities in 1860 has not yet been carried out, though temporary barracks have been erected, and the place continued as a military station up to the present time, with results, however, of a nature similar to those which, six years ago, I stated would most probably occur. In making these remarks I do so in the hope of possibly drawing attention to the question of garrisoning Hong Kong on a different principle to that which is at present followed, and which is sure periodically to be attended with disasters such as now occupy attention.—I am, Sir, your most obedient servant,

D. F. RENNIE, M.D., Surgeon 20th Hussars.

Campbellpore, May 30, 1866.

THE INDIA AND CHINA BANKS.

When we penned the comments in our last issue on the subject of reducing the usance for bills of exchange in the India and China trade we hardly expected so speedy a settlement in the matter. It will be observed from the following circular issued on the 3rd that the matter has been decided on by the leading banks. The Asiatic, it will be seen, are not amongst the banks represented, not we understand from any disapproval of the plan, but from a desire to first elicit the opinions of the Chambers of Commerce in England. The other banks have their head offices in India, and consequently could not join the movement at present. We are painfully reminded now, in dealing with the standing institutions of China, of the absence of the once important Agra and Commercial Banks, two of the oldest establishments.

It being considered desirable to shorten the usance of the bills drawn in India and China on Europe, the undersigned hereby give notice that from the 1st of January, 1867, their branches and agencies in the East will only buy and sell bills of exchange at a term not exceeding four months' sight.

The undersigned further give notice that they will purchase bills of exchange, drawn under credits, only when the credits contain a distinct engagement with the holders of the bills to accept the same.

G. U. ADAM, for the Chartered Bank of India, Australia, and China.
D. T. ROBERTSON, for the Mercantile Bank of India London, and China.
J. OUSELEY, for the Bank of Hindustan, China, and Japan (Limited).
J. C. PARRY, for the Delhi and London Bank (Limited).
G. PIETSCH, for the Comptoir D'Escompte de Paris.
CHARLES J. F. STUART, for the Oriental Bank Corporation.

The following comments on the measure are from *The Times*, in which we do not agree:—

Five of the Indian banks in London,—the Chartered, the Chartered Mercantile, the Bank of Hindustan, the Delhi and London Bank, and the Oriental,—together with the Comptoir d'Escompte de Paris, have announced that from the 1st of January next, owing to its being considered desirable to shorten the usance of bills drawn in India and China on Europe, their branches and agencies in the East will not buy or sell bills of exchange at any term exceeding four months' sight. The present ordinary term is six months' sight, and the measure has obviously been adopted with the praiseworthy object of lessening risk, but it is questioned if it will answer. In a majority of cases it is said even the six months' usance is insufficient for the sending forward and realisation here of the produce against which the bills are drawn; firms on this side, especially in the case of cotton, being often for a couple of additional months under cash advance. They are, therefore, likely to direct their correspondents not to draw upon them at less than the usual term, in which case the business now declined by the banks in question will simply be transferred to private banking and agency houses, or to the banks that have refused to join in the new rule. It is desirable that the facilities of credit so wildly granted during the past two or three years to weak speculators should be cut off, and the shortening of the term of bills would contribute to that result, but a remedy which interferes with the understood routine of trade is sure to fall into desuetude so soon as the excitement under which it was adopted shall have passed away. The true plan of security must be found in making advances on goods only within the most prudent limits and to parties of unquestioned character, and if these precautions ars neglected no artificial restrictions will supply their place.

NOTICES TO CORRESPONDENTS.

No notice can be taken of anonymous correspondence. Whatever is intended for insertion must be authenticated by the name and address of the writer, not necessarily for publication, but as a guarantee of good faith.

A REGISTER is kept of the addresses of all persons connected with the FAR EAST and reference can be made to the same by personal application at the office or by letter.

Any information required by Subscribers, in reference to Commercial or General matters in CHINA, JAPAN, SINGAPORE, *and other parts of the* FAR EAST, *will be supplied on application at the Office, where files may be seen of the Journals published in those countries.*

THE LONDON AND CHINA EXPRESS.

PUBLISHED on the departure of the Mails *via* Marseilles on the 10th, 17th, and 26th, contains a Summary of European, American, and General News; Commercial and Shipping Reports, and Special notices of Trade with the FAR EAST.

Subscription 5ts. per annum, including Postage. Export Supplement 12s. extra.

The London & China Telegraph.

LONDON, MONDAY, JUNE 9, 1866.

TELEGRAPHIC COMMUNICATION WITH CHINA AND AUSTRALIA.

A NEW scheme for a system of telegraphic communication on a very comprehensive scale has been promulgated. It proposes to construct, firstly, an overland line of telegraph between Rangoon and Singapore, with a branch to Bangkok and Saigon; secondly, a line from Singapore by way of Boncalis, Siak, Padang, Bencoolen, and Lampong to Anjer, through Java, and so on to Australia; and thirdly, it is proposed to reach China either from Saigon or Hue, by a land line round the northern shore of the Gulf of Tonquin, or a submarine one *via* Hainan—the latter being apparently the more feasible of the two. Sooner or later we shall doubtless have telegraphic communication, more or less direct, between all our colonies and dependencies in the East, and there can of course be no harm in ventilating any projects of this nature that may from time to time appear. But it will be the work of some years to overcome the many obstacles that present themselves to the execution of even a small portion of this extensive scheme, which is —on paper—so easily sketched out.

THE STRAITS TRANSFER.

WE have already noticed the introduction of the Bill for the transfer of the Straits Settlements, and but for the suspension of the Parliament we should now have the pleasure of announcing that it had passed through all its stages. However, we feel quite safe in assuring our readers that the remaining stages of the Bill will not meet with any opposition in the Commons or Lords from either Liberals or Conservatives, as the good offices of Lord STANLEY have already been engaged in its promotion. The Bill itself contains only a few *pro forma* clauses, granting powers to Her MAJESTY in Council to assume the Government, &c. The fourth and last clause is, however, of very considerable importance, and we deem it best to give it entire, and at the same time we must express our opinion that the SECRETARY of STATE for the COLONIES has exercised a wise discretion in not making a sweeping change in the government at once. By this measure he will gain the experience necessary for the government of the place, according to the formula of the Colonial-office. In the meantime it will, we presume, be open to any officer of the present Government to make any representations as to a continuance in office or pension from their old masters the Government of India. Ultimately we believe the various offices will be filled according to the suggestions of Sir HERCULES ROBINSON, which will be found in the official correspondence which we have forwarded to our agents for the inspection of such of our subscribers who may be desirous of seeing it. Henceforth the Straits Settlements will be in a position to make such progress as may be compatible with surrounding interests; and we trust that even the minority who do not approve of the transfer will now give their hearty co-operation to measures designed for the general good. The following is the extract alluded to above :—

Until otherwise provided by Her Majesty in Council, or by such three or more persons as aforesaid, all laws or regulations (except the aforesaid Act of Parliament), which, when this Act shall come into operation, shall be in force in the said Settlements and their dependencies, and all proceedings of any court of justice had or to be had therein, shall be and continue to be of the same force and effect, and all judicial and other officers who, when this Act shall come into operation, shall be lawfully exercising their offices in the said Settlements and their dependencies, shall continue to have and exercise the same functions and authorities therein as if this Act had not been passed.

THE SINGAPORE SCREW PILE PIER.

WE are glad to learn that this company has obtained the concession of land required for its intended works from the Government of the Straits Settlements on very satisfactory terms. The ground extends westward from the present commercial centre of the town, and will when reclaimed form a space of between forty and fifty acres, to be planned out in town allotments, which must from their advantageous position, be of great value. From the east end of this concession the pier will run out into the centre of the harbour, as described in our issue of the 11th September last. The plan adopted is that of Captain MAYNE, R.E., which has been selected from three competing ones, and as it differs in some respects from the original intentions of the company there will be more delay in commencing active operations than was at first anticipated. A railway is talked of, we hear, to connect Singapore with New Harbour, and should this project be carried out the company will have to allow it a right of way through their new concession, in which case they will, of course, claim and receive fair compensation. But it is by no means improbable that the completion of the pier will render the proposed railway quite a superfluous work, inasmuch as New Harbour, with its strong tides and contracted space, will not offer much inducement to shipping when vessels can avail themselves of the superior facilities for landing and shipping cargo offered by the pier.

THE BRINDISI ROUTE.

NEW arrangements have been made in the railway service on the Italian lines, and the entire distance between London and Brindisi is now performed in 68 hours. The company have thrown the saving of time into the earlier arrival at Alexandria, leaving Brindisi at 6 A.M. on the 7th, 14th, 22nd, and 30th, instead of 3 P.M. as before. The railway works on Mont Cenis are progressing, and also the harbour improvements at Brindisi. Captain TYLOR's report to Government has not yet been published, but it is believed to be favourable.

	Hours.
The trains leave London for Paris as before, viz., 7.25 A.M., arriving at 6 P.M.	10.35
Stay at Paris	2.40
Leave Paris for San Michel at 8.40, thence by diligence over Mont Cenis for Turin, and arrive at 11 P.M.	26.20
Leave Turin 11.20 P.M. for Bologna, and arrive at 5.45 A.M.	6.45
Stop at Bologna	55
Leave Bologna at 6.40 for Ancona, and arrive at 11.35	4.55
Stop at Ancona	15
Ancona to Brindisi at 11.50 A.M., and arrive at 3.25 on the following morning. (The steamers leave at 6, or about 3 hours after the arrival of the train)	15.35
Total	68

On the return the train leaves Brindisi daily at 6.45 P.M., arriving in London on the evening of the third day. Passengers can stay at any point along the route.

THE SAN FRANCISCO AND CHINA LINE.

WE have not yet received intelligence of the despatch of the steamers from New York intended for the San Francisco, Japan, and China line. We hear from San Francisco, however, that the Chamber of Commerce had petitioned that the steamers should not be required to call at the Sandwich Islands. It was in the first instance decided to call there for the purpose of coaling, but it now appears that sufficient coal can be carried for the whole passage, and that the detention there can be saved. A separate line of small steamers is proposed between San Francisco and Honolulu.

It is announced that an arrangement has been concluded between the American company and the French Transatlantic line from St. Nazaire and Havre to Panama, by which goods and passengers can be conveyed by this route to the Far East. Of course the line will be equally available for the English boats from Southampton in the hands of the Royal Mail Steam Company, who will no doubt be fully alive to the opening now made for them of sharing in the traffic to China and Japan. The opportunities now available for visiting China will no doubt cause a large influx of visitors next year. Of the route by Russia, the Amoor, &c., we find the following account in a contemporary :—

Of the various routes which travellers to and from China follow there are but two which are in common use, viz., that usually and now-a-days incorrectly termed the "Overland Route" and the long journey by

Digitized by Google

land via Peking, Siberia, and St. Petersburg. A third route, which during the summer months is quite as practicable and far more agreeable to those who dislike spending nineteen days in the Mongolian desert, or who, from constitutional or other causes, find a long sea passage to be an extreme discomfort, is open to the public; but though it was described in one of our first-class periodicals some months ago very few seemed to have availed themselves of the advantages it presents. This is no doubt greatly owing to the fact that steam communication between Shanghai and the mouth of the Amoor is very uncertain; for it is to the route via Nicolayefsk and Irkutsk that we invite the attention of our readers.

Supposing that the homeward-bound traveller has reached Shanghai and is fortunate enough to meet a steamer bound for Nicolayefsk, a short run of from five to seven days will see him safely landed at the latter port. Steamers run constantly from this place to within four days' ride of Irkutsk, occupying 25 days on the passage. There is a considerable difference between being at sea and gliding along the smooth surface of an inland river, and few would be found to object to so convenient and comfortable a mode of travelling as the latter generally proves to be. There is, so far as we can learn, no great difficulty in obtaining transport overland from the point where navigation ceases to Irkutsk. Having reached this point 29 days by post will carry the traveller to Nijni Novgorod, where the railway commences, and a very few days more will see him safely housed at his destination. On the road from Irkutsk to Nijni Novgorod the first half will be found very agreeable travelling. In Western Siberia the roads are somewhat swampy during the summer months and the traveller's progress will necessarily be slower. No actual discomfort need however be feared, as the Russian posting arrangements are by no means bad. For those who can command official aid the advantages of this route are of course much greater than to the ordinary traveller; but a gentleman from whom we have received some information on the subject has assured us that all persons are likely to meet with civility and attention.

THE Queen has been graciously pleased to appoint Sir Benson Maxwell Recorder of Singapore, and Mr. William Hackett Recorder of Penang.

TELEGRAMS have been received from Shanghai *via* Tien-tsin and Kiachta to the 13th June, being twenty-three days only. It is expected that the time by this route will be reduced to fifteen days. The service between St. Petersburg and Kiachta is however very uncertain. Still the line may prove as serviceable as that *via* Galle, which we know too well is constantly out of order. The telegrams of 11th May, announcing the failure of Overend, Gurney, and Co., had arrived out.

Literature.

Quelques mots sur la Cochin Chine en 1866, par L. des Coincy. 8vo. Paris, Chatlamel Aîné.

Such is the title of a small work of seventy pages by a gentleman connected with the Imperial Government, who has spent some time in the country of which he speaks, and recounts his impressions in plain unpretending language. He is evidently deeply impressed with the value and importance of the settlement to France, but he states the facts as they appeared to him in a manner to win the attention of all who are interested in the present and future of Cochin China and the neighbouring countries. The work is divided into two parts, the first being a general description of the country, given in several journey in various directions; and the second, an account of the military forces, administrative organisation, justice, finances, agriculture, concessions, and commerce. M. de Coincy expresses his gratitude for the manner in which he was treated while in Cochin China, and says that the object of his work is to combat that determined indifference, or hostility, which is unfortunately only too wide spread in France with respect to that country. As regards the feeling of the natives, M. de Coincy says:—"Since the spring of 1865, the Annamite Government having lost all hope of our relinquishing our establishment, submits frankly to it, and the high functionaries of the native districts entertain frequent friendly intercourse with the French." He adds that the authorities of the three provinces of Ha-tien, An-giang, and Vinh-long assisted at the agricultural and industrial exhibition held at Saigon in February last. As regards the climate and productions, M. de Coincy speaks in the highest terms; and he gives an idea of the extent of the French settlement by stating that it is equal in surface to that of New Caledonia, or about one twenty-third part of the whole of France. He gives an account of each river and of the system of canals, which will be useful to visitors to Cochin China, but which is too long to quote. The comparison that is sometimes made between Saigon and Singapore the author meets in the following manner:—"We cannot see what comparison can be established between the capital of a settlement which has had but three years of tranquil existence, between a town situated fifty-six miles up a river, and a colony thirty years old, which has the advantage of priority, of a superior geographical position, and which has long been the entrepot of Eastern commerce. We say more, we do not desire to see Saigon completely resemble Singapore, and we should prefer for the future of our colony a compact homogeneous opulence, useful above all to the metropolis, to an agglomeration of twenty different races, based solely on external commerce, and without those special resources which should be liable to all the chances of a distant war." The routes described in this little work—and described as having been passed over by the author many times, are:—From Saigon towards the north by the grand road, thirty leagues in length, to Tayninh; then eastward to Bienhoa, Baria, and Cape Saint Jacques; and lastly a voyage by water in the Phuoc-Loc, the Tanhoa, and the province of Mitho. The accounts of these trips are enlivened with much interesting matter relative to the natural beauties of the countries, the works and the manners and customs of the people, but the main object, namely, the practical importance of the country, is well maintained throughout.

M. de Coincy gives a pleasing picture of the hospitality of the people:—"In Cochin China hospitality is still that of the patriarchs: If you are hungry, eat! If you are thirsty, drink! If you are fatigued, rest for one, two, three or as many days as you please! Every man who rides on horseback meets with this hospitality." We hope that the *horse-and-shay* limit is not more strictly defined in Cochin China than in other countries. The Annamites seem to be excellent roadmakers, and we regret that space will not permit us to dwell upon this subject. Another subject of interest is the native organisation of the post, which seems somewhat to resemble that of the Tartar post of Russia. M. de Coincy, like all who have visited Cochin China, speaks highly of the excellence and variety of the timber trees. He says that a few Europeans are engaged in the trade, but only on the banks of the rivers; yet that in 1864 the revenue derived by the Government from timber exported from the province of Tay-ninh exceeded 12,000 piastres, or nearly £3,000. Large forests of pine and spruce firs have been discovered in the Upper Cambogia, and these are now beginning to be worked. "The enormous export trade which Mitho, Vin-luong and Cambogia could supply would become, as it were," says M. de Coincy, "the property of whoever will establish a line of steamers."

M. de Coincy gives tables of the finance, navigation, and trade of the colony for the year 1865 showing an increase, as compared with 1864, of 1,071,000 francs in revenue; 121,763 tons in shipping; and 4,592,658 francs in exports.

The Albert N'yanza, Great Basin of the Nile, and Explorations of the Nile Sources. By SAMUEL WHITE BAKER, M.A, F.R.G.S. Two Vols. London: Macmillan and Co.

The problem of the sources of the Nile seems to have exercised an extraordinary fascination over the minds of mortals for countless ages. Yet there can be little doubt that the learned men of antiquity had become masters of the solution, and that, as in many other things, the task of the moderns is not that of original discoverers, but the less honourable one of endeavouring to regain a clue that has has been carelessly or clumsily lost. Ptolemy, the Egyptian geographer of the second century, describes the Nile as emanating from two great lakes that received the snows of the mountains in Ethiopia; and Grant and Speke, and Baker, have done no more than verify the assertion and bring back into the domain of our own knowledge what was probably ascertained to be fact fully a thousand years ago. All honour, however, to the explorers just named as having gained for England the glory of this perilous investigation. Natives of all countries of Europe have lately been seeking for fame in the wilds of Africa. Baron von Decken, a Hanoverian, is the last who paid for his daring with loss of life; and though Mrs. Baker, who accompanied her husband through the whole journey, confers on English womanhood the crown of both courageous affection and complete success, yet it must be remembered that her husband left at Khartoum, on starting for his voyage, a steamer "belonging to the Dutch ladies, Madame van Capellan and her charming daughter, Mademoiselle Tinne," who were also bent on penetrating further up the great river—the whole party, with the exception of the younger lady, afterwards dying of the fever of Central Africa. Mr. Baker had qualified himself for his enterprise by a long course of adventure in tropical climates. The author of "The Rifle and the Hound in Ceylon," and of "Eight Years' Wanderings in Ceylon," had proved himself an

Digitized by Google

indefatigable hunter and an unerring shot—qualities that in the interior of Africa often proved available for a dinner when neither money nor goods could be turned to account. He is made to confess, however, that the animals he had to contend with in Africa were far more worthy of the hunter's skill than his old Ceylon acquaintances of the same race. The females of the African elephant, it seems, are equal to the males of the Indian island. Indeed, the African elephant is not only entirely different from the Indian species in his habits, but also in form. What Mr. Baker lays down on this point is worth quoting, bearing in mind the weight of his authority in such matters. He says:—

The elephant is by far the most formidable of all animals, and the African variety is more dangerous than the Indian, as it is next to impossible to kill it by the forehead shot. The head is so peculiarly formed that the ball either passes over the brain, or lodges in the immensely solid bones and cartilages that contain the root of the tusk. . . . The character of the country naturally influences the habits of the animals: thus Africa, being more generally open than the forest-clad Ceylon, the elephant is more accustomed to activity, and is much faster than the Ceylon variety. Being an old elephant-hunter of the latter island I was exceedingly interested in the question of variety of species, and I had always held the opinion that the African elephant might be killed with the same facility as that of Ceylon by the forehead shot, provided that a sufficient charge of powder were used to penetrate the extra thickness of the head. I have found by much experience that I was entirely wrong, and that although by *chance* an African elephant may be killed by the front shot, it is the exception to the rule. The danger of the sport is accordingly much increased, as it is next to impossible to kill the elephant when in full charge, and the only hope of safety consists in turning him by a continuous fire with heavy guns; this cannot always be effected. . . . The temple shot, and that behind the ear, are equally fatal in Africa as in Ceylon, provided the hunter can approach within ten or twelve yards; but altogether the hunting is far more difficult, as the character of the country does not admit of an approach sufficiently close to guarantee a successful shot. In the forests of Ceylon an elephant can be stalked to within a few paces, and the shot is seldom fired at a greater distance than ten yards; thus accuracy of aim is insured; but in the open ground of Africa, an elephant can seldom be approached within fifty yards, and should he charge the hunter's escape is most difficult. I never found African elephants in good jungle except once, and on that occasion I shot five, quite as quickly as we should kill them in Ceylon.

Mr. Baker's pages put an end to the fear of the supply of ivory suddenly and speedily ceasing, for Central Africa still teems with this noble game. One drawback to security in this respect is that the barbarous natives hunt the animal for the sake of the flesh alone, and up to within the last fifty years, perhaps, the tusks were considered as worthless, and treated as bones. Were the elephant killed only for his ivory, none but full-grown ones would be slaughtered; but where "the pot" is the motive to the chase it is to be feared much untimely murder is perpetrated.

It will be in the memory of our readers,—for the narrative of Speke and Grant, and the proceedings of various learned societies, have made the public interested in and thoroughly informed on all that refers to the discovery of the two great Lakes—that Mr. Baker met the travellers just mentioned at Gondokoro, he on his way into the interior, and the latter returning to England. From them our traveller derived hints and instructions of the utmost value, and throughout his volumes he takes care to give his precursors the full share of merit that belongs to them. As he justly observes, "a great geographical fact has through our joint labours been most thoroughly established"—viz., that the sources of the Nile are to be traced to two great fresh-water inland seas, the Victoria N'yanza, discovered by Speke and Grant, and the Albert N'yanza, by Baker. The geographical fact thus established we will state in the words of the latter:—

The Nile, cleared of its mystery, resolves itself into comparative simplicity. The actual basin of the Nile is included between about 22° and 39° East longitude, and from 3° South to 18° North latitude. The drainage of that vast area is monopolised by the Egyptian river. The Victoria and Albert lakes, the two great equatorial reservoirs, are the recipients of all affluents south of the Equator; the Albert lake being the grand reservoir, in which are concentrated the entire waters from the south, in addition to tributaries from the Blue Mountains, from the north of the Equator. The Albert N'yanza is the great basin of the Nile. The distinction between that and the Victoria N'yanza is, that the Victoria is a reservoir receiving the eastern affluents, and it becomes a starting point, or the most elevated *source*, at the point where the river issues from it at the Ripon Falls: the Albert is a reservoir not only receiving the western and southern affluents direct from the Blue Mountains, but it also receives the supply from the Victoria and from the entire equatorial Nile basin. The Nile, as it issues from the Albert N'yanza is the *entire* Nile; prior to its birth from the Albert lake it is *not* the entire Nile. A glance at the map will at once exemplify the relative value of the two great lakes. The Victoria gathers all the waters on the eastern side, and sheds them into the northern extremity of the Albert; while the latter, from its character and position, is the direct channel of the Nile that receives all waters that belong to the equatorial Nile basin. Thus the Victoria is the first *source*; but from the Albert the river issues at once as the great White Nile.

After all, therefore, we have no certainty that the discovery of the source of this great river has been accomplished. The two lakes are more properly described as "reservoirs" than as sources. Baker's southernmost point was 1° 13′ N., on his march from Kamrasi's capital to the Albert lake; the latitude of Vacovia, where he struck the lake, being 1° 15′ N. But the lake is reported by the natives to be well known as far as between 1° and 2° South, where it turns to the West, its further extent being unknown. The real source of the Nile, then, may yet be some magnificent river flowing into the extreme south-west point of this inland sea—for sea it is, as our present knowledge of it stretches over five degrees of latitude. And now, it may be asked, what has Humanity gained by the starvation and toil and fever endured by these hardy explorers? Let Mr. Baker answer:—

Should the slave trade be suppressed, there will be a good opening for the ivory trade; the conflicting trading parties being withdrawn, and the interest of the trade exhibited by a single company, the natives would no longer be able to barter ivory for cattle; thus they would be forced to accept other goods in exchange. The newly-discovered Albert Lake opens the centre of Africa to navigation. Steamers ascend from Khartoum to Gondokoro in latitude 4° 55′. Seven days' march south from that station the navigable portion of the Nile is reached, where vessels can ascend direct to the Albert lake—thus an enormous extent of country is opened to navigation, and Manchester goods and various other articles would find a ready market in exchange for ivory at a prodigious profit, as in those newly-discovered regions ivory has a merely nominal value. Beyond this commencement of honest trade I cannot offer a suggestion, as no produce of the country except ivory could afford the expense of transport to Europe. If Africa is to be civilised it must be effected by commerce, which, once established, will open the way for missionary labour; but all ideas of commerce, improvement, and the advancement of the African race, that philanthropy can suggest, must be discarded until the traffic in slaves shall have ceased to exist

The slave trade will never be suppressed unless by the active and energetic interference of the European Governments. All the difficulties, other than those of the climate, that Mr. Baker had to contend with arose from the circumstance that throughout his journey he was looked upon by the ivory-traders as an English spy, sent with no other purpose than to stop their nefarious traffic. Nay, the flag of one Consul was actually prostituted to protect the crime. One of the traders at Gondokoro was a Copt, the father of the American Consul at Khartoum; and to Mr. Baker's surprise he saw a vessel full of these brigands arrive at the last-named place with the American flag flying at the mast-head. Even attempts at exploration seem for the moment to be destined to spread this and other curses of the human race. Mr. Baker was unable to make his way to the lake without securing the escort of Ibrahim, a commander of Turkish traders; and, indeed, persuading the latter, by holding out to him a prospect of immense quantities of ivory, to penetrate into a district entirely strange to him. No sooner does the new adventurer arrive than he forms the usual alliance with Kamrasi, the sovereign of the country, affording the tyrant the aid of his musketeers to take vengeance on his enemies—the guerdon being a payment of ivory by the former, and all the cattle they could secure and whatever number of the population—that is, of the women and children—they chose to carry away into slavery. Mr. Baker, too, hits on the idea of distilling a spirit from the sweet potato, in the hope of curing himself of a fever that had stuck to him for months, by reason of his quinine being exhausted. The potato whisky effects the desired cure, but the king hears of the wondrous cordial—

He called it the maroua (cider) of our country, and pronounced it so far superior to his own that he determined to establish a factory. When I explained to him that it was the produce of sweet potatoes, he expressed his regret that he had never sufficiently appreciated their value, and he expressed a determination to cultivate whole districts. Ibrahim was requested to leave one of his men who understood the management of a still to establish and undertake the direction of "King Kamrasi's Central African Unyoro Potato Whisky Company, Unlimited."

Our extracts have been directed to the more important considerations that will occur to the mind from a perusal of the volumes, but of their extreme interest they convey little notion. The greater portion of the work is matter to be devoured, not read; and the reader is never brought to a stand-still by long disquisitions on geology, or natural history, or geography. The moment after we get to Gondokoro and quit the "heart-breaking river," with its endless windings and delays and mishaps, all is pure unmitigated adventure. Always in peril, ever on the watch, ever having to trust to the rifle for food for the whole party, ever on the guard against injuries from man, from the elements, and from the animals and reptiles of the country, Mr. Baker's every page has its sensation. To travellers about to undertake a dangerous journey in unsettled regions the book abounds in useful warnings and suggestions. Each precaution adopted by the experienced voyager and hunter

Digitized by Google

is noted throughout, from the entire organisation of the expedition down to the happy circumstance of the favourite little rifle being in perfect order at a most critical moment, "thanks to Eley's double waterproof central fire-caps, which will resist all weathers." The presence of Mrs. Baker throughout all his dangers adds an inexpressible charm to the story, by shedding a womanly refinement over many of the scenes passed through.

Altogether, we have seen no book for a long period so extraordinarily suited to all readers. The sympathies of each are touched—ignorant or scientific, serious or volatile, young or old, man or woman, boy or girl, we will defy either to quit the volumes till they have been fairly read through. Mr. Baker promises us another treat in his account of what befell him in Abyssinia, and we may confidently predict that the fulfilment will be eagerly looked for by thousands.

We have received the Second Number of the New Series of the *Journal of the North China Branch of the Royal Asiatic Society*. The papers it contains are:—Notes on the Geology of the Great Plain; a Sketch of the Geology of a portion of Quan-tung Province; Birds and Beasts of Formosa; Annals of the Western Ocean; Sorgo, or Northern Chinese Sugar Cane; a Visit to the Agricultural Mongols; the Hieroglyphic Character of the Chinese Written Language; and the Remains of Ancient Kambodia.

Nature and Art is a new monthly periodical, a perfect marvel of beauty as far as the artistic embellishments are concerned, and the letter-press is not behind hand in sterling merit. Readers in the Far East will be particularly interested in Mr. Tegetmeier's article on the "Ailanthus Silkworm and its Culture in England," with the exquisitely coloured illustration that accompanies it. The scene on the Logier River, Zambesi, with the "full striped Quagga," by Mr. Baines, deserves equal praise, whether as regards the narrative or the picture. Mr. Yapp's "Art Notes from France" is the sort of paper that will fill up a gap in our periodical literature that should not have existed so long. Then for the ladies there is a page of "Parisian Chapeaux," so bewitchingly coloured by Messrs. Day and Son, the well-known lithographic artists, that no brute of a husband could possibly refuse to unbutton his pocket at sight of them

Monetary and Commercial.

The annual meeting of the shareholders of the Comptoir d'Escompte is to be held on the 28th July.

The biddings for £350,000 in bills on India took place at the Bank of England. The proportions allotted were—to Calcutta £114,600, to Madras £4,000, and to Bombay £20,000. The *minimum* price was fixed at 1s. 10d. on Calcutta and Madras, and 1s. 10¼d. on Bombay, a further reduction of 2 per cent. in each case. All tenders at and above the *minimum* will receive in full.

Nothing has resulted as to the efforts to resuscitate the Indian business of the Agra and Masterman's Bank. Mr. Shipman, the London manager, has joined Mr. Shoemack (formerly of Overend's) and established a bill brokering establishment under the title of William Shipman and Co., 12, Clement's-lane.

The new Joint-Stock Companies brought out during the past six months are 32 in number, with a capital of £8,220,000, against 160 in the same period last year, with a capital of £56,302,000. In the three years 1863-4 and 5, during which the mania for "limited" companies was in full play, the total number of undertakings started was 832 with an aggregate authorised capital of £363,000,000. The recent panic has virtually put a complete stop to the introduction of new schemes, and will doubtless induce greater caution among investors for the future.

The suspension has been announced of Messrs. Dadabhai, Navroji, and Co., of Great St. Helen's, East India merchants, owing to the non-receipt of expected remittances from Bombay. Their liabilities are stated to be £305,000, and anticipations seem to be entertained of a favourable liquidation.

The following is an extract from the report of the Oriental Hotels Company:—

With this report the balance-sheets of the company for the year ending the 31st of December, 1865, are submitted to the shareholders. The directors have much pleasure in informing the shareholders that at the date of the last reports they have received from Galle, viz., the 18th of May, the hotel at that place was nearly completed. The furniture and the first supply of European stores had arrived in good order, and the fitting up of the building had so far advanced that it was confidently expected the hotel would be opened on the 24th of May. The directors have no doubt that the business at Galle is by this time in full operation. The accounts have not yet been completely rendered, but the board believe that the entire cost of the ground, with the buildings standing thereon at the time of the purchase, of the additions and alterations since made, and of the fittings and furniture of the hotel, will be about £20,000. Seven shops are attached to the new buildings, from which a good return is anticipated, and no doubts appear to be felt by those upon the spot that a large and profitable business will be done by the company's hotel at Galle, such as its superior comforts and accommodation will deserve. In consequence of an outbreak of cholera in Egypt, the work of the Cairo Hotel was suspended for some considerable time last summer, but since the resumption of work the building has been progressing favourably. The shareholders will observe that, at the date when the accompanying balance-sheets were closed, there was a large sum on deposit at interest in the bank which has since unfortunately failed; but before the failure that deposit account had been closed, so that, as the shareholders have already been informed by a circular, the balance at credit of the company's open account in London on the day of the bank's stoppage amounted only to £434 15s.

The Board of Trade Returns for the month, and five months, ended the 31st May, indicate that trade is in a healthy condition, although the general improvement has not quite kept pace with that exhibited in the previous two or three returns. The total declared value of exports for May of the present year is £15,870,131, against £13,194,758 in 1865, and £14,176,640 in 1864, being an increase of £2,675,373 over the former period, and of £1,693,491 over the latter. For the five months of the present year, the total declared value is £78,227,710, against £60,901,576 in 1865, and £64,069,060 in 1864, which is an increase of £17,326,134 compared with 1865, and of £14,158,650 as contrasted with 1864. The return of the value of the Enumerated Imports extends no further than to the end of April, for which month of the present year the value was £22,455,968, against £13,078,755 in 1865, and £17,587,565 in 1864. The value for the four months of the present year is £68,804,895, against £45,337,850 in 1865 and £54,719,390 in 1864; the present year exceeding 1865 by £23,467,045, and 1864 by £14,085,505. Our trade with the Far East presents the figures following:—

EXPORTS TO CHINA AND HONG KONG.

	1864.	1865.	1866.
Quantity for the Month ended 31st May.			
Cotton yarn	266,400	236,800	640,020 lbs.
Cotton manufactures	11,513,490	9,138,293	18,948,204 yds.
Worsted stuffs	1,590,922	1,003,619	2,428,117 „
Woollen & Worsted cloths.	208,790	149,292	184,966 „
Lead	1,493	66	887 tons.
Quantity for the five Months ended 31st May.			
Cotton yarn	801,372	797,562	2,277,226 lbs.
Cotton manufactures	30,002,612	44,469,244	71,938,376 yds.
Worsted stuffs	5,089,801	6,616,812	8,698,797 „
Woollen and worsted cloths	749,020	660,417	815,003 „
Lead	3,518	929	3,722 tons
Value for the five Months.			
Cotton yarn	£97,423	£77,445	£240,054
Cotton manufactures	835,699	1,026,543	1,832,124
Worsted stuffs	326,397	499,583	594,351
Woollen and worsted cloths	126,208	113,829	130,944
Lead	77,567	20,404	81,736

The Cotton Manufactures forwarded from the United Kingdom to other ports and countries in the Far East during the month of May, and their value for the five months of the respective years are thus stated:—

	1864.	1865.	1866.
Quantity for the Month ended 31st May.			
Ceylon	360,550	1,505,233	1,197,336 yds.
Singapore	1,582,764	3,261,635	5,005,246 „
Java	3,722,803	5,033,109	2,049,727 „
Philippine Islands	4,651,404	6,042,350	2,256,949 „
Value for the five Months ended 31st May.			
Ceylon	£184,011	£114,130	£204,678
Singapore	420,378	431,443	550,584
Java	326,344	247,885	456,494
Philippine Islands	286,059	330,701	225,217

Of Cotton Yarn the quantity exported to Singapore during the month of May last was 178,260 lbs., and during the five months 527,650 lbs., against 656,390 in 1865, and 481,308 in 1864. To Ceylon 8,824 lbs. was sent in May, and 125,154 lbs. in the five months, against 71,942 lbs. in 1865, and 77,100 in 1864. The value of the exports during the five months ended 31st May is represented by the following figures:—

	1864.	1865.	1866.
Ceylon	£11,030	£6,090	£19,256
Singapore	58,126	64,447	57,274

IMPORTS.

The supply of Raw Cotton continues on the increase, though up to the end of May China still remains unregistered as an exporting country. The figures are as follows:—

From	1864.	1865.	1866.
Quantity for the Month ended 31st May.			
Egypt	230,398	59,515	148,756 cwts.
British India	472,508	290,381	581,173 „
China	90,046	63,677	—
Total from all parts	997,244	611,653	1,490,636 „
Quantity for the five Months ended 31st May.			
Egypt	590,676	660,208	551,251 „
British India	1,247,875	925,891	1,649,553 „
China	300,164	206,495	—
Total from all parts	2,756,664	2,637,022	5,180,070 „

Digitized by Google

Value for the four Months ended 30th April.

	1864.	1865.	1866.
Egypt	£4,324,432	£4,928,073	£3,996,556
British India	7,211,413	3,363,543	6,343,468
China	1,806,422	683,514	—
Total from all parts	18,472,061	13,967,469	29,244,760

Of Unrefined Sugar the quantity imported from Java and the Philippine Islands during the month of May last was 2 cwt. of the 2nd quality; 39,938 cwt. of the 3rd, and 61,931 cwt., of the 4th quality; and the quantity and value for the respective years, as far as known, is as follows:—

Quantity for the five months ended 31st May.

	1864.	1865.	1866.
Of all qualities	65,075	339,307	162,536 cwts.

Value for the four Months ended 30th April.

Of all qualities	£42,959	£318,821	£54,886

Of Hemp from the Philippine Islands we received 10,738 cwts. during the month of May last, and the general return is as follows:—

	1864.	1865.	1866.
Quantity to 31st May (cwts.)	58,334	89,935	27,327
Value to 30th April	£79,568	£103,708	£39,115

Of Coffee we received from Ceylon during May 4,918,173 lbs.; the return for the respective years being thus stated:—

	1864.	1865.	1866.
Quantity to 31st May (lbs.)	23,365,001	22,114,380	20,241,814
Value to 30th April	£562,689	£526.591	£504,999

The quantities of the articles named remaining in the warehouses under bond on the 31st May is shown thus:—

	1864.	1865.	1866.
Coffee (lbs.)	23,786,068	24,299,730	29,261,655
Sugar, Unrefined (cwts.)	2,202,994	2,722,986	3,443,856
Tea (lbs.)	106,426,541	121,576,792	98,677,918

The Declared Value of the British and Irish Produce and Manufactures exported from the United Kingdom to the ports and countries of the Far East during the four months ended the 30th April appears in the table annexed:—

Exports during the four Months ended 30th April.

To	1864.	1865.	1866.
Egypt	£1,886,128	£1,993,391	£2,856,296
China (exclusive of H. Kong)	849,444	1,229,303	1,622,802
Hong Kong	476,430	485,569	901,533
Ceylon	313,760	172,755	293,432
Singa. and Eastern Straits	579,837	598,046	655,450
Netherlands India (Java, &c.)	314,280	209,485	497,830
Philippine Islands	213,587	280,365	217,987
Siam	11,253	3,614	4,088
Cochin-China, Camboja, and Tonquin	—	—	274
Japan	79,205	412,927	473,973

The amount of bullion by the P. and O. Company's steamer *Delta*, from Southampton on the 4th inst., was:—in gold, to Gibraltar, £1,500; to Madras, £1,021; total in gold, £2,521

THE "LONDON AND CHINA EXPRESS" ON SALE.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S PILLS.—Dyspepsia, indigestion, flatulency, heartburn, biliousness, nausea, want of appetite. French philosophers trace the moral feelings of the mind to the state of the stomach; and there is much wisdom in the speculation; the stomach to the human body is more than the kitchen to the domestic establishment—be it ever so slightly disordered, the whole internal economy is deranged. The young may smile at the simile, and disbelieve the tremendous sacrifice indigestion enacts from its victim. The day will come when they will lament over their dyspepsia, as thousands stronger than themselves have done; when it will be well for their comfort and happiness if they only remember these prophetic words, and hold in readiness Holloway's Pills, a certain safeguard.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility for REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

ENGLISH GARDENS IN THE EAST.

THE Fourth Season has now confirmed the complete success of MR. CHRISTY'S Cases for conveying Fruit Trees, Vines, Plants, Flowering Shrubs, and Seeds, to the East, when shipped in the holds of Steamers like ordinary Case Goods. Mr. John Waterer, junr., the American Nursery, Bagshot, Surrey, or Mr. Christy, 28, Pall Mall, London, are prepared to execute orders for gentlemen in the East, and beg to call attention to the list of prices and conditions. FRUIT TREES, including PEARS, APPLES, PLUMS, CURRANTS, GOOSEBERRIES, PEACHES, NECTARINES, APRICOTS, CHERRIES, and QUINCES, per case, 10 Guineas.

	Guineas.
20 FRUIT TREES, with Ten varieties, per case	14
ROSES of the best kinds ... ... „	15
RHODODENDRONS and AZALIAS, &c.	15
GARDEN SEED (various) ... ... „	5 upwds

The number depends on the size of the roots; the cases average 30 plants each.

All the above prices include freight, insurance, and all charges to any port where the P. and O. steamers call. The season for shipment commences about September and ends in January. All orders must be accompanied by a remittance or orders for payment. The name of the agent at the port of arrival must be furnished, to prevent delay in forwarding.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,

Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation, and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

DYSENTERY, CHOLERA, FEVER, AGUE, ETC.

CHLORODYNE.

CAUTION.—*Vice-Chancellor Wood affirmed in Court that Dr. J. COLLIS BROWNE was undoubtedly the Discoverer of Chlorodyne; that the statements of the Defendant Freeman were deliberately untrue, and he regretted to say they had been sworn to (see "The Times" of July 13, 1864); all others must be spurious.*

Earl Russell has graciously favoured J. T. Davenport with the following extract of a despatch from Mr. Webb, H.B.M.'s Consul at Manila, dated Sept. 17, 1864:—"The remedy most efficacious in its effects (in Epidemic Cholera) has been found to be CHLORODYNE, and with a small quantity given to me by Dr. Burke I have saved several lives." Earl Russell communicated to the College of Physicians that he had receive a despatch from Her Majesty's Consul at Manila, to the effect that Cholera had been raging fearfully, and that the ONLY remedy of any service was CHLORODYNE.—See *Lancet*, December 31, 1864. No home should be without it.

Eminent Hospital Physicians of London stated on oath that they prescribe CHLORODYNE largely, and mean no other than Dr. Browne's.

The General Board of Health, London, state as to its efficacy in Cholera and Dysentery:—"So strongly are we convinced of the efficacy of his remedy, that we cannot too forcibly urge the necessity of adopting it in all cases."

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma, and Dysentery. To it I fairly owe my restoration to health, after eighteen months' severe suffering, and when all other medicine had failed."

From W. Vesalius Pettigrew, M.D.:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an antispasmodic and sedative. I have used it in Consumption, Asthma, Diarrhœa, and other diseases, and am most perfectly satisfied with the results."

Dr. M'Grigor Croft, late Army Staff, says:—"It is a most valuable medicine."

Dr. Gibson, Army Medical Staff, Calcutta:—"Two doses completely cured me of Diarrhœa"

Government supply both the Army and Navy with it. A Sheet of Medical Testimonials accompanies each Bottle.

Sold in Bottles, 2s. 9d. and 4s. 6d., by all Chemists. None genuine without the words

"DR. J. COLLIS BROWNE'S CHLORODYNE" on the stamp.

SOLE MANUFACTURER:—

J. T. DAVENPORT, 33, GREAT RUSSELL-STREET, LONDON, W.C

Be not misled by the statements of unscrupulous persons, as the Defendant was termed by the Vice-Chancellor.

THE CAPE, INDIA, AND CHINA AGENCY.

PRIZE MEDAL,
INTERNATIONAL EXHIBITION, 1862.
AWARDED TO
F. MORDAN,
FOR
IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increased the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public, perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.

F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.

F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.

F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

Merchants and Shippers can obtain Illustrated Catalogues on application at the Manufactory,

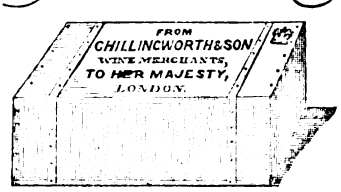
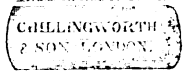
By Special Appointment
TO HER MAJESTY QUEEN VICTORIA.

BRANDS ON CASES AND CASKS.



Seal on Corks.

Brand on side of Corks.



Brand on end of Corks.

CAUTION.

WHEREAS Persons are shipping Wines to India marked with a Crown in imitation of CHILLINGWORTH and SON'S WINES, which are branded with a Crown, they having the appointment of WINE MERCHANTS to HER MAJESTY QUEEN VICTORIA, it is deemed expedient for the protection of dealers and consumers of their superior Wines selected from their extensive and valuable stock expressly for the Indian market, which have been so well known and approved by connoisseurs for the last thirty years for their extreme quality and purity, combining flavour and softness, together with great age, body, delicacy, and bouquet, being more free from acidity or alcohol that any other Wines, to caution all purchasers to ask for

CHILLINGWORTH & SON'S
CROWN SHERRIES AND OTHER WINE

And to be particular in observing that the Cases and Cask-heads are branded with their names at full length; also, on the side of the Corks, inside the bottles, as well as the Crown; and also on the seals, in accordance with the heading of this notice, as a necessary precaution, to ascertain that they are CHILLINGWORTH and SON'S CROWN WINES, in order to prevent a common low class of Wines being improperly foisted on the public, and which are in no way to be compared with those of CHILLINGWORTH and SON'S.

Wholesale Agents for the Sale of their Wines:—Bombay, Messrs. H. Bomanjee, Touche & Co.; Madras, Messrs. Parry & Co.; Calcutta, Messrs. Gordon, Stuart & Co.; Kurrachee, Messrs. H. Bomanjee, Touche & Co.; Colombo, Messrs. Darley, Butler & Co.; Rangoon, Messrs. Gladstone, Wylie & Co.; Hong Kong, Messrs. Robert S. Walker & Co.

THE BRINDISI ROUTE TO THE FAR EAST.

THREE DAYS' SEA PASSAGE FROM ITALY TO EGYPT.

THE SOCIETA ANONIMA ITALIANA, DI NAVIGAZIONE ADRIATICO ORIENTALE,

Under Contract to carry the direct Mails, Despatch their first-class English built Steamers "Cairo," "Brindisi," "Principe di Carignano," or "Principe Tomaso,"

BETWEEN

BRINDISI AND ALEXANDRIA,

ONCE A WEEK.

This Route affords facilities which no other does either in going or returning from Egypt.

In GOING to EGYPT passengers can leave LONDON or PARIS after the Departure of the Indian Mail from either place, and arrive at ALEXANDRIA before its arrival.

In RETURNING from EGYPT, a Special Train is arranged to leave BRINDISI, so that a SAVING of possibly 36 HOURS may be effected. The passage from Brindisi to Alexandria is performed in 72 to 82 hours. The time of departure is as follows:—

From BRINDISI for ALEXANDRIA, on the 7th, 14th, 22nd, and 30th of each Month.

From ALEXANDRIA for BRINDISI, a few hours after the arrival of the Indian mails, usually about the 5th, 12th, 20th, and 28th of each Month.

FARES:—

	1st Class.	2nd Class.	3rd Class
BRINDISI TO ALEXANDRIA (AND *VICE VERSA*) ...	275 fr.	200 fr.	90 fr.

For further particulars apply to, at FLORENCE, VIA MONTEBELLO, 42; PARIS, RUE DE L'UNIVERSITE, 10.

LONDON: Messrs. PALMER, 44, Eastcheap, City, E.C.

JOHN C. CAMPBELL will despatch the following splendid first-class VESSELS:—

Destination.	Ships.	Class.	Tons.	Dock.
Colombo ...	Excelsior ...	A 1 12 yrs.	494	S.K.D.
Colombo ...	Alvington ...	A 1 13 yrs.	313	W.I.D.

No. 22, Great St. Helen's, E.C.

FROM LIVERPOOL.

Destination.	Ships.	Tons.	Class.	To Sail.
Shanghai ...	Magellan ...	613	A 1 —	Imm.
Batavia & Soubrabaya ...	Eliza Henriette ...	312	—	"
Calcutta ...	Bebington ...	889	AA 1	"
Bombay ...	City of Agra .	1073	AA 1	"

For terms of Freight or Passage apply to McDIARMID, GREENSHIELDS, and Co., Liverpool.

MORS LE BLANCH and CO. intend despatching VESSELS to the undermentioned ports as follows:—

Vessel.	Class.	Probable date of sailing.
BATAVIA AND SOURABAYA.		
COQUETDALE ...	A 1	July 15.
BATAVIA AND SINGAPORE.		
OSCAR ...	... 3-3rds	20 July.
SINGAPORE.		
CHLORIS ...	... 3-3rds	July 31.
YOKOHAMA.		
A 1 British SHIP ...	... ...	—

Loading in the Prince's Dock.

Apply at 42 and 43, THE ALBANY.

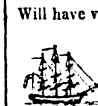
A Regular Trader.

Has a large portion of her Cargo already engaged, and will meet with quick despatch.

FOR COLOMBO, COCHIN, BEYPORE, and MANGALORE, the beautiful British-built clipper ship EXCELSIOR, A 1 thirteen years, 494 tons register, ——, Commander; lying in the St. Katharine Docks. This splendid ship, well known in the trade, offers a first-rate opportunity to shippers.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

Will have very quick despatch, having a large portion of her Cargo engaged.



DIRECT for COLOMBO, the beautiful new clipper ship ALVINTON, A 1 thirteen years, 313 tons register, JOHN ADAMS, Commander; loading in the West India Docks. This magnificent ship has just returned from Colombo in ninety-six days, and offers a first-rate opportunity to shippers of fine season goods.

For Freight or Passage apply to JOHN C. CAMPBELL, 22, Great St. Helen's, Bishopsgate-street, E.C.; or to LIVINGSTON, HOLDING, and BRIGGS, 31, Great St. Helen's, Bishopsgate-street, E.C.

T. & H. SMITH'S

ESSENCE OF COFFEE.

GIVES instantaneously a delicious Cup of Coffee with boiling water or milk merely. To be had in bottles at 1s. and 2s. each, of all respectable Grocers, Chemists, and Italian Warehousemen.

69, COLEMAN-STREET, CITY, AND 21, DUKE-STREET, EDINBURGH.

TO IMPORTERS.

The undersigned beg to remind Importers of Wearing Apparel, and Boots and Shoes, of the many advantages which their long experience as Manufacturers and Shippers, their vast resources, and their intimate knowledge of the requirements of Foreign and Colonial Markets enable them to offer.

ASSORTED SAMPLE CASES FORWARDED ON RECEIPT OF REMITTANCE OR ORDER ON LONDON AGENT.

E. MOSES AND SON,

CORNER OF MINORIES AND ALDGATE, LONDON

Bottled Ales and Wines, &c.

"NO BUYERS for the BEST BRANDS, unless RE-PACKED," in consequence of repeated BREAKAGE.—Melbourne Journal of Commerce, Nov. 16. Heating and Breakage entirely prevented, and 15 per cent. saved in Freight of Cases by using SEYMER'S BOTTLE PACKINGS AND COOLERS.

Price 7½d. per doz. Bottlers contracting for large quantities effect so great a saving in labour, &c., that they can supply them at one-fourth less in price to Shippers, who will find it most profitable to order their goods to be so packed in future. In use by all the leading London houses.—T. WHITEHEAD, 37, EASTCHEAP, E.C. Sole Manufacturer.

TUPPER AND COMPANY.

MANUFACTURERS OF PATENT GALVANISED IRON in Sheets, Tiles, Iron Roofs, Sheds, Cisterns, Pails, Gutters, Wire for Fencing, &c.

WORKS AT BIRMINGHAM; AND LONDON.

OFFICES: 61A, MOORGATE STREET, LONDON.

Merchants' orders executed with despatch.

THE LONDON AND CHINA TELEGRAPH.

From Marseilles, Oct 12.—To Singapore: Mr. and Mrs. Cumming.

Per P. and O. steamer, from Southampton, Oct. 12.—To Ceylon: Sir John Cheape, Mr. Cheape.

Per P. and O. steamer, from Southampton, Oct. 20.—To Hong Kong: Mr. R. M. Stephenson, Mrs. Carnegie, Miss Kate Smith.

From Marseilles, Oct. 28.—To Shanghai: Mr. W. Watson. To Singapore: Mr. T. Scott.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Dates from this port are down to the 15th May. The following items are from the *Overland Japan Times*, the *Japan Herald* has not reached us.

We have to note with regret the departure of Mr. Von Brandt, Prussian Consul, who left us by the *Duplein* on the 12th May. This gentleman arrived here with the Prussian Legation in 1860, when the treaties were exchanged, and returned in 1863 to take charge of Prussian interests, as Consul of this port. None of the Consular Board has shown himself better able to win from his fellow countrymen confidence and respect, from his colleagues, esteem and regard. Mr. Von Brandt carries with him the good wishes of all who have known him in Yokohama.

We have no other diplomatic news, save that the Ministers and the Gorogio are engaged in discussing the Tariff as proposed by the Chamber of Commerce. It is rumoured that the native authorities are inclined to raise the estimated average value of silk. This must be resisted. The present state of things, or rather that which has existed for the past three years here, is quite abnormal; in fact we are inclined to consider the estimate as named by the Chamber too favourable to the Tycoon.

The head-quarters of the 9th Regiment arrived from Hong Kong on the 9th in H.M.S. *Adventure*. The detachment consists of 19 officers, 340 rank and file, 8 women and 4 children, under the command of Colonel Knox, who now becomes Commandant of the Garrison. The men have been landed and appear in good health and spirits. The 20th, so long our companions and protectors, leave us on the 17th by the same ship for Hong Kong. A detachment of 80 men and most of the women and children will remain here under the command of Captain Rochfort. Lieutenant Webster will likewise be left behind on duty. Major Francis, Captain Johnstone, and Lieut. Harris remain on leave.

The itchibou difficulty is forcing itself on the attention of our merchants. The subject is so important, and we are so loath to take up the subject without being able to treat it in a thoroughly exhaustive manner, that we defer its consideration until our next publication. It suffices to say that we are on the eve of a financial crisis, and that nothing but a very bold and decisive measure will save our import market from a disastrous collapse.

Turning to the social matters, a Garrison Race Meeting has really been the most noteworthy incident of the time. We have the greatest pleasure in announcing that the Yokohama community, represented by their very energetic Race Committee, have arrangeda Summer Meeting for the 19th and 20th June. We have every belief, too, that the new racecourse will be immediately begun.

Digitized by Google

H.E. Sir Harry and Lady Parkes entertained the *elite* of the community with a most brilliant ball on the night of Thursday the 10th, which went off very successfully; as many as nineteen ladies were present, which, for a small place like this, is a most unusual number.

Some weeks ago our contemporary, the *Japan Herald* referred in a most unjustifiable manner to some charges brought by a man of the name of Woodward, surgeon in the 20th Regiment, against our chaplain, the Rev. M. Buckworth Bailey. We have the pleasure of announcing that this calumny has been at last officially and publicly refuted. A court of inquiry was held some weeks since by which the charges brought against the Rev. Mr. Bailey were thoroughly examined and pronounced groundless. His assailant, Surgeon G. P. M. Woodward, of H.M.'s 2nd 20th Regiment was sent down to Hong Kong in the *Adventure* on her last trip. He was there immediately offered the alternative of making an ample apology or of standing his trial by court-martial. Be chose the former course, and, accordingly, on the arrival of the *Adventure*, a despatch from Surgeon Woodward to the Commandant at Hong Kong was made public in which he fully apologises to the rev. gentleman and confesses that the charges he preferred against him were without foundation. This was read by order of General Guy before the whole of the officers of all departments of the garrison of Yokohama on the 11th.

The weather has been by no means favourable, great variations of temperature having been experienced. These have had a pernicious effect on the new crop of silk, so that the prospects of the coming season are by no means satisfactory. The natives report that a severe and sudden frost on the morning of the 2nd, with a cold rain or hail during the previous night, very seriously damaged the mulberry trees—we can vouch from personal observation of the truth of this statement as regards almost the whole of the Hatchogee districts. The Japanese assert that Mybashi and Sinchu have suffered in a similar way. In the low-lying countries the leaves were well out, and travelling on the 1st May through some 25 miles of mulberry plantations, we remarked the extremely healthy appearance of the trees. On the following day, passing through part of the same and other districts, the trees were seen in many cases blackened by the frost. The eggs, unfortunately, are hatching fast, and the prospects of some districts are certainly gloomy. At the same time the evil must not be exaggerated. All the other grounds where the leaf was not so soon out escaped completely.

This variable weather has been exceedingly dangerous to the health of persons careless of themselves. We are informed that one or two cases of smallpox have occurred, but we have no fear of its spreading by contagion, as excellent arrangements exist at the smallpox hospital. On the whole, however, we have much to congratulate ourselves upon as regards the season, which has been singularly pleasant and cool.

The following cargoes have been despatched from Yokohama:—

Per *Chanticleer*, for London, despatched by Shaw, Cull, and Co.:—Tea (107,222 lbs.) 2,583 half-chests; silk (Tama), 21 bales; cotton, 44 bales; cocoons, 286 bales; waste silk, 326 bales; jasshubushi, 93 bales; wax, 46 boxes; gall-nuts, 588 boxes; shells, 198 packages; curios, and sundries, 160 packages; merchandise, 96 packages. Per *Castlehow*, for New York, despatched by Stephenson and Co:—Tea (222,874 lbs.), 4,926 packages; waste silk, 53 bales; curios., 60 cases; pistols, 4 cases; tin (block), 649 slabs.

CHINA.

TIEN-TSIN.

A letter from this port of 17 May states:—

"Newchwang is taken by rebels, and gunboats have gone to the protection of Ying-tse (the residence of foreigners, about thirty miles). The British bark *Sunrise*, of Melbourne, has been wrecked in trying to get off the Island, where she got on last November. She now lies on the starboard side, with water to her between decks beam if not above them. Mr. Morrison, who has several times been reportered murdered, was heard from a few days since by friends at Peking. He wrote from the capital of Shantung where he was well known, and he was well, or at least had little the matter with him."

SHANGHAI.

Dates are down to the morning of the 24th May. There is scarcely any news to add to our issue of the 9th inst. The following items are from the *Commercial Record*:—

The monthly meeting of the Municipal Council took place on the 8th, when the reports from the committees were handed in and passed, and other routine business transacted. There are few points of importance to notice. A letter has been received from the United States Consul General relative to the Sampan Office opposite Messrs. Augustine Heard and Co.'s but through some omission is not given in the report. Permission has been granted for the erection of a new boat-house on the Soochow creek above Will's-bridge, but the Secretary of the Boat Club has been referred to the Harbour Master as to extending it into the river further than low water mark, on the grounds that the Council have not jurisdiction beyond that point. As regards the Yangkingpang, the Council are of opinion that the work of clearing it out should be proceeded with in the hope of completing them before the hot weather fairly sets in. A draft contract for lighting the Settlement has been placed in the hands of the finance committee for their approval. The Chamber of Commerce are taking steps to revise the scale of wharfage dues; a measure desirable on account of the unequal manner in which these taxes press upon the various classes of goods in proportion to their values. According to the old scale a bale of silk, value probably Tls. 300, paid 5 cents, while, as coming under the head of "miscellaneous," a case of wine, perhaps worth Tls. 8 to Tls. 10. paid 2 cents, or some 10 to 12 times as much, *ad valorem*. It is a matter of surprise that this inequality has not been taken notice of sooner, and it is to be hoped that the new scale will be of a more equitable nature.

Several letters have been addressed by different members of the community to the Chamber of Commerce complaining of the constant departure of mail on Monday morning; and asking them to exert their influence to obtain a change in the system. The rule supposed to exist in the P. and O. service, that when the appointed day for the mail to leave fell upon a Monday the departure was to be on the Sunday morning previous, was pointed out; but upon investigation it appears that the publishers of the mail card generally in use here, were under an error in stating such to be the case, as no rule of the kind exists. It is, however, to be hoped that the matter having been brought forward in earnest, some steps may be taken to remedy the annoyance which has caused much complaint in Shanghai.

The annual meeting of Land Renters on the French Concession took place on the 8th inst., when the Provisional Committee appointed to act in October last was re-appointed for three months. The usual routine of passing the estimates, &c., was gone through; but at the motion of Mr. Hogg it was decided that no funds raised in virtue of the Budget should be expended after the Provisional Committee's term of office ceased.

A case, involving large interests, brought by the trustees of the estates of Duncan Fletcher and Archibald Campbell and the Bank of India into the Supreme Court, sitting in Bankruptcy, has been decided in favour of the trustees of the estates of Fletcher and Campbell. The matter was entirely of a technical nature, and turned upon the question of the legal right of Thos. Drysdale to raise money upon certain securities which the trustees claimed as the property of A. Campbell and D. Fletcher as partners in the original firm of Fletcher and Co. The amount lent on those securities was as much as Tls. 86,000, and the decision is somewhat hard upon the Bank of India as there can be no doubt that the securities were taken under the full impression that they were valid.

Another case of a very different description has attracted some attention, namely, a claim for damages for an assault committed upon Mr. C. H. Dallas by Mr. Tate, of Blain, Tate and Co. It seems that some story had got abroad in which Mr. Dallas's name was coupled in an unpleasant way with Mr. Tate's and that Mr. Dallas calling subsequently at the office of that gentleman, he lost his temper and first requested him to leave the room and then kicked him as he was going through the doorway. The jury gave damages for plaintiff to the amount of $400.

A fire broke out destroying the wine store of Messrs. George Smith and Co., also the drug shop of Dr. Vernon. Both were insured.

In the estate of Jarvie, Thorburn, and Co., Judge Hornby refused to allow the claims for re-exchange (25 per cent.).

The prohibition by the Chinese authorities to their countrymen to employ foreign vessels in the conveyance of beancake from the northern ports has again been the subject of discussion, and its injurious effect on the shipping interest pointed out. At the time the prohibition was issued, the city magistrates boldly denied having had anything to do with it, and asserted that if, as was stated in the papers, the proclamation was copied from the wall near the east

Digitized by Google

gate, it must have been put there without authority. This was, of course, an unqualified falsehood, and the native merchants were so impressed with authenticity of the document that they immediately declined to charter ships for the Newchwang and Swatow trade. The effect on the shipping interests was very quickly made manifest, for vessels which had been attracted to these waters by the prospect of the remunerative trade suddenly found themselves deprived of every chance of employment. The export trade of Newchwang and Tangchow was seriously affected, and, in a word, through the pig-headed obstinacy of the Governor, a hitherto remunerative branch of commerce was completely cut off. The vague assurance that steps were being taken in the proper quarters was for a time considered sufficient, but now that some ten months have elapsed, and the season is again rapidly approaching, we naturally look for the effect of these "steps." Nothing has, up to the present, been made manifest, and we would therefore press on the attention of the foreign authorities the necessity for a more vigorous course of remonstrance than they appear to have hitherto adopted.

The *Friend of China* notices that Mr. Dahlbach, a Swede, and partner in Dahlbach, Smith, and Co., had decamped with a considerable sum, chiefly borrowed from Chinese.

HONG KONG.

The French mail of 17th April arrived on the 27th May. Dates are now down to the 30th.

The *Daily Press* has the following:—

A correspondent at Swatow, sends us very indignant complaints of certain acts which have been committed by American residents at that port. It is said that some of them, at any rate, seize land that does not belong to them, hold it by force, knock down other people's boundary walls and misconduct themselves in a great variety of ways, as if they had been settlers in Missouri before the compromise instead of commercial representatives of a great Power, with the honour of a foreign flag to maintain. "Other folk" writes our correspondent, "cannot compete with them if they are to be allowed to annex property without paying for it as others have to do. In this case land has actually been wrested from the proper owner and held by force in opposition to the decision of the Chinese authorities, against whom the citizen has employed an armed force with consent and advice of the American Consul." He goes on to say:—Messrs. Lincken and Co. having procured from the Chinese authority proper deeds for their ground proceed to put up a boundary wall, which is knocked down by Bradley and Co., who have stationed 200 armed Chinese at their office, without anything being said to them by Chinese officials, but when the captain of a Canton boat went to clear at the Customs, he was arrested at once and imprisoned for assisting Lincken and Co. to protect their ground. Now why should an American be allowed to keep an armed force of Chinese in his house, to act against Chinese authority and aggressively against Lincken and Co., when the said Lincken and Co. are not allowed a similar privilege.

Violence of this sort is altogether unbearable, and the worst of it is that in a port like Swatow, a Chinese port where there is no supreme foreign authority to appeal to, it is difficult to check if the compatriots of the offenders do not take up the matter themselves and treat it as a personal offence against their common country. We give the information contained in our correspondent's letter without being able to guarantee the literal accuracy of details, but it is very clear that the American Consul at Swatow appears to think the duty of promoting on any terms the interests of individual countrymen greater than that of watching over them, so as to secure at the same time their equitable rights and the esteem of other nations.

The following items are from the *China Mail*:—

Subscriptions have been invited for the purpose of publishing a map of the island of Hong Kong, and the Chinese territory for some fifty miles round it. Great difficulties seem to have stood in the way of the author in gaining the necessary information, for it appears that the villagers in the mountainous districts, have an idiotic tradition that there are deposits of gold in some of the clefts of their mountains and are very jealous of foreigners travelling over them, or examining them; to such an extent does this feeling prevail, that great personal danger seems to have been incurred in carrying out investigations, and gaining information; in many instances the peasants with true Chinese cunning actually feigning friendliness, so as to mislead with false information. The most important information which the map may be fairly expected to afford, will be that which will afford facilities for tracing pirates from the bays and creeks on the coast to their piratical villages, which are frequently situated inland, and which at present are *terra incognita* to the crews of our gun boats; for, as a general rule, the piratical junks when pursued make all sail for shore and run into all sorts of creeks and indentations in the coast, and if fairly run to earth, beach their crafts and make off up the hills, whither, from ignorance of the country, it is impossible to follow them. Considering the amount of knowledge of the surrounding country which this map will afford, both to the naturalist and the traveller, and indirectly the benefits which may result to the commercial world of Hong Kong by the increased facility of guarding our shores, it is evident that little trouble will arise in getting subscriptions enough to place the map in the hands of the lithographer.

Of local news there is nothing very important to record. The attention of the Government has been drawn through the channel of a Sanitary Commission to the horrible state of the Western or Chinese quarter of town, with respect to drainage and other sanitary arrangements. The whole subject has been fully discussed in the daily papers, and descriptions have been given of the filthy dens and crazy Chinese lodging houses of Taipinshan, which do not in any way exaggerate in their account the condition of nearly one-half of Victoria which is truly a disgrace to a civilised community, and rivals the most squalid Indian or Chinese village. A great difficulty no doubt exists in organising adequate means for obtaining proper supervision over the Arabs who live or rather exist in the wretched hovels which, cover this pestilent region, as the inhabitants are essentially nomadic in their habits, and migrate wherever and whenever gain or plunder may afford a lure, for they are nearly all professional thieves; those who have some ostensible means of livelihood, such as pig or goat keeping, are like the Chinese fishermen when times are slack, and may fairly be called land pirates, for they will all join a burglar's gang when *extra* hands are wanted, and make an attack on any unguarded house.

The *White Adder*, with seven companies of the 11th Regiment, left on the morning of the 20th May, the authorities wisely deciding that any little risk of small-pox being carried on board by her passengers would be almost infinitesimal considering the precautions which have been taken, while the excitement and change of the voyage would in itself act strongly against any such contingency. The *Far East* is still lying in a sort of quarantine; no fresh cases of small-pox have occurred on board her, and we believe an early date is named for her departure.

A French opera company have arrived from Shanghai, which it is to be hoped will receive cordial support from the community. The great difficulty which stands in the way at present is the want of a suitable building for their performances; the garrison theatre is too small and not well adapted for sound, but this will be the only available building, and they must make the best of it they can under these circumstances. We wish them every success, more especially under the difficulties they will have to encounter.

Just as we are going to press we learn that a combined British and Chinese expedition has started to attack the piratical haunts on the West Coast. Commander St. John, R.N., has the command of the British gunboats, and a military force from Canton will rendezvous with the latter and proceed to the attack. The Prefect of Canton proceeds as Chinese Civil Commissioner, and is accompanied by Mr. W. F. Mayers, British Vice-Consul at Canton, as British Commissioner.

COCHIN CHINA.

SAIGON.

We notice from the *Courrier de Saigon* that the port of Saigon is now declared a free port, the importation and exportation of all kinds of merchandise, with the exception of opium and arms, are free and subject to no duties. This is a step in the right direction and one more instance of the necessity of free ports, such as the Straits Settlements, in the East.

JAVA.

Dates from Batavia are to the 1st June.

Pirates continue to rove about on the coast of Borneo; seven large boats have been seen off Singkawang. The Dutch men-of-war are in search of them.

News has come to hand from the expedition against the

Digitized by Google

Pasoemah (Palembang, Sumatra); on the 25th April the troops entered the Pasoemah territory, and on the 26th came before the fortified place of Penandingnan, which, after a fight lasting six hours, was taken. The natives defended the place with great courage, the troops being three times repulsed. The loss of the Dutch was 12 killed and 51 wounded. Several chiefs came in to submit, but it is expected that those in the interior will fight to the last.

Nothing of great interest is reported from the seat of war on the west coast of Borneo. One of the principal chiefs, Prince Mas Widjaja, has put to death a native envoy of the Government who had instructions to lay before him the conditions on which his submission would be accepted.

The troops on the south and east coast of Borneo, will be put on a peace footing in July. Fighting there is now at an end, and the natives seem to be satisfied with the new state of affairs.

The Dutch schooner *Union* (Francis owner), from Padang to Batavia, was wrecked on the island of Engano, and the ship plundered by the natives. A Dutch man-of-war was immediately despatched to the locality.

STRAITS OF MALACCA.

SINGAPORE.

Our dates hence are to the 7th June.

The question of the transference of the Settlement to the Crown still continued to occupy the most prominent place in local politics, and dissatisfaction was increasing at the anomalous position in which its affairs are allowed to remain. Some attention had been called to the military charges which the Settlement is called upon to provide out of its revenue. These are altogether disproportioned to the force maintained, and seem to have increased yearly, during the past five years, without any appreciable increase to the avaible force, until at the present time the annual military outlay has reached close upon £80,000. Had this increase of expenditure secured an improved or increased available force, which it has not, it would still be unjustifiable. Beyond the consequent waste of money, too, under this head, the Settlement obtains thereby a reputation for costliness of support which it is to be feared has much deferred the completion of our transfer.

Another subject that has attracted notice lately is the crowded condition in which vessels are allowed to arrive and depart with China passengers. Legislation on this subject has been long required—long before the transfer was dreamed of—and the total absence of any up to the present time serves, with many other unsupplied wants, to show that the desire for separation from the India Office is not an idle outcry.

Commercially, Singapore suffers somewhat, in sympathy with the disastrous intelligence recently received from home; but its material prosperity continues to show itself in the increase of private enterprises and the expansion and improvement of the town. There are new docks and wharves in course of construction; a coir manufactory has been established to utilise the husks of the cocoanut; also an extensive establishment for the production of grass oils, some of the samples of which have already obtained prizes at the Indian exhibitions; and (not to mention gas and ice) other undertakings of a similar nature on foot. The improvements and additions to the town have been very extensive; the entire reclamation of the sea frontage is now covered over with handsome buildings, and Battery-road, formerly a narrow lane some 15 feet wide, but forming the principal access to the harbour frontage, is being widened to a comfortable breadth, and its sides will shortly be lined by handsome and commodious warehouses.

The *Straits Times* complains of the way in which some of the superannuated European public servants are treated; referring to the case of one Evan Evans, a man now altogether broken down and imbecile, who is led about the town by a little Chinese girl begging alms at the various godowns, our contemporary says:—

"This man was Police Inspector here for six years, and had to leave on account of growing infirmities, and the allowance he now gets is exactly one dollar per month—from the police poor-box. We all know what a dollar a month is to an European in this place, and even this sum is granted not as a pension, but as an eleemosynary gift, subject at any moment to be suspended. As far as our inquiries have gone, we find that there was no cause of complaint against the conduct of this man during his occupancy of the post of Inspector, and that his removal from it was due only, as we have stated, to physical disability. A great deal has been said lately about bribery, and of the circumstance that police servants grow rich on salaries barely sufficient for their maintenance; but really there is some show of palliation in the fact that not only do we keep those salaries down to the lowest possible limit, but make no provision whatever for the support of those officers who have to retire, from age or infirmity, before a number of years' service which few can hope to fulfil in this country. It is not necessary that we should add very largely to our pension list to remedy this evil. For men like this Evan Evans there are many country Tannahs and outstations where they could have quarters, be fed, and be clothed, as well as have that show of duty which would go far to preserve them in health and happiness. They might do some service too by their mere presence in such localities, but whether or no, the least we can do is to offer them some such asylum."

The Director-General of Telegraphs in India has notified to the Singapore Chamber of Commerce that no message can be received at Galle for transmission without prepayment.

On the Queen's birthday, at noon, H.M.'s steamer *Coquette*, the Italian war steamer *Magenta*, and the Portuguese war steamer *Maria Anna*, each fired a Royal salute. The salutes fired from the two latter men-of-war were promptly responded to by a salute from Fort Canning. In the afternoon his Honour the Governor proceeded on a visit to the Italian war steamer *Magenta*, and on his leaving the vessel a salute of seventeen guns was fired.

The British barque *Welcome* has been sold to a Chinese merchant for $4,000.

The screw steamer *Mahratta*, from Calcutta and intermediate ports, arrived on the 24th May, brought among her passengers the chief officer and chief engineer of the Siamese steamer *Siam*, wrecked on the Alguada Reef, on her passage from Rangoon to Calcutta. Also the sole survivor of the British barque *Susan*, which vessel capsized off Pulo Jara, during a squall.

By the *Samson*, arrived on the 24th May from Labuan, intelligence was received that the Dutch barque *Anne and Jeannette*, from Labuan to Batavia with coals, was totally wrecked on a reef at the north end of Labuan on 2nd May. The crew and officers came on in the *Samson*.

The British steamer *John Bright*, from Bombay, reached Singapore on the 28th May. On the day before, when about 30 miles to westward of the light-ship, she was discovered to be on fire in the compartment before the engine-room. Capt. Betham, finding the smoke too great to allow any successful attempt to get at the fire, battened the hatches down and covered them with wet sails, and flooded the 'tween-decks with water from the donkey engine. On arrival the hatches were opened, and a commencement was made to discharge the cargo, consisting of opium and piece goods, but the smoke of burning piece goods, opium, and assafœtida was too great; and after several of the men and one officer had become insensible, the hatches were again closed, and it was determined to fill the fore compartment, it having been ascertained by this time that the fire was in the hold. A quantity of oil and tallow had been got up by this time. Messrs. Guthrie and Co.'s fire engine was promptly on the spot and did excellent work, as well as the steam water-boat. By six o'clock in the morning the hatches were opened and it was found that the fire was nearly extinguished. At this time there was about six feet water in the fore hold. Attempts were then made to get out the cargo, and after great difficulty from foul air, the place where the fire had originated was discovered to be close to the ship's side, so that it can only be accounted for by spontaneous combustion. It is impossible to state the amount of damage as yet, but it seems that nearly the whole of the goods in the forehold are more or less damaged.

In reference to the loss of the *Jeddo* by fire near Anjer, with coolies on board from Amoy to Demerara, we append the captain's statement. The Court of Inquiry held at Singapore in its report stated:—

"There is no positive evidence to show how the fire originated, but the witnesses have strong suspicion that the vessel was set on fire by the coolies; this suspicion is strengthened by the fact that the fire broke out the day after the ringleaders were permitted to go below on account of bad weather. While regretting the great loss of life on this occasion, viz., one officer, three seamen, and one hundred and forty-one coolies, we cannot speak too highly of the praiseworthy conduct of Mr. West, the master, and Mr. Lang, the medical superintendent, in saving the lives of so many of the coolies, which was done by means of a line taken on shore through the surf by the master, while the doctor remained on board to the last, to encourage the coolies (of whom about fifty were burnt with the ship) to save themselves."

Digitized by Google

The following is the captain's statement:—

To the Master Attendant, Singapore.

Sir,—I beg to lay before you an outline of the passage and loss of the ship *Jeddo*, of London.

We sailed from Amoy for Guiana on the 18th March with 480 Chinese emigrants. All went on well until the 27th when a plot was discovered amongst the emigrants to murder all the Europeans and take the ship. This was frustrated by one of them turning informer. We arrested and tried the ringleaders and flogged and put ten of them in irons. From that time until the 16th April all went on as usual. On that day the ship was anchored near the third point on the Java coast until about 6.30 P.M. when we got under way with the wind about S. by E. fresh, and stood out steering W.S.W. until about 7.50 P.M. when the alarm was given that the ship was on fire forward in the lower hold. Got the fire-engine and buckets to work and tried every means to put out the fire, but found it gaining on us fast, and I resolved to run the ship on shore to save as many lives as possible. Got out three boats and took every possible means to save life. The ship struck a little after 9 P.M., when we commenced to land the emigrants; the surf at this time was very high, and two of the boats swamped the first trip. We then got a line from the ship to the shore and succeeded in saving a great number of people. A number of the emigrants lost their lives through stealing in the cabins and storerooms.

On mustering the crew and emigrants found chief mate, one A.B., one O.S., one apprentice, and one hundred and forty emigrants missing. The ship continued burning until noon of the 17th when she was burnt to the water's edge; nothing whatever was saved; the survivors landed nearly naked.

I beg you will apppoint a Court of Inquiry to be held here on the loss of the ship at your earliest convenience, as I was detained a month in Java as the Consul declined holding a Court there as he said he considered it unnecessary. I have the honour to be, Sir, your obedient servant,

(Signed) J. WEST.

PENANG.

A most atrocious and wholesale murder, such as the Straits Settlements have not witnessed for many years, was committed on Friday, the 25th May. On Thursday a boat laden with sugar arrived from Bukit Tamboon at Ujong Passir, and after disposing of the produce prepared to return home on Friday evening at about 9 P.M. having on board about seven or eight hundred dollars. The parties on board were, it is reported, the owner, named Hang Ah Cheow, a helmsman, and two rowers; besides these there were three men belonging to the Province, passengers going back, these being in all seven men. Just before starting, four men belonging to the Island begged a passage also, and the whole party started for Bukit Tamboon or the Juru river, it is not certain which. Immediately after the boat left, a sampan with seven men rowed off and closely followed. The sugar boat, in consequence of the strength of the ebb tide, anchored near the Qualla Pry to wait for the flood, and while lying there the sampan came alongside and the seven men jumped on board, when these, together with the assistance of the four passengers on board belonging to Pinang, murdered the rest, and threw them into the sea; one man however is said to have jumped overboard. The money was divided and the murderers were rowed over to town where they dispersed, after giving seventeen dollars to the sampan man who took them across. The sampan man has been arrested and kept in custody, and from him the police have received information which has led to the arrest of two others. He states that he can identify all the men who were in his boat, though we are afraid that the murderers will have had ample opportunity to escape.

The result of the Coroner's inquest has been that of wilful murder against the two men who have been apprehended, named Ah Soon and Ah Kim, in the case of one of the bodies.

Births, Marriages, and Deaths.

(Announcements for subscribers are made free of charge.)

BIRTHS.

LAY—On the 9th July, at 89, Gloucester-terrace, the wife of H. N. Lay, C.B., of a son

MURROW—On the 12th May, at Hong Kong, the wife of Y. J. Murrow, Esq., of a son.

ROSS—On the 4th June, in Singapore Harbour, on board the American ship Alice Ball, the wife of Capt. Wm. Ross, of the American ship Daniel Marcy, of a son.

MARRIAGE.

SADLER—GILBERT.—On the 10th July, at Park Chapel, Hornsey, by the Rev. Chas. Gilbert, father of the bride, assisted by the Rev. J. Corbin, James Sadler, Missionary to China, to Martha Ann Gilbert. No cards.

DEATHS.

BAILLY—On the 20th May, at Shanghai Hospital, Colonel John Bailly.

DUFFIELD—On the 1st May, at Hong Kong, on board H.M.S. Princess Royal, Arthur Duffield, youngest son of the late Thomas Duffield, Esq., of Marsham Park, Berks, aged 29.

HOGG—On the 26th May, at Shanghai, Eleanor, only daughter of A. G. Hogg, aged 17 months.

STANFORD—On the 20th May, at Foochow, on board the Erl King, on his passage to England, Geo. Stanford, Esq., of the firm of Lane, Crawford, and Co., Shanghai.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—There is great excitement in the markets for new teas, which will open at unprecedentedly high rates. The steamer Erl King will load at Foochow, where a number of clippers were by last advices engaged full and waiting the arrival of the new teas expected daily. The first teas from that port will cost about 6d. per pound, laid down in London, above last year's rates.

CANTON.—Although the market has not yet virtually opened for Scented Teas, some considerable settlements have been made in Scented Orange Pekoes (Foochow make) at rather high rates, but the usual descriptions have, with the exception of a few comparatively cheap parcels of Capers at last year's prices, not been touched, and the teamen are holding for extreme prices. The quality of the first crop is not equal to last year, but the scenting flower is reported better. In the new make Canton Congous settlements have been effected during the fortnight at from one to two taels decline in favour of purchasers. Of Canton made Greens there are no comments to make by this opportunity. Sales, &c., are reported as follows:—Canton Packed Congou, 150 half-chests, and 3,500 boxes, at 29½ to 38 taels.

AMOY.—The high rates paid in the interior when the market opened had checked operations, and it was expected that lower rates would rule when purchases were resumed. No musters representing chops have yet been received.

FOOCHOW.—The new teas began to arrive on the 10th May, and there are now on hand from 21,000 to 23,000 chests of Congou including contract teas, and 7,500 half-chests of Oolong. Several boats containing in all 20,000 to 30,000 chests have been delayed in their progress from the interior by the mandarins, who have endeavoured to exact tribute from the boatmen, but the last accounts are to the effect that the boats have been released and would shortly arrive. From the musters shown up to the present time, the new crop appears to be of fair quality, most of the teas possessing great strength, although in appearance they are inferior to those of last season, the leaf having been less carefully picked over; the cost is said to be 5 to 7 taels higher than last year's. As yet no transactions have taken place owing to the very high price demanded by teamen, but the opening of the market is expected. [Telegrams were given in our last].

SHANGHAI.—Black: Musters of the new season's Oopack teas are beginning to arrive on this market. Judging from the few already come, the quality, both as regards make of leaf and strength of water, appears to a certain extent inferior to last season's crop; at the same time, some few musters have been seen in Hankow showing a decided superiority over last year's teas, though not so much as was expected.

HANKOW, 16TH MAY.—At Hip-ca-see the market for New Season's Tea has opened, and the prices paid have been most extravagant, the quality at the same time proving itself inferior to what had been anticipated. In the districts of Yang-laou-toon and Tsung-yang the cost is so high that Teas will lay down at about taels 36 to 40 per picul, while for Hip-ca-see Teas the cost will be about taels 31 to 34 per picul.

KIUKIANG, 18TH MAY.—Black Teas: No settlements have taken place, and only one parcel of inferior Kiukiang-packed tea remains on the market. Advices have been received reporting the opening of the Ningchow market, at rates equivalent to from taels 32 to 34 for best chops, or a price about 40 per cent. above last season's prices. The quality is well spoken of, and the crop is likely to be abundent. Chest musters are expected in about a fortnight.

YOKOHAMA.—The business done in the Tea market amounts only to a very few piculs of finest tea at an extreme quotation for the American market. Buyers are now waiting the arrivals of the new Tea, which is expected down shortly from the interior, after which, if the price be reasonable, operations will recommence.

RAW SILK.—The quantity of raw Silk by the present mail is 152 bales for Southampton, 50 bales for Marseilles.

SHANGHAI.—The settlements only amount to thirty-four bales since the last report. The weather continues favourable for the production of the new Silk; the only drawback is the enormously high cost of the mulberry leaves. Contracts are reported to have been made to the extent of about 1,000 bales, of which about 800 bales are said to be Hainins, and the remainder Kahings, the price mentioned for the former being tls. 440, and for the latter tls. 400 to 405, for the best chops and numbers of each description. At the commencement of the season 1865-66, contracts were made for Hainin No. 1 at tls. 405 and Kahings No. 1 at tls. 380 to 390, and it appears that such will be about the opening rates this season. The market for No. 3 Tsatlee is expected to open at about tls. 450. No contracts are reported for this class of Silk.

YOKOHAMA.—Settlements for the last fortnight may be estimated at about 260 piculs, and arrivals at 300 piculs, leaving an unsold stock of about 1,200 piculs, The quotations are as follows:—Ida, medium, per picul, $640 to $700; inferior, $580 to $630; Mybash, medium, $700 to $750; Sinchu, inferior, $620 to $670.

DRUGS, &C.—CANTON.—Cassia Lignea: Settlements amount to 2,300 piculs, at $19 to $19.25, principally for the American markets; stock, 500 piculs. Cassia Buds are dull, and offered at $40 per picul; stock, 50 piculs. Galangal: $2, 100 piculs are reported to have been sold and 300 piculs remain on offer. China Galls: $14 per picul. No transactions; stock, 100 piculs. Vermilion: $37.50 per box of 50 catties for best genuine. Of Essential oils, Star Anniseed, Musk, and Rhubarb, the market remains perfectly bare.

COTTON.—HONG KONG.—There has been a further decline since the departure of the last mail in the quotations and during the fortnight the market for this article has been dull and drooping. Sales has been very limited and effected with great difficulty. The rates at present are as follows:—Bengal, $16 to 19 per picul; Tientsin, $20 to 21 per picul; Shanghai, $20.50 to 21.50; and Ningpo, $31 to 22 per picul. The sales have amounted to 7,000 bales. The Western Chief has been despatched from this for London with a large cargo.

CANTON.—The transactions in Cotton which have taken place during the fortnight show a decline of about 5 mace. The sales and quotations for the fortnight have been as follows:—150 piculs Ningpo at tls. 16.04 to 16.07; 200 piculs Shantung at tls. 15 to 16; 910 piculs Tientsin at tls. 14.02 to 15.05; and 2,330 piculs of Bengal at tls. 12.06 to 15.08. The stocks amount to about 450 bags of China sorts and 1,160 bales of Bengal.

AMOY.—During the past fortnight there has been active demand for Northern Cotton at somewhat improved rates, especially for Shanghai staple, which is now more in favour than Tientsin. Holders have mostly been anxious to meet the market at current rates, but stocks are now much

Digitized by Google

reduced and prospects appear favourable for a further advance. Indian Cotton has been sold at very low rates and is in little inquiry at present. Sales for the fortnight comprise:—1,595 bags Chefoo at $25, 846 bags Tongchow and Tientsin at $22.50 to 24,50, 1,162 bags Shanghai at $24 to 24.50, 640 bales Bengal at $19 to 20. The quotations are:—Ordinary to good Shanghai, $22 to 24; Chefoo, $23 to 25; Tientsin, $21 to 23; Ningpo, $26 to 28; Bengal, $20 to 21. Unsold stock, 2,565 bags Native and 824 bales Indian Cotton.

SHANGHAI.—The market has been exceedingly dull, and there has been no demand for either Tientsin or Shanghai staple. Quotations are at present nominally 15 tls. per picul for the former, and 16½ tls. for the latter.

CHINA IMPORTS.

COALS.—HONG KONG.—There have been six coal laden vessels arrived during the fortnight aggregating a quantity of tons 4396, nearly the whole of which came to consumers—English may be quoted $15; Welch, $15½; Australian $12 per ton from alongside.

SHANGHAI.—The only arrivals have been 720 tons from Great Britain, 750 tons from Australia, and 475 tons from Japan; the first 1,470 tons had been sold "to arrive," the latter fetched tls. 8.5.0 per ton. Quotations from ship here are quite nominal, and buyers "to arrive" prefer at present to wait for expected supplies rather than enter into any fresh transactions at the very high rates now demanded. The quotations are:—English, tls. 10.5 to 12; Cardiff, 13 5 to 14; American Anthracite, 13.5 to 14; Sydney, 9.7 5 to 10; Japan, 8 to 8.5.

HONG KONG.—The ships Everest and Devana with manufactured goods both arrived on 25th May, from Liverpool and London respectively. Throughout the fortnight there has been little or nothing doing in manufactures either on the part of Chinese or foreigners. Some 8.4 lbs. Grey Shirtings, partially sea-damaged, have however realised fair prices at auction $3.90 to $4 per piece having been paid. There has been some inquiry for Yarn, but only lower prices have been tendered. Turkey Red Shirtings are wanted. Of other kinds of Manufactured Goods there is nothing to report. In Woollens and Metals there is nothing new to report except that Nail Rod Iron is more readily saleable.

EXCHANGES ON LONDON.

[For dates, see first page.]

			Bank.	Private.
At Yokohama	6	months sight.	4s. 8¼d.	4s 8¼d. to 4s. 9d.

[Dates from Shanghai to the 13th June, via Kiachta, report Exchange at 6s. 1d.]

From Sharp and Co.'s *Circular*, Hong Kong, Tuesday, 6 P.M., May 29th, 1866:—

GOLD.—There has come in during the fortnight $350.000, and the total exported, including the amount per last mail and without that to leave to-morrow, is $630,000.—There is but very little of this bullion left upon the market,

SILVER.—Amounts inwards total $290,000, outwards $470 000. This return is inclusive and exclusive as above with gold. The present low rate of rupees will insure the clearing out for Indian remittance of any small parcels which may remain.

DOLLAR CURRENCY.—There have been received since our last circular $1,100,000, and the shipments are together $1.690,000. This latter sum is exclusive of a considerable amount which will go forward by the mail to-morrow. This outturn being superior to that given by rupee bills.

NEW KONG KONG DOLLARS.—These are only curious at present, the minting having been delayed by an accident to the machinery and by the sickness of some of the employés, who, English like, have been doing the laborious work themselves and have succumbed to the insupportable heat of the melting room.

DISCOUNT AND MORTGAGES.—Money has been rather cheaper on undoubted securities, not so much from its abundance as the want of confidence caused by the bad news received from Europe and India.

EXCHANGE.—But a small business has been done in bills pending the opening of the market for new season's teas.

SHARES.—In these, but very little has been done at a slight decline upon the news, in all descriptions.

HONG KONG FIRE INSURANCE COMPANY.—This has been established very much after the manner of the Canton Insurance Company, under the auspices and management of Messrs. Jardine, Matheson and Co., and should it be anything like as successful as the older institution, those will have cause for congratulation who may be so fortunate as to secure a share.

SHIPPING INTELLIGENCE.

ARRIVALS.

At YOKOHAMA.—From London: May 15, Challenger, Conference.

At SHANGHAI.—From Newport: May 11, Pldt Harbitz. (Reported by telegram.)—From Liverpool: Kew-Kee. (Reported by telegram.)—From London: Lauderdale.

At HONG HONG.—From Liverpool: May 25, Everest. From Sunderland: 17, Zingra; 22, Maitland. From England: Amberwitch. From Newcastle: 25, Hollands, Trouro. From Cardiff: 19, Island Queen. From Hamburg: 15, Margaretha; 18, Patna; 19, Patria. From New York: 17, N.B. Palmer; 23, Benefactor. (Reported by telegram.)—From Sunderland: June 23, Challenge.

At MANILA.—From London: May 17, Loyala. From Liverpool: 5, Alavesa.

At SINGAPORE.—From London: June 5, Eastern Star. From Liverpool: 6, Harry Puddemsey, Bolivia. From Hamburg: Mauritius. (Reported by telegram.)—Off Anjer: St. Eagle.

At PENANG.—None.

DEPARTURES.

From YOKOHAMA.—For New York: May 12, Castlehow.

From SHANGHAI.—None.

From FOOCHOW.—For London: May 30, Taeping. (Reported by Telegram.)

From HONG KONG, CANTON, and MACAO.—For London (via Algoa Bay): May 20, Whiteadder; 26, Western Chief; 10, Chanticleer; 24, Kungmon. For New York: 13, Caroline (via Hong Hong); 20, Ann Lucy (via Macao). For Havana: 12, Cataluna.

From MANILA.—For London: May 13, Lochnagar; 16, Herbert. For Falmouth: 13, Madagascar, Satellite. For Cork: Turandot. For New York: 17, Hadassah.

From SINGAPORE.—For Bristol: June 5, Alfred Ray. For Bremerhaven: Frederick VII.

From PENANG.—None.

VESSELS PASSED STRAITS OF SUNDA.

From ENGLAND AND CONTINENT TO CHINA, &c.—May 6, Star of China, London to Shanghai; 9, Fy-chow, Sunderland to Amoor River; 12, Punjaub, London to Hong Kong; Valdivia, London to Hong Kong; 14, Royal Minstrel, Cardiff to Hong Kong; 15, Blencathra, Broadwater, London to Japan; 16, Challenge, Sunderland to Hong Kong; 17, Fiwan, London to Shanghai, 18, Jan Peter, Hamburg to Singapore; Vigil, Liverpool to Shanghai; 21, Isles of the South, London to Japan; 27, Noord Brabant, Rotterdam to Batavia.

At HANKOW.—For London: Eliza Shaw, Guinevere, Highflyer, Napoleon III.

At SHANGHAI.—For London: Cinderella, Burdwan, Ethiopian, City of Aberdeen, Sir Lancelot, Coulnakyle. For Liverpool; Trebolgan.

At FOOCHOW.—For London: Fiery Cross, Serica, Ariel, Taiping, Taitsing, Black Prince, Chinaman (all engaged full), Ada, Falcon, Yangtze, and Erl King, str. For Liverpool: Ziba (engaged full).

At HONG KONG and WHAMPOA.—For London: Deerfoot, Belted Will, Jno. Milton. For Liverpool: Luzon. For New York: N. B. Palmer, Ann Lucy (filling up).

At MANILA.—For London: Ironsides, Oithona. For Cork: Laura. For Falmouth: Simoon, William Cundal. For New York: Sailor Prince.

At SINGAPORE.—For London: Eastiaan Pot, Winona. For Liverpool: Patriot Queen, Grenada, Activ.

At PENANG.—For London: Queensberry.

FREIGHTS AND CHARTERS.

At YOKOHAMA.—To London: Cotton and Tea, £2 10s. to £3. Silk, £4 to £4 10s.

At SHANGHAI.—To London: No rate of freight fixed for New Teas, but £5 per ton is expected for the first ships. Tonnage remains scarce.

At FOOCHOW.—The rate of freight is fixed at £5 per ton of 50 cubic feet, and 10s. per ton extra for first ship to arrive in London with the New Teas. The rate per Erl King has not transpired.

At HONG KONG and CANTON.—In Home Charters direct no change is to be reported—the tea-clippers for London are still loading at Whampoa at £4 to £4 10s. per ton. The Island Queen has been laid on. The Victoria has taken the berth for general cargo, and is loading at £3 per ton. To New York 13 dol. gold. According to the circular of George Holmes, the estimated number of disengaged vessels in Hong Kong is 96, representing 47,056 tons.

At MANILA.—The Simoon loads for a port in the U. K. at £2 15s. per ton for a full cargo of Unclayed Sugar, 200 tons being shipped here, and the balance in Cebu. The Oithona has been fixed for London, with 500 tons Clayed Sugar at £2 17s. 6s. per ton.

At SINGAPORE.—For England: Ships on the berth load slowly at former rates of £2 per ton for dead weight, and £2 10s. per ton for light cargo.

COMMERCIAL POSTSCRIPT.

ARRIVALS NOT INCLUDED IN THE TABLES.—June 30, at New York, from Yokohama, Diamond; from Japan, Louisa Brogington; July 3, at Boston, from Batavia, Newcastle; 14, at Falmouth, from Rangoon, Otto; Speculator.

DEPARTURES.—July 11, from off Dungeness, for Batavia, Maria Regina; 13, from off Falmouth, for Batavia, Anthony v. Hoboken; 12, from Deal, for Batavia, Marie; from Cardiff, for Galle, Courier.

The ship Horatio, Palmer, cleared from New York for Shanghai on the 2nd July.

LAID-ON.—At London, for Shanghai, Silver Eagle.

SPOKEN.—Dr. Petermann (Bremen barque), Cardiff to Hong Kong, May 21, 23 S., 33 W.; Apellina, Singapore to New York, April 20, 27 S., 46 E.; Avondale, Cronstadt to the Amoor, April 30, 5 N., 114 E.; Geffrard, Liverpool to Batavia, July 6, 52 N., 11 W.

THE DUTCH SETTLEMENTS IN SUMATRA.

(To the Editor of the *London and China Telegraph.*)

SIR,—I regret that I am only able to reply to "Pulo Penang" after some considerable delay, but hope you will allow me a small space in your columns to rebut the questions which he evidently considers to be unanswerable. In the first place, I did not *attempt* to prove that "the Sultan of Siak is Suzerain of all States on the east coast of Sumatra," for I quoted as undeniable proof my authority, Mr. Anderson, who was charged by the Governor of Penang to make treaties with the various chiefs of Sumatra, and who admits the fact of the suzerainty. I do not wish to have better testimony on my side.

Pulo Penang lays great stress upon the third and sixth articles of the treaty of 1824, and charges the Dutch authorities with ignoring their existence. Now, I believe I am correct in asserting that the British first of all violated Art. 3 by failing to communicate, before the conclusion of that treaty, all former treaties and engagements existing between them and any native Power in the Eastern seas, for it is notorious that some of the conventions upon which the English found their claims to consideration with respect to Sumatra were never, until lately, made known to the Dutch authorities. But the concluding part of the article under notice states, "Like communication shall be made of all such treaties concluded by them respectively hereafter;" and yet Pulo Penang says that "the Dutch had not a shadow of right to conclude a treaty without informing the British Straits authorities." How is it possible to communicate a concluded treaty if one has not the power to conclude? Again, Pulo Penang argues that the Dutch have no right to form any new settlement, and asks whether the military occupation of Benghalies is not a violation of the treaty of 1824. I reply unhesitatingly that it is not. The Dutch officers had the previous authority of their Government in Europe, and that I deem quite sufficient (see Art. 6 of Treaty). Neither will I admit that the treaty with Siak of 1856 was a violation of Art. 3, unless it can be proved that the Dutch positively declined to communicate to, or endeavoured to conceal its nature from, the British Government.

I will now turn to an "unimportant point," viz., a question of history. Pulo Penang says:—"From the time the British held Java the Dutch had no power or right to any part of Sumatra. Their right to Benkoelen had been conquered from them by the British and their power in Sumatra became *nil*." Now I, together with many of my countrymen, have been and are still under the impression, that Java, &c., was taken from the French and in the name of the Prince of Orange to be returned when the war was over. At that time Holland, in fact, did not exist, it being, as many other and larger countries were then, merely a French province. In consequence of this the Dutch were afterwards (1815) again placed in possession of some of their territory, but Pulo Penang ignores these "patent facts" and adds another victory to British arms—the battle of Benkoelen!! Date not given. A person who makes such loose statements as those I have contradicted above should not carry weight with serious thinkers. Pulo Penang has not refuted any assertion formerly made by me, and I repeat, in reply to his repetition of the absurd charge against the Dutch of interfering with and jeopardising British commerce on the coast of Sumatra, that a trade which within the last four years shows an increase of 15 per cent. on imports and 36 per cent. on exports cannot be fostered by monopolies and double duties, and this fact, proved from official sources, is worth all the mouthy declamation and unfounded assertions of Pulo Penang. As for his last statement, that the natives of Java have been at a standstill, if not retrograding, since the English gave the country up to the Dutch, it is one of those old-fashioned accusations without proof which some people are in the habit of bringing forward at haphazard against the Dutch. It is evidently a proof that Pulo Penang has never been in Java, and I should advise him to do as I did last year and travel in that beautiful island for three months, after which I am sure he will have imbibed quite different ideas about the "standstill, if not retrogression," of the Javanese.—I remain, Sir, your most obedient servant,

T. C.

RUSSIA, GERMANY, &c.

(FROM OUR OWN CORRESPONDENT.)

HAMBURG, July 7.

After a severe struggle, and as the only means of preserving its independence as a Free State, Hamburg has resolved to take part with the winning side. For some time past Prussia has been urging the Hanseatic cities to accept her offers of alliance, with the promise of respecting their independence if they would join her in the reconstruction of the German Confederation, send members to the National Parliament, and put their contingents on the war footing, at the same time placing them at the disposal of the King of Prussia. This last condition was the hardest of all to swallow, as the public feeling is so decidedly in favour of Austria, and the disinclination to take active part in the fratricidal war very unmistakably apparent. Bremen and Lubeck have thrown themselves unconditionally into the arms of Prussia, voting, almost unanimously, the money required for the mobilisation of their contingents.

The party of Chinese that were lately in England, after having finished their visit to Holland, arrived here on Wednesday by the steamer from Amsterdam, and after inspecting the institutions most worth inspecting in this city, such as the Exchange, the Bank, and other public buildings, as well as the Zoological Gardens, left again the following day by the railway from Altona to Kiel, where they embarked the same evening for Copenhagen *en route* for St. Petersburg. They stopped at the Hotel de l'Europe and caused quite a sensation wherever they appeared, from the singularity of their costume, which has seldom or never been seen here before. They had luncheon with Mr. Kopcke, a merchant of this city, and then proceeded with that gentleman to the Exchange, from the interior galleries of which they contemplated for some time the busy throng assembled at their feet.

The *Stockholm Gazette* mentions the appointment of Mr. M. G. Moore to be Vice-Consul for the King of Sweden and Norway at Tientsin under the Consulate-General of Shanghai, and announces that Mr. D. Thorburn has resigned his appointment as Swedish and Norwegian Vice-Consul at Che-foo.

The sudden announcement of the *Moniteur* that Austria has offered to cede Venetia to France and make peace with Italy and Prussia has taken the Exchange by surprise, and funds of all descriptions rose ten per cent. In the meanwhile the dreadful losses of killed and wounded of Austrians, Prussians, and Hanoverians has created here a painful sensation, as so many of them were personally known and related to Hamburg families. Half a dozen charitable committees have been formed to collect lint, bandages, wine, cigars, and other refreshments and necessaries for the wounded, and with great success, especially among the ladies; and I firmly believe there is not a single house in this city where the females, high and low, are not engaged every day in picking lint and making bandages. At Altona, too, a Ladies' Committee has been formed, and amongst the names I notice that of Mrs. Pustau, the wife of Mr. Wm. Pustau, the China merchant, as one of the ladies who receive contributions for the sick and wounded.

P.S.—I have just heard of the arrival of the Chinese at Copenhagen, where they are making a great sensation.

COMMERCIAL.

There is but little to report to-day on this subject, public attention being far more absorbed here by the great military operations in Bohemia and Italy than business. The markets for all articles are still in a very feeble state, and what few transactions have been done were mostly at lower rates, indeed, so much so as to affect the retail prices in the shops. The only exception was Spelter, which has partially recovered from its late fall, and is more in favor as the miners and workmen at the smelting establishments in Silesia being all called out to serve in the army, the production of that metal is necessarily stopped for the present, and it has thus become a fair object for legitimate speculation. I must, however, add that since the receipt of the news that the war is probably at an end, a dull feeling pervades the market.

Money is much more plentiful now, and discount has fallen to 6½ per cent. Yesterday's official weekly returns of the Bank of Hamburg show that the present amount of the precious metals in that establishment is now 17,005,026 marks banco.

SHIPPING.—Arrived: July 5, Insulanerin from Sourabaya; July 6, George Andreas from Batavia. Sailed: June 25, Elise to Shanghai, July 5, Hans to Singapore; July 6, Alsen to Hong Kong.

COURT OF COMMON PLEAS.—PALMER v. LEMON.—This was an an action to recover damages for injury done to 584 bags of coffee from Manila shipped by the plaintiff on board the defendant's ship the *Sepoy* in the summer of 1864, and alleged to have been damaged by the defendant's taking on board a quantity of cocoa-nut oil at Manila, the pungent and bad smell of which flavoured the coffee. Mr. Brett, Q.C., and Mr. Mathew appeared for the plaintiff, and Mr. Edward James, Q.C., and Mr. Crompton for the defendant. The plaintiff's case was that this oil was stowed in the same hold as the coffee at Manila, and caused the damage to it. The defendant's case was that there was other coffee on board which was not injured, and it was assumed that if the pungent oil on board had caused the injury, the other coffee would have been injured too, and it was suggested that the coffee had possibly been damaged before it was put on board by being stowed in the same warehouse with Manila oil. No evidence was, however, called to substantiate this charge. The jury found a verdict for the plaintiff on the two issues submitted to them—that the coffee was not delivered in good condition according to the bill of lading, and that there was negligence in the shipowner in stowing coffee in the same hold as cocoa-nut oil. The amount of damage was agreed to be referred.

COHEN AND OTHERS v. WALKER AND OTHERS.—This was an action to recover the sum of £1,100 for negligence in not properly buying and superintending the packing of 262 bales of Shanghai cotton. Mr. Edward James, Q.C., and Mr. Watkyn Williams appeared for the plaintiffs; and Mr. Karslake, Q.C., and Mr. Mathew for the defendants. The plaintiffs, it appeared, are general merchants at Birmingham, and in 1863 they ordered through the defendants, who are brokers at Hong Kong, from 200 to 300 bales of cotton, and 262 bales were shipped to their order, the defendants being paid a commission to examine the cotton and see it properly packed. On the cargo arriving at Liverpool, and the cotton being inspected, the bales were found to have been what is called "water packed"—a species of fraud resorted to to make the cotton weigh heavier, by throwing water upon it when packed, which it was the defendants' duty to have discovered. On unpacking the bales the cotton was found to be in such a lumpy and damaged condition from "water packing" that it was unsaleable, and had to be sold by auction for what it would fetch, and it realised upwards of £1,100 less than the then market price for cotton of that quality. The defence was that this was a speculation which had not answered by reason of there being a falling market at the time of its arrival, otherwise there would have been no complaints about the cotton. The jury found a verdict for the defendants.

LONDON, MONDAY, JULY 16, 1866.

IMPROVEMENT OF SHANGHAI HARBOUR.

THE interests of foreign trade in China, and at Shanghai especially, are so overwhelming that the condition of the great arteries of commerce in and around what is now practically the capital of the Far East, claims the attention not only of the mercantile community but of the Imperial Government. When the rapidly rising importance of Shanghai as a commercial centre was first fully recognised, Admiral Sir JAMES HOPE, with that rare discernment which marked his career in China and has not deserted him in his new sphere, prevailed on the Chinese Government to appoint a qualified officer to the post of Conservator of the Yang-tsze-Kiang and its most important tributary, the Wusung Kiang, or as it is more generally known the Wang-poo. Year by year the number of ships entering the Yangtsze to discharge their cargoes on the Shanghai quays had steadily increased, but with that increase there had been an equally steady drain on the insurance offices caused by the accidents which occurred to vessels navigating the constantly shifting channels that led to their destinations. Collisions were of frequent occurrence, and the operation technically known as "fouling" was every day performed to the intense disgust of agents on the spot and of owners in this country. So soon, however, as Mr. HOCKLY was invested with the necessary authority as Harbour Master and Conservator a new state of things was rapidly organised. The narrow river which washes the walls of Shanghai, and pours its muddy stream past the foreign settlements was accurately sounded, buoyed and mapped out into berths, and a regularly graduated scale of tonnage eligible for the various divisions of the harbour was drawn up and rigidly enforced. By an arrangement with the Custom House authorities no vessel not reported as properly berthed in such a position as placed her out of reach of danger to herself, and out of the power of doing damage to others, was permitted to commence discharging cargo, and thus the interests of all were scrupulously observed. Gunpowder, which had hitherto been allowed to lie in unprotected cargo boats off the foreign settlements, was confined to the lower limits of the anchorage, where an explosion could do comparatively little harm, and vessels bringing munitions of war were compelled to remain far below the shipping until their dangerous stores were landed in a place of safety or transferred to the authorised powder hulk. It can easily be conceived that this exercise of an authority to which the merchants had not been accustomed created in many instances opposition, and in some ill-feeling. Fortunately, however, as the regulations were persevered in without respect to persons, even the most discontented eventually acknowledged the advantages which arose from the enforcement of one general rule, and gradually fell into the plans formed by the Harbour Master for the benefit of all. The result was soon manifest. Collisions became of rare occurrence, for whereas formerly a ship on arrival dropped anchor where she pleased and how she pleased, she was now assigned a place in which she formed one of a tier, and where she assisted in marking out the deep water channel through which coast and river steamers and tugs were able at any time to reach their moorings. Fouling was thenceforward unknown, for a ship so soon as it entered the river was boarded by an *employé* of the Harbour Master's office, and was obliged to comply with certain carefully prepared rules as to berthing, shifting of anchors, &c., which enabled her to swing without damage to her neighbours, and rendered drifting impossible under ordinary circumstances. The men-of-war, gunboats, river steamers and junks were each assigned their proper anchorage grounds; a junk channel in shallow water was kept clear, so that these unwieldy monsters of the deep could perform their peculiar evolutions without sustaining or causing injury, and finally the jetties, which in former times were often inaccessible from the vast number of cargo boats, house boats and native sampans which crowded round them, were placed under supervision and a passage to each kept open. Such were the more important improvements made in the harbour, but the approaches to the anchorage demanded even more attention than did the anchorage itself.

The entrance to the Yang-tsze Kiang is well-known to mariners on the China coast as the most dangerous, if not the most difficult to find, of any of the river embouchures. For some years a light-ship had been in existence, and a beacon about twenty miles from Wusung had warned navigators of the dangers of the South Bank. But while the light-ship was under no responsible supervision, the beacon was useless except in broad daylight, and hence the channel of the Yangtsze was studded in various places by sunken wrecks as dangerous as rocks, and was throughout so uncertain that the most experienced ship-masters were obliged, in default of any reliable marks, literally to feel their way from Gutzlaff to the anchorage at Shanghai. The first step was, of course, to improve the light at the entrance the second to endeavour to remove the existing obstructions, and failing this to buoy and light them; the third to place such marks and lights on shore and such buoys in the river as would serve to indicate the proper channel. This once completed all that was absolutely necessary would have been accomplished. Few believed that Mr. HOCKLY'S designs, involving as they did a considerable outlay, would ever have been carried out. But, all honour to the Chinese, who in this instance did not display that density of comprehension which so generally characterises them when improvements designed to prove of advantage to foreigners only are proposed, the Yangtsze is now lighted and buoyed; the sunken wrecks of the *Ocean Mail* and *Hellespont* are no longer the bugbear of captains entering the river at night; to go ashore on either bank is no longer the almost inevitable concomitant of a voyage up or down the river, but is rather a proof of gross stupidity or carelessness; the entrance to the Wangpoo is accurately marked, and the river itself so carefully sounded and laid down that even at night the lead is sufficient to indicate the position of a ship ascending or descending. The progress of these improvements we have watched with very considerable interest as from time to time the erection of a beacon, the establishing of a light, or the mooring of a buoy has been announced in the Shanghai papers, and, to judge from our individual experience of that tortuous stream which leads to the "model settlement," the dangers which once beset the voyager have now been removed, and the Wangpoo is as safe as the Thames, if not actually safer.

Owners of shipping have, as we pointed out above, gained by the formation of rules which prevent the constantly recurring accidents of former times. The insurance offices have materially gained by the lighting, buoying, &c., of the Yangtsze, for until the late improvements were made the voyage from the Lightship to Shanghai carried with it more actual danger than did the voyage from the European port of departure to the mouth of the Yangtsze. The ordinary sagacity of a mariner was of no avail, and ship captains were compelled to rely on that indefinite course of action—trusting in Providence. We do not assert that accidents can no longer occur. Until incompetent pilots are forcibly prevented from taking charge of vessels, cases will occur such as that of the *Ocean Mail*, in which, by the way, not only a large tea cargo perished, but the bibliographic gems rescued by Mr. WADE from the ruins of Yuen Ming Yuen were irretrievably lost. Assuming however the competence of the pilots, there is now no excuse for accident in either river, a statement fully borne out by the non-occurrence of any casualty during the past three years. But from Mr. HOCKLY'S exertions not only has the mercantile community derived an advantage, but the Chinese have learned to appreciate in a great measure the views held by Europeans with regard to river conservancy. He has taught them that by careful management and a judicious expenditure they can avoid endless trouble and litigation, and he has thus commended to their

Digitized by Google

attention and adoption the systems in vogue among the most civilised nations of the West. We trust that services such as these will be held by those in authority to merit same recognition, and that from the Admiralty Mr. HOCKLY will receive some solid proof of the estimation in which those officers are held who devote themselves successfully to the task of advancing European interests amongst a race so obstinately exclusive as is the Chinese.

THE P. AND O. COMPANY'S MAIL CONTRACT.

The last convention made between the Government and the company is dated Feb. 27, 1866. The following extract gives the company's contract time. The contract now runs subject to a year's notice. The penalty for non-delivery in the specified time is £50 per day and an allowance is made of £25 per day for early delivery:—

Between Suez and Alexandria	.. ..	310 hours.
Marseilles and ditto	.. ..	155 ,,
Suez and Calcutta	.. ..	499 ,,
Ditto and Bombay	.. ..	312 ,,
Bombay and Hong Kong	.. ..	413 ,,
Hong Kong and Shanghai	.. ..	84 ,,

NEW STEAMERS, &c., FOR CHINA.

There is again a movement in new steamers for China and Japan. We have to note the trial trip of the screw steamer *Osaka*, built by Messrs. Alex. Stephen and Sons, on the Clyde. Her engines are of 90 H.P., and she is owned by the same parties as the *Japan*, now in China. She is to be commanded by Captain Hybert, formerly of Dunbar's service.

Captain Castilla is on the Clyde, to superintend the building of a river steamer. Two screws of about 500 tons are building by Messrs. Henderson, Coulbourn, and Co., on the Clyde, and Messrs. Halls, of Aberdeen, have one in hand intended for the China trade A fine clipper ship is building for the tea trade, under the superintendence of Capt. Maxton, similar to the *Ariel*. She will be launched in about a month, and will be probably named the *Titania*.

A Return has been issued by order of the House of Commons on the East Indian Shan States, &c., containing the copy of a letter from Captain Richard Sprye to the Secretary of State for India, dated the 15th day of January, 1866, and of the maps attached thereto, referring to commerce with the Shan States and West of China from Rangoon, and extension of the Indo-European Telegraph by land from Pegue to Hong Kong and the Chinese open ports.

TRADE WITH THE FAR EAST.

We have received from the Foreign-office the Blue-book containing the Commercial Reports of Her Majesty's Consuls in China, Japan and Siam for the year 1865. In accordance with our usual custom we proceed to give a *resume* of each report, taking them in the order in which they are arranged, and commencing with Mr. P. J. Hughes' Report on

KIUKIANG.

The tonnage of vessels visiting this port does not, as will be seen by the following table, differ very materially from that of former years. The steamers at present plying regularly on the river are ten in number, and appear quite sufficient for the existing traffic.

	1863. Tons.	1864. Tons.	1865. Tons.
Tonnage of vessels cleared from Kiukiang	359,730	333,528	330,362

One British vessel, the *Emperor*, loaded with tea, direct for England. Almost all other vessels, including, of course, the steamers, proceeded to Hankow as well.

Though, in the winter months new shoals are often formed, others disappear, and, in spite of the shifting nature of the channels, the navigation of the river has offered no serious impediment to vessels drawing 10 feet of water,—vessels of greater draught are unsuitable for the winter navigation. In this season the most shallow part of the river is close to Hunter's Island, some twenty miles above this port, where the depth of water in the narrow channel is generally found to be about 10½ feet. Last season the principal difficulty was met with twenty-two miles lower down, that is to say, two miles below this port, where no impediment is at present encountered. This will serve as an illustration of the great changes to which the bed of the river is subject. The difference between the level of the river at Kiukiang on the 24th August, when it was at its highest, and the beginning of this month (January, 1866), is 39 feet. The river has not, however, as yet fallen so low as it did in January, 1865, when it was certainly three or four feet below its present level.

Exports.—The following table will show the amount and value of he exports from this port during the past year:—

	Value. Taels.		Value. Taels.
Chinaware, coarse ..	76,966·9	Tobacco, prepared ..	48,987·1
Ditto, fine ..	51,670·1	Ditto, leaf and dust ..	37,756·1
Paper, 1st quality ..	55,395·4	Tea	6,259,105·6
Ditto, 2nd ditto ..	101,778·4	Treasure	1,325 534·4
Hemp	78,579·9	Sundries	22,309·6
Grasscloth	24,704·9		
Vegetable tallow ..	46,206·0	Total ..	Tls. 8,199,774·4

Tea.—In the Report for 1864 it was remarked that the native dealers, rather than dispose of their teas at the prices offered, stored them in foreign godowns, and paid interest on loans obtained from the foreign merchants on the security of these teas at the rate of from two to three per cent. per mensem. The subjoined table shows that, despite the heavy losses which the teamen thus incurred, and the unfavourable anticipations which they, in common with almost every one else, entertained respecting the prospects of the season, the export of tea for 1865 has exceeded that of either 1863 or 1864:—

COMPARATIVE TABLE OF EXPORT OF TEA DURING THE YEARS 1863, 1864, AND 1865.

	1863. lbs.	1864. lbs.	1865. lbs.
Black	9,818.608	10,294,555	8,961,556
Green	15,724,115	7,609,605	18,140.790
Leaf	885,235	352,548	152,788
Totals ..	26,427,958	18,256,708	27,255,134

As the teas which were brought to Kiukiang during the past year came from districts drained by streams which flow into the Poyang Lake, Kiukiang may, therefore, be considered their natural *entrepot*; and such teas are not likely to be taken, at all events in the first instance, to other ports. The business transacted was done in the face of discouraging circumstances, as already pointed out, and it is evident that, so far as the natives are concerned, there is no reason to suppose that the amount of tea placed on the market at Kiukiang may not in subsequent years greatly exceed the supply of 1865.

Imports.—Subjoined is a list of the principal imports during the past year:—

	Value. Taels.		Value. Taels.
Seaweed	133,293·4	Spanish stripes ..	143,292·0
Sugar	320,949·9	T-cloths	89,296·4
Copper cash	52,434·0	Brocades	7,915·0
Opium, Malwa, & Patna	1,561,357·7	Camlets	39,943 0
Salt and cuttle fish ..	188,634·8	Chintz	16,637·3
Birds' nests	4,527·0	Crapes	8,700·0
Sugarcandy	7.825·9	Lastings	30,150·0
Lead	29,069·0	Long ells	124,080 0
Pepper	50,148·8	Lustres	36,138·4
Quicksilver	12,041·3	Velvets and velveteens	35,688 0
Sandal and sapanwood	35,068·5	Cotton handkerchiefs	8,258·6
Cotton, raw	35,820·6	Coals	9,135·0
Silk piece goods ..	22,791·3	Treasure	2,193,278 0
Nankeens	29,246·6	Sundries	216,707·0
Shirtings, figured & white	29,993·1		
Ditto, grey	205,125·6	Total value of imports ..	5,678,186·2

Of the above amount 639·738·7 taels is the value of the native produce imported.

If we compare this list with the imports of last year, we shall find a gratifying increase in the amount of most articles, whether native produce or foreign manufactures. Take, for example, the following items which represent important materials of clothing and food:—

	1864.	1865.
Grey shirtings	Pieces 34,091	60,331
Figured and white ditto ..	,, 7,506	7,990
T-cloths	,, 25,330	34,614
Sugar	Piculs 44,773·65	59,901·73
Seaweed	,, 26,377·07	33,563·96

Kiukiang has never been a great mart of trade, and its power of absorbing imports is limited. The extensive districts around the Poyang Lake will, however, be always supplied from Kiukiang; and should the country remain tranquil, and the means of communication be improved by the introduction of steam, the import trade of this port may in future years assume very respectable proportions.

The average value of the tael for the past year in bills at six months' sight was 6s. 8d. sterling. Agencies of two banks were established at this port in 1865. Exchange business is done chiefly with Shanghai and Hankow—seldom direct with England.

HAKODADI.

The following is Mr. Consul Vyse's Report of the trade of Hakodadi for the year 1865:—

BRITISH TRADE.

	No. of Vessels.	Tonnage.	Imports. Dols.	Exports. Dols.
1865	27	9,664	73,474	359,901
1864	45	13,746	83,070	356,758

FOREIGN TRADE.

1865	18	4,061	60,502	101,914
1864	26	6,346	7,727	58,088

It would thus appear that the British trade has been nearly stationary, while greater activity is observable in the traffic carried on in foreign bottoms.

Mr. Vyse represents that the trade continues to suffer from various monopolies and restrictions imposed by the authorities. The engagements they lately entered into to abandon the monopoly of irico and awabi only came into effect on the 9th of November last; and as it has been observed at Nagasaki, the good faith of our Government will eventually cause it to be observed in Hakodadi also.

Trade and Commerce.—Notwithstanding the numerous failures of

Digitized by Google

business houses all throughout the East, but more especially in China, which would be calculated to affect the few foreign resident merchants at this port, there is a very considerable increase in most of the articles of export over that of last year, which amounts to 75,000 Mexican dollars, including the large amount lost by fire, the property of Messrs. Lindsay and Co., of Shanghai.

Silk.—More of this article has been exported this year, and very much more could have been shipped if it was not for the obstacles placed in the way of the producers by the Governor, who will give no facility for its being brought across the Straits.

Comboo, the chief article of export for the China market, shows a decrease over the exportation of the same article during 1864, which was 119,054 piculs, and during 1865 there have been 82,862 piculs.

Erico.—65 piculs more during 1865 than the preceding year.

Awabee shows a diminution, which is entirely on account of the exportation of this article being monopolised by the Japanese Government, notwithstanding a promise which has been made that all restrictions hitherto imposed on the free sale of awabee to foreigners should be removed, and a notification was circulated in Hakodadi by the Governor to that effect; but at the same time at the principal ports on this island, as well as on the north coast of the Island of Niphon, nothing is as yet known of the aforesaid Proclamation, so that virtually the same prohibitions exist, and the Tycoon's Government, as is its custom, have broken faith with the foreign representatives.

Cuttle Fish is an article that varies from year to year more than any other. Last year 12,000 boxes were exported; this year 25,000. It is a fish that is very rare on this coast, and is only to be found in large quantities every two or three years, so the natives say themselves; but this is, I fancy, merely a legend.

Timber.—The exportation of this is also very much on the increase.

Shipping and Navigation.—Not much can be said upon this point. Twenty-seven British vessels only have visited this port during 1865, and the preceding year there were forty-six, which appears most incomprehensible, comparing it with the large increase of articles of exportation. Among the general shipping the arrival of the Japanese steamer *Kiu-siu*, from Nagasaki, and departure for Yokohama with a miscellaneous cargo, is worthy of notice, inasmuch as it denotes a readiness on the part of the Japanese to trust their merchandise to foreign-built vessels, the superiority of which over their fragile junks cannot but be apparent. There is no doubt but that with the opening of new ports commerce would not only be developed in the ordinary way, but that a large carrying trade in native produce for native consumption would be carried on along the coast in foreign bottoms; and even if the Japanese preferred to carry on the coasting trade with their own hands, the demand that this would give rise to for foreign-built craft would be immense, and, as a necessary consequence, for machinery and the like; in addition to this it would induce them to work their own coal-fields with something like vigour, and with all the mechanical appliances known to ourselves; the supply of this mineral in large quantities and at a fair rate would be an immense benefit to commerce in the East. The steamer *Kiu-siu* (English built) was recently purchased by the Prince of Satsuma, and was formely the property of Messrs. Fletcher and Co., of China.

Public Works.—During the past year an attempt was made on the part of the Governor to establish a light-ship at the entrance of the harbour, but up to the present time his efforts have been unattended with success.

General Remarks.—Hakodadi is a port that I feel convinced would increase rapidly both in population and commerce if proper inducements were held out on the part of the Japanese Government to their merchants to arrive and locate themselves; but the monopolies of the Government are so numerous that they find it impossible to contend against such competition; thus the commerce of Hakodadi is checked from perhaps becoming among the most important in Japan for the trade of China.

BANGKOK.

The following is Mr. Consul Knox's Report on the trade of Bangkok for the year 1865:—

Owing to the small quantity of rain that fell during the season of 1864, the rice crop was so much below the usual average that the Siamese Government considered it expedient to prohibit the exportation of that article.

This prohibition came into effect on the 25th of January, 1865, and ceased on the 21st of August last.

The high prices which the growers, as soon as the effect of the drought became apparent, demanded for their rice, would of itself have been a virtual prohibition to its export; and doubtless the most legitimate one.

The Siamese Government, however, failed to understand that in such matters there was no necessity for their interference, and, as the results would have been the same whether caused by the shortness of supply or Government intereference, I merely drew their attention to the fact, and yielded without remonstrance.

I have reason to believe that the lesson has not been lost on them, and that, on future occasions, this Government will not interfere in such matters.

From inquiries which I have made, it would appear that droughts occur in Siam on an average of once in twelve years. On former occasions the loss was much more injuriously felt than on the last.

Before the treaty with Great Britain, Siam merely grew enough rice for home consumption; but since that treaty a large export trade in that grain has sprung up, and consequently a great deal more is now planted than can be consumed in the country, even if the return is only an average one. Thence last year, though the return was very much below the average, yet, from the greater quantity sown, there was quite sufficient for the consumption of the people.

The consequences of this drought will, however, be plainly seen in the tables that accompany this report. Four-fifths of the exports of this country consist of rice, and having had last year none to export, the whole trade has been, to a great extent, paralysed.

The present crop, now harvested, is said to be an excellent one, and I therefore hope that my next report on the trade of this country will be very much more favourable than the present one.

I have to report one beneficial change which has taken place during last year, viz., the abolition of the heavy tax on cocoa-nut trees, which has been replaced by a light one on the oil extracted from the nut.

As the soil and climate of many parts of Siam are particularly well suited to the growth of this palm, a very extended cultivation of it will now probably take place.

NAGASAKI.

The following is Mr. Consul Gower's Report and returns of trade for the port of Nagasaki for the year 1865:—

The summary with which Mr. Gower concludes his Report exhibits a considerable decrease, both in imports and exports, as compared with the trade of the previous year; on the British side imports have decreased to the extent of 188,941 dollars, or one-fifth less than those of 1864, and the diminution in the case of exports is 409,010 dollars, or nearly one-half of the aggregate of the previous year. On the foreign side a similar falling-off is observed in exports, while in imports transactions have been stationary.

Mr. Gower is of opinion that this unfavourable result is attributable to the incorrectness of the returns, which are taken from the Custom-house books, and that if the real amount of business could be ascertained the trade of the past year would show an improvement instead of the reverse. The comparison between the two years, however, is made with returns obtained from the same source, and equally open, therefore, to the charge of short reports. In the case of each year—1864 and 1865—Mr. Gower considered that 50 per cent. should be added to the returns for smuggled goods and low valuations, and I am disposed to believe that he would have been within the fact if he had even doubled this estimate of the deficiencies of Japanese Custom-house administration.

The difference between the export trade of the two years may be traced, however, to the discontinuance of cotton shipments—those of 1865 being only 50,653 dollars in value against 496,404 in 1864. The exports of tea are satisfactory, being 3,216,440 lbs., according to the returns, or only 100,000 lbs. less than those of last year, and the circumstance that this item is in excess of the private estimate supplied to Mr. Gower is some proof that the returns are not altogether without their value. The transactions in silk at Nagasaki are very trifling.

The sale of steamers and foreign sailing-vessels forms a very considerable item in the business of the port, amounting this year to 699,500 dollars, and which is not included in the returns. These vessels have in every case been sold to Daimios, and it appears that a considerable impetus would be given to trade if Japanese merchants were also free to purchase foreign shipping.

Imports.—The principal imports are cotton and woollen manufactured goods, such as grey shirtings, cambrics, camlets, &c. The returns do not show increase during the past year; but this is easily accounted for by the high prices goods cost laid down in this country and the low value of the native currency. To this may also be added that the cessation of the civil war in America caused a very great diminution in the export of raw cotton, which export greatly tended to augment the import of manufactured goods. The total imports, however, amount to something very considerable, if steamers and sailing ships sold to the Japanese, as shown in the following list, may be included under this head:—

Name.	By whom Sold.	Price in Mex. dols.	To whom Sold.
BRITISH.			
Kin Lin	Glover and Co. ..	100,000 ..	Satsuma.
Sir Harry Parkes	J. Cull ..	112,000 ..	Kanga.
Union	Glover and Co. ..	60,000 ..	Satsuma.
Pembroke ..	Walsh and Co. ..	25,000 ..	Ditto.
Ayrshire Lass	Glover and Co. ..	25,000 ..	Chikuzen.
Gerard	A. Baudwin ..	80,000 ..	Satsuma.
Elgin	Glover and Co. ..	125,000 ..	Chikuzen.
AMERICAN.			
Star	Walsh and Co. ..	12,500 ..	Kanga.
Huntress ..	Glover and Co. ..	19,000 ..	Satsuma.
Matthew Luce, with stores ..	Walsh and Co. ..	35,000 ..	Japan Govt.
PRUSSIAN.			
Berlin	Ditto ..	11,000 ..	Echizen.
DUTCH.			
Viola	A. Baudwin ..	95,000 ..	Satsuma.
	Total	699,500	

A very large business is transacted also in arms and ammunition, of which but a very small portion is reported to the Custom-house. And, finally, I may include as sold to the local Government, principally by Chinese, 350 bars of Peking gold at 225 dollars, equal to 78,750 dollars.

Exports.—Tea, camphor, cotton, tobacco, vegetable wax, and silk, are the principal exports. These are largely produced to meet the foreign demand, and their cultivation greatly increased and still increasing. By reliable data furnished me by one of the principal British firms here, I find that tea exported in 1865 amounted to 2,239,839 lbs.; in 1861, 1,559,587 lbs.; showing a surplus of 680,252 lbs.; and this does not include the "green leaf," which the Chinese have commenced to fire in their own country, the quantity of which is considerable, but impossible to ascertain. Even the export of silk, which is but commencing at this port, shows an increase of 62 piculs 49 catties; and I may add that some 160,000 cards of silkworm eggs, valuing about 98,360 dollars, left this port for Europe during last year.

Exchange.—There are as yet no banks established at this port, and banking transactions are entirely in the hands of the principal mercantile firms. The rate of exchange is almost entirely regulated by those of our neighbouring port, Shanghai, and the sight value of the Mexican dollar may be said to have averaged about 4s. 5d. sterling. The average exchange of the native silver coin last year was 244 itzebus for 100 Mexican dollars.

Shipping.—It will be observed that there is no material difference be-

Digitized by Google

tween the number and tonnage of ships arriving at and departing from this port during the years 1864 and 1865. A large number came seeking, and generally succeeding in procuring, miscellaneous cargoes for various ports in China. Some came merely for the purpose of laying up, as the current expenses at this port are more moderate than in Shanghai.

The foreign residents are slowly increasing. They now number 166, viz. :—

British subjects	70	Portuguese	3
American citizens ...	32	Swiss	2
Dutch	26		
Prussian	19	Total	166
French	14		

Many visitors from China remain here during the summer months to recruit their health, or merely as villeggiatura, and bungalows for their reception are rapidly being built on the beautiful hills surrounding our charming lake-like harbour.

In conclusion, I may observe that notwithstanding the continued unsettled state of internal affairs in Japan, the trade of Nagasaki is prospering, and promises to improve; so much so, indeed, that even the opening of Hiogo will hardly affect it, as the Princes of Kiusiu are those who principally give proofs of entering into the spirit of our commerce, and they are undoubtedly making great preparations to freely supply our demands, and thereby the nature of trade here is gradually becoming more and more local.—I have, &c., (Signed) ABEL A. J. GOWER.

NINGPO.

The following is Mr. Consul Fittock's Report on the returns of trade at the Port of Ningpo for the year 1865 :—

Upon contrasting the present returns with those of the previous year, it will be observed that, as was predicted, a large decrease has taken place in many of the articles of both import and export; thus, owing to the termination of hostilities in America, the export of the raw cotton has dwindled from 103,201 piculs, valued at 3,096,030 dollars, to 33,567 piculs, valued at 963,100 dollars. As a partial set-off to this, however, green tea, which is sent from this port principally for the American markets, has increased from 53,810 piculs, valued at 2,475,260 dollars to 70,662 piculs, valued at 3,311,232 dollars, which realises the prediction contained in my report on the trade of 1864, that Ningpo is in a fair way of asserting her natural right to become the tea depot of the province of Chekiang.

Silk, which is also chiefly produced in this province, has increased in export from 949 piculs, valued at 379,600 dollars, to 1,914 piculs, valued at 957,000 dollars; and this, notwithstanding that the same obstructions to its reaching the port from the silk districts continue to exist. Were these obstructions removed there can be little doubt but this port would become the principal outlet for the raw silk grown in the province, instead of Shanghai, as at present. The obstructions referred to consist entirely of a defective water communication between this and Hang-chow, and they might easily be removed if the people had anything of Western enterprise in their character. Even as it is, I think it would not be wise to calculate upon Shanghai becoming the permanent *entrepot* for the raw silk and tea so extensively produced and cultivated in this province.

Another peculiar feature of the trade of the port during the past year as contrasted with that of 1864, is the decrease in the export of copper cash. This has gone from 1,362,892 strings, valued at 1,362,892 dollars, to 395,785 strings, valued at 395,785 dollars. This is no doubt attributable to the fact that the port of Hankow is for the present supplied from some cheaper source, possibly from Japan, the copper cash of which country, I believe, is identical with that of China. When at Nagasaki last year I heard, upon good authority, that, although the exportation is prohibited, large quantities were smuggled out of the country; and no wonder, for there you could obtain about 4,000 for the dollar, and dispose of the same in three days' time at Shanghai at a profit of 300 per cent. In my Report of last year I stated that if the enormous export of cash continued it might lead to popular disturbance, and that I thought why it had not done so already was because the people had not fathomed the mystery of the continually increasing cost of the necessaries of life. The staff of life to the Chinese is rice, and the way in which they were affected by the drain of copper cash was this: The province used to produce large quantities of grain, more, in fact, than was required for local consumption. The cultivation was first of all interrupted by the inroads of the rebels, and when this pest was removed, the enhanced value of cotton, in consequence of the civil war in America, induced cultivators to turn their attention to that product in lieu of rice. The result was that the dealers had to procure this necessary from abroad; and without apparently suspecting it, the consumers had to go to market to supply their wants on the same terms as the foreign residents had to furnish themselves with this and other requisites; that is to say, they had to pay in dollars instead of copper cash. The foreign merchant meanwhile took care to receive payment from the native brokers indirectly in copper cash, as he could thereby make a double market by sending it to Hankow, where it was in great demand for the purchase of tea, or rather to pay for its manipulation, there being a great scarcity of the circulating medium at that port to defray the daily demands of the numerous labourers engaged in the manufacture and preparation of the leaf to meet the continually increasing foreign demand. I believe this scarcity of copper cash is still much felt at Hankow and the other Yang-tsze ports; and it is quite probable a further resort will be had to this and other provinces to obtain the requisite supply, if it cannot be procured from Japan or elsewhere at a more remunerative rate.

I think the above brief statement of the decrease in the chief articles of export will show that the result, if not advantageous to the mercantile class, is undoubtedly so to the general inhabitants of the province, the gap caused by the diminished demand for raw cotton being almost filled up by the greater quantity of tea required, and the cessation of the drain of copper cash.

I believe the same may be said as regards the import trade, as evinced by the following statistics :—

In 1864 rice was imported to the extent of 1,911,143 piculs, valued at 5,613,463 dollars; last year only 558,442 piculs were imported, valued at 1,092,981 dollars. This tends to show either that a further tract of land has been brought under cultivation, or else that part of the area diverted to the growth of raw cotton has reverted to its former use.

In 1864 opium was imported to the extent of 3,011 piculs, valued at 2,258,430; last year the quantity was 3,380 piculs, valued at 2,251,690 dollars.

Sugar is the third principal article of import; and although this fell off from 149,924 piculs in 1864 to 136,847 piculs in 1865, that of 1864 in valued at 1,029,654, whilst the lesser quantity imported in 1865 is set down at 949,860 dollars, or nearly as much.

The foreign tonnage of the port has decreased from 296,311 tons in 1864, to 258,247 tons during the past year. As the duties collected by the Imperial Government increased to 346,566 taels last year against 342,918 taels in 1864, whilst the coast trade duties decreased from 52,405 taels in 1864 to 37,159 taels in 1865, it appears pretty evident that the total decrease in the value of the trade during the past year is attributable to the existence of a lesser demand amongst the inhabitants of the province for the products of their own country, and not to any abatement of the demand for commodities in which foreign countries, and more especially Great Britain, are interested; in other words, it is rather a sign of native prosperity than indicative of a threatened diminution of foreign trade, which I consider is now settled on a firmer and more satisfactory basis than it has ever been before at this port.

CHEFOO.

Mr. W. H. Lay, Vice-Consul at Chefoo, makes the following remarks upon the trade during the past year :—

Opium.—There has been an increase of nearly 13,000 piculs in the import of this drug. Various reasons are assigned for this increase, the most probable being the stoppage of the growth of the native article in the provinces of Shan-si, &c., and the heavy tax levied upon it by the Chinese authorities. Another reason of the large import may be attributed to the fact that during most of the year affairs have been tranquil in the North.

Cotton Piece-Goods.—The increased consumption of cotton piece-goods (247,242 pieces in 1865 against 112,753 in 1864) has been caused by the diminution in price—which has been slight—from last year, and by the decrease in arrivals in 1864. In that year there was a falling off as compared with 1863 of 12,000 pieces of grey shirtings, and of all cotton piece-goods of 27,000 pieces. These goods are purchased at once on arrival; and I am informed by the merchants that had the stock been double in 1865 it would have been sold. The high prices are still a bar to a very large trade in these articles at this port; but could a direct trade with England spring up, there is no doubt whatever the trade would increase enormously. At present the goods—which are refuse stock, not saleable at the moment—come hither from the ports in the South, incurring double freight and other expenses, and thus preventing their consumption to any large extent, and putting our manufactures in an unfavourable position, and not able to compete with the native. This port is a great depot for this province and the adjacent provinces of Shan-si, Ho-nan, and Shen-si, &c. Goods imported are conveyed in junks to the Ta-tsing River, and from thence taken to the marts of Se-nan-foo, Tung-chang-foo, Yen-chow-foo, Tsaou-chow-foo, Tung-ping-chow, &c., where they are lost sight of, but there is no doubt they penetrate far to the West and North. Reports of severe squeezes by the mandarins at a place called Teen-mun-kwan, a little distance from the Ta-tsing River, continue to reach this. It is difficult, however, to obtain the exact truth; the authorities here deny it. It is to be hoped, however, that as affairs get more tranquil in these provinces this impost, which is considered by some to be a war tax, will cease.

Cotton.—There has been a decrease this year, consequent upon the cessation of export to England, and the return of Indian cotton to China. It commands but a low price in the South, and so long as this continues the export will be small.

Seaweed.—This trade has largely increased, as the following table shows :—

Import of Seaweed.

	Piculs.
1863	8,500
1864	6,658
1865	41,425

Of these latter about 38,000 piculs were imported from foreign ports, Japan, Passiet, &c. The import of this article will probably increase, it being much used by the Chinese.

Sugar.—There has been a falling off in this import from the heavy prices ruling in the South. The presence of the rebels at Amoy, coupled with the inundations at Swatow, have been the cause of the failing of the crops.

Coals.—Upwards of 2,000 tons of coals have arrived at this port, and a ready sale has been effected. Chefoo is the coaling station for the steamers which ply between Shanghai and the northern ports, and is, moreover, a coaling station for the British and French fleets. Coals are at present taken to Shanghai, and from thence brought here, thus adding largely to their cost. A direct trade with England would materially benefit the consumers of this article.

Wheat.—Although the wheat crops suffered much from the long drought and heavy rains, a very large export was made :—

	Piculs.
In 1864	14,240
1865	59,538

showing an increase in 1865 of 45,298 piculs, or above 6,000,000 lbs.

Beancake.—The export of this article has largely increased, while the Newchwang beancake has fallen off. The former is now much preferred, in consequence of its containing more oil than the latter, the cakes not being pressed to such an extent.

Freights have been a trifle better than last year. The trade of this port is principally in the hands of the Chinese, and so long as an indirect trade continues this will be the case. The nive merchants find it much cheaper to go to Shanghai and buy goods there themselves than to purchase of the British merchant here, who adds to the Shanghai price his own commission and charges.

The extension of the tonnage dues certificates to vessels bound to and from Japan will be beneficial to the trade of this port in consequence of its proximity, and the large trade existing between it and Chefoo.

Digitized by Google

The port of Chefoo possesses a fine large harbour, with good anchorage for vessels. During the north-east monsoon, safe anchorage and smooth water is to be found on the other side of the harbour under Chefoo Cape. The harbour is more than four miles broad, and in length it extends to the Kung-Tung Islands, a distance of about five miles.

I regret that it is not in my power to make out comparative statements of the trade at this port from Consular official papers. From the 1st of January, 1865, and until my arrival here in April, 1865, in consequence of the illness of the Acting Consul, it does not appear that the manifests of ships containing what is necessary to compile full and correct returns of trade were preserved. Those I append, and numbered from 1 to 7, which I have obtained from the Custom-house through the kindness of the Commissioner, will I trust, be sufficient.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

ROTTERDAM, JULY 8.

The Second Chamber is now definitively constituted for the new session, which is to be opened in September next. The elections and re-elections have not altered the strength of the different parties, so that three-fourths of the members are still Liberal. We are now waiting for the assembling of the members to finish the present session. Nothing has been yet heard on this point, notwithstanding it is very urgent that the Budget for India should be discussed. Mr. Myer, the Minister for the Colonial Department, seems, however, not to be ready. If we may believe the ministerial papers, the Budget of Mr. Fransen van de Putte is to be totally reformed in a Conservative sense; that is, the expenses for India are to be decreased and measures taken that our *batig slot* (the favourable balance of the revenues of India) shall be secured for the mother country. Of course this intelligence will cause much disappointment in India, but I think it better for them to trust in the Liberal majority of Parliament than in the *entrefilets* of the *Dagblad*. The conviction of the Liberals is that concessions must be made to India, and that the revenues of India must be spent in behalf of India. Much is said in our Conservative circles about an article in the *London Shipping and Mercantile Gazette*, relative to the commercial relations existing between England and foreign States. That journal argued:—"As regards the Netherlands the Dutch Government cannot, or, at all events, do not, as yet see the expediency of abandoning the privileges reserved to the Dutch East India Company under Treaty. Double Differential Duties [!] are, we believe, still levied in the Dutch Ports of the Indian Archipelago, and the interest which maintains this system is still strong and resolute. The rapid rise, however, of Singapore, and the facilities afforded to the commerce of those seas by the employment of steamers, must have the effect of diverting the foreign trade from such ports as Batavia and Lombok to those in the neighbouring region, where it can be pursued without the disabilities which attach to it in the Dutch ports; and thus, it may be hoped, the evil will work its own cure." The Conservatives decline to admit the truth of this reasoning, and thus their attitude will force the evil to work its own cure. It is already a vast stumbling block in their path that a good deal of the private imports from Java in our harbours are conveyed by English ships. But is not this the fault of most of our ship-owners themselves, who prefer to wait two or three years for their ships to be chartered, at a high rate, by the Trading Company rather than make an extra voyage on their own account, as the ship-owners of England, France, and Hamburg do? The old system is worn out.

In my last letter I told you, according to the declarations of our representative at the Federal Diet, that our Government declined to take part in any course of action which should imply a recognition of the continuance of the Federal Pact. This conclusion seems not to be right, because Mr. Von Scherff is still in Francfort and attends the sittings of the Diet. This, of course, confirms the opinion that the Federal Pact is not dissolved by the present war between Prussia and Austria. Contrary to the conviction of our present Minister of Foreign Affairs, we are obliged to wait for our province of Limburg being let loose from the Diet in a legal way. In the meantime, we have every reason to be very content that the Limburg Contingent is exempted from mobilisation. The war, however, has a very prejudicial influence upon our trade, which is really in a state of inertness. For home consumption but a very few transactions have taken place, and there is yet no likelihood of any material improvement in the business with foreigners. Much disappointment has been experienced at the Bank raising its discount to 7 and 7½ per cent. The news brought by the last mail, that some important failures had again taken place in Java, caused much sensation. I hear that in consequence thereof some of the Indian orders are withdrawn.

His Excellency the Chinese Commissioner, Ping-chun, and suite arrived here on the 26th June from England. This visit had an entirely unofficial character. After they had visited the Hague and Amsterdam, where they inspected all worth seeing, the foreign visitors started for Hamburg. Our Minister of Foreign Affairs had a very long conversation with his Excellency, which is said to be the prelude to a duly accredited embassy. Ping-chun seemed to be delighted with Amsterdam. Several times he said, "Here I should like to live; this town is much finer than Paris and London." The following *impromptu* we owe to his poetical feeling:—

TO HOLLAND.

A famous country, and of old renown;

There, where centuries ago the sea raged, wild and disordered, the strawberries ripen, the corn-ears grow.

Long bridges unite distant river banks, and vessels glide prettily along broad canals;

Long rows of houses sparkle in the moonlight, whereunder the streams glitter as brightly as precious stones.

Thanks, kindly thanks we owe to them by whose knowledge this was accomplished, whose energy was great, to whom the country owes its prosperity.

Such faculties, such works, such exertion must never be forgotten.

PING CHUN, Chinese Commissioner, who arrived from the Hague at Amsterdam on the 19th of the 5th moon.

In the last number of the *Bataviaasch Handlesblad* are two very interesting articles about the steam service between Java, Queensland, and Sydney, We are told that the Government of Queensland sacrificed about £10,000 to make two trials with the steamer *Souchays*, and the paper thinks that the Indian Government will now grant a subsidy, in order that the line may be continued and the company definitively constituted. But, of course, this cannot be done without the consent of our Home Government, and I have reasons to believe that Mr. Myer is not willing to allow this, notwithstanding the line would prove to be highy profitable for both the countries.

The East India Railway Company held its annual meeting on the 19th June. The report, which was inserted in the *Staats Courant* of the 1st inst., proved that the financial condition, as well as the progress of the works, was satisfactory. It was stated that in the year ending the 16th June 2,810 lasts of railway materials, representing a value of 796,750f., were shipped. It was regretted that the capital wanted for the construction of the Batavia-Buitenroz line could not be found in the present critical state of the money market.

Your readers in India will remember that Mr. T. J. Stieltjes was released from duty by Mr. Fransen van de Putte without the epithet "honourable." The present Minister, Mr. Myer, however, has now rehabilitated the high reputation of this gentleman.

His Majesty has appointed Mr. Fr. MacNab Vice-Consul at Sydney; Prince Pangeran Adhipatti Ario Mangkoe Negow at Souracarta his Adjutant Extraordinary; and granted an annual pension to ex-Ministers Mr. Fransen van de Putte of 3,327f., and to Mr. J. H. Geertsema of 516f.

COMMERCIAL.

COFFEE.—There is some inquiry for home consumption, but nothing is transacted for export. Only 2,000 bags Padang ex Uncas and 1,106 bags Java ex Marie were sold. The stock amounts to 465,217 bags, against 512,200 bags in 1865.

SUGAR.—The market is dull, but prices are firm. Holders decline to operate at the actual prices. Stock of the Trading Company 92,411 kr., of which 56,000 kr. will be offered in public sale on July 24. Total stock 60,743,943 kilo.

TOBACCO.—Java. The market is very dull, because the exports to England and Germany have totally ceased. Ordinary sorts, of which there is considerable stock, can only be sold at much lower prices. In Manilla sorts the market is inactive. The first hand stock amount to 12,700b. Java; 3,542b. Manilla.

CIGARS.—Manilla Habanas are rare, but there is a very important stock of Cortados. 2a 1864 Habanas are quoted 40f. to 43f. 2a 1864 Contados, 37f.

GINGER.—In auction yesterday were sold 450 ch. China ex Uranus; 400 ch. preserved were paid with 85c. to 88c., and 50 ch. Mandarin at 100c. to 104c.

JAVA INDIGO meets with a good demand. 90 chests private import were sold.

BANCA TIN.—The market has been very strong during the fortnight, and, notwithstanding the continued stringency in the money market, and the outbreak of hostilities in Germany, the price has steadily advanced. For Banca there has been a good demand; in the beginning of last month some sales took place at 44½f., from which the market gradually improved to 46½f. buyers. For 500 slabs was paid 47f., and holders decline now to operate under 47½. Stock on the 1st July 107,650 slabs, against 15,719 slabs in 1865.

HIDES.—Since our last report were sold 92 p. Buffalo ex Kanagawa; 277 Passaroeang do. ex. Three Bells.

TEA.—There is only some demand for consumption. Good ordinary China Congo is quoted 95 to 100c., and ditto Java 90 to 95c.

RICE.—We quote 1st table f.15 to f.16; 2a f.13 to f.14; White Java,

Digitized by Google

f.10½ to f.11; Carga, f.6½ to ¾. Rangoon floating is paid with f.6¾; Necranzie, f.6½.

SPICES.—The market is inactive. The nominal quotation for Nutmegs is 75c.; Mace D 95 to 98c.; Cloves No. 2, 25½ to 26c.; Pepper 19c. Unsold stock on the 1st July:—Nutmegs, 1,545 caks; Mace, 782 casks; Cloves, ; Cinnamon, 2,347 fard.

MONEY MARKET—The remarkable news from Paris, which was received on the morning of the 6th, created great excitement on the Stock Exchange. It was received directly with great satisfaction, and produced a very beneficial effect on the Dutch and foreign stock. The raising of the rate of discount by the Bank produced no effect in the stock market, all interest being absorbed with the intelligence which leads to the prospect of a speedy return to peace. Austrian funds were in very great demand, and speculators went in very heavily. That a good deal of this animation should be temporary was to foresee. The markets close much weaker to-day, in consequence of the uncertainty about the intentions of the King of Prussia. Should any unfavourable news be received there might be as great a desire to sell as there was, two days ago, to buy. Dutch Two-and-a-Half per Cents., 57½; Three per Cents., 67¼; Four per Cents., 87½; Trading Company, 137¼; Dutch Rhenish Railway shares, 270; Austria Five per Cents., 48; Two-and-a-Half per Cents., 24½; Nation, 1854, 51.

SHIPPING.—ARRIVALS.—June 30, at Texel, from Batavia, Anthonie Hoboken, Christina; July 1, at Texel, from Batavia, Willemina Clara; 2, at Texel, from Banjoewangie, Loevestein; from Padang, Helena; from Sourabaya, Viking; 3, at Brouwershaven, from Batavia, Hugo Grotius; at Texel, from Banjoewangie, Cornelia Adolphina; 4, at Texel, from Batavia, Cornelis Smit; 5, at Texel, from Batavia, Anna.

DEPARTURES.—June 23, from Texel for Padang, Almelo; for Batavia, Anna Sophia; 26, from Brouwershaven for Singapore, Ellina; from Texel for Samarang, Waalstroom; 28, from Texel for Batavia, Elizabeth.

PASSENGERS INWARD.

From Java.—Per Cornelia Adolphina: Mr. E. G. F. H. Poelman; per Helena: Mr. Deeleman, V. D. Schalk, Epke, Olt; per Loevestein: Messrs. Boes and family, Priester and family, Beretti and family, Van Balen Walter; per Willemina and Clara: Mr. de Neve and family, Baumhauer and family, M. D. Cross, J. H. Meyer, Miss Patyn; per Anna: Messrs. Looman, Edeling, and Marchand.

PASSENGERS OUTWARD.

To Java.—Per Rotterdam: Mr. S. E. Harthoorn and family, H. R. Kleyn, C. J. W. van Rhyn van Beverwyk, C. Kaempfer, E. C. Roll; per Maria Regina: J. Verheul and family; per Christina: Mr. J. van Zeventer and family; per Anna and Sophie: Messrs. F. A. Kamsma and family, C. A. Vermandel and family, Schurenberg and family, W. J. Thieme and family, D. J. Soeterik and family, F. van Oven, J. V. D. Laan, R. Goldenberg, and Misses Thieme and Wynveld; per Kosmopoliet; Messrs. J. C. Zublie and family, F. Elliot.

DIPLOMATIC APPOINTMENTS.—The Queen has appointed James Hay Wodehouse, Esq., now Her Majesty's Consul at Para, to be Her Majesty's Commissioner and Consul-General in the Sandwich Islands; and James De Vismes Drummond-Hay, Esq., C.B., now British Vice-Consul at Rabat and Salle, to be Her Majesty's Consul at Para. The Queen has appointed Charles Wilthew, Esq., now Her Majesty's Consul at Islay, to be Her Majesty's Consul at the island of St. Croix. The Queen has appointed George Strachey, Esq., now a Second Secretary in Her Majesty's Diplomatic Service, to be Secretary to Her Majesty's Legation at Buenos Ayres. The Queen has also appointed Charles Stewart Scott, Esq., now a Third Secretary, to be a Second Secretary in Her Majesty's Diplomatic Service.

Monetary and Commercial.

The report of the National Bank (the London drawing bank of the Bank of Hindustan) states the profit for the half-year to have been £111,863, against £94,416 in the corresponding half of 1865, and recommends the usual dividend, at the rate of 8 per cent. per annum, and a bonus of 16s. per share, leaving £11,863 to be applied to reserve, which will then stand at £467,917. The business of the establishment is stated to have been conducted with extreme caution, so as to preserve complete independence throughout the recent crisis, and thus "not only have the directors been able to refrain from seeking any advance or re-discount, but they have maintained, on an average, at the Bank of England, more than double their previous average balance.

The annual general meeting of the proprietors of the Union Bank of London was held at the London Tavern, Bishopsgate-street, Mr. P. Northall Laurie in the chair. The report of the directors, which was unanimously adopted, stated that the net profits of the bank for the six months ending 30th June last, after payment of all charges (including the sum of £174,780 13s. 10d. for interest paid and due to customers on their current and deposit accounts), and making full provision for all bad and doubtful debts, were £179,224 3s. 6d., which, with £50,659 13s. 3d. brought forward from 31st December last, amounted to £229,883 16s. 9d., out of which the directors declared a dividend at the rate of 15 per cent. per annum and a bonus of 5 per cent., being with the dividend and bonus paid in January last, 22½ per cent. per annum for the past twelve months, clear of income-tax. The unappropriated balance carried forward to the profit and loss new account was £79,883 16s. 9d.

FREIGHTS AND CHARTERS.

In consequence of the great scarcity of available vessels, caused by the present financial pressure, outward freights have manifested an upward tendency, and rates may now be quoted as under, viz.—

Current Rates of Freight for Vessels on the Berth:—To Yokohama: 40s. weight, 50s. meast. To Nagasaki: 50s. weight or mea. To Shanghai: 45s. weight, 45s. to 47s. 6d. meast. To Hong Kong: 40s. weight, or meast. To Singapore: 30s. weight or measurement. To Penang: 40s. weight or measurement. To Ceylon: 25s. to 30s. weight, 35s. meas.

The current quotations for coal, &c., are as follows:—From Wear or Tyne per keel. For Hong Kong: £47. For Galle: £36 to £38. For Singapore: £36 to £37. For Shanghai: £52. For Saigon: £50. For Manila: £14. For Yokohama: £50. From Newport, Cardiff or Swansea, per ton. For Hong Kong: 23s. to 24s. For Manila: £2. For Galle: £1 13s. to £1 14s. For Singapore, £1 15s. For Yokohama: £2 8s. For Shanghai: £2 10s. For Saigon: £2 8s. For Batavia: £1 12s. 6d. For the Philippine Islands: £2 2s. 6d.

The Admiralty have invited tenders for the conveyance of 126 tons porter from the River Thames to Hong Kong.

CASUALTIES.

The Dilkhoosh, Bissett, from London to Shanghai, put into Falmouth, July 12, damaged, and with loss of jibboom, having been in collision on the night of the 11th, off the Eddystone, with the Mivina (barque), of and for Bremen, which vessel also sustained injury.

The Cezard, Caron, from Banjoewangie to Boston, put into the Mauritius, May 26, having experienced heavy weather, with a high cross sea May 17, in 26 S., 50 E. (Paris), in which she sprung a leak, making about 8 inches water per hour, and would have to discharge.

"CHINA MAIL" OFFICE.

No. 2 WYNDHAM-STREET (back of the Club):—

1.—THE EVENING MAIL,

A DAILY PAPER.

PRICE.—2 dols. per month.

TERMS OF ADVERTISING.—First insertion, Ten lines and under, 1 dol.; each additional line, 10 cents. Subsequent insertions, per week, 50 cents and 5 cents—"Auction" Notices are excepted, for which only One Charge per week is made).

2.—THE CHINA MAIL,

AN ORIGINAL WEEKLY PAPER.

[(Every Thursday Night.)

PRICE.—15 dols. per annum; Single Copies, 44 cents. ADVERTISING.—First insertion, Five lines, 1 dol.; each additional line, 20 cents. Subsequent insertions, 50 cents. and 10 cents.

The "China Mail" has been permanently enlarged in size, namely, from 4 to 6 full pages. It is the only weekly paper published in China which contains a complete summary of Hong Kong news as well as that from the treaty ports of China and Japan, and from Manila, Australia, India, and the Straits. Its circulation, which has of late considerably increased, extends throughout the coasts of those countries as well as to various parts of Europe. Great facilities are thus afforded to advertisers in this newspaper.

3.—OVERLAND CHINA MAIL.

Containing 8 FULL PAGES, and consisting of a reprint of the articles in the EVENING and CHINA MAILS, with Summary of News and Commercial Summary.

ONCE A FORTNIGHT.

(The Morning of the Mail's despatch.)

ADVERTISING.—The same as in the Weekly. All "Notices of Firms" appearing in the Weekly will be inserted in the *Overland*, and charged for, unless otherwise ordered.

A. SHORTREDE & CO.

Hong Kong, May 17, 1866.

Keating's Cough Lozenges.

JUDGED BY THE IMMENSE DEMAND this Universal Remedy now stands the first in public favour and confidence: this result has been acquired by the test of fifty years' experience. These Lozenges may be found on sale in every British colony, and throughout India and China. They have been esteemed wherever introduced. For COUGHS, ASTHMA, and all affections of the Throat and Chest, they are the most agreeable and efficacious remedy.

Prepared and sold in boxes and tins of various sizes, by THOMAS KEATING, Chemist, &c., 79, St. Paul's Churchyard, London. Sold retail by all druggists and patent medicine vendors in the world.

N.B.—To prevent spurious imitations, please to observe that the words "KEATING'S COUGH LOZENGES," are engraven on the Government Stamp of each Box without which none are genuine.

HOLLOWAY'S OINTMENT AND PILLS.—These highly esteemed medicaments cannot be too strongly recommended for curing most of the maladies to which humanity is heir. They are as suitable for the child first entering on the journey of life, as for the aged and infirm. The Ointment is a specific for the cuts, bruises, abrasion, and eruptions often witnessed in a nursery, and it is no less efficient in healing up soundly and permanently the chronic ulcers and bad legs which so often heap misery on advanced years. By an early attention to the instruction wrapped round each packet of Ointment and Pills, any moderately intelligent person may abridge or avert the discomfort and misery of chronic ill health.

PORT OF AMOY.

SHIPOWNERS, AGENTS, and COMMANDERS are informed that the Dock Company's Establishments at the above Port afford every facility or REPAIRING and SPARRING VESSELS, and for CLEANING and PAINTING Iron and Steam Ships.

Their large Granite Dock, 286 feet long on the blocks, is in complete working order, and at average spring tides can take vessels drawing 16 to 17 feet water. The Dock is fitted with a Caisson Gate and with a Centrifugal Steam Pump of great power, ensuring despatch in all states of the tide. An ample stock is kept on hand of Timber, Oregon Spars, Sheathing Copper and Yellow Metal, and of every description of material for Dockyard use.

The premises comprise an Engineer's Workshop, Brass Foundry, a large Smithy and Carpenter's Workshops, and the works are superintended by Resident Europeans, viz., a Shipwright, an Engineer and a Blacksmith. Dry, Godowns for the reception of vessel tores, &c., when requiring to discharge them.

Amoy, March, 1865.

THE CREDIT FONCIER & MOBILIER OF ENGLAND (Limited).

The following Circular has been issued by the Credit Foncier and Mobilier of England (Limited):—

To the Shareholders of the Credit Foncier and Mobilier of England (Limited).

Referring to the Circular Letter of the 3rd inst., the Directors of the Credit Foncier and Mobilier of England (Limited) have much pleasure in reporting that the proposal for the RECONSTRUCTION of the COMPANY, with a view to the reduction of the liability of the Shareholders, has been most favourably received, as will be apparent when it is mentioned that out of a total of 4,546 Shareholders only 15 Shareholders have dissented from the proposals put forward, and even of these some have only expressed a qualified dissent.

I am further instructed to inform you that the Directors, at a meeting of the Court held this day, have unanimously passed the following Resolutions, to which your attention is requested:—

1st. That in accordance with the powers granted by Clause 83 of the Articles of Association, interest be paid to the Shareholders at the rate of Two Shillings and Sixpence per Share (free of income-tax), equal to 10 per cent. per annum, being interest from 1st April to 30th June, 1866, on the Company's investments; and that interest warrants for the same be sent to all Shareholders registered on the books of the Company on Monday, 9th July, 1866.

2nd. That in accordance with the powers granted by the Articles of Association in Clause 2 of Article 25, the sum of £400,000, or £2 per Share, be, and is hereby transferred to the capital account of the Company, in reduction of the amount of unpaid capital on the Shares of the Company, and that each Share do henceforth stand in the books of the Company as £7 paid up.

3rd. That in accordance with the powers granted by the Articles of Association, Article 6, a Call of £1 per Share be, and hereby made; the same to be payable at Messrs Smith, Payne, and Smith, Bankers, No. 1, Lombard-street E.C., on Saturday, 21st July, 1866.

4th. That an Extraordinary General Meeting be held on Monday, the 30th July, 1866, for the purpose of submitting to the Shareholders certain Resolutions, having reference to the Circular addressed to them, under date 3rd July, 1866; formal notice, naming place and hour of such meeting, to be duly sent to each Shareholder.

The Directors have further the satisfaction of reporting that, owing to the desire expressed by many of the Shareholders to pay up their Shares in full as soon as the reconstruction of the Company shall be carried out, the Directors are able to announce their confident belief that the Call of £1 per Share, announced as payable on 1st January, 1867, will not be required.

By order of the Court of Directors,
ALFRED LOWE, Secretary.

17 and 18, Cornhill, July 9, 1866.

Copies of the Circular, dated the 3rd July, and of the above, can be obtained on application at the Offices of the Company.

THE AGRA AND MASTERMAN'S BANK (Limited).

—Notice is hereby given, that the undersigned, Herbert Harris Cannan, the liquidator of this Bank, is prepared to ISSUE to all the creditors (other than persons holding Bills of Exchange or Promissory Notes or other securities) CERTIFICATES, in the form hereunder written, of the sums appearing on the books of the Bank to have been due to such creditors on the 7th day of June, 1866, when the said Bank stopped payment, subject to such claim or deduction as mentioned in the form of certificate. Creditors desirous of having such certificates are requested to apply, by letter, to the undersigned, stating such desire and the amount and particulars of their claims for examination.

H. H. CANNAN, 35, Nicholas-lane, London,
July 7, 1866.

N.B.—Creditors holding deposit receipts of the Bank, who are desirous of having certificates of indebtedness, will be required to give up such deposit receipts to be cancelled.

The AGRA and MASTERMAN'S BANK (Limited).

Certificate of Indebtedness for £——.

I hereby certify that it appears by the books of the Agra and Masterman's Bank (Limited) that the said Bank was indebted to——————at the time of its suspension, on the 7th day of June, 1866, in the sum of £————, subject to any claim or deduction which the said Bank may have or may be entitled to in respect of payment, mutual credit, or set off, or otherwise.

Dated this——day of——, 1866.

————————. Liquidator.

N.B.—Debts are only assignable in equity, and can only be recovered in the name of the creditor, and to make such assignments valid the assignee should give notice of them to the liquidator, who will register such notices on payment of a fee of 5s. each, and no one should advance money upon any debt without requiring the creditor to make a statutory declaration that the whole amount is due to him from the Bank, and is not liable to claim or deduction in respect of payment, mutual credit, set off, or otherwise.

Creditors who are shareholders in the Bank are not entitled to payment of their debts until the creditors who are not shareholders have been paid in full.

RADLEY'S HOTEL,
SOUTHAMPTON,

IMMEDIATELY OPPOSITE THE RAILWAY TERMINUS AND DOCKS

THIS FIRST-CLASS HOTEL, so well-known to most Travellers from the East and West Indies, China, the United States, Brazils, &c., is admirably situated for their convenience, Mr. RADLEY having, by careful organisation, made those arrangements that have tended so much to establish its reputation.

Mr. R. employs no touters or paid agents, but his Porters are always in attendance to meet passengers on arrival, with carriages, &c., as usual. Rooms may be engaged by letter from Malta.

SOLID MAHOGANY FURNITURE FOR INDIA, CHINA AND THE COLONIES.

HEAL and SON are Manufacturing, ESPECIALLY FOR use in EXTREME CLIMATES, BEDROOM FURNITURE, which is entirely Free from Veneer. A general Assortment always in Stock.

IRON AND BRASS BEDSTEADS

Suitable for all Parts of the World. Their Stock consists of 2,500 Bedsteads.

HEAL AND SON'S PATENT HORSEHAIR MATTRESS.

HEAL and SON have Patented an Improvement in the Manufacture of Mattresses, which prevents the material from felting into a mass, as is the case with all Mattresses made in the ordinary way. The Patent Mattresses are made of the very best Horsehair, are rather thicker than usual, and the prices are but a trifle higher than those of other good Mattresses.

HEAL AND SON'S ILLUSTRATED CATALOGUE

For INDIA, CHINA, and the COLONIES, of Bedsteads, Bedding, and Bedroom Furniture, SENT FREE TO EVERY PART OF THE WORLD to which there is Book Post.

HEAL and SON, Bedstead, Bedding, and Bedroom Furniture Manufacturers 196, 197, 198, Tottenham-court-road, London, W.

MESSRS. COLLARD & COLLARD

FIND it NECESSARY to CAUTION the Public against the EXTENSIVE FRAUDULENT USE of their NAMES in the COLONIES, and urge on Purchasers the necessity of Examining very Carefully the NAME-BOARD of any INSTRUMENT they may be Buying; but especially they recommend that in all cases Respectable DEALERS or PROFESSORS of MUSIC should be CONSULTED for GUIDANCE.

A Certificate of Authenticity accompanies every Instrument sent abroad by Messrs. COLLARD and COLLARD.

16, GROSVENOR-STREET, and 26, CHEAPSIDE, LONDON.

WALKER'S CRYSTAL CASE WATCHES.

PRIZE MEDAL, 1862.

JOHN WALKER,
CHRONOMETER, WATCH AND CLOCK MAKER

(BY APPOINTMENT), TO THE

English, Indian, Foreign, and Colonial Railways,

68, CORNHILL, AND 230, REGENT STREET, LONDON.

J. W. SOLICITS the attention of Military and Naval Officers and the Public of China to his CRYSTAL CASE WATCHES, as they are especially adapted for foreign use.

The CRYSTAL CASE WATCH is so constructed that it entirely obviates the necessity of a Hunting Case Watch, as it is much stronger and cannot so easily get out of repair. Description Pamphlets with List of Prices on application.

PRIZE MEDAL,
INTERNATIONAL EXHIBITION, 1862.
AWARDED TO
F. MORDAN,
FOR
IMPROVEMENT IN WRITING MATERIAL

F. MORDAN'S EVERLASTING GOLD PEN is now established in reputation as the most beautiful, useful, and truly economical Pen ever manufactured. Thirty years' experience has only increased the estimation in which it is held, and tested the value of the warranty given with it. F. MORDAN can now proudly point to a sale of upwards of 90,000.

F. MORDAN'S PATENT PNEUMATIC INKSTANDS, the most useful and simple ever offered to the public, perfectly protecting the ink from dust or evaporation.

F. MORDAN'S WRITING, COPYING, BLUE, BLUE BLACK, BLACK, COLOURED, and MARKING INKS, in bottles of new and useful designs, with patent spouts and stoppers. These bottles are rapidly superseding all others, there being no increase of price for these improvements.

F. MORDAN'S PERFUMED MAUVE INK for Ladies' writing.

F. MORDAN'S SCENTED SEALING WAX in fancy colours; also HARD INDIA WAX for warm climates.

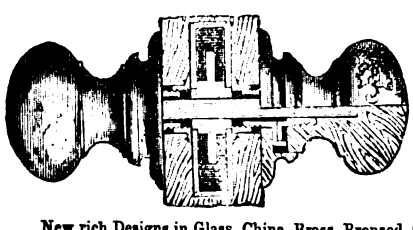
F. MORDAN'S LIQUID GLUE, for mending Glass, China, Wood, Metals, &c.

F. MORDAN'S PREPARED LIQUID GUM, for Office use, and general purposes.

Merchants and Shippers can obtain Illustrated Catalogues on application at the Manufactory,

ALBION WORKS, 326, CITY ROAD, LONDON.

THOMAS PUGH & CO.'S NEW PATENT ECONOMIC SELF-ADJUSTING MORTISE AND RIM LOCK FURNITURE.



J. B. SCAMMELL & CO.,
(Late THOMAS PUGH & Co.)
WHOLESALE IRONMONGERS,
13, KING-STREET, SNOW-HILL, LONDON.

We invite particular attention to the PATENT LOCK FURNITURE, which we do not hesitate to say is the most perfect article now manufactured, great improvements having been recently made in it. It has been extensively used in Public and Private Buildings, in Her Majesty's Pavilion and Camp at Aldershott—alone, many hundred sets without one single failure. It is applicable to all Locks and Latches, both Rim and Mortise, and effects a most secure fastenings without any screw in the neck of the knob.

New rich Designs in Glass, China, Brass, Bronzed, Gilt, Carved Woods, Inlaid, &c., &c., or to any Design.
THIS FURNITURE MAY BE HAD WITH PLATES OR NUTS.
A most complete and extensive stock of
SUPERIOR LOCKS, LATCHES, BRASS FOUNDRY, AND IRONMONGERY,
Required for Buildings, of the best quality manufactured, at the lowest wholesale prices.
☞ *Illustrations and Particulars sent on application.*

SCREWS, NAILS, PIPES, GUTTERS, AND BUILDERS' CASTINGS.

IMPORTANT ANNOUNCEMENT

JOSEPH GILLOTT,
Metallic Pen Maker to the Queen,

BEGS to inform the Commercial World Scholastic Institutions, and the Public generally that, by a novel application of his unrivalled Machinery for making Steel Pens, he has introduced a NEW SERIES of his useful productions, which, for EXCELLENCE OF TEMPER, QUALITY OF MATERIAL, and above all, CHEAPNESS IN PRICE, must ensure universal approbation. and defy competition.

Each Pen bears the impress of his name as a guarantee of quality; they are put up in boxes containing one gross each, with label outside, and the fac-simile of his signature.

At the request of numerous persons engaged in tuition J. G. has introduced his WARRANTED SCHOOL and PUBLIC PENS, which are especially adapted to their use, being of different degrees of flexibility, and with fine medium, and broad points, suitable for the various kinds of Writing taught in Schools.

Sold Retail by all Stationers and Booksellers. Merchants and Wholesale Dealers can be supplied at the Works, Graham-street, Birmingham; at 91, John-street New York; and 37, Gracechurch-street, London.

From Marseilles, Oct. 28.—To Shanghai: Mr. W. Watson. To Singapore: Mr. T. Scott.

Summary of News from the Far East.

JAPAN.

YOKOHAMA.

Our advices from this port extend to the 28th May. The English mail of 26th March had arrived out, and telegraphic news had been received up to 17th April.

Another great stride has been made towards the entire freedom of the people of Japan, the Government having publicly proclaimed that the restrictions which hitherto prevented the Japanese from visiting other countries are now entirely withdrawn.

The following is a translation of the edict:—

"Persons wishing to go in future to any of the various countries beyond the sea, for the purpose of learning any science or art, or for objects of trade, will receive permission from the Government on making application to this effect.

"The Government will, upon examination, grant a permit, with seal attached, to any such person. Let, therefore, the application be made out, giving the name of the petitioner, and stating clearly how he wishes to proceed, for what object, and to what country he intends to go. Retainers of Daimios and Hatamótos should make their application through their master. Peasants and citizens through the governor or rent collector of their place, or through the lord of the domain, to the proper department. In case any person should go abroad secretly without a passport, he shall be severely punished. Therefore let everybody understand and observe this regulation.

"The above decree having been issued, it is to be circulated and made known to everyone, even to the ordinary people, in order that such as wish to go may make their application.—May 23rd, 1866.

On Thursday, the 17th May, at 8 A.M., the first division of the 22nd Regiment embarked on board H.M.'s transport *Adventure*, and at noon the vessel steamed from the anchorage, bound for Hong Kong. The *Japan Herald* says:—The 22nd Regiment has now left the shores of Japan, and has taken its route for Hong Kong, in as fine condition of health and efficiency as did any regiment ever quit "Old England." The men who came up from Kowloon nearly two years ago pale, worn and half dessicated, have carried hence such an amount of health and vigour as would, we think, quickly decide the home authorities as to where they should keep their soldiers in this part of the world, could they but see them. In the interests of commerce, it is necessary that forces be retained in China and Japan; for the instant the rulers of either country saw them depart they would infallibly resume their obstructions, and all their pent-up animosities would burst into activity. But we do not

Digitized by Google

see any real necessity for keeping the bulk of the European troops at Hong Kong. Head-quarters, of course, must be there; first, as it is our own colony; and secondly, orders from home reach it days before they could reach Japan, and it has a centre to which all information and from which all orders would naturally radiate. But if a garrison mainly composed of Indian troops were kept there, almost the whole of the European soldiers might remain in Japan, to their great advantage and the saving of valuable men and consequently large sums of money to the country. It has been a great thing for the 2nd 22nd to be able to drill on almost every day of the year and to have barracks on a hill overhanging the sea. The men have had every possible advantage—a healthy locality, fine sea bathing, a beautiful country to recreate themselves in when off duty. The Commandant has been fortunate enough to see his men in the main exceedingly well conducted, and fraternising with the kind-hearted sociable people amongst whom they moved. He has kept them in such a state of discipline that, although it is true, both officers and men wished parades were less frequent, it was a great pleasure for practised eyes to see them go through their manœuvres on a field day; and he has been enabled to keep them in wind and feckle, by weekly marches, sham fights, &c., in a manner that would hardly be attempted even at home. On the whole, we doubt if there be any station in the world more favourable for troops, than Yokohama, and we have very strong hopes that the British Government will make it, not simply a sanitarium but the garrison for European troops in the China command. The colonel and officers of the 9th seem determined that we shall miss their predecessors as little as possible. Already the band has been promised for every Thursday afternoon. From the performances we have heard, we are disposed to think highly of the band. A question arises in our minds on seeing those who come down from the Bluff for our amusement exposed to the inconvenience of sun or rain, as the case may be, whether a band-stand might not be provided for them? A few hundred dollars would procure a very substantial one, and it might be so built as to be a very slight obstruction on the Bund. If it were raised so that pedestrians could walk beneath it, every advantage would be gained.

The Queen's birthday, unfortunately for the good intentions of the lieges resident in Yokohama, was one of the most boisterous days of the season. The early morning was gloomy enough, and the overcast sky gave promise of the rain that begun to fall about eight o'clock and continued until well on into the afternoon, whilst the wind gradually rose, until at midday it blew a perfect gale. The consequence was that the military parade on the Bund and the regatta were postponed. In the evening, however, all had cleared up, and a most brilliant moon shone resplendently in the cloudless and starlit sky. The guests, therefore, received by Lady Parkes "At home" were very numerous, and all were charmed with the excellent arrangements for their comfort and enjoyment. The whole of the diplomatic corps and the *elite* of Yokohama society were present. The grounds were illuminated, but, we believe, the bad weather of the earlier portion of the day interfered with some of the outdoor plans. Dancing was kept up until about one o'clock with great spirit to the irresistible music of the band of the 9th Regiment.

The regatta came off on the following day. The captain and officers of H.M.S. *Pelorus* very kindly invited most of the residents of Yokohama to a *déjeuner* on board, and to witness the regatta got up privately amongst themselves. The regatta itself had comparatively little interest for shoregoing people, as the racing was limited to so few boats, the majority of those being heavy ships' boats. The scene on board, however, was very animated and beautiful, and the hospitality of Captain Haswell and the officers such as merits the most hearty acknowledgments of all who shared it. The band of H.M.'s 9th Regiment was present, and after justice had been done to the collation, dancing commenced and continued until the day drew near its close.

In the diplomatic world, says the *Japan Herald*, there is nothing to report; and the only item of Japanese news is to the effect that it is generally understood that Choshiu has rejected the Tycoon's terms, and the arbitration of the sword seems alone to be expected. Satsuma, it is believed, sympathises with Choshiu, and openly declares that were the quarrel simply between the Tycoon and Choshiu, he would assist the latter—but the Tycoon acting only as the generalissimo of the Mikado, he will not oppose. Whether he will actively assist him is doubtful.

Municipal affairs are for the moment at a standstill. The first year has come to a close, and an election has taken place for members to serve in the Council for the coming twelve months. The changes in the component members are more numerous than might have anticipated, and do not, it is said, show that discrimination in the body of land-renters for which they were given credit. Some of the hardest working men are left out of the new Council; we can only hope good men have been found to replace them.

The revision of the Tariff is almost completed upon the basis proposed by the Chamber of Commerce, with very slight alterations. In other respects, the *Japan Times* remarks, the aspect of commercial affairs is unsatisfactory. "We have to note the continued depression of our markets for imports, and the almost total cessation of business in silk. The high value of the dollar and arrivals of large consignments of Manchester goods have driven down prices to a point at which it is impossible to sell without loss, and, even at such rates, buyers are not to be found among the natives. As for our chief export staple, the news from home being more gloomy than ever, the probability of a European crop of from 30 to 50 per cent. larger than last year's being reported from Italy—and it being certain that consumers in Europe are beginning to reduce their purchases of manufactured goods, in consequence of their enhanced price—these causes combine to make it unsafe to pay anything better than the equivalent of 30s. for best Mybash, a figure which no Japanese dealer will yet concede. Some Silk has been settled, however, but we look for six or eight weeks of comparative inaction, especially as the new crop is likely to be somewhat late."

Another disturbance between foreigners and natives had taken place which might have led to most serious results. A number of Japanese sailors belonging to the *Fusi-yama*, Japanese man-of-war, were ashore "on the burst" before putting to sea. At Yoshiwarra they were becoming somewhat noisy and uproarious, when a foreigner—we believe, a sergeant of police, quietly interfered to induce them to be less boisterous. They became indignant at being interfered with. He explained that he was a Yakonin, and it was his duty to see that the peace was not disturbed. They told him to mind his own (the foreign) settlement. They were in the Japanese town and had their own officers to answer to if they did wrong; and one, not unsheathing his sword, but drawing sword, sheath and all out of his waistband, said if the foreigner touched one of them he would knock him down. A number of soldiers came up at the moment and appeased the Japanese, and the affair fortunately ended quietly.

The *Challenger*, arrived from London on the 15th May, reports having had a very severe hurricane in lat. 18° S., lon. 172° E. Had to cut away mizen mast and fore and main top-gallant-masts, and sustained considerable other damage.

An infantry rifle corps has been organised, with every prospect of success, and on such a footing as will enable all classes of the community to take part in the movement. The mounted corps already established has, of course, absorbed all the more wealthy residents; the infantry corps will be, for the most part, composed of men whose means will not allow of a large expenditure, or of keeping a pony, a fact which would have prevented them from hitherto joining the mounted volunteers. The corps is formed, too, of very different stuff than usual. We have first on the list the officer who has raised it, who has for years been intimately connected with many metropolitan corps at home, and whose services to the volunteer force and Wimbledon Rifle Association have been gratefully acknowledged by Lords Elcho and Bury. Next comes the late Sergeant-major of the 20th Regiment, who, with two sergeants, a corporal, and twenty rank and file, all of whom have been but recently discharged from the 20th, compose the "old soldier" part of the corps. Our readers will agree with us in our remark that no volunteer rifles in the East have ever had such a foundation to build on. Then follow the names of twenty or thirty gentlemen, residents in this place, nearly all of whom have served in infantry corps in Great Britain, and consequently must need but little training to render them efficient. In fact, the preliminary parts of the exercise, which are so irksome and unpleasant, need only occupy a very small portion of time—merely enough, in fact, to bring up any who have in any particular forgotten it and the instructors may pass almost immediately to the more interesting and advanced stages. The first parade of the corps took place at the lot in rear of No. 1. The muster was excessively good, considering that it was their first appear-

Digitized by Google

ance, and the steadiness and attention of all gentlemen in the ranks must be very encouraging to the originators of the corps. After drilling for some time in the plot, the company was marched on to the bund and learnt several movements on the march. They then returned, and having taken up their rifles, marched with them to the armoury [where] they were dismissed.

The gale of the 24th May, which, as mentioned above, greatly interfered with the festivities held in honour of the Queen's birthday, was very violent, but does not appear to have caused any loss of life. A boat from one of the French men-of-war, the *Primauguet*, which attempted to make the shore, was driven over towards Kanagawa, about a mile-and-a-half out of her course. Two large boats from H.M.S. *Argus* were sent to its assistance, but the force of the gale increased and, in spite of all the efforts of the large crews which manned them, these boats found it impossible to return without assistance. They accordingly anchored; more help was despatched to them, and finally the curious spectacle was seen of the boats being drawn back to their ships by means of ropes more than a mile in length. In the evening, most fortunately, the weather changed —the storm passed and a dead calm succeeded to its fury.

NAGASAKI.

Our dates from this port are to the 7th June. There was no political or other news of importance. Nagasaki is rapidly getting up a name for being one of the most festive parts in the East. Almost every letter which we receive brings a description of some sports or festivities, got up on the slightest possible provocation, but with a heartiness and completeness which speak volumes for the bracing effect of the Nagasaki climate and the genial disposition of its residents. Such an occasion as the Queen's birthday could of course not be allowed to pass, although the absence of H.B.M. Consul was a disappointment, as a ball had been spoken of in connection with his name. Early in the morning the four Russian men-of-war in port, the *Askald*, *Variag*, *Isoumroud*, and *Sobol*, as well as H.M.'s ships *Scylla* and *Cormorant*, were gaily dressed with flags; and at noon a royal salute was fired from the *Askald*, *Variag*, and *Scylla*. In the evening H.M. Acting Consul entertained the Russian Admiral and the captains and officers of the Russian and English men-of-war, the foreign Consuls, and several of the residents to dinner, the band of H.I.R.M. ship *Variag* being in attendance. Immediately after dinner dancing was begun and kept up till a late hour. The Consulate buildings and the gardens were illuminated with a brilliance and good taste which did infinite credit to Mr. Lowder, who had undertaken the arrangements. Altogether the illumination was voted the best, and the festival one of the most joyous, that had taken place at Nagasaki.

CHINA.

TIEN-TSIN.

At Tien-tsin all is quiet, and nothing occurred to mar the success of the spring race meeting, which forms the only interesting item of news. The following is a summary:—

FIRST RACE.—Tzechulin Stakes, half a mile. Tls. 75. Mr. Martin's Blanc Mange, 1; Mr. Waverley's Flying Buck, 2. The race was between Flying Buck and Blanc Mange, and the judge decided it a dead heat. The deciding heat was run off after the day's races were over; both Blanc Mange and Flying Buck kept close together the whole way, Flying Buck having the inside place, but Blanc Mange passed him gradually on the winning post. Time, 1min. 5 sec.

SECOND RACE.—Town Plate. Once round. For ponies not otherwise entered. 1. Mr. Armstrong's Brick Tea; 2. Mr. Sempen's Knieput. Knieput took the lead down the hill but on coming in for the straight, Brick Tea came up and won easily, Knieput five lengths behind.

THIRD RACE.—Griffin's Plate. One mile. For ponies that have never run before in China. 1. The Cosmopolite's Quill Driver; 2. The Union's Black Diamond. Quill Driver won by 7 lengths; Black Diamond second.

FOURTH RACE.—The Tientsin Cup. Two miles and a half. 1. Mr. Martin's Blanc Mange; 2. Corduff's Anak.

FIFTH RACE.—The Peiho Stakes. Three quarters of a mile. 1, Flying Buck; 2, Chang; 3, Blitz. The race was won easily by Flying Buck, who came in 10 lengths ahead of Chang. Time, 1m. 42s.

SIXTH RACE.—Peking Cup. One mile and a half. 1, Black Diamond; 2, Spot's George; 3, Sir Michael. Black Diamond came to the front closely pressed by Sir Michael and by Spot's George who had come down the hill with a terrific rush, going through the other ponies as if they were standing still. He could not catch the Black, however, but came in a good second.

SEVENTH RACE.—Flyaway Stakes. Once over steeplechase course, Only Joke and Brute started, and the former had it all his own way. Both jumped beautifully.

SECOND DAY.

FIRST RACE.—Kiachta Cup. One mile. 1, Scrub; 2, Chang. The general opinion was that the race was Chang's, but after a severe struggle up the hill-house, Scrub came in a winner, Chang a length behind. Time 2.22.

SECOND RACE.—Roadster's Plate. Twice round. Winner of Town Plate 5lbs. extra. 1, Knieput; 2, Brick Tea.

THIRD RACE.—Challenge Cup.—Value 120 guineas. Two miles. To be won at two consecutive meetings by a pony or ponies, the property of the same owner. Eight started:—Blanc Mange, 1; Black Diamond, 2; Flying Buck, 3; and Spot's George, 4. They got away with a good start, and Quill Driver at once took the lead at a tremendous pace, followed at about eight lengths' distance by Flying Buck and Black Diamond, with the rest not far off. These positions were pretty closely maintained during the race, until, coming down the hill for the run in, Blanc Mange, who had been kept nearly last, rushed forward, and took the lead after entering the home stretch, hard pressed by Black Diamond. Spot's George took third place for a moment, but Flying Buck passed him again, and they passed the judge as numbered above. The race was a very good one, as there were no stragglers, all well up. Won by half a length. Immediately after the race, the Cup was presented to the owner of Blanc Mange. Time, four minutes fifty-one seconds.

FOURTH RACE.—Mongol Cup.—One mile and a quarter. This was reduced to a match between Sir Michael and Rushlight. The former won in a canter. No time.

FIFTH RACE.—Steeple Chase. This was no race. Blanc Mange went to the post to give Joke a start, the former was then quietly walked back. Joke went twice round the course taking all the jumps beautifully; but on the second time at the first jump, opposite the Stand, did not exert himself sufficiently and pitched on his head turning an exact sumersault, as did also his rider, who fell fortunately clear of the pony. The rider immediately mounted again, took Joke back and put him over the jump again successfully. He was much applauded on coming in.

SIXTH RACE.—Selling Race. Quarter mile. For all ponies. Gladiateur, 1; Brick Tea, 2.

THIRD DAY.

FIRST RACE.—Ceylon Planter's Cup. Value tls. 100, presented. One mile and a-half. 1, Spot's George; 2, Black Diamond. This was a very interesting race. The owners of Black Diamond felt very confident of winning, and Flying Buck had also a good many supporters. After a most exciting struggle, Spot's came in a winner by two lengths, running strong; Black Diamond 2nd; Sir Michael and Flying Buck raced for 3rd, which the Buck took. Time 3m. 36s.

SECOND RACE.—Tai Yuen Stakes. Three miles. This race did not attract much interest, as the only starters were Blanc Mange and Donner. Blanc Mange took the lead and maintained it easily.

THIRD RACE.—Trial Stakes. One mile. 1, Black Diamond; 2, Quill Driver; 3, Flying Buck. There were six competitors for this race. Quill Driver was the favourite. Time 2m. 19s.

FOURTH RACE.—Consolation. One mile. For all losers at this meeting. Six of the vanquished put in an appearance. 1, Chang; 2, Blitz; 3, Cockeye.

A Mafu's race was then organised, and thirteen ponies started; it was won by Mr. Harma's man upon Sir Michael.

Two or three Donkey races, which caused much amusement, concluded the sports; and thus ended a most successful meeting.

CHEFOO.

From this port we have no news of importance, either political or commercial. The spring race meeting came off on the 11th and 12th of May, and the following is a *resume* of the proceedings:—

FIRST DAY.

1.—The Trial Stakes. Value, $75. Half a mile, for Griffins. Entrance, $5. 1, Mr. Gannett's Outsider; 2, Mr. Hogarth's Hard Lines. This race was taken easily by Outsider, who won hard held, Hard Lines having unfortunately gone lame at starting. Useless, a pony much thought of by his friends, was entered, but began bucking as soon as his rider mounted, and, instead of going up to the starting point, galloped wildly off across the racecourse and disappeared amongst the crowd. When again seen, his jockey had left him in the usual abrupt manner in which bucking ponies and weak riders part.

2.—Merchant Shipping Stakes. Value $125. One mile and a quarter. Entrance, $5. 1, Mr. Wilson's Tam O'Shanter; 2, Gannett's Outsider. Jeames, Snowdrop and Souther Johnny ran but were not placed.

3.—Spring Cup. Value $100. Three-quarters of a mile. Entrance $5. Mr. Wilson's Souter Johnny, 1; Mr. Hope's Substitute, 2. Schuerin and Jewess also ran. Useless could not be mounted, so the ponies started without him.

4.—Yentai Vase. Value $125. One mile and a half. Entrance $5. Mr. Wilson's Tam O'Shanter, 1; Mr. Gannett's Outsider, 2. This was a well-contested race, but the victorious Tam could not be withstood.

SECOND DAY.

1.—Challenge Cup. Value £70. Two miles. Entrance $5. Mr. Wilson's Tam O'Shanter, 1. Before starting, Useless, who was ridden this time by an experienced China Ma-fu, took it into his head to start off at full speed across country. His rider, with much skill and nerve, just steered clear of the Grand Stand and the crowd, and then resigned himself with patience to a mile gallop. Tam O'Shanter is a Tien-tsin pony, and last ran at that port under the name of Nervous.

2.—Consolation. For all losers, $50. Half a mile. Entrance $5. 1, Mr. Cornabe's Schuerin. 2, Mr. Smith's Useless. A very hard fight for first place between Substitute and Schuerin; Substitute came in first by half a length, but a foul was claimed, and the stewards awarded the race to Schuerin.

3.—Criterion.—For all winners, $100. Once round. Entrance $10. 1, Mr. Wilson's Tam O'Shanter. 2, Mr. Gannett's Outsider. At starting, Souter Johnny got off badly, and lost a good deal of ground, the other two going away comfortably together, Tam winning with the greatest ease by five or six lengths.

4.—All comers. A handicap. Value $75. Once round. Entrance

Digitized by Google

$3. 1, Mr. Hogarth's Hard Times. 2. Wilson's Souter Johnny. Won by 50 lengths, Hard Times having a very light weight up.

5.—Celestial Stakes. For China Mafus. Winner to receive $15, the second $5. Once round. 1, Jeames; 2, Bayswater. The rider of Bayswater soon ran up against a post and fell off, so Jeames jogged merrily along by himself and won without any hurry. The mirth of the meeting was much increased by the appearance of a trap, an imitation, apparently, of a London postman's mail cart. It had three ponies, tandem fashion; the driver appearing in the correct Derby-going costume, to-wit, a white hat with veil and spectacles. The other two ponies had postilions, one of whom blew vigorously at a horn. The trap was duly paraded up the straight past the Grand Stand and winning post, to the great delight of everybody in general and the Chinese in particular, who evidently thought it a great institution.

NEWCHWANG.

Under the date of 4th May, a correspondent gives the following particulars of the late disturbances at Newchwang:—

"On the 25th ult. I noticed an armed body of Europeans, to the number of 50 odd, consisting principally of Swedes, Hollanders, and a few Manilamen, the latter each having a chopper, and carrying between them ropes and ladders for scaling purposes, collected from the several vessels in port for which Mr. Knight acts as Consul. These were headed by Mr. Knight, and accompanied by Mr. Commissioner of Customs A. Macpherson. On arriving at the place where they had been fired at previously, the order was given to level it to the ground, and after a few hours' work this was effected. One poor fellow, an Englishman, whilst in the act of demolishing a door with the butt of his musket, exploded his piece the ball passing through both his thighs, and smashing the bone of one leg. His leg will have to be amputated. After demolishing the house, the company, commanded by Mr. Knight marched back to the settlement, and for a few days we thought all was settled, when in came, on the 28th ult., news that the robbers I before mentioned had captured the district city of Newchwang, distant from us about 30 miles English.

The Chinese merchants, on hearing this, immediately formed a defence committee, who quickly collected all the coolies, thieves, boatmen, loafers, &c., that could be found in and around the settlement, to the number of 3,000 odd. The authorities, not having any guns or muskets, except a few rusty useless old three-pounders, decided to arm some of these 3,000 with a bamboo, about 20 feet long, into the end of which was inserted a bran new three-inch nail.

About midnight of the 30th ult. we were all roused out of our beds by cries and yelling that the robbers had come, and were attacking the Chinese part of the town. It being pitch dark, and no one seeming to know what the noise all meant, the females were carried on board one of the pilot boats that happened to be up the river that night, and remained on board till the following morning, when things being tolerably quiet, and there not being any apparent immediate danger of attack from the robbers, they returned to their homes.

The same day the British Consul called a meeting to ascertain, in the event of the robbers attacking the settlement, whom he could rely on to defend the Consulate, when it turned out that only seven persons appeared willing to take their chance with him (the Consul) at the Consulate; and as he said it would be useless to attempt to fight with so small a muster of Europeans, the meeting was dissolved, everyone being at liberty to shift for himself.

SHANGHAI.
